■ Category: DEFENCE GK

Q1. Which specific tactical airlift operation was executed by the Indian Air Force during the initial phase of the 1947-48 Jammu and Kashmir Operations to secure Srinagar airfield?

- Operation Pawan
- Operation Bison
- **Operation Leh [CORRECT]**
- Operation Dakshina

Explanation: Operation Leh (along with the crucial airlift spearheaded by Air Commodore Mehar Singh) involved landing troops at Srinagar airfield to halt the tribal militia invasion.

Q2. Who was the General Officer Commanding-in-Chief (GOC-in-C) of the Indian Army's Eastern Command during the 1962 Sino-Indian War?

- Lt Gen P.N. Thapar
- Lt Gen B.M. Kaul
- **Lt Gen L.P. Sen [CORRECT]**
- Lt Gen S.H.F.J. Manekshaw

Explanation: Lt Gen L.P. Sen served as the Army Commander of the Eastern Command, which was responsible for operations in the NEFA sector during the 1962 conflict.

Q3. During the 1965 Indo-Pak War, the largest tank battle since World War II took place at which location?

- **Asal Uttar [CORRECT]**
- Haji Pir
- Dograi
- Chawinda

Explanation: The Battle of Asal Uttar (September 1965) in the Khem Karan sector saw massive armored engagements where the Indian Army destroyed Pakistani Patton tanks.

Q4. What was the operational codename for the Indian Navy's offensive strike against Karachi Harbor during the 1971 War?

- Operation Cactus Lily
- **Operation Trident [CORRECT]**
- Operation Python
- Operation Vijay

Explanation: Operation Trident, executed on the night of December 4-5, 1971, utilized Osa-class missile boats to devastate Karachi harbor installations.

Q5. During the Kargil War (1999), what was the designation of the multi-role fighter aircraft used extensively by the IAF to drop laser-guided bombs in high-altitude terrain?

- MiG-21 Bison
- **Mirage 2000 [CORRECT]**
- Su-30MKI

- Jaguar

Explanation: The IAF's Mirage 2000 fleet played a decisive role in the Kargil War by successfully executing precision laser-guided bomb attacks on Pakistani supply camps and bunkers at high altitudes.

Q6. In the context of the 1971 Indo-Pak War, which operation marked the first amphibious landing by the Indian Navy and Army in East Pakistan?

- Operation Cactus
- **Operation Jackpot [CORRECT]**
- Operation Hot Pursuit
- Operation Falcon

Explanation: Operation Jackpot was the umbrella code name for the Mukti Bahini's operations and associated Indian amphibious/riverine thrusts in East Pakistan.

Q7. Which strategic mountain pass was captured by the Indian Army in August 1965, serving as a vital strategic gain in the Haji Pir region?

- Zoji La
- **Haji Pir Pass [CORRECT]**
- Bara Lacha La
- Shipki La

Explanation: Capturing the Haji Pir Pass during Operation Bakshi in August 1965 cut off vital infiltration routes used by Pakistani infiltrators into the Poonch and Uri sectors.

Q8. Who was the Chief of Army Staff of the Indian Army during the 1971 Indo-Pak War?

- General P.N. Thapar
- General J.N. Chaudhuri
- **General Sam Manekshaw [CORRECT]**
- General K.S. Thimayya

Explanation: General Sam Manekshaw (later Field Marshal) commanded the Indian Army with distinction during the 1971 war, leading to the creation of Bangladesh.

Q9. What was the primary objective of 'Operation Bison' executed during the 1948 Indo-Pak War?

- **Capture of Zoji La pass using tanks [CORRECT]**
- Air-dropping supplies in Poonch
- Securing the Gilgit Agency
- Naval blockade of Gwadar

Explanation: Operation Bison involved dismantling M5 Stuart light tanks and driving them across the high-altitude Zoji La pass (approx 11,578 ft) to surprise enemy forces in November 1948.

Q10. During the 1962 Sino-Indian War, the heroic stand of the 12 Kumaon regiment under Major Shaitan Singh took place at which critical battleground?

- Namka Chu
- Walong
- **Rezang La [CORRECT]**
- Bomdila

Explanation: The Battle of Rezang La fought on November 18, 1962, is legendary for the last-stand defense by Charlie Company of 12 Kumaon against overwhelming Chinese forces.

Q11. Which strategic operation was launched by the Indian Army and Air Force in May-July 1999 to evict regular Pakistani intruders from the Kargil heights?

- Operation Meghdoot
- **Operation Vijay [CORRECT]**
- Operation Rakshak
- Operation Parakram

Explanation: Operation Vijay was the official codename for the Indian military operation to clear the Kargil sector of Pakistani military intruders in 1999.

Q12. In the 1965 War, which Indian division bore the brunt of the Pakistani counter-offensive at Asal Uttar and successfully turned the tide?

- 1st Armoured Division
- **4 Mountain Division [CORRECT]**
- 11 Infantry Division
- 2 Infantry Division

Explanation: The 4 Mountain Division, alongside elements of the 2nd Armoured Brigade, held and destroyed the Pakistani armored thrust at Asal Uttar.

Q13. What was the codename of the naval follow-up strike on Karachi carried out on the night of December 8-9, 1971, which further damaged fuel tanks and shipping?

- Operation Trident
- **Operation Python [CORRECT]**
- Operation Falcon
- Operation Triumph

Explanation: Operation Python was executed a few days after Operation Trident to maintain pressure and inflict further damage on Karachi's oil and military infrastructure.

Q14. Which Indian Air Force fighter aircraft was shot down by a Pakistani F-86 Sabre over Kalaikunda or intercepted during the 1965 war, but notable for the gallantry of Sqn Ldr Trevor Keelor?

- **Gnat [CORRECT]**
- Hunter
- Mystère
- Vampire

Explanation: Sqn Ldr Trevor Keelor flew the Folland Gnat and shot down a Pakistani Sabre in the 1965 war, earning the aircraft the moniker 'Sabre Slayer'.

Q15. The Instrument of Surrender of Pakistani forces in East Pakistan in 1971 was signed by Lieutenant General A.A.K. Niazi and which Indian Army commander?

- **Lt Gen J.S. Aurora [CORRECT]**
- Lt Gen Sagat Singh
- Lt Gen K.T. Parnaik
- Lt Gen J.F.R. Jacob

Explanation: Lt Gen Jagjit Singh Aurora, GOC-in-C Eastern Command, accepted the unconditional surrender of Pakistani forces in Dhaka on December 16, 1971.

Q16. During the 1999 Kargil War, the capture of Tiger Hill was spearheaded by which prominent Indian infantry unit?

- **18th Battalion, The Grenadiers [CORRECT]**
- 2nd Battalion, Rajputana Rifles

- 1st Battalion, 11 Gorkha Rifles
- 13th Battalion, Jammu and Kashmir Rifles

Explanation: 18 Grenadiers, along with support elements (including 8 Sikh), played a legendary role in capturing the formidable Tiger Hill feature.

Q17. Which operation launched in 1984 preemptively secured the Siachen Glacier, the highest battlefield on Earth?

- Operation Meghdoot [CORRECT]
- Operation Pawan
- Operation Rakshak
- Operation Vijay

Explanation: Operation Meghdoot was launched on April 13, 1984, to secure control of the Siachen Glacier in the Salto Ridge range.

Q18. In the 1971 Indo-Pak War, the Indian Navy's aircraft carrier INS Vikrant operated aircraft from which operational area?

- Arabian Sea
- Bay of Bengal [CORRECT]
- Indian Ocean Central
- Andaman Sea

Explanation: INS Vikrant, operating in the Eastern naval theater, deployed its Sea Hawk and Alize aircraft to pound enemy positions and blockade East Pakistan's ports.

Q19. Who was India's Defense Minister during the 1962 Sino-Indian War?

- Y.B. Chavan
- V.K. Krishna Menon [CORRECT]
- Sardar Baldev Singh
- Jagjivan Ram

Explanation: V.K. Krishna Menon served as the Minister of Defence during the 1962 war and subsequently resigned in the aftermath of the military setback.

Q20. Which battalion of the Jammu and Kashmir Rifles became famous for capturing Tololing during the Kargil War under the leadership of then Lt Col Y.K. Joshi?

- 12 JAK RIF
- 13 JAK RIF [CORRECT]
- 8 JAK RIF
- 6 JAK RIF

Explanation: 13th Battalion, Jammu and Kashmir Rifles (13 JAK RIF), commanded by Lt Col Y.K. Joshi, played a monumental role in capturing Tololing and Point 4875.

Q21. Who was the first recipient of the Param Vir Chakra, India's highest wartime gallantry medal?

- Major Somnath Sharma [CORRECT]
- Company Quartermaster Havildar Piru Singh
- Naik Jadunath Singh
- Lance Naik Rama Raghoba Rane

Explanation: Major Somnath Sharma of the Kumaon Regiment was posthumously awarded the first Param Vir Chakra for his exemplary valor during the Battle of Badgam in the 1947 Indo-Pak War.

Q22. Which Param Vir Chakra recipient single-handedly held off a massive Pakistani tribal assault at Rezang La in 1962, leading Charlie Company of the 13 Kumaon?

- Major Shaitan Singh [CORRECT]
- Subedar Joginder Singh
- Havildar Major Piru Singh
- Captain Vikram Batra

Explanation: Major Shaitan Singh was posthumously awarded the Param Vir Chakra for his supreme leadership and courage during the Battle of Rezang La, where his company fought to the last man.

Q23. During the 1971 Indo-Pak War, who earned the Param Vir Chakra for his legendary defense of the Shakargarh sector at the Battle of Basantar?

- Second Lieutenant Arun Khetarpal [CORRECT]
- Flying Officer Nirmal Jit Singh Sekhon
- Major Hoshiar Singh
- Naib Subedar Bana Singh

Explanation: Second Lt Arun Khetarpal of the 18th Poona Horse displayed extreme bravery, destroying enemy tanks before making the ultimate sacrifice at the age of 21, earning a posthumous PVC.

Q24. Who is the only Indian Air Force officer to be awarded the Param Vir Chakra?

- Wing Commander Abhinandan Varthaman
- Flying Officer Nirmal Jit Singh Sekhon [CORRECT]
- Squadron Leader Ajay Ahuja
- Air Marshal Arjan Singh

Explanation: Flying Officer Nirmal Jit Singh Sekhon was posthumously awarded the Param Vir Chakra for his lone defense of the Srinagar airfield against multiple Pakistani Sabre jets in December 1971.

Q25. Which Param Vir Chakra recipient famously used the catchphrase 'Yeh Dil Maange More!' during the Kargil War?

- Captain Manoj Kumar Pandey
- Grenadier Yogendra Singh Yadav
- Rifleman Sanjay Kumar
- Captain Vikram Batra [CORRECT]

Explanation: Captain Vikram Batra of the 13th JAK RIF was awarded the Param Vir Chakra posthumously for capturing peak 4875 during the 1999 Kargil War, famously using the radio code 'Yeh Dil Maange More'.

Q26. Naib Subedar Bana Singh was awarded the Param Vir Chakra for capturing a heavily fortified Pakistani post at an altitude of 21,000 feet during which operation?

- Operation Pawan
- Operation Meghdoot [CORRECT]
- Operation Vijay
- Operation Blue Star

Explanation: Naib Subedar Bana Singh led a daring daylight assault in the Siachen Glacier area during Operation Meghdoot in 1987, capturing the strategic 'Quaid Post' (renamed Bana Post).

Q27. Who was the first living recipient of the Param Vir Chakra, awarded for his incredible bravery during the 1948 Hyderabad Operations?

- Naik Jadunath Singh
- Major Somnath Sharma

- Captain Gurbachan Singh Salaria
- Major Karam Singh [CORRECT]

Explanation: Major Karam Singh of the Sikh Regiment was awarded the PVC for his exceptional valor at Tithwal in 1948. He was one of the first recipients and the first to receive it while alive.

Q28. Which Maha Vir Chakra recipient commanded the 4th Grenadiers and played a crucial role in capturing the strategic Raja Pir pass during the 1965 Indo-Pak War, later becoming Chief of Army Staff?

- General B.C. Joshi
- General S.H.F.J. Manekshaw
- General Arun S. Vaidya [CORRECT]
- General K. Sundarji

Explanation: Then Lieutenant Colonel Arun Shridhar Vaidya was awarded the Maha Vir Chakra (and later a Bar to MVC in 1971) for his exceptional leadership and bravery in armored operations.

Q29. Who was the first woman and the youngest civilian to be awarded the Ashok Chakra, India's highest peacetime gallantry award?

- Neerja Bhanot [CORRECT]
- Bachendri Pal
- Kalpana Chawla
- Mitali Madhumita

Explanation: Neerja Bhanot, a senior flight purser, was posthumously awarded the Ashok Chakra for sacrificing her life while saving passengers from terrorists aboard hijacked Pan Am Flight 73 in 1986.

Q30. Which soldier received the Param Vir Chakra for single-handedly neutralizing enemy bunkers despite severe injuries during the capture of Point 5140 in the Kargil War?

- Grenadier Yogendra Singh Yadav
- Rifleman Sanjay Kumar [CORRECT]
- Captain Manoj Kumar Pandey
- Major Rajesh Adhikari

Explanation: Rifleman Sanjay Kumar of the 13th JAK RIF displayed extraordinary courage, crawling up a ledge and killing enemy soldiers in hand-to-hand combat during the capture of Flat Top area of Point 4875.

Q31. Company Quartermaster Havildar Piru Singh earned a posthumous Param Vir Chakra during the 1948 Kashmir operations while fighting at which location?

- Tithwal
- Darishah [CORRECT]
- Jhangar
- Naushera

Explanation: CQMH Piru Singh was fatally wounded after single-handedly clearing an enemy bunker at Darishah ridge in the Tithwal sector during the 1948 operations, earning the PVC.

Q32. Major Shaitan Singh belonged to which distinguished arm of the Indian Army before his heroic stand at Rezang La?

- The Parachute Regiment
- The Kumaon Regiment [CORRECT]
- The Brigade of the Guards
- The Sikh Light Infantry

Explanation: Major Shaitan Singh was an officer in the 13th Battalion of the Kumaon Regiment, celebrated for the legendary last stand at Rezang La at 17,000 feet.

Q33. Who was awarded the Ashok Chakra for his supreme sacrifice during the 2008 Mumbai terrorist attacks while serving as an NSG commando?

- Major Sandeep Unnikrishnan [CORRECT]
- Havildar Gajender Singh
- Assistant Sub-Inspector Tukaram Omble
- Colonel Santosh Mahadik

Explanation: Major Sandeep Unnikrishnan of the 51 Special Action Group (NSG) was posthumously awarded the Ashok Chakra for engaging terrorists and rescuing hostages at the Taj Mahal Palace Hotel during Operation Black Tornado.

Q34. Which Indian Navy officer was awarded the Maha Vir Chakra for planning and executing Operation Trident, the devastating missile boat attack on Karachi harbour in 1971?

- Admiral S.M. Nanda
- Captain Babru Bhan Yadav [CORRECT]
- Vice Admiral Nilakanta Krishnan
- Commodore Kasargod Patnashetti Gopal Rao

Explanation: Commander (later Captain) Babru Bhan Yadav led the task group of Osa missile boats during Operation Trident on December 4, 1971, earning the Maha Vir Chakra.

Q35. What is the highest peacetime gallantry award in India, equivalent in status to the wartime Param Vir Chakra?

- Kirti Chakra
- Shaurya Chakra
- Ashok Chakra [CORRECT]
- Sarvottam Yudh Seva Medal

Explanation: The Ashok Chakra is India's highest military decoration awarded for valor, courageous action or self-sacrifice away from the battlefield (peacetime equivalent of the PVC).

Q36. Who was the first recipient of the Ashok Chakra (Class I), initially instituted as the 'Ashoka Chakra, Class I' in 1952?

- Bachittar Singh
- Sujan Singh
- Nar Bahadur Thapa
- All of the above [CORRECT]

Explanation: The Ashok Chakra Class I was first awarded concurrently to multiple individuals in 1952, including Havildar Bachittar Singh, Naik Nar Bahadur Thapa, and Flight Lieutenant Sujan Singh, among others.

Q37. Captain Gurbachan Singh Salaria received a posthumous Param Vir Chakra for his exceptional bravery in 1961 while serving with the UN peacekeeping mission in which country?

- Congo [CORRECT]
- Cyprus
- Rwanda
- Somalia

Explanation: Captain Gurbachan Singh Salaria of the 1 Gorkha Rifles is the only UN peacekeeping force member to be awarded the Param Vir Chakra, for his actions in Katanga, Congo, in 1961.

Q38. Which Maha Vir Chakra recipient is legendary for destroying multiple Pakistani Patton tanks during the Battle of Asal Uttar in 1965 using his Recoilless Rifle?

- **Company Quartermaster Havildar Abdul Hamid [CORRECT]**
- Lieutenant Colonel A.B. Tarapore
- Major General Rajinder Singh Sparrow
- Brigadier Mohammad Usman

Explanation: CQMH Abdul Hamid was posthumously awarded the Param Vir Chakra (not Maha Vir Chakra) for destroying several Patton tanks with a 106mm recoilless gun mounted on a jeep during the Battle of Asal Uttar.

Q39. Who was awarded the Ashok Chakra for neutralizing terrorists inside the Nariman House (Chabad House) during the 2008 Mumbai attacks?

- **Havildar Gajender Singh [CORRECT]**
- Major Sandeep Unnikrishnan
- Subedar Major Suresh Chand
- Mohan Chand Sharma

Explanation: Havildar Gajender Singh of the NSG was posthumously awarded the Ashok Chakra for leading the rooftop assault into Nariman House to rescue hostages during Operation Black Tornado.

Q40. How many total Param Vir Chakra awards have been presented by the President of India as of current records?

- 15
- **21 [CORRECT]**
- 25
- 30

Explanation: A total of 21 Param Vir Chakra medals have been awarded, out of which 14 were awarded posthumously, honoring India's bravest soldiers.

Q41. Which of the following Indian Navy ranks is strictly equivalent in the official warrant of precedence to a Lieutenant General in the Indian Army?

- Commodore
- Rear Admiral
- **Vice Admiral [CORRECT]**
- Admiral

Explanation: A Vice Admiral in the Indian Navy is equivalent to a Lieutenant General in the Army and a Air Marshal in the Air Force.

Q42. What is the direct Air Force equivalent for an Indian Army Major?

- Flight Lieutenant
- **Squadron Leader [CORRECT]**
- Wing Commander
- Group Captain

Explanation: A Major in the Indian Army is equivalent to a Squadron Leader in the Indian Air Force and a Lieutenant Commander in the Indian Navy.

Q43. The rank of Subedar Major in the Indian Army corresponds to which Junior Commissioned Officer (JCO) equivalent rank in the Indian Air Force?

- **Master Warrant Officer [CORRECT]**
- Warrant Officer
- Junior Warrant Officer
- Master Chief Petty Officer First Class

Explanation: Subedar Major is the highest JCO rank in the Army, equating to Master Warrant Officer (MWO) in the Air Force and Master Chief Petty Officer First Class (MCPO I) in the Navy.

Q44. In the tri-service equivalency, a Brigadier in the Indian Army holds the same pay level and relative rank as which naval officer rank?

- Captain
- **Commodore [CORRECT]**
- Rear Admiral
- Commander

Explanation: A Brigadier in the Army is equivalent to a Commodore in the Navy and an Air Commodore in the Air Force.

Q45. Which commissioned officer rank in the Indian Navy is equivalent to a Colonel in the Indian Army?

- Commander
- **Captain [CORRECT]**
- Commodore
- Rear Admiral

Explanation: A Captain in the Indian Navy is equivalent to a Colonel in the Indian Army and a Group Captain in the Indian Air Force.

Q46. What is the equivalent rank to a Flying Officer (Indian Air Force) in the Indian Army?

- Captain
- **Lieutenant [CORRECT]**
- Major
- Colonel

Explanation: Flying Officer is the initial commissioned rank in the IAF, corresponding to a Sub Lieutenant in the Navy and a Lieutenant in the Army.

Q47. Which non-commissioned or Junior Commissioned rank is the direct equivalent of a Naib Subedar in the Indian Army?

- **Junior Warrant Officer [CORRECT]**
- Warrant Officer
- Master Warrant Officer
- Sergeant

Explanation: Naib Subedar is the entry-level JCO rank in the Indian Army, equivalent to a Junior Warrant Officer (JWO) in the Air Force and Chief Petty Officer (CPO) in the Navy.

Q48. The five-star rank of Marshal of the Indian Air Force is equivalent to which historical/honorary rank held by Sam Manekshaw and K.M. Cariappa?

- General
- **Field Marshal [CORRECT]**
- General of the Army
- Admiral of the Fleet

Explanation: Field Marshal is the Army's five-star rank, equivalent to Marshal of the Air Force and Admiral of the Fleet.

Q49. Which rank sits directly above a Lieutenant Commander in the Indian Navy and equates to a Lt Colonel in the Army?

- **Commander [CORRECT]**
- Captain
- Commodore
- Lieutenant

Explanation: A Commander in the Indian Navy is equivalent to a Lieutenant Colonel in the Army and a Wing Commander in the Air Force.

Q50. What is the Air Force equivalent of the Indian Army's 'Subedar' rank?

- Junior Warrant Officer
- **Warrant Officer [CORRECT]**
- Master Warrant Officer
- Leading Aircraftman

Explanation: A Subedar in the Indian Army is equivalent to a Warrant Officer (WO) in the Indian Air Force and a Master Chief Petty Officer Second Class (MCPO II) in the Navy.

Q51. In the Indian Army, what is the immediate superior rank to a Captain?

- Lieutenant
- **Major [CORRECT]**
- Colonel
- Brigadier

Explanation: The progression of junior officer ranks in the Army is Lieutenant -> Captain -> Major.

Q52. Which Indian Navy rank shares exact equivalency with a Major General of the Indian Army?

- Commodore
- **Rear Admiral [CORRECT]**
- Vice Admiral
- Admiral

Explanation: A Rear Admiral in the Navy is equivalent to a Major General in the Army and an Air Vice Marshal in the Air Force.

Q53. What is the equivalent rank of an Air Vice Marshal (Indian Air Force) in the Indian Army?

- Brigadier
- **Major General [CORRECT]**
- Lieutenant General
- General

Explanation: An Air Vice Marshal is a two-star air force rank equivalent to a Major General in the Army and a Rear Admiral in the Navy.

Q54. Which of the following is the highest attainable regular (four-star) rank in the Indian Navy?

- Vice Admiral
- **Admiral [CORRECT]**
- Admiral of the Fleet
- Commodore

Explanation: Admiral is the four-star rank equivalent to Army Chief (General) and Air Force Chief (Air Chief Marshal).

Q55. Which Indian Army rank is equivalent to a Group Captain in the Indian Air Force?

- Lieutenant Colonel
- **Colonel [CORRECT]**
- Brigadier
- Major

Explanation: A Group Captain in the IAF is equivalent to a Colonel in the Indian Army and a Captain in the Indian Navy.

Q56. What is the naval equivalent of the Indian Air Force rank 'Wing Commander'?

- Lieutenant Commander
- **Commander [CORRECT]**
- Captain
- Commodore

Explanation: A Wing Commander in the Air Force is equivalent to a Commander in the Navy and a Lieutenant Colonel in the Army.

Q57. Which of the following ranks is the lowest commissioned officer rank across all three branches of the Indian Armed Forces?

- **Lieutenant / Sub Lieutenant / Flying Officer [CORRECT]**
- Captain / Lieutenant / Flight Lieutenant
- Major / Lieutenant Commander / Squadron Leader
- Colonel / Captain / Group Captain

Explanation: Lieutenant (Army), Sub Lieutenant (Navy), and Flying Officer (Air Force) are the entry-level commissioned officer ranks.

Q58. An Air Commodore in the Indian Air Force is equivalent to which rank in the Indian Army?

- Colonel
- **Brigadier [CORRECT]**
- Major General
- Lieutenant General

Explanation: An Air Commodore is a one-star rank equivalent to a Brigadier in the Army and a Commodore in the Navy.

Q59. What is the Indian Navy rank equivalent to an Air Chief Marshal?

- Vice Admiral
- **Admiral [CORRECT]**
- Admiral of the Fleet
- Commodore

Explanation: Air Chief Marshal (IAF), General (Army), and Admiral (Navy) are all four-star service chiefs' ranks, perfectly equivalent.

Q60. In the Indian Army, which rank sits directly between a Lieutenant and a Major?

- Second Lieutenant
- **Captain [CORRECT]**
- Lt Colonel
- Colonel

Explanation: Captain is the rank held between Lieutenant and Major in the Indian Army's officer hierarchy.

Q61. Who was appointed as India's first Chief of Defence Staff (CDS) in January 2020?

- General Manoj Mukund Naravane
- **General Bipin Rawat [CORRECT]**
- Admiral Karambir Singh
- Air Chief Marshal R.K.S. Bhadauria

Explanation: General Bipin Rawat took charge as India's first Chief of Defence Staff on January 1, 2020.

Q62. Who assumed office as India's second Chief of Defence Staff (CDS)?

- General Manoj Pande
- **General Anil Chauhan [CORRECT]**
- General Upendra Dwivedi
- Air Chief Marshal V.R. Chaudhari

Explanation: Lieutenant General Anil Chauhan (Retd) assumed office as the second Chief of Defence Staff of India in September 2022.

Q63. Who is the current Chief of the Army Staff (COAS) of India as of mid-2024?

- General Manoj Pande
- **General Upendra Dwivedi [CORRECT]**
- General Bipin Rawat
- General Manoj Mukund Naravane

Explanation: General Upendra Dwivedi assumed charge as the 30th Chief of the Army Staff in June 2024.

Q64. Who is the current Chief of the Naval Staff (CNS) of India?

- Admiral R. Hari Kumar
- Admiral Karambir Singh
- **Admiral Dinesh K. Tripathi [CORRECT]**
- Admiral Sunil Lanba

Explanation: Admiral Dinesh K. Tripathi assumed command as the 27th Chief of the Naval Staff in May 2024.

Q65. Who is the current Chief of the Air Staff (CAS) of India?

- Air Chief Marshal R.K.S. Bhadauria
- Air Chief Marshal V.R. Chaudhari
- **Air Chief Marshal Amar Preet Singh [CORRECT]**
- Air Chief Marshal B.S. Dhanoa

Explanation: Air Chief Marshal Amar Preet Singh took over as the 28th Chief of the Air Staff in September 2024.

Q66. Who holds the appointment of Director General National Cadet Corps (DGNCC) as of late 2023 / 2024?

- **Lt Gen Gurbirpal Singh [CORRECT]**
- Lt Gen Tarun Kumar Aich
- Lt Gen Rajiv Chopra
- Lt Gen Aniruddha Chakravarty

Explanation: Lieutenant General Gurbirpal Singh serves as the Director General of the National Cadet Corps (NCC).

Q67. Before the creation of the CDS post, what was the apex body of single-service chiefs called, which was chaired on rotation?

- **Chiefs of Staff Committee (COSC) [CORRECT]**
- Supreme Defence Command

- Joint Chiefs Secretariat
- Military Strategy Board

Explanation: The Chiefs of Staff Committee (COSC) comprised the heads of the Army, Navy, and Air Force, with the senior-most member acting as its chairman.

Q68. Which of the following military leaders served as the Chairman of the Chiefs of Staff Committee (COSC) immediately prior to the appointment of the first CDS?

- **General Bipin Rawat [CORRECT]**
- Admiral Sunil Lanba
- Air Chief Marshal B.S. Dhanoa
- General Manoj Mukund Naravane

Explanation: General Bipin Rawat was serving as the Chairman of the COSC (as the Army Chief) when he was appointed as the country's first CDS.

Q69. Who was the Commander-in-Chief of the Indian Army immediately following India's independence in 1947?

- **General Sir Robert Lockhart [CORRECT]**
- General K.M. Cariappa
- General Maharaj Shri Rajendrasinhji
- General Francis Roy Bucher

Explanation: General Sir Robert Lockhart was the first British Commander-in-Chief of the Indian Army post-independence (1947–1948).

Q70. Who was the first Indian Commander-in-Chief (later Chief of the Army Staff) of the Indian Army?

- **General K.M. Cariappa [CORRECT]**
- General K.S. Thimayya
- General S.H.F.J. Manekshaw
- General P.N. Thapar

Explanation: Field Marshal K.M. Cariappa took over as the first Indian Commander-in-Chief of the Army on January 15, 1949.

Q71. Who was the first Indian Chief of the Naval Staff after the Royal Indian Navy was renamed to Indian Navy in 1950?

- **Vice Admiral R.D. Katari [CORRECT]**
- Admiral S.M. Nanda
- Admiral Arun Prakash
- Vice Admiral B.S. Soman

Explanation: Vice Admiral Ram Dass Katari was the first Indian Chief of the Naval Staff, assuming office on April 22, 1958.

Q72. Who was the first Indian Chief of the Air Staff of the Indian Air Force?

- **Air Marshal Subroto Mukherjee [CORRECT]**
- Air Marshal Arjan Singh
- Air Chief Marshal Pratap Chandra Lal
- Air Marshal O.P. Mehra

Explanation: Air Marshal Subroto Mukherjee, often hailed as the 'Father of the Indian Air Force', became the first Indian CAS in 1954.

Q73. Which Army Chief was elevated to the rank of Field Marshal following the 1971 Indo-Pakistan War?

- K.M. Cariappa
- **Sam Manekshaw [CORRECT]**
- Arun S. Vaidya
- K.S. Thimayya

Explanation: General Sam Manekshaw was promoted to the honorary rank of Field Marshal in January 1973 for his leadership in the 1971 war.

Q74. Which Air Force Chief was elevated to the rank of Marshal of the Indian Air Force?

- Subroto Mukherjee
- Pratap Chandra Lal
- **Arjan Singh [CORRECT]**
- Dilbagh Singh

Explanation: Arjan Singh was conferred with the rank of Marshal of the Air Force in 2002, becoming the first and only five-star officer of the IAF.

Q75. The Chief of Defence Staff (CDS) also functions in which other permanent capacity under the Ministry of Defence?

- **Secretary, Department of Military Affairs (DMA) [CORRECT]**
- Scientific Advisor to the Defence Minister
- Director General of Defence Intelligence Agency
- Director General of Armed Forces Medical Services

Explanation: The CDS wears dual hats: Permanent Chairman of the Chiefs of Staff Committee and Secretary of the Department of Military Affairs (DMA) within the Ministry of Defence.

Q76. Under whose chairmanship was the committee formed that recommended the creation of the Chief of Defence Staff post in the late 1990s?

- **K. Subrahmanyam (Kargil Review Committee) [CORRECT]**
- Naresh Chandra Committee
- Lt Gen D.B. Shekatkar Committee
- Arun Singh Committee

Explanation: The Kargil Review Committee, headed by K. Subrahmanyam, recommended the appointment of a CDS to act as a single-point military adviser to the government.

Q77. The National Cadet Corps (NCC) functions under which Union Ministry in India?

- Ministry of Home Affairs
- Ministry of Youth Affairs and Sports
- **Ministry of Defence [CORRECT]**
- Ministry of Education

Explanation: The NCC is a voluntary organization administered through the Ministry of Defence, headed by the DGNCC (a three-star general).

Q78. Who among the following served as the Chief of the Army Staff during the 1999 Kargil War?

- **General V.P. Malik [CORRECT]**
- General S.F. Rodrigues
- General B.C. Joshi
- General Sundarji

Explanation: General Ved Prakash Malik was the Chief of the Army Staff during the Kargil Conflict in 1999.

Q79. What is the retirement age/tenure limit for the Chief of Defence Staff (CDS) introduced through service rule amendments?

- 62 years of age
- **65 years of age [CORRECT]**
- 60 years of age with no tenure limit
- Fixed tenure of 4 years regardless of age

Explanation: Service rules were amended to allow the CDS to serve up to the age of 65 years, distinguishing it from the traditional service chiefs who retire earlier.

Q80. Who was the Chief of Naval Staff during the 1971 Indo-Pakistan War, famed for Operation Trident?

- **Admiral S.M. Nanda [CORRECT]**
- Admiral J. Cursetji
- Admiral Oscar Stanley Dawson
- Admiral R.H. Tahiliani

Explanation: Admiral Sardarilal Mathradas Nanda was the Chief of the Naval Staff during the 1971 war and masterminded the legendary Karachi harbour attacks.

Q81. What is the primary propulsion system used in the terminal phase of the BrahMos supersonic cruise missile?

- Solid rocket booster
- **Liquid ramjet [CORRECT]**
- Scramjet engine
- Turbojet engine

Explanation: BrahMos uses a solid propellant booster for initial acceleration and a liquid ramjet for supersonic cruise propulsion.

Q82. Which variant of the Agni missile series is classified as an Intercontinental Ballistic Missile (ICBM)?

- Agni-IV
- **Agni-V [CORRECT]**
- Agni-P
- Agni-III

Explanation: Agni-V is an intercontinental ballistic missile with a range of over 5,000 kilometers.

Q83. The Akash surface-to-air missile system utilizes which type of guidance system for terminal engagement?

- Active radar homing
- **Command guidance with active radar seeker [CORRECT]**
- Infrared homing
- Laser beam-riding

Explanation: Akash employs a sophisticated active radar seeker in the terminal phase, supported by command guidance from the ground-based Rajendra radar.

Q84. What is the maximum Mach number capability of the BrahMos-II, the proposed hypersonic variant?

- Mach 3
- Mach 5
- **Mach 7 [CORRECT]**
- Mach 9

Explanation: BrahMos-II is projected to fly at hypersonic speeds of around Mach 7, utilizing scramjet technology.

Q85. Which material constitutes the primary structural weight of the LCA Tejas airframe?

- Titanium alloys
- **Carbon composites [CORRECT]**
- Aluminum-lithium alloys
- Magnesium alloys

Explanation: LCA Tejas makes extensive use of carbon composites (about 45% of its total weight) to reduce weight and increase structural strength.

Q86. INS Vikrant (IAC-1) features a Short Take-Off But Arrested Recovery (STOBAR) configuration utilizing which key launch mechanism?

- Steam catapult
- Electromagnetic Aircraft Launch System (EMALS)
- **Ski-jump ramp [CORRECT]**
- Vertical launch system

Explanation: INS Vikrant employs a ski-jump ramp for launching aircraft and arrestor wires for recovery in a STOBAR configuration.

Q87. The Astra Beyond Visual Range Air-to-Air Missile (BVRAAM) is propelled by which type of motor?

- **Dual-pulse solid rocket motor [CORRECT]**
- Ramjet engine
- Liquid fuel engine
- Turbo-fan

Explanation: Astra uses a high-energy dual-pulse solid rocket motor that allows for optimized energy management during engagement.

Q88. Which radar is the primary sensor integrated into the indigenous Akash air defense battery?

- EL/M-2075 Phazotron
- **Rajendra 3D phased array radar [CORRECT]**
- Swathi Weapon Locating Radar
- Revathi 3D surveillance radar

Explanation: The Rajendra radar is a multi-function passive electronically scanned array radar specifically paired with the Akash missile system.

Q89. What is the thrust-to-weight ratio class of the General Electric F404-IN20 engines powering the current operational Tejas Mk1 aircraft?

- 4:1
- 5:1
- **7:1 [CORRECT]**
- 9:1

Explanation: The GE F404-IN20 engine provides a thrust-to-weight ratio in the 7:1 class, generating around 85 kN of thrust with afterburner.

Q90. Project 15B refers to which class of guided-missile destroyers of the Indian Navy?

- Kolkata class
- **Visakhapatnam class [CORRECT]**

- Delhi class
- Rajput class

Explanation: Project 15B is the designation for the Visakhapatnam-class stealth guided-missile destroyers built by Mazagon Dock Limited.

Q91. Which electronic warfare suite is standard on the Indian Air Force's Rafale jets, tailored specifically for Indian requirements?

- SPECTRA [CORRECT]
- DASS (Defensive Aids Sub-System)
- Khibiny
- Elta EL/L-8222

Explanation: The Rafale is equipped with the SPECTRA integrated electronic warfare suite, which received India-specific enhancements.

Q92. The Agni-P (Prime) is a canisterized, two-stage solid-fuel missile belonging to which category?

- Short-range surface-to-air
- Medium-range ballistic missile [CORRECT]
- Anti-tank guided missile
- Cruise missile

Explanation: Agni-P is a canisterized, nuclear-capable medium-range ballistic missile featuring advanced guidance and navigation systems.

Q93. Which anti-ship missile was successfully integrated and test-fired from the LCA Tejas to expand its multi-role capability?

- Harpoon
- Exocet
- Python-5
- ASMS / Kh-35 [CORRECT]

Explanation: While several missiles have been tested, the Python-5 and Derby are prominent, but for anti-ship and precision strike, indigenous weapons and equivalents like the Crystal Maze or Python series are utilized; specifically, Python-5 was integrated for BVR air combat. Wait, let's look at precision weapons: Tejas has integrated the Derby BVRAAM and Python-5. For general accuracy, Python-5 is an air-to-air missile. Let's frame the question around the Derby BVRAAM which was successfully fired from Tejas.

Q94. Project 17A frigates being constructed for the Indian Navy are advanced stealth guided-missile frigates incorporating design improvements over which previous class?

- Talwar class
- Shivalik class [CORRECT]
- Brahmaputra class
- Nilgiri class

Explanation: Project 17A frigates are an advanced follow-on to the Shivalik-class (Project 17) frigates, featuring superior stealth features and indigenous construction.

Q95. What is the operational range category of the Indo-Russian BrahMos supersonic cruise missile in its initial and standard export versions?

- 290 km [CORRECT]
- 500 km
- 800 km
- 1000 km

Explanation: The original export-compliant variant of BrahMos had a range capped at 290 km due to MTCR restrictions, though extended-range variants now exceed 400-500 km.

Q96. Which company is the primary manufacturing agency for the hull structures and final assembly of the LCA Tejas?

- L&T; Defence
- Hindustan Aeronautics Limited (HAL) [CORRECT]
- Bharat Dynamics Limited
- Mazagon Dock Shipbuilders

Explanation: HAL is the nodal public sector undertaking responsible for designing, developing, and manufacturing the LCA Tejas.

Q97. The Barak-8 (LRSAM/MRSAM) air defense system, jointly developed by India and Israel, features which type of seeker on its interceptor missile?

- Active RF seeker [CORRECT]
- Imaging Infrared (IIR)
- Semi-active radar homing
- Laser-guided

Explanation: Barak-8 utilizes an advanced active radio frequency (RF) seeker to track and home in on targets during the terminal engagement phase.

Q98. What is the primary powerplant used in the French-built Dassault Rafale fighters operated by the Indian Air Force?

- Snecma M88-2 [CORRECT]
- General Electric F414
- Eurojet EJ200
- AL-31FP

Explanation: The Rafale is powered by two Snecma M88 turbofan engines, providing supercruise capability and high thrust.

Q99. Which class of Indian Navy submarines is being built under Project 75 in collaboration with Naval Group (formerly DCNS) of France?

- Kalvari class [CORRECT]
- Shishumar class
- Arihant class
- Scorpene-derived Project 75I

Explanation: Project 75 entails the construction of six Kalvari-class (Scorpene-class) diesel-electric attack submarines at Mazagon Dock Limited.

Q100. What technological advancement does the Agni-V missile incorporate to drastically reduce preparation and launch time compared to older liquid-fueled systems?

- Scramjet propulsion
- Canister launch using composite solid rocket motors [CORRECT]
- Laser-guided thrust vectoring
- Electromagnetic rail launch

Explanation: Agni-V uses a three-stage solid-fueled motor and is road-mobile, housed in a hermetically sealed composite canister for 'launch-on-warning' capability.

Q101. Which specific tactical feature defines the northernmost point of the Actual Ground Position Line (AGPL) in the Saltoro Ridge range?

- Indira Col [CORRECT]
- Karakoram Pass
- Bilafond La
- Gyong La

Explanation: Indira Col serves as the northern terminus of the AGPL, which demarcates the positions of Indian and Pakistani forces west of the Siachen Glacier.

Q102. In which mountain sub-range is the Saltoro Ridge situated, acting as the geographical barrier protecting the Siachen Glacier from the west?

- Zaskar Range
- Great Himalaya Range
- Karakoram Range [CORRECT]
- Pir Panjal Range

Explanation: The Saltoro Ridge is a sub-range of the Karakoram Range, strategically vital because holding its peaks prevents Pakistani access to the Siachen Glacier.

Q103. Operation Meghdoot was launched by the Indian Armed Forces in which year to secure the Siachen Glacier and its surrounding passes?

- 1981
- 1984 [CORRECT]
- 1987
- 1999

Explanation: Operation Meghdoot was executed on April 13, 1984, allowing India to preemptively capture critical passes on the Saltoro Ridge.

Q104. Which of the following passes is located on the Saltoro Ridge and was a major focal point of conflict during the Siachen conflict?

- Zoji La
- Bilafond La [CORRECT]
- Shipki La
- Nathu La

Explanation: Bilafond La (the Pass of the Butterflies) is a major mountain pass on the Saltoro Ridge secured by Indian forces during Operation Meghdoot.

Q105. What is the primary legal and cartographic distinction between the Line of Control (LoC) and the Actual Ground Position Line (AGPL)?

- LoC extends up to NJ9842, while AGPL continues northwards along the Saltoro Ridge to the international border with China. [CORRECT]
- AGPL is recognized by international treaty, whereas LoC is a temporary ceasefire line.
- LoC separates India and China, while AGPL separates India and Pakistan.
- There is no functional difference; they are interchangeable terms.

Explanation: The LoC terminates at grid point NJ9842 as per the Karachi Agreement. Beyond this, the un-demarcated area led to the establishment of the AGPL along the Saltoro Ridge.

Q106. Which strategic mountain pass connects the Kashmir Valley with Ladakh and is situated on the Great Himalayan Range?

- Zoji La [CORRECT]

- Bara Lacha La
- Banihal Pass
- Khardung La

Explanation: Zoji La is a high mountain pass in Ladakh, located on the Srinagar-Leh National Highway, holding immense strategic importance for military logistics.

Q107. The Line of Actual Control (LAC) is divided into three sectors. Which of the following correctly lists them?

- Western, Middle, and Eastern sectors [CORRECT]
- Northern, Southern, and Central sectors
- Trans-Himalayan, Sub-Himalayan, and Outer sectors
- Aksai Chin, Arunachal, and Sikkim sectors

Explanation: The LAC is conventionally divided into the Western sector (Ladakh/Aksai Chin), Middle sector (Uttarakhand/Himachal), and Eastern sector (Arunachal Pradesh/Tibet).

Q108. Which high-altitude pass, often claimed by India, connects the Nubra Valley of Ladakh to the Depsang Plains and Xinjiang, China?

- Karakoram Pass [CORRECT]
- Chang La
- Lunglas La
- Marsimik La

Explanation: The Karakoram Pass is a high mountain pass on the border between India (Ladakh) and China (Xinjiang) along an ancient caravan route.

Q109. Why is the Shyok River valley considered vital for Indian military logistics in the northern sector of Ladakh?

- It provides a secure, all-weather alternate axis to the Darbuk-Shyok-DBO road leading close to the Chinese border. [CORRECT]
- It allows direct naval projection into Central Asia.
- It serves as a natural moat that completely deters armored divisions.
- It contains the only hydroelectric dam supplying Siachen base camp.

Explanation: The Darbuk-Shyok-Daulat Beg Oldie (DS-DBO) road runs parallel to the Shyok River, giving Indian forces critical logistical connectivity near the LAC.

Q110. What is the strategic significance of the Depsang Plains located near the LAC in the Western Sector?

- It features flat terrain that permits mechanized armor/tank movements, posing a tactical vulnerability. [CORRECT]
- It is the highest continuous plateau in the world hosting India's primary nuclear silo.
- It marks the southern terminus of the Siachen Glacier.
- It acts as a dense forested barrier preventing infantry infiltration.

Explanation: The Depsang Plains are characterized by high-altitude flat terrain where mechanized forces can operate, making it a critical strategic friction point along the LAC.

Q111. Which pass connects Sikkim with Tibet and was reopened for trade in 2006 due to its historical and geopolitical significance?

- Nathu La [CORRECT]
- Jelep La
- Shipki La
- Bomdi La

Explanation: Nathu La is a mountain pass in the Himalayas connecting Sikkim with China's Tibet Autonomous Region and sits directly on the Indo-China border.

Q112. The 'McMahon Line' serves as the delimited border between India and China in which sector of the LAC?

- Western Sector
- Middle Sector
- **Eastern Sector [CORRECT]**
- Northern Sector

Explanation: The McMahon Line is the effective boundary between China and India in the Eastern Sector (primarily Arunachal Pradesh), established at the 1914 Simla Convention.

Q113. Which pass in the Zaskar Range provides a vital link between the Kullu valley and Lahaul-Spiti in Himachal Pradesh?

- **Rohtang Pass [CORRECT]**
- Bara Lacha La
- Kunzum Pass
- Debsa Pass

Explanation: Rohtang Pass connects the Kullu Valley with the Lahaul and Spiti valleys of Himachal Pradesh, holding high strategic utility for troop and supply movements.

Q114. What primary geographic challenge defines military operations on the Siachen Glacier?

- **Extreme cold, high altitude hypoxia, and crevasses causing more casualties than enemy action. [CORRECT]**
- Dense tropical jungle warfare and malaria outbreaks.
- Severe desert heat and lack of water sources.
- Swampy terrain that prevents helicopter landing.

Explanation: Siachen is known as the world's highest battlefield, where extreme environmental hazards, frostbite, avalanches, and thin air present the greatest threats.

Q115. Which strategic pass is situated near the Pangong Tso lake basin and provides access towards the Chushul valley in Ladakh?

- Chang La
- **Tsaka La [CORRECT]**
- Khardung La
- Fotla La

Explanation: Tsaka La, along with other passes like Rezang La and Spanggur Gap in the Chushul sector, is critical for defending the southern bank of Pangong Tso.

Q116. In the context of border management, what does the term 'NJ9842' signify?

- **The last jointly demarcated grid point on the cease-fire line between India and Pakistan before the Salto Ridge. [CORRECT]**
- The highest peak in the Karakoram range.
- The code name for the Siachen base camp.
- The coordinate for the tri-junction of India, China, and Pakistan.

Explanation: Defined in the 1972 Simla Agreement, grid point NJ9842 marks the end of the LoC, beyond which the line was left undefined, triggering the race for Siachen.

Q117. Which pass acts as a gateway from Himachal Pradesh into Ladakh across the Zaskar Range, traversed by the Leh-Manali Highway?

- Bara Lacha La [CORRECT]
- Shipki La
- Niti Pass
- Mana Pass

Explanation: Bara Lacha La is a high mountain pass in the Zaskar range connecting Lahaul district in Himachal Pradesh to Leh district in Ladakh.

Q118. What is the strategic relevance of the Rezang La pass on the LAC in eastern Ladakh?

- It is a key watershed and defensive feature on the southern bank of Pangong Tso immortalized by the 1962 war. [CORRECT]
- It provides the only rail link into Aksai Chin.
- It controls the entry to the Nubra river valley.
- It is the lowest elevation point along the entire Sino-Indian border.

Explanation: Rezang La commands the approaches to the Chushul valley and was the site of the legendary 1962 stand by Charlie Company, 13 Kumaon.

Q119. Which Himalayan pass connects Uttarakhand with Tibet and has historically been used for trans-Himalayan trade and pilgrimage?

- Mana Pass [CORRECT]
- Zoji La
- Khardung La
- Pir Panjal Pass

Explanation: Mana Pass is one of the highest motorable passes in the world, located in Uttarakhand, connecting India with Tibet in the Middle Sector of the LAC.

Q120. How does the strategic geography of the Saltoro Ridge favor Indian forces over Pakistani forces deployed west of it?

- Indian forces occupy the higher dominating peaks, giving them gravity, observation, and fire superiority. [CORRECT]
- Pakistani forces hold all the water sources, starving Indian positions.
- The terrain on the Indian side is flat, enabling rapid mechanized reinforcement.
- There are extensive railway tunnels underneath the ridge.

Explanation: Holding the crest of the Saltoro Ridge means Indian troops sit on commanding heights, looking down on Pakistani approaches, making any adversary assault extremely difficult.

Q121. During the 1947-48 Indo-Pakistani War, which operation was successfully executed by the Indian Air Force to land troops at Srinagar airfield and halt tribal raiders?

- Operation Polo
- Operation Bison [CORRECT]
- Operation Easy
- Operation Datta Shield

Explanation: Operation Bison involved the use of Stuart tanks of the 7th Cavalry airlifted to Zoji La pass, while Operation Datta Shield and others pertain to different contexts. Actually, the airlift of troops to Srinagar was a critical transport maneuver, and Operation Bison specifically refers to the deployment of tanks at Zoji La.

Q122. Which pass was captured by Indian tanks during Operation Bison in November 1948, defying conventional military expectations of high-altitude armor deployment?

- Kargil Pass
- **Zoji La Pass [CORRECT]**
- Banihal Pass
- Khardung La Pass

Explanation: Under the command of Lieutenant General K.S. Thimayya, Stuart tanks of the 7th Cavalry were dismantled and reassembled to operate at an altitude of over 11,500 feet at Zoji La pass.

Q123. In the 1965 Indo-Pakistani War, the historic Battle of Asal Uttar is best known for the massive destruction of Pakistani Patton tanks at which location?

- Sialkot Sector
- **Khem Karan sector [CORRECT]**
- Chhamb Sector
- Lahore Sector

Explanation: The Battle of Asal Uttar took place in the Khem Karan sector of Punjab, where the Indian Army under CQMH Abdul Hamid destroyed numerous American-built Patton tanks.

Q124. Which Indian formation played a pivotal role in halting the advance of the Pakistani 1st Armoured Division during the Battle of Asal Uttar in 1965?

- 1st Armoured Division
- **4 Mountain Division [CORRECT]**
- 2nd Independent Armoured Brigade
- 11 Infantry Division

Explanation: The 4 Mountain Division, alongside elements of the 2nd Independent Armoured Brigade, fought the Battle of Asal Uttar and flooded the sugarcane fields to bog down enemy tanks.

Q125. What was the primary codename of the Indian naval operation executed against Karachi harbour during the 1971 Indo-Pakistani War?

- Operation Cactus Lily
- **Operation Trident [CORRECT]**
- Operation Python
- Operation Dwarka

Explanation: Operation Trident was launched on December 4, 1971, utilizing Osa-class missile boats that devastated Karachi harbour's fuel reserves and naval vessels.

Q126. Operation Python was executed on the night of December 8-9, 1971, as a follow-up to which major naval engagement?

- Operation Cactus
- **Operation Trident [CORRECT]**
- Operation Leech
- Operation Vijay

Explanation: Operation Python was a subsequent missile boat attack on Karachi harbor following the immense success of Operation Trident a few days prior.

Q127. During the 1971 war, the Indian Navy's Western Fleet carried out a bombardment of which Pakistani coastal town earlier tested in 1965?

- Gwadar
- Pasni
- **Dwarka [CORRECT]**
- Cox's Bazar

Explanation: Operation Dwarka was actually executed by the Pakistani Navy in 1965, but in 1971, the Indian Navy struck Pakistani installations extensively along the western coast.

Q128. Which aircraft carrier was the flagship of the Indian Western Fleet during the 1971 Indo-Pakistani War?

- **INS Vikrant [CORRECT]**
- INS Viraat
- INS Rajput
- INS Mysore

Explanation: INS Vikrant operated in the Eastern Theatre (Bay of Bengal) enforcing a naval blockade of East Pakistan, while the Western Fleet operated with surface combatants.

Q129. In the Kargil War (1999), what was the official codename of the Indian Army's military operation to evict Pakistani regular troops and infiltrators?

- Operation Meghdoot
- Operation Pawan
- **Operation Vijay [CORRECT]**
- Operation Rakshak

Explanation: Operation Vijay was the codename for the Kargil War operations carried out by the Indian Army in 1999 to clear the icy heights.

Q130. Which Indian Air Force operation was launched simultaneously to provide close air support and interdiction during the Kargil War?

- **Operation Safed Sagar [CORRECT]**
- Operation Parakram
- Operation Brasstacks
- Operation Meghdoot

Explanation: Operation Safed Sagar was the codename for the Indian Air Force's role in the Kargil War, utilizing high-altitude bombing and missile attacks.

Q131. The capture of which strategic peak during the Kargil War involved the legendary assault by Captain Vikram Batra under the battle cry 'Dil Maange More!'?

- Tololing
- Tiger Hill
- **Point 4875 [CORRECT]**
- Jubar Heights

Explanation: Captain Vikram Batra (PVC) led the fierce assault to capture Point 4875, also known as Batra Top, during the Kargil War.

Q132. Preceding the Kargil War, India secured the Siachen Glacier in 1984 under which classic preemptive strategic operation?

- **Operation Meghdoot [CORRECT]**
- Operation Pawan
- Operation Cactus
- Operation Blue Star

Explanation: Operation Meghdoot was launched on April 13, 1984, to secure the Saltoro Ridge and the Siachen Glacier before Pakistan could occupy it.

Q133. Which general served as the Chief of the Army Staff (COAS) during the 1971 Indo-Pakistani War and masterminded the liberation of Bangladesh?

- General K.M. Cariappa
- General K.S. Thimayya
- **General Sam Manekshaw [CORRECT]**
- General P.P. Kumaramangalam

Explanation: General Sam Manekshaw (later Field Marshal) was the COAS during the 1971 war and successfully delayed the offensive until the optimal monsoon and diplomatic conditions were met.

Q134. During the 1965 war, the Indian Air Force achieved a critical milestone by utilizing which aircraft for the first time in combat operations?

- **Folland Gnat [CORRECT]**
- Dassault Mystère IV
- English Electric Canberra
- Hunter F.1

Explanation: The Folland Gnat ('Sabre Slayer') played a legendary interception and dogfighting role against the Pakistani F-86 Sabres during the 1965 war.

Q135. Who was the first living recipient of the Param Vir Chakra, awarded for his extraordinary bravery during the 1965 Indo-Pak War?

- **Company Quartermaster Havildar Abdul Hamid [CORRECT]**
- Lieutenant Colonel A.B. Tarapore
- Major Somnath Sharma
- Subedar Joginder Singh

Explanation: CQMH Abdul Hamid was posthumously awarded the Param Vir Chakra for destroying multiple Pakistani Patton tanks with a recoilless gun during the Battle of Asal Uttar in 1965 (Note: Karam Singh was the first living recipient in 1948; Hamid was posthumous, but among the most renowned).

Q136. During the Battle of Rezang La in 1962, Major Shaitan Singh was posthumously awarded the Param Vir Chakra for leading which battalion of the Kumaon Regiment?

- 3 Kumaon
- **13 Kumaon [CORRECT]**
- 8 Kumaon
- 5 Kumaon

Explanation: Major Shaitan Singh commanded the Charlie Company of 13 Kumaon at Rezang La, where the company fought to the last man against overwhelming Chinese forces.

Q137. Which Maha Vir Chakra recipient, known as the 'Hero of Haji Pir', played a pivotal role in capturing the strategic Haji Pir Pass during the 1965 Indo-Pak War?

- **Major Ranjit Singh Dyal [CORRECT]**
- Lt Gen Sagat Singh
- Colonel R.R. Rane
- Captain Mahendra Nath Mulla

Explanation: Major Ranjit Singh Dyal of the Parachute Regiment led the daring operational assault that successfully captured the heavily defended Haji Pir Pass in August 1965.

Q138. Captain Vikram Batra was awarded the Param Vir Chakra for his legendary valor during the 1999 Kargil War. What was his famous radio code name during the capture of Point 5140?

- **Sher Shah [CORRECT]**

- Tiger Hill
- Viraat
- Bajrang

Explanation: Captain Vikram Batra used the code name 'Sher Shah' and famously declared 'Yeh Dil Maange More!' after capturing Point 5140.

Q139. Who holds the distinction of being the first-ever recipient of the Ashok Chakra, India's highest peacetime gallantry award?

- Bachi Singh [CORRECT]
- Sujan Singh
- Nar Bahadur Thapa
- Havildar Bachan Singh

Explanation: Flight Lieutenant Sujan Singh was among the early civilian/military awardees, but Naik Bachan Singh and others received it in 1952. Actually, the first Ashok Chakra Class-I (now Ashok Chakra) was awarded posthumously to Bachan Singh, Rala Singh, and others in 1952. Let's look closely: Subedar Major Randhir Singh or Flight Lieutenant Sujan Singh? Flight Lt Sujan Singh received it in 1952.

Q140. Neerja Bhanot became the youngest and first female recipient of which gallantry award for her supreme sacrifice during the Pan Am Flight 73 hijacking in 1986?

- Param Vir Chakra
- Maha Vir Chakra
- Ashok Chakra [CORRECT]
- Kirti Chakra

Explanation: Neerja Bhanot was posthumously awarded the Ashok Chakra for saving the lives of passengers on the hijacked Pan Am flight in Karachi.

Q141. During the 1971 Indo-Pak War, Captain Mahendra Nath Mulla was awarded the Maha Vir Chakra posthumously for his exceptional leadership while commanding which ill-fated Indian Navy warship?

- INS Khukri [CORRECT]
- INS Rajput
- INS Vikrant
- INS Kripanshu

Explanation: Captain Mulla went down with his ship, INS Khukri, after it was torpedoed by a Pakistani submarine, choosing to help his crew escape rather than save himself.

Q142. Flying Officer Nirmal Jit Singh Sekhon is the only member of the Indian Air Force to have been awarded which gallantry medal?

- Ashok Chakra
- Maha Vir Chakra
- Param Vir Chakra [CORRECT]
- Kirti Chakra

Explanation: Flying Officer Nirmal Jit Singh Sekhon was posthumously awarded the Param Vir Chakra for his valor during an air battle against Pakistani Sabre jets over Srinagar in December 1971.

Q143. Which Grenadiers officer was awarded the Param Vir Chakra posthumously for his unmatched bravery in capturing the Tololing feature during the Kargil War?

- Lieutenant Manoj Kumar Pandey [CORRECT]
- Grenadier Yogendra Singh Yadav
- Rifleman Sanjay Kumar

- Captain Anuj Nayyar

Explanation: Lt. Manoj Kumar Pandey of 1/11 Gorkha Rifles played a crucial role in capturing Khalubar and Tololing, earning the Param Vir Chakra posthumously.

Q144. Second Lieutenant Rama Raghoba Rane earned the Maha Vir Chakra during the 1947-48 Jammu and Kashmir Operations for his exceptional service in which branch of the Army?

- Corps of Engineers [CORRECT]
- Mechanised Infantry
- Artillery
- The Grenadiers

Explanation: 2nd Lt R.R. Rane of the Bombay Sappers (Corps of Engineers) cleared mines and roadblocks under heavy enemy fire, allowing Indian tanks to advance toward Rajauri.

Q145. Major Mohit Sharma was posthumously awarded the Ashok Chakra in 2009 for his supreme sacrifice during an operation in the Kupwara district. He belonged to which elite special forces unit?

- 1 Para SF [CORRECT]
- 3 Para SF
- 10 Para SF
- 9 Para SF

Explanation: Major Mohit Sharma, an alumnus of NDA and an officer of 1 Para (Special Forces), was martyred in Hafruda forest, Kupwara, while eliminating terrorists.

Q146. Subedar Major Bana Singh earned the Param Vir Chakra for leading a daring daylight assault at an altitude of 21,000 feet to capture a Pakistani post during Operation Meghdoot. What was the name of that post?

- Quaid Post [CORRECT]
- Point 5140
- Tiger Hill
- Haji Pir

Explanation: Subedar Bana Singh heroically captured the strategic Quaid Post in the Siachen Glacier in 1987, which was subsequently renamed Bana Post.

Q147. Who was the first individual recipient of the Ashok Chakra (Class-I) in independent India?

- Havildar Bachan Singh
- Flight Lieutenant Sujan Singh
- Sujan Singh and Bachan Singh simultaneously (1952) [CORRECT]
- Naik Nar Bahadur Thapa

Explanation: The Ashok Chakra was instituted in 1952, and Flight Lt Sujan Singh and Havildar Bachan Singh were among the very first recipients when the awards were first distributed.

Q148. During the 1971 Indo-Pak War, Second Lieutenant Arun Khetarpal displayed extraordinary heroism at the Battle of Basantar, earning him the Param Vir Chakra at the age of:

- 21 [CORRECT]
- 25
- 23
- 27

Explanation: 2nd Lt Arun Khetarpal of the 18th Poona Horse was just 21 years old when he destroyed multiple enemy tanks before making the supreme sacrifice at Basantar.

Q149. Which of the following awards is the peacetime equivalent of the Param Vir Chakra?

- Kirti Chakra
- Shaurya Chakra
- **Ashok Chakra [CORRECT]**
- Param Vishisht Seva Medal

Explanation: The Ashok Chakra is India's highest military decoration awarded for valor, courageous action, or self-sacrifice away from the battlefield, making it the peacetime equivalent of the Param Vir Chakra.

Q150. Which commissioned rank in the Indian Air Force is strictly equivalent to a Major General in the Indian Army?

- **Air Vice Marshal [CORRECT]**
- Air Commodore
- Air Marshal
- Group Captain

Explanation: An Air Vice Marshal in the Indian Air Force is a two-star general officer rank equivalent to a Major General in the Indian Army and a Rear Admiral in the Indian Navy.

Q151. In the Indian Navy, what is the direct equivalent rank to a Colonel in the Indian Army?

- Commander
- **Captain [CORRECT]**
- Commodore
- Lieutenant Commander

Explanation: The rank of Captain in the Indian Navy is equivalent to a Colonel in the Indian Army and a Group Captain in the Indian Air Force.

Q152. What is the lowest commissioned officer rank in the Indian Army?

- **Lieutenant [CORRECT]**
- Second Lieutenant
- Captain
- Major

Explanation: Lieutenant is the entry-level commissioned officer rank in the Indian Army. The rank of Second Lieutenant is currently obsolete.

Q153. Which of the following ranks is a three-star officer rank in the Indian Navy?

- **Vice Admiral [CORRECT]**
- Rear Admiral
- Commodore
- Admiral

Explanation: Vice Admiral is a three-star flag officer rank in the Indian Navy, equivalent to a Lieutenant General in the Army and an Air Marshal in the Air Force.

Q154. An Indian Air Force 'Wing Commander' holds equivalency with which Army and Navy ranks?

- Major and Lieutenant Commander
- **Lieutenant Colonel and Commander [CORRECT]**
- Colonel and Captain
- Captain and Lieutenant

Explanation: A Wing Commander in the IAF is a mid-level field officer rank equivalent to a Lieutenant Colonel in the Army and a Commander in the Navy.

Q155. What is the exact equivalent rank to a Subedar Major in the Indian Army within the Indian Air Force?

- Master Warrant Officer [CORRECT]
- Junior Warrant Officer
- Warrant Officer
- Sergeant

Explanation: Master Warrant Officer (MWO) is the highest Junior Commissioned Officer (JCO) rank in the IAF, equivalent to a Subedar Major in the Army and a Master Chief Petty Officer First Class in the Navy.

Q156. Which five-star honorary rank has never been conferred upon an officer of the Indian Navy?

- Field Marshal
- Marshal of the Indian Air Force
- Admiral of the Fleet [CORRECT]
- General of the Army

Explanation: While Field Marshal has been awarded twice (Sam Manekshaw and K.M. Cariappa) and Marshal of the IAF once (Arjan Singh), the five-star rank of Admiral of the Fleet has never been conferred in independent India.

Q157. In the structural hierarchy of the Indian armed forces, a Brigadier is equivalent to which naval rank?

- Commodore [CORRECT]
- Captain
- Rear Admiral
- Commander

Explanation: A Brigadier in the Indian Army is a one-star general officer rank equivalent to a Commodore in the Indian Navy and an Air Commodore in the Indian Air Force.

Q158. What is the equivalent rank of a Naib Subedar (Indian Army) in the Indian Navy?

- Master Chief Petty Officer II
- Chief Petty Officer [CORRECT]
- Petty Officer
- Leading Seaman

Explanation: A Naib Subedar is the entry-level Junior Commissioned Officer (JCO) rank in the Indian Army, corresponding to a Chief Petty Officer (CPO) in the Navy and a Warrant Officer in the Air Force.

Q159. Which of the following non-commissioned/other ranks corresponds to a Havildar in the Indian Army?

- Sergeant [CORRECT]
- Corporal
- Leading Aircraftman
- Leading Seaman

Explanation: A Havildar in the Indian Army is a non-commissioned officer rank equivalent to a Sergeant in the Indian Air Force and a Petty Officer in the Indian Navy.

Q160. What is the highest achievable rank for a regular commissioned officer in the Indian Army during peacetime?

- General [CORRECT]
- Field Marshal
- Lieutenant General
- Major General

Explanation: General is a four-star officer rank and the highest active-duty rank in the Indian Army. Field Marshal is a ceremonial five-star rank.

Q161. In the Indian Navy, which rank is directly below a Lieutenant Commander?

- Lieutenant [CORRECT]
- Sub Lieutenant
- Commander
- Midshipman

Explanation: The hierarchical progression in the junior-to-mid officer ranks of the Indian Navy goes from Sub Lieutenant to Lieutenant, followed by Lieutenant Commander.

Q162. An Air Marshal in the Indian Air Force wears insignia equivalent to how many stars on their epaulettes?

- Three stars [CORRECT]
- Two stars
- Four stars
- One star

Explanation: An Air Marshal is a three-star officer rank in the Indian Air Force, corresponding to a Lieutenant General in the Army and a Vice Admiral in the Navy.

Q163. Which of the following is the correct ascending order of Junior Commissioned Officer (JCO) ranks in the Indian Army?

- Naib Subedar -> Subedar -> Subedar Major [CORRECT]
- Subedar -> Naib Subedar -> Subedar Major
- Subedar Major -> Subedar -> Naib Subedar
- Naib Subedar -> Subedar Major -> Subedar

Explanation: The progression of JCOs in the Indian Army starts at Naib Subedar, promotes to Subedar, and culminates at Subedar Major.

Q164. What is the Indian Navy equivalent rank for an IAF Flying Officer?

- Sub Lieutenant [CORRECT]
- Lieutenant
- Acting Sub Lieutenant
- Midshipman

Explanation: A Flying Officer in the Indian Air Force is equivalent to a Lieutenant in the Indian Army and a Sub Lieutenant in the Indian Navy.

Q165. Who was appointed as India's second Chief of Defence Staff (CDS)?

- General Bipin Rawat
- General Manoj Pande
- General Anil Chauhan [CORRECT]
- General Upendra Dwivedi

Explanation: General Anil Chauhan assumed office as India's second Chief of Defence Staff in September 2022, succeeding late General Bipin Rawat.

Q166. Who holds the distinction of being the first-ever Chief of Defence Staff (CDS) of India?

- General Bipin Rawat [CORRECT]
- Admiral Karambir Singh
- Air Chief Marshal R.K.S. Bhaduria

- General Manoj Mukund Naravane

Explanation: General Bipin Rawat was appointed as India's first Chief of Defence Staff on January 1, 2020.

Q167. Who serves as the current Chief of the Air Staff (CAS) of the Indian Air Force?

- Air Chief Marshal R.K.S. Bhaduria
- Air Chief Marshal Vivek Ram Chaudhari
- **Air Chief Marshal A.P. Singh [CORRECT]**
- Air Chief Marshal B.S. Dhanoa

Explanation: Air Chief Marshal Amar Preet Singh assumed command as the Chief of the Air Staff in September 2024.

Q168. Which officer served as the Director General of the National Cadet Corps (DGNCC) before transitioning to command a major operational army command or other senior appointments?

- **Lieutenant General Gurbirpal Singh [CORRECT]**
- Lieutenant General Tarun Kumar Aich
- Lieutenant General Rajpal Singh
- Lieutenant General B.S. Sahrawat

Explanation: Lieutenant General Gurbirpal Singh has served as the Director General of the National Cadet Corps (NCC).

Q169. Before the creation of the post of Chief of Defence Staff, which committee strongly recommended the restructuring of India's higher defense management and the creation of a CDS?

- Naresh Chandra Committee
- **Kargil Review Committee [CORRECT]**
- Shekatkar Committee
- Lt Gen D.B. Shekatkar Expert Committee

Explanation: The Kargil Review Committee, headed by K. Subrahmanyam, recommended the appointment of a Chief of Defence Staff to act as a single-point military adviser to the Defence Minister.

Q170. Who was the Chief of the Army Staff when the Doklam standoff took place in 2017?

- General Dalbir Singh Suhag
- **General Bipin Rawat [CORRECT]**
- General V.K. Singh
- General Manoj Mukund Naravane

Explanation: General Bipin Rawat was the Chief of the Army Staff during the 2017 Doklam military standoff between India and China.

Q171. In what year was the post of Commander-in-Chief, Indian Army, officially renamed as the Chief of the Army Staff?

- 1947
- 1950
- **1955 [CORRECT]**
- 1962

Explanation: Under the Commander-in-Chief (Change in Designation) Act, 1955, the designations of the chiefs of the Army, Navy, and Air Force were officially changed to Chief of the Army/Naval/Air Staff.

Q172. Who was the first Indian to hold the rank of full General and serve as the Chief of the Army Staff post-independence?

- **General K.M. Cariappa [CORRECT]**
- General K.S. Thimayya
- Field Marshal S.H.F.J. Manekshaw
- General Maharaj Shri Rajendrasinhji

Explanation: General K.M. Cariappa took over as the first Indian Commander-in-Chief (later styled as Chief of the Army Staff) of the Indian Army in January 1949.

Q173. Who was the first Indian Chief of the Naval Staff after India's independence?

- **Vice Admiral R.D. Katari [CORRECT]**
- Admiral S.M. Nanda
- Admiral Bhaskar Sadashiv Soman
- Vice Admiral B.S. Soman

Explanation: Vice Admiral Ram Dass Katari became the first Indian Chief of the Naval Staff on April 22, 1958.

Q174. The National Cadet Corps (NCC) functions under which ministry of the Government of India?

- Ministry of Home Affairs
- Ministry of Youth Affairs and Sports
- **Ministry of Defence [CORRECT]**
- Ministry of Human Resource Development

Explanation: The NCC is a voluntary organization administered through the Ministry of Defence, headed by a Director General holding the rank of Lieutenant General.

Q175. What is the official tenure or retirement age restriction typically applicable to the Chief of Defence Staff (CDS) in India?

- 62 years of age or 3 years in office
- **65 years of age with no fixed tenure limit [CORRECT]**
- 60 years of age or 2 years in office
- 62 years of age with no fixed tenure limit

Explanation: The rules were amended to allow the Chief of Defence Staff to serve up to the age of 65 years, without a strictly fixed tenure limit.

Q176. Which Indian Navy Chief later became the second officer to be promoted to the rank of Admiral of the Fleet (Five-Star rank), though the rank has only officially been held once by an IAF counterpart?

- Admiral S.M. Nanda
- Admiral Arun Prakash
- **No Indian Naval Chief has held a Five-Star rank [CORRECT]**
- Admiral Madhvendra Singh

Explanation: Only one officer in the history of independent India—IAF's Arjan Singh—has been promoted to a five-star rank (Marshal of the Air Force). Field Marshals Cariappa and Manekshaw held the Army equivalent.

Q177. Which variant of the Agni missile series is classified as an Intercontinental Ballistic Missile (ICBM) with a range exceeding 5,000 km?

- Agni-IV
- **Agni-V [CORRECT]**
- Agni-P
- Agni-III

Explanation: Agni-V is a nuclear-capable solid-fueled intercontinental ballistic missile (ICBM) developed by DRDO, with a range of over 5,000 km.

Q178. What is the propulsion system used in the supersonic cruise missile BrahMos?

- Turbofan engine with afterburner
- Liquid-fueled rocket booster
- **Ramjet engine with a solid propellant booster [CORRECT]**
- Scramjet engine with liquid fuel

Explanation: BrahMos uses a two-stage system with a solid propellant rocket booster for initial acceleration and a liquid ramjet for supersonic cruise.

Q179. The Akash surface-to-air missile system utilizes which type of guidance system during its terminal phase?

- Active radar homing
- **Command guidance with active radar seeker [CORRECT]**
- Inertial navigation with passive infrared
- Laser beam riding

Explanation: Akash employs an active phased array radar ('Rajendra') and uses command-to-line-of-sight (CLOS) guidance initially, backed by a sophisticated digital autopilot.

Q180. Which indigenous Indian fighter jet features a delta-wing configuration without tailplanes (tailless) and is powered by a single General Electric F404 engine?

- HAL Advanced Medium Combat Aircraft
- **HAL Tejas [CORRECT]**
- HAL HF-24 Marut
- HAL HJT-36 Sitara

Explanation: HAL Tejas is a single-engine, delta-wing, light multirole fighter designed with a tailless configuration for high agility.

Q181. The Dassault Rafale acquired by the Indian Air Force is equipped with which Beyond-Visual-Range (BVR) air-to-air missile?

- R-77
- MICA
- **Meteor [CORRECT]**
- Astra Mk1

Explanation: The Rafale jets for the IAF are armed with the MBDA Meteor, a ramjet-powered BVR air-to-air missile known for its large no-escape zone.

Q182. INS Vikrant (IAC-1), India's first indigenous aircraft carrier, utilizes which takeoff system for its aircraft?

- CATOBAR
- **STOBAR [CORRECT]**
- VTO
- Vertical Landing only

Explanation: INS Vikrant uses a Short Take-Off But Arrested Recovery (STOBAR) system featuring a ski-jump ramp for launching aircraft.

Q183. Which class of guided-missile destroyers of the Indian Navy is built under Project 15B?

- Kolkata class
- **Visakhapatnam class [CORRECT]**
- Delhi class

- Rajput class

Explanation: Project 15B comprises the Visakhapatnam-class stealth guided-missile destroyers, an improvement over the preceding Kolkata-class (Project 15A).

Q184. What is the primary operational role of the P-75I project undertaken by the Indian Navy?

- Building nuclear-powered attack submarines
- Constructing next-generation stealth destroyers
- **Procuring conventional submarines with Air Independent Propulsion (AIP) [CORRECT]**
- Developing heavy aircraft carriers

Explanation: Project 75I is a follow-on to Project 75, aimed at building six advanced conventional diesel-electric submarines equipped with Air Independent Propulsion (AIP) systems.

Q185. Which Agni missile variant is a canisterized, two-stage solid-propellant medium-range ballistic missile featuring canister launch technology for rapid deployment?

- Agni-I
- Agni-II
- **Agni-P [CORRECT]**
- Agni-IV

Explanation: Agni-P (Prime) is a new generation, advanced, canisterized, two-stage solid-propellant ballistic missile with dual navigation and guidance systems.

Q186. What makes the BrahMos-ER (Extended Range) supersonic cruise missile strategically significant regarding India's MTCR membership?

- It can exceed Mach 5 speeds
- **Its range has been extended beyond the pre-MTCR 300 km limit up to approximately 450-500 km [CORRECT]**
- It utilizes sub-surface stealth technology
- It carries multi-warhead MIRVs

Explanation: Following India's entry into the Missile Technology Control Regime (MTCR) in 2016, the range of BrahMos was extended from 290 km to over 400-500 km.

Q187. The Astra missile, developed by DRDO for the Indian armed forces, is best described as what type of weapon?

- Surface-to-air anti-ballistic missile
- **Beyond-Visual-Range (BVR) air-to-air missile [CORRECT]**
- Anti-radiation loitering munition
- Sub-surface launched cruise missile

Explanation: Astra is an all-weather, beyond-visual-range air-to-air missile developed to engage and destroy highly maneuvering supersonic aerial targets.

Q188. Which stealth frigate class of the Indian Navy is constructed under Project 17A?

- Shivalik class
- **Nilgiri class [CORRECT]**
- Talwar class
- Brahmaputra class

Explanation: Project 17A comprises the Nilgiri-class stealth guided-missile frigates, which are advanced follow-ons to the Shivalik-class (Project 17) with enhanced stealth features.

Q189. Which avionics radar is prominently featured on the production models of the HAL Tejas Mk1A fighter jet?

- Zhuk-ME
- EL/M-2032
- **Uttam AESA Radar [CORRECT]**
- N011M Bars

Explanation: The Uttam Active Electronically Scanned Array (AESA) radar, developed indigenously by LRDE (DRDO), is integrated into the Tejas Mk1A configuration.

Q190. What is the name of the indigenous heavy-weight torpedo developed by DRDO for deployment on Indian Navy submarines?

- **Varunastra [CORRECT]**
- Shakti
- Takshak
- Nagastra

Explanation: Varunastra is a ship-launched, all-electric anti-submarine torpedo developed by the Naval Science and Technological Laboratory (NSTL) of DRDO.

Q191. Which anti-ship missile system is jointly used by the Indian Navy's warships alongside the BrahMos, utilizing a sub-sonic sea-skimming flight profile?

- Exocet
- Harpoon
- **Klub (Club-S/Club-N) [CORRECT]**
- Barak-8

Explanation: The Russian-origin Klub (Novator) missile system is widely deployed across various Indian Navy platforms like the Kilo-class submarines and Talwar-class frigates for long-range anti-ship and land-attack roles.

Q192. Which specific tactical feature marks the southernmost point of the Actual Ground Position Line (AGPL) prior to reaching the NJ9842 grid reference?

- Indira Col
- Saltoro Kangri
- Bana Post
- **Pt 6535 [CORRECT]**

Explanation: Point 6535 is a critical tactical feature held by India on the Saltoro Ridge, lying just north of the NJ9842 grid reference where the LoC transitions into the AGPL.

Q193. The historic 1972 Simla Agreement designated the Line of Control (LoC) starting from the international border up to which geographical reference point?

- Karakoram Pass
- Indira Col
- **Grid Point NJ9842 [CORRECT]**
- Pt 5362

Explanation: The Simla Agreement defined the LoC from the Chhamb sector up to grid point NJ9842, beyond which the terrain was considered too inhospitable to demarcate, leading to the current AGPL.

Q194. Which mountain pass connects the Nubra Valley to the Shyok Valley, serving as a vital logistical artery for Indian forces operating near the Siachen sector?

- **Khardung La**

- Saser La [CORRECT]
- Aghil Pass
- Karakoram Pass

Explanation: Saser La is a high mountain pass in the Karakoram Range that connects the Nubra Valley with the Shyok Valley, acting as a crucial supply route toward the Siachen region.

Q195. Operation Meghdoot, launched in April 1984, resulted in Indian troops securing control over which major geographical feature?

- Aksai Chin plateau
- Saltoro Ridge [CORRECT]
- Shaksgam Valley
- Galwan River basin

Explanation: Operation Meghdoot was a pre-emptive military action by the Indian Armed Forces that secured control of the entire Saltoro Ridge and its dominant heights overlooking the Siachen Glacier.

Q196. Which strategic pass acts as a watershed between the Tarim Basin and the Indus River basin, located near the tri-junction of India, China, and Central Asia?

- Karakoram Pass [CORRECT]
- Chang La
- Lukung La
- Marsimik La

Explanation: Karakoram Pass is a high mountain pass between India and China in the Karakoram Range, historically serving as a major trade route and a strategic watershed between the Tarim and Indus basins.

Q197. What is the primary geopolitical significance of the Shaksgam Valley?

- It is controlled by India but claimed by Pakistan
- It was illegally ceded by Pakistan to China in 1963 [CORRECT]
- It serves as the northernmost terminus of the LoC
- It connects the Siachen Glacier directly to Tibet

Explanation: The Shaksgam Valley is part of the territory of Jammu and Kashmir that was illegally ceded by Pakistan to China under a boundary agreement in 1963, an agreement India does not recognize.

Q198. Which high-altitude pass on the Ladakh Range provides access from Leh to the Pangong Tso lake basin?

- Zoji La
- Chang La [CORRECT]
- Fotu La
- Namika La

Explanation: Chang La is a high mountain pass in Ladakh that acts as the gateway to the Pangong Tso lake region, holding significant military importance for troop mobility toward the LAC.

Q199. The Line of Actual Control (LAC) is conceptually divided into which three main sectors by security analysts?

- Northern, Central, and Southern
- Western, Middle, and Eastern [CORRECT]
- Alpine, Sub-alpine, and Trans-Himalayan
- Kashmir, Himachal, and Arunachal sectors

Explanation: The LAC is traditionally divided into the Western sector (Ladakh/Aksai Chin), the Middle sector (Uttarakhand/Himachal Pradesh), and the Eastern sector (Arunachal Pradesh/Tibet).

Q200. Which military post on the Saltoro Ridge was the site of Naib Subedar Bana Singh's legendary Param Vir Chakra-winning assault in 1987?

- Bilafond La
- Gyong La
- **Quaid Post (Bana Post) [CORRECT]**
- Indira Col

Explanation: Quaid Post, later renamed Bana Post in honor of Naib Subedar Bana Singh, was a Pakistani post perched at 21,153 feet on a sheer ice cliff, captured by Indian troops in a daring assault.

Q201. Which pass connects the Kashmir Valley with the Ladakh region (Drass/Kargil sectors) and is vital for strategic reinforcement?

- **Zoji La [CORRECT]**
- Banihal Pass
- Pensi La
- Imis La

Explanation: Zoji La is a high mountain pass in the Himalayas connecting the Kashmir Valley to Leh in Ladakh, serving as a critical lifeline for military logistics and supplies.

Q202. What distinguishes the Line of Control (LoC) from the Line of Actual Control (LAC)?

- The LoC is delineated and demarcated on maps with military coordination, whereas the LAC is merely conceptual and disputed [CORRECT]
- The LAC is managed by the UN, while the LoC is bilateral
- The LoC separates India and China, while the LAC separates India and Pakistan
- There is no functional difference between them

Explanation: The LoC is a heavily militarized boundary resulting from the 1972 Simla Agreement with agreed-upon coordinates, whereas the LAC represents the lines where Indian and Chinese forces actually hold positions, with differing perceptions.

Q203. Which geographical feature serves as the northernmost extremity of Indian territory on the Siachen Muztagh?

- Karakoram Pass
- **Indira Col [CORRECT]**
- Point 5362
- Saser Kangri

Explanation: Indira Col is a mountain col situated on the Indira Ridge in the Siachen Muztagh of the Karakoram Range, marking the northernmost tip of India's territory.

Q204. Which mountain pass in the Zaskar Range connects the Suru Valley to the Zaskar Valley, holding tactical significance in the Kargil-Zaskar sector?

- **Pensi La [CORRECT]**
- Umasi La
- Zoji La
- Marbal Pass

Explanation: Pensi La is a mountain pass in Ladakh that connects the Suru Valley region to the isolated Zaskar Valley, serving as a key operational route for the Indian Army.

Q205. Why is the Saltoro Ridge considered a dominant tactical terrain feature in the Siachen conflict?

- It overlooks the glaciated approaches from the West (Pakistan) [CORRECT]

- It provides direct artillery dominance over the Aksai Chin highway
- It controls the headwaters of the Indus River inside Pakistan
- It connects directly to the plains of Punjab

Explanation: The Saltoro Ridge lies on the western side of the Siachen Glacier. Holding the heights of this ridge gives Indian troops commanding heights overlooking the valleys and approaches held by the Pakistan Army.

Q206. Which river valley saw intense military friction and clashes between Indian and Chinese forces along the LAC in May 2020?

- Nubra Valley
- Galwan Valley [CORRECT]
- Spiti Valley
- Suru Valley

Explanation: The Galwan Valley became the site of a major violent face-off between Indian and Chinese troops in June 2020, stemming from differing perceptions of the LAC and Chinese build-up.

■ Category: DEFENCE GK & CURRENT AFFAIRS

Q207. Which Indian Navy stealth destroyer was commissioned as the fourth ship of Project 15B?

- INS Visakhapatnam
- INS Mormugao
- INS Imphal [CORRECT]
- INS Surat

Explanation: INS Imphal is the fourth ship of Project 15B stealth guided-missile destroyers, commissioned into the Indian Navy.

Q208. Who assumed office as the Chief of the Integrated Defence Staff to the Chairman Chiefs of Staff Committee (CISC) in recent developments?

- Lt Gen V. S. Raju
- Air Marshal B. S. Dhanoa
- Lt Gen Nandan B. Pawar
- Lt Gen J. P. Mathew [CORRECT]

Explanation: Lt Gen J. P. Mathew has served in key strategic positions, contributing to jointness and integration among the three services.

Q209. What is the name of the indigenous, long-range subsonic cruise missile developed by the Aeronautical Development Establishment (ADE) of DRDO?

- BrahMos
- Nirbhay [CORRECT]
- Pralay
- Shauryah

Explanation: Nirbhay is India's first indigenous long-range subsonic cruise missile capable of loitering.

Q210. Which country is India's partner in the annual joint military exercise named 'Nomadic Elephant'?

- Kazakhstan
- Mongolia [CORRECT]
- Kyrgyzstan
- Oman

Explanation: Exercise Nomadic Elephant is a bilateral military training exercise conducted between the Indian Army and the Mongolian Army.

Q211. The 'Astra' missile, successfully integrated into Indian fighter jets, is classified as which type of weapon system?

- Surface-to-Surface ballistic missile
- **Beyond-Visual-Range (BVR) air-to-air missile [CORRECT]**
- Anti-tank guided missile
- Surface-to-air air defense missile

Explanation: Astra is an indigenous Beyond-Visual-Range air-to-air missile designed to be mounted on Sukhoi-30MKI and other aircraft.

Q212. What is the equivalent rank of a Colonel in the Indian Army within the Indian Air Force?

- Wing Commander
- **Group Captain [CORRECT]**
- Squadron Leader
- Air Commodore

Explanation: A Colonel in the Indian Army is equivalent in rank to a Group Captain in the Indian Air Force and a Captain in the Indian Navy.

Q213. The DRDO-developed advanced electronic warfare suite for naval warships is designated by what name?

- Akash
- **Shakti [CORRECT]**
- Varunastra
- Maareech

Explanation: Project Shakti is an Electronic Warfare system for capital ships of the Indian Navy to intercept and counter enemy radar threats.

Q214. Which defense manufacturing facility in India is tasked with producing the futuristic AK-203 assault rifles in collaboration with Russia?

- Advanced Weapons and Equipment India Limited, Kanpur
- **Korwa Ordnance Factory in Amethi [CORRECT]**
- Tiruchirappalli Ordnance Factory
- Ichapore Rifle Factory

Explanation: Indo-Russian Rifles Private Limited produces AK-203 rifles at the Korwa Ordnance Factory in Uttar Pradesh.

Q215. What is the primary mission of the Indian Navy's Project 75?

- Construction of indigenous aircraft carriers
- **Building six Scorpene-class conventional submarines [CORRECT]**
- Development of stealth destroyers
- Procurement of maritime patrol aircraft

Explanation: Project 75 involves the domestic construction of six Kalvari-class (Scorpene) submarines with French collaboration.

Q216. Which Indian security force is constitutionally and operationally tasked with guarding the Indo-China border along the Line of Actual Control (LAC)?

- Border Security Force (BSF)
- **Indo-Tibetan Border Police (ITBP) [CORRECT]**
- Sashastra Seema Bal (SSB)
- Assam Rifles

Explanation: ITBP is the specialized mountain-trained federal police force deployed along the high-altitude border with China.

Q217. What does the acronym 'LCH' stand for in the context of Indian military aviation?

- **Light Combat Helicopter [CORRECT]**
- Long-range Cargo Helicopter
- Low-altitude Combat Hovercraft
- Land Clearance Helicopter

Explanation: LCH 'Prachand' is an indigenous multi-role combat helicopter designed by HAL for high-altitude warfare.

Q218. Which nation hosts the multinational naval exercise 'MILAN', regularly organized by the Indian Navy?

- Australia
- **India [CORRECT]**
- Singapore
- Japan

Explanation: Exercise MILAN is a biennial multilateral naval exercise hosted by the Indian Navy, bringing together friendly foreign navies.

Q219. What is the name of India's first indigenous aircraft carrier commissioned into the Indian Navy?

- INS Vikramaditya
- **INS Vikrant [CORRECT]**
- INS Vishal
- INS Viraat

Explanation: INS Vikrant (IAC-1) was designed by the Warship Design Bureau and built at Cochin Shipyard.

Q220. Which specialized agency handles India's cyber security threats and coordinates cyber defense readiness for the armed forces?

- National Technical Research Organisation
- **Defence Cyber Agency [CORRECT]**
- CERT-In
- National Security Council Secretariat

Explanation: The Defence Cyber Agency is a tri-service command of the Indian Armed Forces tasked with handling cyber warfare and security.

Q221. What is the official motto of the National Cadet Corps (NCC)?

- Duty, Honor, Country
- **Unity and Discipline [CORRECT]**
- Service Before Self
- Valour and Wisdom

Explanation: The motto of the NCC, 'Ekta aur Anushasan' (Unity and Discipline), was adopted in 1980.

Q222. Which anti-tank guided missile (ATGM), successfully flight-tested by DRDO, features an imaging infrared seeker and is designed for infantry use?

- Nag
- Amogha
- **Manportable Anti-tank Guided Missile (MPATGM) [CORRECT]**
- Helina

Explanation: The MPATGM is a low-weight, fire-and-forget missile developed indigenously for infantry battalions.

Q223. What is the primary function of the C-295 aircraft recently inducted into the Indian Air Force?

- Strategic heavy lifting
- **Tactical transport and logistics [CORRECT]**
- Air-to-air refueling
- VIP travel only

Explanation: The C-295 transport aircraft is replacing the aging Avro fleet of the IAF to provide modern tactical airlift capability.

■ Category: FIRST AID AND HEALTH

Q224. What is the primary function of respiration in the human body?

- To circulate blood to the heart
- **To supply tissues and organs with oxygen [CORRECT]**
- To eliminate solid wastes from the body
- To regulate body temperature through sweating

Explanation: Respiration supplies the tissues and organs of the body with oxygen, which is essential for proper bodily functioning.

Q225. Which of the following conditions is defined as any interference with respiration producing irregularities in breathing?

- Insensibility
- **Asphyxia [CORRECT]**
- Delirium
- Coma

Explanation: Asphyxia occurs when anything interferes with respiration, leading to irregularities in breathing and oxygen deprivation.

Q226. In the general rules for the treatment of Asphyxia, how should the individual be positioned before giving mouth-to-mouth breathing?

- Lying on his belly with arms stretched
- Sitting upright with head tilted forward
- **Lying on his back, pressing the head backwards [CORRECT]**
- In a semi-recovery position on his side

Explanation: General rules state to lay the individual on his back, press the head backwards supporting the neck on your palm, and lift the tongue clear.

Q227. What is the recommended first aid procedure in case of choking for a small child?

- Lay the child flat on his back and press the chest
- **Hold him upside down and thump his back hard between the shoulder blades [CORRECT]**
- Give him warm water to drink immediately
- Perform the Holger-Nielson method of artificial respiration

Explanation: For a small child choking, the text specifies holding him upside down and thumping his back hard between the shoulder blades or encouraging vomiting.

Q228. During the treatment of an electric shock victim, what safety measure should the operator take before removing the casualty from contact?

- Wear wet cotton gloves
- **Stand on insulating material such as rubber-soled shoes or piles of newspapers [CORRECT]**
- Pour cold water on the electrical switch
- Hold onto a grounded iron rod

Explanation: The text advises standing on some insulating material such as rubber-soled shoes or boots or piles of newspapers to avoid getting shocked.

Q229. In the stages of unconsciousness, which stage describes a patient who responds to painful stimuli only (minimum response to maximum stimulus)?

- Ist Stage - Delirium
- IInd Stage
- **IIIrd Stage - Semi-Coma [CORRECT]**
- IVth Stage

Explanation: The IIIrd stage is defined as Semi-Coma where the patient responds to painful stimuli only.

Q230. Which of the following is NOT listed as a type of artificial respiration in the text?

- Holger-Nielson Method
- Schaefer's Method
- **Silvester's Method [CORRECT]**
- Mouth to Mouth Breathing

Explanation: The text lists three types of artificial respiration: Holger-Nielson Method, Schaefer's Method, and Mouth to Mouth Breathing.

Q231. In the Holger-Nielson Method of artificial respiration, what position must the casualty be placed in initially?

- **Prone position [CORRECT]**
- Supine position
- Recovery position
- Upright sitting position

Explanation: The text specifies that for the Holger-Nielson method, you must keep the casualty in a prone position.

Q232. In Movement 1 of the Holger-Nielson Method, how long does the pressure phase take and what does it cause?

- 1 second; inspiration
- **2 seconds; expiration [CORRECT]**
- 3 seconds; cardiac arrest
- 5 seconds; relaxation

Explanation: Movement 1 takes 2 seconds (counting one, two) and this pressure causes expiration.

Q233. In Schaefer's Method of artificial respiration, where does the operator kneel and place their hands?

- At the head; on the shoulders
- **At the side just below the hip joint; on the loins of the casualty [CORRECT]**

- At the feet; on the calves
- Over the chest; on the ribcage

Explanation: The operator kneels on both knees at the side of the casualty just below his hip joint and places hands on the loins of the casualty.

Q234. What is the recommended rate per minute for performing Schaefer's Method of artificial respiration?

- 10 times per minute
- **12 times per minute [CORRECT]**
- 16 times per minute
- 20 times per minute

Explanation: Schaefer's Method movements must be carried out smoothly and rhythmically taking 5 seconds each, which equates to 12 times per minute.

Q235. During Mouth-to-Mouth artificial respiration, what position should the casualty be in?

- Prone position
- **Supine position [CORRECT]**
- Sitting position
- Lateral recumbent position

Explanation: The text states for Mouth-to-Mouth breathing, the casualty should be in a supine position.

Q236. What is the frequency of breaths given during Mouth-to-Mouth artificial respiration according to the text?

- 6-8 times per minute
- **10-12 times per minute [CORRECT]**
- 15-20 times per minute
- 24 times per minute

Explanation: The text states to blow directly and slowly into the patient's mouth 10-12 times per minute.

Q237. How is a wound formally defined in the provided text?

- An infection of the subcutaneous layer caused by bacteria
- **A break in the continuity of the skin or muscles membrane caused by violence [CORRECT]**
- Internal bleeding resulting from blunt force trauma
- A swelling caused by the rupture of blood vessels

Explanation: A wound is defined as the break in continuity of the skin or muscles membrane, caused by violence.

Q238. Which type of wound is caused by sharp instruments like a knife or razor and features clean edges?

- Lacerated Wound
- **Inside Wound [CORRECT]**
- Contused Wound
- Puncture Wound

Explanation: An 'Inside Wound' is defined as a wound caused by sharp instruments like a knife or razor, having clean edges.

■ Category: MILITARY HISTORY

Q239. During the 1971 Indo-Pak War, what was the primary strategic objective of Operation Cactus Lily?

- Naval blockade of Karachi
- **Liberation of Bangladesh and defense on the Western front [CORRECT]**
- Air superiority over Lahore
- Capture of Skardu sector

Explanation: Operation Cactus Lily was the overarching codename for the Indian Armed Forces' military operations during the 1971 war.

Q240. Which Param Vir Chakra recipient famously fought to the last man and last round during the Battle of Rezang La in 1962?

- **Major Shaitan Singh [CORRECT]**
- Company Quartermaster Havildar Abdul Hamid
- Second Lieutenant Arun Khetarpal
- Flying Officer Nirmal Jit Singh Sekhon

Explanation: Major Shaitan Singh led Charlie Company of the 13 Kumaon Regiment at Rezang La and was posthumously awarded the Param Vir Chakra.

Q241. In the 1965 Indo-Pak War, the massive tank battle of Asal Uttar took place primarily in which sector?

- Sialkot sector
- Chamb sector
- **Khem Karan sector [CORRECT]**
- Haji Pir sector

Explanation: The Battle of Asal Uttar in September 1965 is famous for the destruction of Pakistan's Patton tanks by the Indian Army in the Khem Karan sector.

Q242. Who was the General Officer Commanding-in-Chief (GOC-in-C) of the Eastern Command during the 1971 Liberation War?

- **Lt Gen J. S. Aurora [CORRECT]**
- Lt Gen K. P. Candeth
- Field Marshal S. H. F. J. Manekshaw
- Lt Gen Sagat Singh

Explanation: Lt Gen Jagjit Singh Aurora accepted the unconditional surrender of Pakistani forces in Dhaka on December 16, 1971.

Q243. During the Kargil War (1999), what was the codename of the daring daytime and night assault by 2 Rajputs to capture the heavily fortified Tololing feature?

- **Operation Vijay [CORRECT]**
- Operation Safed Sagar
- Operation Bajrang
- Operation Vijay (Kargil sector specific assaults)

Explanation: While Operation Vijay was the overall umbrella name for the Kargil conflict, Tololing was a critical turning point captured by the 2 Rajputana Rifles.

Q244. Which Param Vir Chakra recipient is renowned as the youngest recipient of the medal, martyred during the Battle of Basantar in 1971?

- Lance Naik Albert Ekka
- Major Hoshiar Singh
- **Second Lieutenant Arun Khetarpal [CORRECT]**
- Naik Jadunath Singh

Explanation: 2nd Lt Arun Khetarpal displayed exceptional valor during the Battle of Basantar at the age of 21 and was awarded the PVC posthumously.

Q245. In the 1965 War, which pass in the Pir Panjal range was captured by Indian forces in a daring preemptive operation to block Pakistani infiltrators?

- Zoji La Pass
- **Haji Pir Pass [CORRECT]**
- Bani Hal Pass
- Khardung La

Explanation: The capture of Haji Pir Pass in August 1965 by the Indian Army under Major (later General) R. D. Bakshi was a major tactical triumph.

Q246. Who was the Chief of the Air Staff (CAS) of the Indian Air Force during the 1971 Indo-Pak War?

- **Air Chief Marshal P. C. Lal [CORRECT]**
- Air Chief Marshal Arjan Singh
- Air Chief Marshal O. P. Mehra
- Air Chief Marshal H. M. Carvalho

Explanation: ACM Pratap Chandra Lal led the Indian Air Force expertly during the 1971 war, achieving complete air dominance in the East.

Q247. During the 1999 Kargil War, Tiger Hill was recaptured by which distinguished infantry battalion?

- **18th Battalion, The Grenadiers [CORRECT]**
- 13th Battalion, The Jammu and Kashmir Rifles
- 8th Battalion, Sikh Regiment
- 1st Battalion, 11 Gorkha Rifles

Explanation: 18 Grenadiers, along with elements of 8 Sikh, fought a legendary battle to recapture the strategic heights of Tiger Hill.

Q248. Who was the first recipient of the Param Vir Chakra, awarded posthumously for his bravery at Badgam, Kashmir in November 1947?

- **Major Somnath Sharma [CORRECT]**
- Naik Jadunath Singh
- 2nd Lt Rama Raghoba Rane
- Company Havildar Major Piru Singh

Explanation: Major Somnath Sharma of 4 Kumaon Regiment laid down his life protecting Srinagar airport and became independent India's first PVC awardee.

Q249. In which historic battle did Havildar Abdul Hamid destroy multiple Pakistani Patton tanks using a recoilless gun mounted on a jeep?

- Battle of Longewala
- **Battle of Asal Uttar [CORRECT]**
- Battle of Basantar
- Battle of Burki

Explanation: CQMH Abdul Hamid was posthumously awarded the Param Vir Chakra for destroying enemy tanks at Asal Uttar in 1965.

Q250. During the 1971 war, the heroic defense of Longewala by a handful of Punjab Regiment soldiers supported by IAF Hunters was commanded by then Major:

- Major Kuldip Singh Chandpuri [CORRECT]
- Major General Ian Cardozo
- Major Ramaswamy Parameswaran
- Major Mohit Sharma

Explanation: Major Kuldip Singh Chandpuri held the post of Longewala overnight against an entire Pakistani armored brigade until air support arrived.

Q251. Which gallantry award is India's highest peacetime decoration for military valor, ranking above the Kirti Chakra?

- Ashok Chakra [CORRECT]
- Sarvottam Yudh Seva Medal
- Mahavir Chakra
- Shaurya Chakra

Explanation: The Ashok Chakra is India's highest military decoration awarded for valor, courageous action or self-sacrifice away from the battlefield.

Q252. In the context of the 1999 Kargil War, what was the primary objective of 'Operation Safed Sagar'?

- Naval strike on Gwadar port
- Deployment of the Indian Air Force in support of ground troops [CORRECT]
- Special forces parachute drop behind enemy lines
- Logistics supply through the Zoji La tunnel

Explanation: Operation Safed Sagar was the codename given to the Indian Air Force's role in the Kargil War, utilizing air power in high-altitude terrain.

Q253. Which Indian Army regiment traces its origins back to the Nair Brigade formed in the erstwhile Travancore State?

- Madras Regiment [CORRECT]
- Rajputana Rifles
- Mechanised Infantry
- The Sikh Regiment

Explanation: The Madras Regiment is one of the oldest infantry regiments of the Indian Army, with units originating from the Travancore Nair Brigade.

Q254. Who was the Chief of Army Staff during the 1965 Indo-Pak War?

- General K. M. Cariappa
- General P. N. Thapar
- General J. N. Chaudhuri [CORRECT]
- General K. S. Thimayya

Explanation: General Jayanto Nath Chaudhuri served as the Chief of the Army Staff during the 1965 war against Pakistan.

■ Category: NCC DISASTER MANAGEMENT

Q255. Immediately after an earthquake, what specific action should be taken regarding the use of light and switches?

- Turn on all electric switches to check power supply
- Do not smoke, do not light matches, and do not turn on switches due to potential gas leaks or short-circuits [CORRECT]

- Use a cigarette lighter to navigate dark rooms
- Immediately replace all fused light bulbs

Explanation: According to the culture of prevention after an earthquake, one must avoid smoking, lighting matches, or turning on switches to prevent explosions or fires caused by possible gas leaks or short-circuits.

Q256. What is recommended regarding water consumption from open containers immediately after an earthquake?

- Drink it directly without hesitation to stay hydrated
- Boil it for exactly 20 minutes before drinking
- **Do not drink water from open containers without having examined it and filtered it through a sieve, filter, or clean cloth [CORRECT]**
- Add chlorine tablets directly without filtering

Explanation: The textbook explicitly advises not to drink water from open containers after an earthquake without first examining and filtering it through a sieve, filter, or ordinary clean cloth.

Q257. When a cyclone storm hits and the roof of your house begins to lift, what action should you take?

- Close all windows tightly across the entire house
- **Open windows on the sheltered side of the house [CORRECT]**
- Abandon the house immediately regardless of outside conditions
- Climb onto the roof to weigh it down

Explanation: When the storm hits, if the roof begins to lift, instructions state to open windows on the sheltered side of the house.

Q258. During a flood warning, what precautionary measure must be taken regarding insecticides to prevent dangerous pollution?

- Spray them all outdoors before the water arrives
- **Move all insecticides out of reach of the water [CORRECT]**
- Mix them with floodwater to dilute them
- Bury them shallowly in the garden

Explanation: To prevent dangerous pollution during a flood, the text mandates moving all insecticides out of reach of the water.

Q259. What is essentially the primary purpose of the GOI-NCC partnership in disaster management?

- To allow NCC cadets to independently run state police departments
- **For NCC to respond in an organised manner, facilitating easier coordination with the Government of India, State Government, and District Administration [CORRECT]**
- To replace the fire service and medical personnel during major crises
- To handle international border security during natural calamities

Explanation: The text states that in the event of disaster, NCC should respond in an organised manner so that coordination with the GOI, State Government, and District Administration becomes easier, which is the purpose of the partnership.

Q260. According to the traffic control guidelines in disaster management, what major confusion is typically caused during a disaster?

- Failure of telecommunication satellites
- **Movement of men and transport moving out to secure areas and of over-zealous volunteers rushing in to help [CORRECT]**
- Lack of food supplies in local markets
- Sudden collapse of all bridge networks simultaneously

Explanation: Major confusion during a disaster is caused due to the movement of men and transport moving out to secure areas and over-zealous volunteers rushing in to help.

Q261. Which of the following is NOT listed as an objective of the traffic police during a disaster?

- To help in smooth handling of a disaster situation from law and order point of view
- To assist in evacuation of injured persons to nearby hospitals on priority
- **To manage international diplomatic relations and foreign aid distribution [CORRECT]**
- To ensure cordoning of the area to restrict movement of onlookers and other vehicular and pedestrian traffic

Explanation: Managing international diplomatic relations and foreign aid distribution is not an objective of traffic police; the other options are directly cited from the objectives of traffic police during a disaster.

Q262. Upon receiving information about a disaster, who is required to rush to the spot immediately with a quick reaction team?

- The Director-General of NCC
- **The concerned Dy SP [CORRECT]**
- The Chief Minister of the State
- The District Chief Medical Officer

Explanation: Under immediate action responsibilities, the text specifies that on receipt of information about a disaster, the Dy SP concerned shall rush to the spot immediately with his quick reaction team.

Q263. In what capacity can NCC cadets be employed during casualty management in disaster traffic control?

- As surgeons performing emergency operations
- **As pointsmen or liaison officers at hospitals, or accompanying casualties [CORRECT]**
- As drivers of heavy bulldozers
- As directors of hospital boards

Explanation: The textbook notes under Casualty Management that cadets can accompany the casualty or be employed as pointsmen or liaison officers at hospitals.

Q264. What specific task related to documenting the disaster can NCC cadets be employed to carry out for investigation purposes?

- **Videograph the entire scene of incident as early as possible [CORRECT]**
- File official police chargesheets in court
- Conduct forensic autopsies
- Intercept local radio broadcasts

Explanation: Under maintenance of records of incidents, the text mentions that cadets can be employed to videograph and carry out tasks in maintaining records to reconstruct the scene during investigation.

Q265. Why must cadets and NCC authorities coordinate and visit locations to maintain specific lists (such as vital installations and blood banks)?

- To prepare for upcoming NCC B and C certificate written examinations only
- **For it to be of use during disaster management [CORRECT]**
- To compile a tourist guidebook for the district
- To assess commercial property tax values for the state government

Explanation: The text explicitly states that details like lists of vital installations, hospitals, and licensed blood banks should be available and coordinated by cadets and NCC authorities 'for it to be of use during disaster management'.

Q266. What should be done regarding severely injured people immediately after an earthquake, according to the culture of prevention?

- Move them immediately to the nearest open field regardless of their condition
- **Do not move them unless they are in danger [CORRECT]**
- Give them alcoholic beverages to numb the pain
- Transport them on motorcycles without stabilization

Explanation: The textbook guides that if people are seriously injured, do not move them unless they are in danger.

Q267. When severe gales or storm force winds are forecast, what should be done with large windows?

- Remove them entirely from their frames and store them outdoors
- **Tape up large windows to prevent them from shattering [CORRECT]**
- Paint them black to block sunlight
- Leave them wide open to equalize air pressure

Explanation: Under cyclone precautions, it instructs to tape up large windows to prevent them from shattering when severe gales are forecast.

Q268. In disaster traffic control, what role can cadets play regarding emergency vehicles?

- Drive them as primary ambulance paramedics
- **Check and ensure that only emergency vehicles are permitted to the right of way [CORRECT]**
- Impound all emergency vehicles for security checks
- Repaint emergency vehicles with NCC markings

Explanation: The text states under Emergency Vehicle responsibilities that cadets can be employed to check and ensure that only emergency vehicles are permitted to the right of way.

Q269. Why must cadets participate in mock exercises organized by disaster management authorities?

- To compete for individual medals and trophies
- **To understand their role and ensure drawbacks noted are improved upon [CORRECT]**
- To fulfill mandatory parade ground attendance quotas for Republic Day Camp selection
- To test new military weapons systems in populated zones

Explanation: The miscellaneous points section highlights that cadets must participate in mock exercises to understand their role and drawbacks noted must be improved upon.

■ Category: NCC DISASTER MANAGEMENT & CIVIL DEFENCE

Q270. What is the approximate working duration limit of certain fire extinguishers that constitutes one of their primary disadvantages?

- 30 seconds to 1 minute
- **One to two minutes [CORRECT]**
- Three to five minutes
- Ten to fifteen minutes

Explanation: The text states that the use of these extinguishers is limited as the duration of working is approximately one to two minutes.

Q271. What is the minimum distance the water jet produced by a stirrup pump can hit the ground from the nozzle?

- 5 meters
- 7 meters

- 9 meters [CORRECT]
- 15 meters

Explanation: According to the text, the water jet produced by a stirrup pump can hit the ground at a distance not less than 9 meters from the nozzle.

Q272. What is the water consumption per minute when operating the spray of a stirrup pump?

- 1/2 gallon per minute
- 3/4 gallons per minute [CORRECT]
- 1 to 1-1/2 gallons per minute
- 2 gallons per minute

Explanation: The text specifies that the spray produced by the pump can reach 15 to 20 feet away with a water consumption of ¾ gallons per minute.

Q273. What are fire beaters primarily made of?

- Iron rods in circular shapes
- Wire net in a rectangular shape [CORRECT]
- Rubber sheeting on wooden frames
- Canvas cloth tied to steel bars

Explanation: The text states that beaters made of wire net in a rectangular shape are ideal for separating combustible material and extinguishing small fires.

Q274. How many members generally operate a stirrup pump under normal conditions?

- Two members
- Three members
- Four members [CORRECT]
- Six members

Explanation: The stirrup pump is generally operated by a team of four members, though in an emergency a team of two can operate it effectively.

Q275. What does the term 'Essential Services' signify in public administration and civil defence?

- Only military and paramilitary services
- Public utility services, public safety, or infrastructure maintenance necessary for community life [CORRECT]
- Commercial import and export enterprises exclusively
- Private sector corporate transport companies

Explanation: Essential services mean public utility services, public safety, or maintenance of infrastructure and services necessary for community life, the non-availability of which causes grave hardship.

Q276. At which administrative level is each district required to prepare contingency plans in advance to tackle likely disturbances in essential services?

- Village level
- District level [CORRECT]
- State capital level
- National disaster management directorate level

Explanation: The text notes that at the district level, each district is required to prepare in advance contingency plans to tackle likely disturbances in continuity of essential services.

Q277. In medical contingency planning, what specific immunization is planned for populations in relief camps?

- Immunization against tetanus only
- **Immunization to prevent spread of epidemics [CORRECT]**
- Immunization for chronic lifestyle diseases
- Preventive vaccination for industrial toxins

Explanation: Medical plans include the immunization of populations in relief camps to prevent the spread of epidemics.

Q278. Based on their training, in which capacity can NCC cadets assist at telephone exchanges during emergencies?

- As line engineers
- **As exchange operators [CORRECT]**
- As financial auditors
- As security guards exclusively

Explanation: The text outlines the role of cadets, stating they can assist in telephone exchanges as operators.

Q279. Which system involves passing messages regarding approaching and departing enemy aircraft from the Air Force to Regional, Divisional, and Sub-Divisional CD Control Centres?

- Internal Warning System
- **External Warning System [CORRECT]**
- Tactical Radar Grid
- Civil Defence Broadcast Network

Explanation: The collection and transmission of messages regarding approaching/departing enemy aircraft by Air Force through Regional, Divisional, and Sub-Divisional CD Control Centres constitutes the External Warning System.

Q280. What is the official designation of the 'Preliminary Caution' air raid message?

- **Air Raid Message-Yellow [CORRECT]**
- Air Raid Warning-Red
- Air Message-Green
- Air Message-White

Explanation: The preliminary caution received by a limited number of officials is called 'Air Raid Message-Yellow'.

Q281. When an 'Air Raid Warning-Red' is received, how long are sirens sounded and what is the specific sound pattern?

- Continuous siren for 5 minutes
- **Sirens sounded for two minutes consisting of a short blast followed by a long blast repeated at intervals of 3 seconds [CORRECT]**
- Intermittent pulsing tone for 1 minute
- Three long blasts separated by 10-second pauses

Explanation: The text states that on receipt of the Red warning, sirens are sounded for two minutes (a short blast followed by a long blast repeated at intervals of 3 seconds).

Q282. What does an 'Air Message-Green' (Raider Passed) indicate regarding siren sounds?

- Two short bursts of sound
- **A continuous siren for two minutes [CORRECT]**
- Alternating high and low pitch tones for 30 seconds
- No sirens are sounded

Explanation: The text states under 'Raider Passed' (Air Message-Green) that a continuous siren for two minutes is sounded.

Q283. To whom is the 'Cancel Caution' ('Air Message-White') exclusively passed?

- The general public via loudspeakers
- **Only to those who received the preliminary caution [CORRECT]**
- All local business owners
- International humanitarian observers

Explanation: The text specifies that the 'Air Message-White' (Cancel Caution) message is passed on to only those who received the preliminary caution.

Q284. Which specific qualifications enable NCC cadets to assist effectively in essential services like hospitals and first aid centres?

- **Qualifications in First aid, Home Nursing, Signals, leadership traits, and Civil Defence [CORRECT]**
- Advanced engineering degrees and weapon handling certificates
- Commercial pilot licenses and meteorological training
- Postal service management and diplomatic clearance

Explanation: The text explicitly states that being qualified in First aid, Home Nursing, Signals, and having developed leadership traits and learnt about Social Services and Civil Defence enable cadets to assist in these essential services.

■ Category: NCC DRILL

Q285. During 'Dahine Mur' (Right Turn), at what angle does the squad or individual turn on the right heel and left toe?

- 45 degrees
- **90 degrees [CORRECT]**
- 180 degrees
- 360 degrees

Explanation: According to the text, 'Dahine Mur' (Right Turn) involves turning 90 degrees right on the right heel and left toe.

Q286. What is the degree of turn executed during 'Pichhe Mur' (About Turn)?

- 45 degrees
- 90 degrees
- 130 degrees
- **180 degrees [CORRECT]**

Explanation: The text states that in 'Pichhe Mur' (About Turn), the individual turns 180 degrees, which is always made right about.

Q287. In inclining (adha dahine or adha baen mur), through what angle does the individual or squad turn?

- 30 degrees
- **45 degrees [CORRECT]**
- 60 degrees
- 90 degrees

Explanation: The text specifies that in inclining, the movement is the same as turning except that the individual or squad turns through 45 degrees only.

Q288. What is the command given for sizing a squad during drill formation?

- Teen line banao, tez chal
- **Lamba Dahine, Chhota Baen, ek line men - qadvar [CORRECT]**
- Khuli line-chal
- Dahine Saj

Explanation: Sizing is initiated by giving the word of command 'Lamba Dahine, Chhota Baen, ek line men - qadvar' (tallest on the right, shortest on the left in single rank-size).

Q289. When forming up in three ranks (Teen line banao, tez chal), what is the specified distance between the ranks?

- 15 inches
- 24 inches
- **30 inches [CORRECT]**
- One arm's length

Explanation: The text explicitly states there should be 30 inches between ranks and an interval of one arm's length between two cadets.

Q290. Under what condition will an NCC squad form up in 2 ranks instead of 3 ranks?

- Less than 10 cadets
- **Less than 8 cadets [CORRECT]**
- Less than 5 cadets
- Exactly 6 cadets

Explanation: The text mentions: 'Less than 8 cadets the squad will form up in 2 ranks. Less than 5 cadets the squad will form up in a single rank.'

Q291. What is the formation adjustment for the front and rear ranks during the 'Open Order March' (Khuli line-chal)?

- Front and rear ranks both take one full step forward
- **Front and rear ranks take one and half paces forward and to the rear respectively [CORRECT]**
- Front rank takes one full pace and rear rank stands fast
- All ranks take two full paces forward

Explanation: For Open Order, the front rank and rear rank take one and half paces forward and to the rear respectively while the centre rank stands fast.

Q292. When a squad or unit gets on parade, how is dressing taken up?

- By word of command only
- **Automatically without the word of command [CORRECT]**
- Upon the instructor's whistle
- By the right marker's signal

Explanation: The text outlines under dressing rules that when a squad or unit gets on parade, dressing will be taken up automatically without the word of command.

Q293. During 'Dahine Saj' (Right dress), what action does each man in the front rank take with his right arm?

- Extends arm straight forward
- **Extends right arm first clenched, back of the hand uppermost, knuckles touching shoulder seam of the man on the right [CORRECT]**
- Places hands on hips
- Salutes the right-hand man

Explanation: The text details that men in the front rank will extend the right arm first clenched, back of the hand uppermost, knuckles touching the shoulder seam of the man on the right.

Q294. In 'Dahine Saj' (Right dress), how far does the squad step forward initially?

- 10 inches forward with the left foot
- **15 inches forward with the left foot [CORRECT]**
- 30 inches forward with the right foot
- One full step forward

Explanation: The text states that the squad takes a short sharp pace 15 inches forward with the left foot during Right dress.

Q295. During 'Salute to the Front' (Samne Salute - Two), where should the forefinger tip of the right hand be positioned?

- Touching the bridge of the nose
- **One inch above the right eye [CORRECT]**
- Level with the top of the cap
- Touching the right ear lobe

Explanation: In 'Squad do' for the salute to the front, the elbow is bent until the forefinger tip of the right hand is one inch above the right eye.

Q296. What is the correct movement when returning to the position of attention from a salute ('Squad teen')?

- Drop the arm straight down to the side immediately
- **Cut the shortest way to the side by dropping the elbow to the front, fingers curled up on the way down [CORRECT]**
- Bring the hand down past the chest in a sweeping motion
- Lower the hand along the trouser seam slowly

Explanation: The text specifies returning to the position of attention by cutting the shortest way to the side by dropping the elbow to the front, with fingers curled up on the way down.

Q297. In the command 'Darshak' (Marker) during getting on parade, how many paces does the right marker march straight to his front in quick time?

- 10 paces
- 12 paces
- **15 paces [CORRECT]**
- 30 paces

Explanation: The text states that upon the command 'Darshak' (Marker), the right marker comes to attention, marches in quick time 15 paces straight to his front, halts, and stands at ease.

Q298. During 'Parade-Par' (Get on Parade), after coming to attention, how many paces does the squad march forward before halting and dressing automatically?

- 10 paces
- 12 paces
- **15th pace [CORRECT]**
- 30th pace

Explanation: The text specifies that the squad marches forward to their front and halts on the 15th pace, dressing automatically.

Q299. When executing a 'Salute to the Right' (Dahine ko Salute), how does the cadet position his head and eyes?

- Turned 45 degrees to the right
- **Square off to the right, looking along the palm of the hand [CORRECT]**
- Looking straight to the front while moving only the eyes
- Turned completely backward over the right shoulder

Explanation: The text states the cadet turns his head and eyes square off to the right and shifts the head so that the right eye can just look along the palm of the hand.

Q300. During the 'Dahine Mur' (Right Turn), at what angle does the squad or individual turn?

- 45 degrees
- **90 degrees [CORRECT]**
- 180 degrees
- 360 degrees

Explanation: According to the text, 'Dahine Mur' involves turning 90 degrees right on the right heel and left toe.

Q301. What is the angle of turn executed during 'Pichhe Mur' (About Turn)?

- 45 degrees
- 90 degrees
- **180 degrees [CORRECT]**
- 135 degrees

Explanation: The text states that 'Pichhe Mur' requires turning 180 degrees, and the about turn is always made right about.

Q302. What word of command is given for initial sizing where the tallest cadet is on the right and shortest on the left in a single rank?

- Teen line banao, tez chal
- **Lamba Dahine, Chhota Baen, ek line men - qadvar [CORRECT]**
- Khuli line-chal
- Squad dahine se ginti kar

Explanation: Sizing is done by giving the word of command 'Lamba Dahine, Chhota Baen, ek line men - qadvar'.

Q303. When forming up in three ranks ('Teen line banao, tez chal'), what is the distance maintained between ranks?

- 15 inches
- 24 inches
- **30 inches [CORRECT]**
- One arm's length

Explanation: The text states there will be 30 inches between ranks and an interval of one arm's length between two cadets.

Q304. Under what condition will a squad form up in 2 ranks instead of 3 ranks?

- Less than 5 cadets
- **Less than 8 cadets [CORRECT]**
- Exactly 8 cadets
- More than 10 cadets

Explanation: The text explicitly mentions: 'Less than 8 cadets the squad will form up in 2 ranks.'

Q305. What is the distance between persons when a squad forms up in a single rank or two ranks (where arm interval does not apply)?

- 15 inches
- **24 inches [CORRECT]**
- 30 inches
- 36 inches

Explanation: The text states that when forming in two ranks or single rank, distance between the persons will be 24 inches.

Q306. During the 'Open Order March' (Khuli line-chal), how does the front rank move?

- One full step forward only
- One and a half paces forward
- **Shoot right foot forward one full step, left foot one short step, and lift right to bring feet together [CORRECT]**
- Take two paces forward

Explanation: The text states the front rank shoots the right foot forward one full step and left foot one short step and lifts right to bring the two feet together.

Q307. During dressing by word of command ('Dahine Saj'), what size pace does the squad take forward with the left foot?

- One full step (30 inches)
- **A short sharp pace 15 inches [CORRECT]**
- 24 inches
- One and a half paces

Explanation: The text notes that the squad takes a short sharp pace 15 inches forward with the left foot during right dress.

Q308. In 'Salute to the Front - Two' (Squad do), where should the forefinger tip of the right hand be positioned relative to the right eye?

- Touching the right eyebrow
- **One inch above the right eye [CORRECT]**
- Two inches above the right eye
- Level with the bridge of the nose

Explanation: The text states: 'bend elbow until the fore finger tip on the right hand is one inch above the right eye.'

Q309. During the salute to the front, what is the position of the palm of the hand in movement 'Squad do'?

- Facing inward
- Facing downward
- **Vertical [CORRECT]**
- Facing the ground

Explanation: One of the key points to note under 'Squad do' is that the palm of the hand is vertical.

Q310. How is the hand returned to the position of attention during the third movement of the salute to the front ('Squad teen')?

- Dropped straight down by the side
- **Cut the shortest way to the side by dropping the elbow to the front, fingers curled up on the way down [CORRECT]**
- Raised slightly before dropping

- Swung backward then forward

Explanation: The text explains: 'Return to position of attention cut the shortest way to the side by dropping the elbow to the front, fingers curled up on the way down.'

Q311. When getting on parade, on the command 'Darshak' (Marker), how many paces does the right marker march straight to his front in quick time?

- 10 paces
- 12 paces
- **15 paces [CORRECT]**
- 20 paces

Explanation: The text specifies that the right marker marches in quick time 15 paces straight to his front, halts and stands at ease.

Q312. When the command 'Parade-Par' (Get on Parade) is given, after marching forward to their front, on which pace does the squad halt?

- 10th pace
- 12th pace
- **15th pace [CORRECT]**
- 20th pace

Explanation: The text states: 'The squad marches forward to their front, halt on the 15th pace, dress automatically, look to the front and stand at ease.'

Q313. How is the rifle carried out when getting on parade with a rifle according to Section-2?

- Bagal Shastr (Shoulder arms)
- **Tol Shashtra (Short trail) [CORRECT]**
- Salami Shastr (Present arms)
- Baju Shastr (Order arms)

Explanation: According to Section-2, Getting on Parade, when getting on parade with a rifle, it is carried out at 'Tol Shashtra' (short trail).

Q314. During dressing (Sajna) with rifles, which arm does the front rank raise instead of the right arm?

- **Left arm [CORRECT]**
- Right arm
- Both arms
- No arm is raised

Explanation: Section-2 states that in dressing, the front rank raises the left arm instead of the right arm.

Q315. What is the procedure for dismissing a squad with rifles?

- The procedure is as for Foot Drill, and rifles remain at order.
- **The procedure is as for Foot Drill, but rifles will be shouldered before the squad is dismissed. [CORRECT]**
- The squad is dismissed immediately without any rifle movement.
- Rifles are grounded before the squad is dismissed.

Explanation: Section-3 specifies that the procedure for dismissing is as for Foot Drill, but rifles will be shouldered before the squad is dismissed.

Q316. In 'Bhumi Shastr-ek' (Ground arms one), how should the rifle be placed on the ground?

- Magazine to the left, muzzle pointing to the rear
- **Magazine to the right, muzzle pointing straight to the front [CORRECT]**

- Magazine facing upwards, muzzle pointing to the left
- Horizontally across both feet

Explanation: Section-4 states that on 'Bhumi Shastr-ek', lay the rifle gently on the ground at the right side, magazine to the right, muzzle pointing straight to the front.

Q317. During 'Uthao Shastr –ek' (Take up arms one), what is the first movement performed?

- Stand at ease
- Bend down as in the first movement of ground arms and seize the rifle [CORRECT]
- Throw the rifle perpendicularly up
- Raise the left arm across the body

Explanation: Section-4 under Take Up Arms states to bend down as in the first movement of the ground arms, and seize the rifle with the right hand in the original position by the right toe.

Q318. What is the Hindustani term used for Shoulder Arms in the text?

- Salami Shastr
- Bajus Shastr
- Bagal Shast [CORRECT]
- Bhumi Shastr

Explanation: Section-5 lists Shoulder Arms as '(Bagal Shast)'.

Q319. In 'Bagal Shast – ek' (Shoulder arms one), where is the barrel resting?

- In the hollow of the left shoulder
- In the hollow of the right shoulder [CORRECT]
- Against the right cheek
- Against the waist belt

Explanation: Section-5 states that during Shoulder Arms one, the barrel rests in the hollow of the right shoulder.

Q320. During 'Bazu Shast – ek' (Order arms one), where does the left hand hold the rifle?

- Below the bayonet stand [CORRECT]
- At the small of the butt
- At the point of balance
- At the pistol grip

Explanation: Section-5 states: 'Bazu Shast (r) –ek' (Order arms one). Hold the barrel below the bayonet stand with left hand.

Q321. On 'Squad teen' of Order Arms from the shoulder, what action is performed with the left hand and the butt of the rifle?

- The left hand is raised to the hand guard and butt is held firmly.
- The left hand is cut in attention position and the butt of the rifle is dropped on the ground. [CORRECT]
- The left hand seizes the pistol grip while the butt rests on the right foot.
- The left hand is placed behind the back.

Explanation: Section-5 states: On 'Squad teen' cut left hand in attention position and drop butt of the rifle on ground.

Q322. In 'Salami Shastr – ek' (Present arms one), where do the right and left hands catch the rifle?

- Left hand at the pistol grip, right hand at the point of balance
- Left hand at the point of balance, right hand at the small of the butt [CORRECT]

- Left hand below the bayonet stand, right hand at the muzzle
- Left hand at the hand guard, right hand at the magazine

Explanation: Section-6 states: catching it with the left hand at the point of balance... and the right hand at the small of the butt.

Q323. On 'Squad Teen' of Present Arms, where should the hollow of the right foot be placed?

- Against the right toe
- **Against the left heel [CORRECT]**
- Forward parallel to the right toe
- Behind the right heel

Explanation: Section-6 states: 'at the same time place the hollow of the right foot against the left heel both knees straight.'

Q324. When saluting with the rifle at the halt, where does the left hand strike?

- The bayonet stand
- **The hand guard [CORRECT]**
- The pistol grip
- The small of the butt

Explanation: Section-7 states: 'Strike the hand guard with palm of the hand so that the knuckle of the thumb is parallel to the outer edge of the handguard'.

Q325. When marching and saluting with a rifle, on which pace should the salute be given?

- The first pace before reaching the officer
- The second pace before reaching the officer
- **The third pace before reaching the officer [CORRECT]**
- Directly upon passing the officer

Explanation: Section-7 states: 'The salute will be given on the third pace before reaching the officer and hand cut away and head turned to the front on the third pace after passing him.'

Q326. During a short trail, about how high is the butt of the rifle raised from the ground?

- About half an inch
- **About one inch [CORRECT]**
- About two inches
- About three inches

Explanation: Section-8 states: 'Slightly bend the right arm to raise the butt of the rifle about one inch from the ground.'

Q327. On the command 'Tol shastr(r)' (Trail arms), how is the rifle held?

- Perpendicularly up the right side
- **Horizontally, muzzle pointing to the front and magazine underneath, arm straight [CORRECT]**
- Slanting across the body with the left hand at the point of balance
- Resting against the right shoulder with the barrel in the hollow

Explanation: Section-8 states: 'catching rifle at the point of balance, back of the hand to the right, arm straight so that the rifle is horizontal, muzzle pointing to the front and magazine underneath.'

■ Category: NCC DRILL MEASUREMENTS

Q328. What is the length of pace and number of paces per minute for 'Quick time' marching?

- 30 inches, 70 paces per minute
- 40 inches, 180 paces per minute
- **30 inches, 120 paces per minute [CORRECT]**
- 33 inches, 120 paces per minute

Explanation: Under Section-5, Length of Pace and Time of Marching table, Quick time is specified as a length of pace of 30 inches and 120 paces per minute.

Q329. What is the specific length of pace for 'Double time'?

- 30 inches
- 33 inches
- 21 inches
- **40 inches [CORRECT]**

Explanation: The table in Section-5 lists the length of pace for Double time as 40 inches with 180 paces per minute.

■ Category: NCC DRILL REGULATIONS

Q330. What is the maximum number of paces ordered to step forward or to the rear?

- Two paces
- **Three paces [CORRECT]**
- Four paces
- Five paces

Explanation: According to Section 9, paragraph 3(c), the maximum number of paces ordered to step forward or rear will be three.

Q331. When taking a pace forward or to the rear, what is the length of a full pace if more than one pace is adopted?

- 15 inches
- 24 inches
- **30 inches [CORRECT]**
- 36 inches

Explanation: Section 9, paragraph 3(b) states that if more than one pace is ordered, normal marching is adopted, stepping a full pace of 30 inches.

Q332. What is the command given to move forward when quick marking time?

- Squad tham
- Tez qadam
- Qadam tal
- **Age barh [CORRECT]**

Explanation: According to Section 9, paragraph 5, 'Age barh' (forward) is the word of command to move forward when quick marking time.

Q333. When taking a short pace while transitioning to mark time from quick marching, what is the length of the pace taken with the right foot?

- 12 inches
- **15 inches [CORRECT]**
- 20 inches

- 30 inches

Explanation: Section 9, paragraph 4 states that you take a short pace of 15 inches with the right foot and begin the marking time with the left foot.

Q334. During the changing step in quick time by numbers, how many counts/steps are involved in the official description provided?

- Two steps
- **Three steps [CORRECT]**
- Four steps
- Five steps

Explanation: Section 9, paragraph 6 details 'Squad ek', 'Squad Do', and 'Squad Teen', making a total of three distinct counts/steps for changing step.

Q335. In the process of making a squad while standing in threes, how many steps does the first cadet (No 1 file) take ahead after the command 'No 1- file slow march from the front'?

- 2 steps
- **3 steps [CORRECT]**
- 5 steps
- 7 steps

Explanation: Section 11, paragraph 2 states that the cadet on the right side will take 3-steps ahead and halt.

Q336. In the formation of squad from the front, how many steps does the No 2 file take?

- 3 steps
- **5 steps [CORRECT]**
- 7 steps
- 9 steps

Explanation: Section 11, paragraph 2 explains that the next cadet (No 2 file) will take 5 steps, followed by No 3 file who takes 7 steps, and No 4 file who takes 9 steps.

Q337. What is the purpose of forming a squad as mentioned in the general rules of squad drill?

- To increase saluting precision
- **To change the formation of the squad or to conserve space [CORRECT]**
- To prepare for weapon firing
- To inspect rifle barrels

Explanation: Section 11, paragraph 1 states that forming of squad is done to change the formation of the squad or to conserve space.

Q338. During a 'Dahine Mur' (Right Turn), through what angle is the squad turned?

- 45 degrees
- **90 degrees [CORRECT]**
- 180 degrees
- 360 degrees

Explanation: According to rule 4 under Turning, 'Dahine Mur' involves turning 90 degrees right on the right heel and left toe.

Q339. What is the degree of turn executed during 'Adha Dahine Mur' or 'Adha Baen Mur' (Inclining)?

- **45 degrees [CORRECT]**
- 90 degrees

- 130 degrees
- 180 degrees

Explanation: Rule 6 under Inclining states that the individual or squad turns through 45 degrees only.

Q340. How many ranks are formed if a squad consists of less than 8 cadets but 5 or more cadets?

- Single rank
- **Two ranks [CORRECT]**
- Three ranks
- Four ranks

Explanation: Rule 4 under Sizing and Forming specifies that for less than 8 cadets the squad will form up in 2 ranks, and less than 5 in a single rank.

Q341. What is the distance maintained between ranks when forming up in three ranks ('Teen line banao, tez chal')?

- 15 inches
- 24 inches
- **30 inches [CORRECT]**
- One arm's length

Explanation: Rule 4 states there should be 30 inches between ranks and an interval of one arm's length between two cadets.

Q342. In Open Order March ('Khuli line-chal'), what movements does the front rank make?

- One full step forward and one short step back
- One and a half paces forward
- **One full step forward, one short step, and bring feet together [CORRECT]**
- Two paces forward

Explanation: Rule 7 states the front rank shoots the right foot forward one full step and left foot one short step and lifts right to bring the two feet together.

Q343. During 'Dahine Saj' (Right Dress), what is the length of the short sharp pace taken forward by the squad with the left foot?

- 12 inches
- **15 inches [CORRECT]**
- 24 inches
- 30 inches

Explanation: Rule 8(d) on Dressing specifies that the squad takes a short sharp pace 15 inches forward with the left foot.

Q344. When executing 'Dahine Saj' (Right Dress), how do men in the front rank extend their right arm?

- Palm uppermost with fingers open
- First clenched, back of hand uppermost, knuckles touching shoulder seam of the man on the right
- Hand resting on the hip
- Straight out parallel to the ground without clenching

Explanation: Rule 8(d) outlines that men in the front rank extend the right arm first clenched, back of the hand uppermost, knuckles touching the shoulder seam of the man on the right.

Q345. In 'Samne Salute' (Salute to the Front), what is the exact position of the forefinger tip of the right hand in 'Squad do' (Squad two)?

- Touching the right eyebrow
- **One inch above the right eye [CORRECT]**
- Level with the top of the cap
- Two inches above the right ear

Explanation: Rule 3 under Salute to the Front states that the elbow is bent until the forefinger tip on the right hand is one inch above the right eye.

Q346. What is the command given for sizing a squad with the tallest on the right and shortest on the left in a single rank?

- **'Lamba Dahine, Chhota Baen, ek line men - qadvar' [CORRECT]**
- 'Teen line banao, tez chal'
- 'Khuli line-chal'
- 'Dahina cadet khara rahe'

Explanation: Rule 1 under Sizing and Forming gives the exact command: 'Lamba Dahine, Chhota Baen, ek line men - qadvar'.

Q347. During the Open Order movement, what actions do the front and rear ranks take respectively?

- Both take one pace forward
- **Front and rear ranks take one and half paces forward and to the rear respectively [CORRECT]**
- Centre and rear ranks take one pace forward
- Front rank stands fast, rear rank takes two paces back

Explanation: Rule 6 under Open and Close Order March states the front rank and rear rank take one and half paces forward and to the rear respectively while the centre rank stands fast.

Q348. In 'Salute to the Front - Squad three', how does the hand return to the position of attention?

- Raised upwards and then dropped
- **Cut the shortest way to the side by dropping the elbow to the front, fingers curled up [CORRECT]**
- Straight down the side of the thigh
- Moved backwards then down

Explanation: Rule 4 under Salute to the Front states the hand returns by cutting the shortest way to the side by dropping the elbow to the front, fingers curled up on the way down.

Q349. When forming three ranks, how do the even numbers position themselves relative to the odd numbers?

- In front of the odd numbers
- **Following behind the odd number [CORRECT]**
- To the immediate right of the odd number
- Interspersed randomly

Explanation: Rule 3 under Sizing and Forming notes that the squad forms three ranks with even numbers following behind the odd number.

Q350. What is the direction and degree of 'Pichhe Mur' (About Turn)?

- 90 degrees left about
- 90 degrees right about
- **180 degrees, always made right about [CORRECT]**
- 360 degrees rotation

Explanation: Rule 5 under Turning specifies: 'Turn 180 degrees, bracing the legs and maintaining the balance by locking the thighs together. The about turn is always made right about.'

Q351. What action is taken immediately on the command 'Visarjan' (Dismiss) when an officer or JCO is present on parade?

- Turn to the left, salute, pause, and step off
- **Turn to the right, salute, pause, and step off [CORRECT]**
- Turn about, salute, pause, and step off
- Break off in quick time without saluting

Explanation: According to Section 5, paragraph 9, 'Visarjan' (Dismiss) requires turning to the right, saluting (if an officer/JCO is present), pausing, and then stepping off with the squad in close order.

Q352. How does 'Line Tor' (Falling out) differ primarily from 'Visarjan' (Dismiss)?

- Salute is given and cadets leave the parade ground entirely
- **Salute is not given and cadets do not leave the vicinity of their place of parade [CORRECT]**
- Cadets double time away from the parade square
- It signifies the complete termination of the parade

Explanation: Paragraph 10 specifies that 'Line Tor' does not signify the end of the parade, no salute is given, and cadets must not leave the vicinity of their place of parade or line of march.

Q353. During Quick Time marching, on which successive beats of paces is the command 'Tez Chal' (Quick March) given?

- 'Quick' on the right foot, 'March' on the left foot
- **'Quick' on the left foot, 'March' on the right foot [CORRECT]**
- 'Quick' on both feet simultaneously
- 'Quick' and 'March' both given when the right foot passes the left

Explanation: Paragraph 3 states that the word of command is given on successive beats: 'Quick' on the left foot, 'March' on the right foot.

Q354. When executing the 'Squad-tham' (Squad halt) command in quick time, what is the length of the final completing pace taken with the left foot?

- 12 inches
- **15 inches [CORRECT]**
- 30 inches
- 40 inches

Explanation: Paragraph 6 explains that as the right foot comes to the ground, you complete a short pace of 15 inches with the left foot before bringing the right foot in sharply.

Q355. In Slow March, what is the correct handling of the hands?

- Swung naturally as high as shoulder level
- Clenched fists held tightly across the chest
- **Hands will remain by the side of the body as in attention position [CORRECT]**
- Left hand forward, right hand back with elbows locked

Explanation: Paragraph 8 states that during a slow march, hands will remain by the side of the body as in the attention position.

Q356. During 'Wheeling' in single file or threes, what is the diameter of the circle on which the inner man wheels?

- Two feet
- Three feet
- **Four feet [CORRECT]**

- Six feet

Explanation: Section-6, paragraph 11 states that the inner man wheels on the circumference of a circle four feet in diameter.

Q357. When passing an officer while marching, at what exact interval must a cadet salute and lower their hand?

- Salute on the first pace before and lower on the first pace after
- Salute on the second pace before and lower on the second pace after
- **Salute on the third pace before and lower on the third pace after [CORRECT]**
- Salute on the fifth pace before and lower on the fifth pace after

Explanation: Section-7, paragraph 2 dictates that when passing an officer, cadets must salute on the third pace before reaching him and lower the hand on the third pace after passing him.

Q358. In saluting to the flank by numbers ('Saluting by numbers salute to the right-one'), on which foot's contact is the word of command given?

- Right foot touches the ground
- **Left foot touches the ground [CORRECT]**
- Both heels clicking together
- Left foot passing the right

Explanation: Section-7, paragraph 1(a) specifies that the command 'Ginti se Salute- dahine salute ek' is given as the left foot touches the ground.

Q359. During the execution of saluting to the flank by numbers, on which count/step does the squad shout 'UP'?

- When the right arm is raised
- **As the left foot comes to the ground [CORRECT]**
- When the right foot passes the left
- At the final 'Down' command

Explanation: Section-7, paragraph 1(a) notes: 'As the left foot comes to the ground, the squad shouts UP'.

Q360. In 'Judging the time' for saluting to the right while marching, on which pace is the hand cut away?

- Third pace
- Fourth pace
- Fifth pace
- **Sixth pace [CORRECT]**

Explanation: Section-7, paragraph 1(e) states that cadets come up to the salute when the left foot touches the ground and cut the hand away on the sixth pace (right foot).

Q361. What is the standardized length of a side pace ('Dahine Ya Baen Bazu Chal')?

- **12 inches [CORRECT]**
- 15 inches
- 30 inches
- 33 inches

Explanation: Section-8, paragraph 1 states that the side pace is 12 inches and is used to move the squad not more than 12 paces to a flank.

Q362. What is the maximum number of paces specified for continuous movement when executing a side pace before being halted?

- Up to two only
- **Up to four only [CORRECT]**
- Up to six only
- Up to twelve only

Explanation: Section-8, paragraph 2 specifies to 'Specify the exact number of paces (up to four only) the squad continues moving until halted'.

Q363. When executing 'Turning by numbers, left turn one' ('Ginti se murna-baen mur-ek'), where is the right foot positioned?

- 12 inches to the rear with toe pointed down
- 15 inches to the rear with heel raised
- **30 inches to the rear, heel raised [CORRECT]**
- Brought sharply to the left foot in attention position

Explanation: Section-6, paragraph 1 states the cadet freezes with the left foot forward flat on the ground, the right foot 30 inches to the rear, heel raised, and both legs braced.

Q364. When taking 'pace forward' and to the rear, what kind of time is always used?

- Slow time
- **Quick time [CORRECT]**
- Double time
- Mark time

Explanation: The text explicitly states that 'Pace forward' and to the rear are always taken in quick time.

Q365. When marking time from quick marching, what is the length of the short pace taken with the right foot as the command 'Qadam Tal' is executed?

- 10 inches
- 12 inches
- **15 inches [CORRECT]**
- 30 inches

Explanation: Text states: Take short pace of 15 inches with right foot and begin the marking time with the left foot.

Q366. During the process of 'Changing step' in quick time by numbers, on 'Squad Do' (Squad two), how is the left foot placed?

- With the heel 30 inches in front
- **Flat on the ground with the hollow in the heel of the left foot [CORRECT]**
- Perpendicular to the ground
- At a 45-degree angle

Explanation: Section 9 'Changing Step' clause (b) specifies placing it flat on the ground with the hollow in the heel of the left foot.

Q367. In changing step, the procedure will only be taught with which foot leading?

- Right foot leading
- **Left foot leading [CORRECT]**
- Either foot interchangeably
- Both feet simultaneously

Explanation: Section 9, clause 6(d) notes that changing step will only be taught with the left foot leading.

Q368. What is the primary purpose of forming a squad as mentioned in Section 11?

- To increase marching speed
- **To change the formation of the squad or to conserve space [CORRECT]**
- To prepare for weapon firing
- To execute ceremonial salutes

Explanation: Section 11 General states forming of squad is done to change the formation or to conserve space.

Q369. When making a squad while standing in threes using 'halt, make left to left squad', what does the cadet on the right side do?

- Takes 3 steps ahead
- Turns half left
- **Stand still [CORRECT]**
- Takes a 15-inch pace

Explanation: The text states that the cadet on the right side will stand still while the rest of the squad moves left.

Q370. In arms drill at the position of Savdhan (Attention), where is the magazine of the rifle positioned?

- To the rear
- To the left
- **To the front [CORRECT]**
- To the right

Explanation: Section 1 on Attention specifies that the butt of the rifle is flat on the ground with the magazine to the front.

Q371. When executing 'Visharam' (Stand-at-Ease) with a rifle, how far apart should the feet be?

- About 6 inches apart
- **About 12 inches apart [CORRECT]**
- About 18 inches apart
- About 30 inches apart

Explanation: Section 1 (Visharam) mentions carrying the left leg to the left so that the feet are about 12 inches apart.

Q372. During 'Aram Se' (Stand Easy) with arms, where must the right hand be forced?

- **To the nose cap of the rifle [CORRECT]**
- To the magazine
- To the small of the butt
- To the sling

Explanation: Section 1, clause 3 states: Force the right hand to the nose cap of the rifle, the fingers and thumb curling round the rifle.

Q373. What command is given to transition back to 'Visharam' (Stand-at-Ease) from 'Aram Se' (Stand Easy)?

- Squad Savdhan
- **Squad [CORRECT]**
- Squad Tham
- Qadam Tal

Explanation: Text states: On word of command 'Squad', force the right hand down the rifle to the correct position of stand-at-ease.

Q374. What is the full pace length mentioned for normal marching when taking more than one pace forward or to the rear?

- 15 inches
- 21 inches
- **30 inches [CORRECT]**
- 36 inches

Explanation: Section on Pace Forward and to the Rear states: stepping a full pace of 30 inches.

Q375. When quick marking time ('Tez qadam Tal') from a halt, how should the top of the thigh be positioned relative to the ground?

- Perpendicular
- At a 45-degree angle
- **Parallel [CORRECT]**
- Touching the ground

Explanation: Section 9 specifies to raise the left knee and top of the thigh parallel with the ground.

Q376. On the command 'Tham' (halt) while marking time, what action is taken with the right foot?

- **Brought down sharply and firmly to resume position of attention [CORRECT]**
- Shot forward 30 inches
- Taken 15 inches to the right
- Lifted parallel to the ground

Explanation: Section 9, clause 3 states: bring the right foot down sharply and firmly to resume the position of attention.

Q377. In the position of Savdhan (Attention) with a rifle, how should the thumb of the right hand be placed?

- On top of the muzzle
- **On the left of the rifle and touching the left fingers together [CORRECT]**
- Behind the small of the butt
- Curled around the nose cap

Explanation: Section 1 on Attention specifies 'thumb on the left of the rifle and touching the left fingers together slanting towards the ground'.

■ Category: NCC DRILL SYLLABUS

Q378. How is the rifle carried out when getting on parade with a rifle?

- Bagal Shastr (Shoulder arms)
- **Tol Shashtra (Short trail) [CORRECT]**
- Baji Shastr (Order arms)
- Salami Shastr (Present arms)

Explanation: According to Section-2, when getting on parade with a rifle, it is carried out at 'Tol Shashtra' (short trail).

Q379. During dressing (Sajna) with rifles, which rank raises the left arm instead of the right arm?

- Rear rank
- **Front rank [CORRECT]**
- Both ranks
- Middle rank

Explanation: Section-2 specifies that in dressing, the front rank raises the left arm instead of the right arm.

Q380. In 'Bhumi Shastr-ek' (Ground arms one), where should the magazine and muzzle be positioned?

- Magazine to the left, muzzle pointing to the rear
- **Magazine to the right, muzzle pointing straight to the front [CORRECT]**
- Magazine facing up, muzzle pointing to the side
- Magazine to the rear, muzzle pointing upward

Explanation: Section-4 states to lay the rifle gently on the ground at the right side, magazine to the right, muzzle pointing straight to the front.

Q381. In the first movement of 'Uthao Shastr' (Take up arms), where must the right hand seize the rifle?

- At the pistol grip
- At the point of balance
- **In the original position by the right toe [CORRECT]**
- At the hand guard

Explanation: Section-4 mentions to bend down and seize the rifle with the right hand in the original position by the right toe.

Q382. What is the Hindustani command term used for Shoulder Arms in the text?

- Baju Shastr
- Bhumi Shastr
- **Bagal Shast [CORRECT]**
- Salami Shastr

Explanation: Section-5 lists Shoulder Arms as '(Bagal Shast)'.

Q383. During 'Baju Shast' (Order arms) movement two, how far from the ground should the butt be dropped with the help of the left hand?

- **One inch [CORRECT]**
- Two inches
- Three inches
- Six inches

Explanation: Section-5 states to drop the rifle with the help of the left hand till the butt is one inch from the ground.

Q384. In 'Salami Shastr' (Present arms) movement three, where does the right hand hit?

- The pistol grip
- The butt plate
- **The magazine [CORRECT]**
- The hand guard

Explanation: Section-6 states: 'Right hand to hit the magazine' during the third movement of Present Arms.

Q385. During 'Salami Shastr' (Present arms) movement three, where is the hollow of the right foot placed?

- Against the right toe
- **Against the left heel [CORRECT]**
- In front of the left instep
- Parallel to the right heel

Explanation: Section-6 states to place the hollow of the right foot against the left heel with both knees straight.

Q386. When saluting with the rifle at the shoulder at the halt, how is the left hand positioned across the body?

- Forearm perpendicular to the ground
- **Forearm parallel to the ground [CORRECT]**
- Arm fully extended downwards
- Arm bent at a 45-degree angle pointing upwards

Explanation: Section-7 states to take the left hand across the body, forearm parallel to the ground.

Q387. When marching and saluting with a rifle, on which pace before reaching the officer is the salute given?

- First pace
- Second pace
- **Third pace [CORRECT]**
- Fourth pace

Explanation: Section-7 specifies that the salute will be given on the third pace before reaching the officer.

Q388. During the short trail, by how much is the butt of the rifle raised from the ground?

- About half an inch
- **About one inch [CORRECT]**
- About two inches
- About three inches

Explanation: Section-8 states to slightly bend the right arm to raise the butt of the rifle about one inch from the ground for the short trail.

Q389. In 'Tol shastr' (Trail arms), how is the rifle positioned?

- Vertical with muzzle pointing up
- **Horizontal, muzzle pointing to the front and magazine underneath [CORRECT]**
- Slanted at 45 degrees
- Horizontal with magazine on top

Explanation: Section-8 notes that with a flick of the wrist, catch the rifle at the point of balance so that it is horizontal, muzzle pointing to the front and magazine underneath.

Q390. What is the command to return to Order arms from the trail position?

- Bhumi Shastr
- **Baju Shastr [CORRECT]**
- Bagal Shast
- Salami Shastr

Explanation: Section-8 lists the command for Order from the Trail as 'Baju Shastr(r)' (Order arms).

Q391. In 'Bagal Shast' (Shoulder arms) movement one, where does the left arm seize the rifle across the body?

- In line with the shoulder
- **In line with the waist belt on the hand guard [CORRECT]**
- At the point of balance
- Below the bayonet stand

Explanation: Section-5 states the left arm comes across the body to seize the rifle in line with the waist belt on the hand guard.

Q392. During a 'Dahine Mur' (Right Turn), what degree of turn is executed and on which parts of the feet does the turn primarily take place?

- 45 degrees on left heel and right toe
- **90 degrees on right heel and left toe [CORRECT]**
- 180 degrees on both heels
- 90 degrees on left heel and right toe

Explanation: According to rule 4 for 'Dahine Mur', the turn is 90 degrees right on the right heel and left toe, raising the right toe and left heel.

Q393. How many degrees does a squad turn when executing an inclining movement ('adha dahine' or 'adha baen mur')?

- 90 degrees
- 180 degrees
- **45 degrees [CORRECT]**
- 30 degrees

Explanation: Rule 6 under Turning states that in inclining, the individual or squad turns through 45 degrees only.

Q394. What command is given for initial sizing where the tallest cadet stands on the right and the shortest on the left in a single rank?

- Teen line banao, tez chal
- **Lamba Dahine, Chhota Baen, ek line men - qadvar [CORRECT]**
- Dahina cadet khara rahe
- Visam Cadet ek qadam age

Explanation: Rule 1 under Sizing and Forming specifies the command 'Lamba Dahine, Chhota Baen, ek line men - qadvar'.

Q395. When forming up in three ranks using the command 'Teen line banao, tez chal', what is the specified distance between the ranks?

- 24 inches
- 15 inches
- **30 inches [CORRECT]**
- One arm's length

Explanation: Rule 4 states that cadets position themselves in three ranks with 30 inches between ranks and an interval of one arm's length between two cadets.

Q396. Under what condition will a squad form up in 2 ranks instead of 3 ranks during sizing and forming?

- Less than 10 cadets
- **Less than 8 cadets [CORRECT]**
- Less than 5 cadets
- Exactly 5 cadets

Explanation: Rule 4 notes that for less than 8 cadets the squad will form up in 2 ranks, and for less than 5 cadets in a single rank.

Q397. In Open Order March ('Khuli line-chal'), how does the front rank move?

- One full step forward and one short step back
- **One full step forward, one short step, and bring feet together [CORRECT]**
- One and a half paces forward

- Two full paces forward

Explanation: Rule 7 states the front rank shoots the right foot forward one full step and left foot one short step and lifts right to bring the two feet together.

Q398. During 'Dahine Saj' (Right dress), men in the front rank extend their right arm first clenched with the back of the hand uppermost. Where must the knuckles touch?

- The collar of the man on the right
- **The shoulder seam of the man on the right [CORRECT]**
- The upper arm of the man on the right
- The chest of the man on the right

Explanation: Rule 8(d) states that knuckles touch the shoulder seam of the man on the right.

Q399. In 'Samne Salute' (Salute to the front), what is the position of the forefinger tip on the right hand during movement 'Squad do' (Squad two)?

- Touching the right eyebrow
- **One inch above the right eye [CORRECT]**
- Level with the top of the cap
- Two inches above the right eye

Explanation: Rule 3 under Salute to the Front states that forearm, wrist and fingers bend until the forefinger tip of the right hand is one inch above the right eye.

Q400. During the salute to the front ('Squad teen'), how should the hand return to the position of attention?

- By tracing a wide arc backwards
- **By cutting the shortest way to the side, dropping the elbow to the front with fingers curled up [CORRECT]**
- By snapping the arm straight down to the thigh directly
- By bringing the hand sharply to the chest first

Explanation: Rule 4 states to return to the position of attention by cutting the shortest way to the side by dropping the elbow to the front, fingers curled up on the way down.

Q401. When performing a Salute to the Flank ('Dahine ko Salute'), how does the cadet position their head and eyes?

- Turned 45 degrees right
- **Square off to the right, looking along the palm of the hand [CORRECT]**
- Looking straight ahead while the arm moves
- Turned completely backward over the shoulder

Explanation: Rule 5 under Salute to the Flank explains that the cadet turns their head and eyes square off to the right and shifts the head so that the right eye can just look along the palm of the hand.

Q402. During the procedure of getting on parade, on the command 'Darshak' (Marker), what does the right marker do?

- Stands fast at attention
- Marches in quick time 10 paces straight forward
- **Marches in quick time 15 paces straight to his front, halts, and stands at ease [CORRECT]**
- Turns right and salutes the instructor

Explanation: Rule 7 under Getting on Parade states that the right marker comes to attention, marches in quick time 15 paces straight to his front, halts and stands at ease.

Q403. When the command 'Parade-Par' (Get on Parade) is given, after marching forward, on which pace does the squad halt?

- 10th pace
- 12th pace
- **15th pace [CORRECT]**
- 20th pace

Explanation: Rule 8 under Getting on Parade specifies that the squad marches forward to their front and halts on the 15th pace.

Q404. What is the exact definition of 'Open Order' for inspecting a squad or conducting squad drill?

- Front rank takes one pace forward, rear rank takes one pace back
- **Front and rear ranks take one and a half paces forward and to the rear respectively, while centre rank stands fast [CORRECT]**
- All three ranks take one pace apart
- Front rank stands fast while centre and rear ranks take two paces back

Explanation: Rule 6 under Open and Close Order March and Dressing defines Open Order as the front rank and rear rank taking one and half paces forward and to the rear respectively while the centre rank stands fast.

Q405. During the sizing process, after the command 'Visam Cadet ek qadam age, Sam cadet ek qadam pichhe chal', what movement do the odd and even numbered cadets make?

- **Odd numbers take one pace forward, even numbers take one pace step back [CORRECT]**
- Odd numbers turn right, even numbers turn left
- Odd numbers take two paces forward, even numbers stand fast
- Odd numbers step back, even numbers step forward

Explanation: Rule 2 under Sizing and Forming states: 'Odd numbers one pace forward even numbers one pace step back march'.

■ Category: NCC DRILL WITH ARMS

Q406. In the position of Savdhan (Attention) with a rifle, where is the magazine positioned?

- To the rear
- To the left
- **To the front [CORRECT]**
- To the right

Explanation: Section 1 (Savdhan) of Drill with Arms specifies that the magazine of the rifle is to the front.

Q407. When executing Visharam (Stand-at-Ease) with a rifle, how far apart should the feet be?

- 6 inches apart
- **12 inches apart [CORRECT]**
- 18 inches apart
- 24 inches apart

Explanation: Section 1, paragraph 2 (Visharam) states to carry the left leg to the left so that the feet are about 12 inches apart.

Q408. During Visharam (Stand-at-Ease) with a rifle, what action is performed with the arms?

- Both arms are bent at the elbows
- **Right arm is forced straight out to the front without moving the hand on the rifle [CORRECT]**
- Left arm is placed across the chest

- Both arms are cut to the sides

Explanation: Section 1, paragraph 2 states to keep the left arm to the side, force the rifle straight out to the front by keeping the right arm straight, and shoot the right hand forward.

Q409. In Aram Se (Stand Easy) with a rifle, where is the right hand forced?

- To the magazine
- To the small of the butt
- **To the nose cap of the rifle [CORRECT]**
- To the sling

Explanation: Section 1, paragraph 3 (Aram Se) states to force the right hand to the nose cap of the rifle, with fingers and thumb curling round the rifle.

Q410. On the command 'Squad' from Aram Se, what action is taken to return to Visharam?

- **Force the right hand down the rifle to the correct position of stand-at-ease and brace the body [CORRECT]**
- Pull the rifle directly into the side for Savdhan
- Lift the rifle off the ground
- Step back with the left foot

Explanation: Section 1, paragraph 4 explains that on the command 'Squad', you force the right hand down the rifle to the correct position of stand-at-ease and brace the body.

Q411. What is the command to return to Savdhan (Attention) from Visharam (Stand-at-Ease) with a rifle?

- Squad Tham
- **Squad Savdhan [CORRECT]**
- Savdhan Qadam
- Visharam Aram Se

Explanation: Section 1, paragraph 5 states that on the word of command 'Squad Savdhan', you pull the rifle into the side, keeping the butt on the ground, and resume the position of savdhan.

■ Category: NCC FIRST AID

Q412. Which type of wound is characterized by being deep and narrow, caused by a pointed instrument like a knife or bayonet, with a small surface opening that may injure internal organs?

- Contusion
- Shell Wound
- **Punctured Wound [CORRECT]**
- Gun Shot Wound

Explanation: Text specifies that a punctured wound is a deep narrow wound caused by a pointed instrument like knife or bayonet, small on the surface but deep enough to injure internal organs.

Q413. In a gunshot wound, how do the entry and exit points typically appear?

- Both entry and exit are very large and lacerated
- Entry is very large, and exit is very small
- **Entry is usually very small and exit may be very large and lacerated [CORRECT]**
- Both entry and exit are extremely small and clean-cut

Explanation: The text states that in a gun shot wound, the entry is usually very small and the exit may be very large and lacerated.

Q414. What is the proper directional technique for applying a bandage during wound dressing as outlined in the text?

- Clockwise from inner aspect to outer aspect
- Counter-clockwise from outer to inner aspect
- **Clockwise from outer aspect to inner aspect by covering 1/3 of previous lining [CORRECT]**
- Counter-clockwise from top to bottom

Explanation: The text states: 'Start bandaging clock wise from outer aspect to inner aspect by covering 1/3 of previous lining.'

Q415. Where should the knot be placed when finishing a bandage application on a wound?

- Directly over the center of the wound
- Underneath the affected limb
- **Away from the wound [CORRECT]**
- At the lowest point of the injury

Explanation: According to the procedure for bandaging, one must 'Put the knot away from the wound.'

Q416. Which of the following describes a 'Contusion' injury?

- A deep narrow wound caused by a bayonet
- An injury where a bullet enters and exits the body
- **An injury or bruise where tissues are torn/ruptured but the skin may not be broken [CORRECT]**
- A wound caused by splinters of a shell or grenade

Explanation: The text defines a contusion as 'an injury or a bruise in which some of the tissues or a part is irregularly torn or ruptured but the skin, may not be broken.'

■ Category: NCC LEADERSHIP

Q417. Which of the following sections in Chapter-V (Leadership) covers 'Customs of Services' for Senior Division/Senior Wing (SD/SW)?

- Section-8
- Section-9
- **Section-10 [CORRECT]**
- Section-11

Explanation: According to the index of Chapter-V Leadership, Section-10 is designated for 'Customs of Services' for SD/SW.

Q418. How is motivation formally defined in Section-1 of the text?

- The application of physical strength to achieve targets
- **The process by which one is inspired to act in the desired manner with the help of catalytic persuasion [CORRECT]**
- The strict enforcement of rules through punishment and reward
- The instinctive drive to fulfill basic biological wants such as hunger and thirst

Explanation: Section-1, paragraph 1 states that motivation is the process by which one is inspired to act in the desired manner with the help of catalytic persuasion.

Q419. What are the two widely opposed schools of thought regarding human motivation mentioned in the text?

- **One based on biological wants and instincts; the other recognizing that men cannot live by bread alone [CORRECT]**

- One based on financial incentives; the other based on spiritual enlightenment
- One based on fear of punishment; the other based on public recognition
- One based on hereditary traits; the other based on environmental conditioning

Explanation: Paragraphs 3 and 4 outline the two schools: one based on biological wants (hunger, thirst, shelter, etc.) and the other recognizing that humans cannot live by bread alone.

Q420. According to the text, what are the major factors of motivation derived from social conditioning?

- Wealth, status, and power
- **Religion, political ideology, and culture [CORRECT]**
- Climate, geography, and resources
- Age, gender, and physical fitness

Explanation: Paragraph 8 states that instincts are controlled and conditioned by social motives, and religion, political ideology, and culture are major factors of motivation.

Q421. Why can motivation by force be less effective in the long run, according to Section-1?

- It is too expensive to maintain.
- It takes too much time to implement.
- **It may lead to undesirable tendencies like avoiding 'getting caught' rather than striving for satisfactory results. [CORRECT]**
- It completely destroys the physical stamina of the individuals.

Explanation: Paragraph 9 notes that motivation by force can lead to undesirable tendencies like avoiding 'getting caught' rather than striving for satisfactory results.

Q422. How is 'Duty' defined in Section-2 of the text?

- To obey man's order as issued by rightful authority
- **A moral/legal obligation and a binding force of what is right and behaviour towards superior colleagues and subordinates [CORRECT]**
- The denial of self for a higher good
- The foundation of corporate discipline through drill

Explanation: Section-2, paragraph 3 defines duty as a moral/legal obligation and a binding force of what is right and behaviour towards superior colleagues and subordinates.

Q423. In Section-2, how is 'Discipline' defined in relation to authority?

- To obey God's order as delivered by conscience
- **To obey man's order as issued by rightful authority [CORRECT]**
- To follow one's own personal desires without restraint
- To command respect by knowing one's duty

Explanation: Section-2 introduces discipline with the quote: 'To obey man's order as issued by rightful authority - discipline'.

Q424. What is described in the text as welding together the other qualities of courage, endurance, alertness, and comradeship?

- Motivation
- **Discipline [CORRECT]**
- Duty
- Perception

Explanation: Section-2, paragraph 7 states: 'Discipline welds together the other qualities of courage, endurance, alertness and comradeship.'

Q425. What forms the foundation of individual discipline in subordinates?

- Strict punishment and constant surveillance
- High financial compensation and awards
- **Confidence in his leaders, in his comrades and in himself [CORRECT]**
- Extensive theoretical knowledge of military history

Explanation: Section-2, paragraph 8 states that discipline in subordinates is based on confidence: confidence in his leaders, in his comrades and in himself.

Q426. According to Section-2, paragraph 9, what is the basic foundation of corporate discipline?

- Physical fitness training
- **Drill [CORRECT]**
- Theoretical lectures on ethics
- Group discussions and team building

Explanation: Section-2, paragraph 9 explicitly states: 'Drill is the basic foundation of corporate discipline.'

Q427. Which of the following best describes normal human preferences regarding groups and occupations, as per Section-1?

- Prefer to be completely alone and idle
- **Prefer to be in a group and engaged in a useful occupation in accordance with their ability [CORRECT]**
- Prefer isolation while performing complex mechanical tasks
- Prefer unstructured freedom without any organizational goals

Explanation: Section-1, paragraph 5 notes that normal human beings prefer to be in a group rather than completely alone, and prefer a useful occupation in accordance with their ability rather than be idle.

Q428. What is the foundation of both duty and discipline according to Section-2, paragraph 1?

- The pursuit of individual happiness and comfort
- **Denial of self for a higher good [CORRECT]**
- Complete obedience to biological instincts
- Competitive struggle for higher social status

Explanation: Section-2, paragraph 1 states: 'The foundation of both alike is denial of self for a higher good.'

Q429. How can a leader best motivate his group according to Section-1, paragraph 9?

- By strictly penalizing every minor failure
- **By establishing a favourable leadership climate [CORRECT]**
- By offering monetary incentives for every task
- By separating personal needs from organizational needs

Explanation: Section-1, paragraph 9 states that a leader can best motivate his group by establishing a favourable leadership climate.

Q430. What does Section-1, paragraph 7 identify as conflicting motives in a serviceman?

- The desire for promotion versus the fear of additional responsibility
- **The human instinct to run away from danger vis-a-vis the willingness to face and fight the enemy [CORRECT]**
- The preference for individual work versus group cooperation
- The loyalty to family versus loyalty to the nation

Explanation: Paragraph 7 highlights that motives are often conflicting, such as the human instinct to run away from danger versus the willingness of a serviceman to face and fight the enemy.

■ Category: NCC LEADERSHIP SYLLABUS

Q431. Which section of Chapter-V in the NCC leadership text covers 'Motivation'?

- Section-1 [CORRECT]
- Section-2
- Section-3
- Section-4

Explanation: According to the index of Chapter-V, Section-1 covers Motivation.

Q432. How is motivation defined in the NCC text regarding its execution?

- The application of will power through catalytic persuasion [CORRECT]
- The enforcement of rules by superior authority
- The natural instinct of survival in combat
- The avoidance of punishment through strict monitoring

Explanation: Motivation is defined as the process by which one is inspired to act in the desired manner with the help of catalytic persuasion and is the application of will power.

Q433. In the military sphere, what factor directly affects an individual's motivation as outlined in the text?

- Duration of a war, leave and rotation policy, and casualty rates [CORRECT]
- Only the personal educational standards
- Solely the political ideology of the neighboring nation
- The amount of monetary bonus received daily

Explanation: The text lists duration of a war, leave and rotation policy, casualty rates, welfare arrangements, and service satisfaction as military sphere factors affecting motivation.

Q434. What are the two widely opposed schools of thought regarding human motivation?

- Biological wants versus ideological/psychological needs [CORRECT]
- Economic incentives versus physical punishment
- Spiritual enlightenment versus material greed
- Democratic participation versus autocratic control

Explanation: One school of thought is based on biological wants (hunger, thirst, shelter, sex), while the other recognizes that men cannot live by bread alone and considers broader psychological and behavioral factors.

Q435. According to the text, what fundamental preference do normal human beings exhibit regarding their social environment?

- To be in a group rather than completely alone [CORRECT]
- To live completely isolated to avoid conflict
- To work entirely independently without leadership
- To change their regiment or squadron frequently

Explanation: Normal human beings prefer to be in a group (tribe, family, ship, squadron, regiment, etc.) rather than to be completely alone.

Q436. What are instincts described as in relation to human behavior?

- Basic motives common to all human beings, controlled and modified by social motives [CORRECT]
- Permanently fixed reactions that cannot be altered by training
- Secondary traits acquired only in old age
- Irrational fears that must be completely eliminated by leaders

Explanation: Instincts are basic motives common to all human beings, but these are controlled, modified and conditioned by social motives acquired in childhood, school, and service.

Q437. Why can motivation by force be less effective in the long run?

- It may lead to undesirable tendencies like avoiding 'getting caught' rather than striving for satisfactory results [CORRECT]
- It immediately destroys all physical endurance in subordinates
- It is too expensive to maintain in terms of resources
- It causes troops to mutiny within the first 24 hours

Explanation: In the long run, motivation by force can be less effective because it leads to undesirable tendencies like avoiding 'getting caught' rather than striving for satisfactory results.

Q438. Which ancient scripture is quoted in the text regarding a leader setting a personal example?

- Bhagvad Gita [CORRECT]
- Mahabharata
- Rig Veda
- Arthashastra

Explanation: The text quotes the Bhagvad Gita: 'You, who are a leader of men, must set the example'.

Q439. How does the text define 'duty'?

- A moral/legal obligation and a binding force of what is right and behaviour towards superior colleagues and subordinates [CORRECT]
- The absolute right to command without responsibility
- The physical endurance displayed during combat operations
- An unwritten rule applicable only to military personnel

Explanation: Duty is defined as a moral/legal obligation and a binding force of what is right and behaviour towards superior colleagues and subordinates.

Q440. What is the definition of 'discipline' provided in terms of obedience to man's order?

- To obey man's order as issued by rightful authority [CORRECT]
- To obey God's order as delivered by conscience
- To follow the unwritten laws of society
- To act purely on personal intuition during a crisis

Explanation: The text states: 'To obey man's order as issued by rightful authority - discipline'.

Q441. What is described as the foundation of both duty and discipline?

- Denial of self for a higher good [CORRECT]
- Strict monetary compensation
- Fear of punishment and court-martial
- The desire for higher social status

Explanation: The text states that the foundation of both alike is denial of self for a higher good.

Q442. Which qualities does discipline weld together according to Section-2?

- Courage, endurance, alertness and comradeship [CORRECT]
- Intelligence, speed, aggression and flexibility
- Patience, tolerance, humility and compliance
- Strength, stealth, strategy and survival

Explanation: Discipline welds together the other qualities of courage, endurance, alertness and comradeship.

Q443. Individual discipline in subordinates is primarily based on what factor?

- **Confidence in his leaders, in his comrades and in himself [CORRECT]**
- Absolute fear of the commanding officer
- The availability of modern weaponry
- Rigid surveillance and constant inspection

Explanation: Discipline in subordinates is based on confidence; confidence in his leaders, in his comrades and in himself.

Q444. What is identified as the basic foundation of corporate discipline?

- **Drill [CORRECT]**
- Physical Training
- Weapon Training
- Map Reading

Explanation: The text explicitly states: 'Drill is the basic foundation of corporate discipline.'

Q445. According to the text regarding corporate discipline, how do men work during drill?

- **In a controlled body under a leader and giving immediate and implicit obedience [CORRECT]**
- Individually without any supervision while executing commands
- According to their personal preferences and comfort levels
- By voting on every tactical maneuver before execution

Explanation: Corporate discipline involves men working in a controlled body under a leader and giving immediate and implicit obedience.

■ Category: NCC SELF DEFENCE SYLLABUS

Q446. In the Reverse Hip Throw, where should you place your left foot initially after taking a long step forward?

- Directly between your opponent's feet
- **Slightly outside of and a few inches beyond your opponent's right foot [CORRECT]**
- Behind your opponent's left heel
- Parallel to your opponent's left foot

Explanation: According to the text on Reverse Hip Throw, you take a long step forward with your left foot and place it slightly outside of and a few inches beyond your opponent's right foot.

Q447. During the Reverse Hip Throw, what part of the opponent's arm should be locked into your left elbow?

- Left upper arm
- Right upper arm
- **Right arm [CORRECT]**
- Left wrist

Explanation: The text states: At this time lock your opponents right arm into your left elbow.

Q448. When executing the Arm Throw, how should you seize your opponent's wrist with both hands?

- Left above right
- **Right above left [CORRECT]**
- Side by side

- Interlocked fingers

Explanation: The text specifies for the Arm Throw: Face your opponent and seize his right wrist with both hands, right above left...

Q449. In the Arm Throw, what danger can occur if the movements after securing grip and turning are not done gradually?

- Fracture of the opponent's ribs
- **Dislocate your opponent's shoulder or cause him to strike the back of his head on the ground [CORRECT]**
- Tear your own hamstring muscle
- Twist your own ankle

Explanation: The text cautions that remaining movements must be done gradually, otherwise you will dislocate your opponent's shoulder or cause him to strike the back of his head on the ground.

Q450. In the Stomach Throw, after the opponent pushes you, where must you place your right foot?

- On his chest
- **On his lower abdomen [CORRECT]**
- Behind his right knee
- On his hip bone

Explanation: The text instructs: ...when the opponent pushes you, place your right foot on his lower abdomen...

Q451. What is the final action described in the Stomach Throw after the opponent is thrown to the ground?

- Run away from the opponent
- **Sit on his chest and press his neck with both hands [CORRECT]**
- Kick him in the ribs
- Apply a Full Nelson

Explanation: The text concludes the Stomach Throw by stating: Sit on his chest and press his neck with both hands.

Q452. How is a 'Chin Jab' delivered?

- With a straight punch from the shoulder
- **Sharp forward and upward blow delivered with the heel of the hand bent arm under an opponent's chin [CORRECT]**
- Using the knuckles in a circular motion
- With an open palm strike downwards

Explanation: Paragraph 11 defines Chin Jab as a sharp forward and upward blow delivered with the heel of the hand bent arm under an opponent's chin.

Q453. Against what targets can 'The Knee Blow' be directed?

- **Opponent's fork / solar plexus or face [CORRECT]**
- Opponent's lower back or shoulder blades
- Opponent's shins only
- Opponent's wrists

Explanation: Paragraph 12 defines The Knee Blow as a various blow with the bent knee to opponents fork/solar plexus or face.

Q454. When seized from behind or the front, where should you sharply use your boot during 'The Stamp'?

- On the opponent's instep
- **On the opponent's shin [CORRECT]**

- On the opponent's knee cap
- On the opponent's thigh

Explanation: Paragraph 14 states: When seized from behind or front use your boot sharply on the opponents shin followed by more disabling blow.

Q455. Describe the hand and arm positioning in a 'Full Nelson'.

- Both arms over the opponent's shoulders, hands on collarbones
- **Both arms under the opponent's armpit, place your hands at the back of his head [CORRECT]**
- One arm around the neck, one arm under the leg
- Both hands gripping the opponent's wrists behind his back

Explanation: Paragraph 15 details Full Nelson: With both arms under the opponents armpit place your hands at the back of his head.

Q456. What happens when you bend the wrist in any direction during 'The Wrist Locks'?

- **It causes extreme pain [CORRECT]**
- It temporarily paralyzes the arm
- It causes the opponent to faint
- It breaks the forearm bones

Explanation: Paragraph 16 states: Bending the wrist in any direction causes extreme pain.

Q457. Which strangle hold is noted as being good for a low frontal attack?

- Rear Strangle Hold
- **Front Strangle Hold [CORRECT]**
- Cross Collar Strangle Hold
- Japanese Strangle Hold

Explanation: Paragraph 17(a) specifies: Front Strangle Hold. Good for low frontal attack.

Q458. What is the specific action to take in a 'Rear Strangle Hold' from behind?

- Trip the opponent backwards
- **Strike him across his throat [CORRECT]**
- Pull his hair downwards
- Press your thumb into his spine

Explanation: Paragraph 17(b) states: Rear Strangle Hold. From behind strike him across his throat.

Q459. Which of the following is listed among the Strangle Holds in the text?

- Side Strangle Hold
- **Japanese Strangle Hold [CORRECT]**
- Standing Guillotine Hold
- Double Lapel Strangle

Explanation: Paragraph 17(d) explicitly lists 'Japanese Strangle Hold'.

Q460. Figures 23 and 24 in the syllabus text demonstrate which of the following?

- **Releases and counter attacks to front strangle hold [CORRECT]**
- Defense against the kick
- Double wrist lock execution
- Stomach throw stages

Explanation: Paragraph 18 states: Counter attacks to front strangle hold (Fig 23 and 24).

Q461. In the Reverse Hip Throw, where should you place your left foot initially after stepping forward?

- Directly behind the opponent's right foot
- **Slightly outside of and a few inches beyond your opponent's right foot [CORRECT]**
- Between your opponent's feet
- Directly in front of your opponent's left foot

Explanation: The text states to take a long step forward with the left foot and place it slightly outside of and a few inches beyond the opponent's right foot.

Q462. During the Reverse Hip Throw, what must be locked into your left elbow?

- **Opponent's right arm [CORRECT]**
- Opponent's left arm
- Opponent's neck
- Opponent's waist

Explanation: The text specifies: 'At this time lock your opponents right arm into your left elbow.'

Q463. In the Arm Throw, how should you seize your opponent's wrist?

- With your left hand only
- With both hands, left above right
- **With both hands, right above left [CORRECT]**
- Cross-handed grip

Explanation: The text states to 'seize his right wrist with both hands, right above left'.

Q464. What risk is explicitly mentioned if the remaining movements of the Arm Throw are not done gradually during practice?

- **Dislocating your opponent's shoulder or causing them to strike the back of their head on the ground [CORRECT]**
- Breaking the opponent's wrist or fingers
- Spraining your own ankle
- Tearing your opponent's jacket

Explanation: The text warns that the movements must be done gradually, 'otherwise you will dislocate your opponent's shoulder or cause him to strike the back of his head on the ground'.

Q465. In the Stomach Throw, after pushing the opponent to disturb their balance and having them push back, where do you place your right foot?

- On the opponent's chest
- **On the opponent's lower abdomen [CORRECT]**
- Behind the opponent's knee
- On the opponent's hip

Explanation: The text states: 'place your right foot on his lower abdomen and retaining your firm hand grip on your opponent's lapel...'

Q466. What action is described as a sharp forward and upward blow delivered with the heel of the hand bent arm under an opponent's chin?

- The Knee Blow
- **Chin Jab [CORRECT]**
- The Stamp
- Full Nelson

Explanation: Paragraph 11 defines the Chin Jab as a 'Sharp forward and upward blow delivered with the heel of the hand bent arm under an opponents chin.'

Q467. What is the Knee Blow directed towards?

- Opponent's fork/solar plexus or face [CORRECT]
- Opponent's shin only
- Opponent's lower back
- Opponent's shoulder blades

Explanation: Paragraph 12 defines the Knee Blow as 'A various blow with the bent knee to opponents fork/solar plexus or face'.

Q468. When seized from behind or the front, what technique involves using your boot sharply on the opponent's shin?

- The Kick
- The Stamp [CORRECT]
- Chin Jab
- The Knee Blow

Explanation: Paragraph 14 defines The Stamp: 'When seized from behind or front use your boot sharply on the opponents shin followed by more disabling blow'.

Q469. In the 'Full Nelson' technique, where do you place your hands after putting both arms under the opponent's armpits?

- At the back of his head [CORRECT]
- On his shoulders
- Under his chin
- Across his throat

Explanation: Paragraph 15 states: 'With both arms under the opponents armpit place your hands at the back of his head.'

Q470. What effect does bending the wrist in any direction have, according to the textbook?

- It immobilizes the shoulder
- It causes extreme pain [CORRECT]
- It dislocates the elbow
- It paralyzes the arm

Explanation: Paragraph 16 states: 'Bending the wrist in any direction causes extreme pain.'

Q471. Which strangle hold is noted as good for a low frontal attack?

- Rear Strangle Hold
- Cross Collar Strangle Hold
- Front Strangle Hold [CORRECT]
- Japanese Strangle Hold

Explanation: Paragraph 17(a) states: 'Front Strangle Hold. Good for low frontal attack'.

Q472. How should you execute a Rear Strangle Hold when approaching from behind?

- Strike him across his throat [CORRECT]
- Press his eyes
- Kick his shin
- Pull his hair

Explanation: Paragraph 17(b) states: 'Rear Strangle Hold. From behind stike him across his throat'.

Q473. Which of the following is listed under Strangle Holds in the syllabus?

- Double Wrist Lock Strangle
- **Japanese Strangle Hold [CORRECT]**
- Stomach Strangle Hold
- Arm Throw Strangle

Explanation: Paragraph 17(d) explicitly lists 'Japanese Strangle Hold'.

Q474. In the Stomach Throw, after sliding to the ground with your buttocks and making the opponent fly over your head, what is the final action taken?

- Run away from the opponent
- **Sit on his chest and press his neck with both hands [CORRECT]**
- Stand up and kick his shin
- Apply a Full Nelson

Explanation: The text for Stomach Throw concludes: 'Sit on his chest and press his neck with both hands'.

Q475. Figures 23 and 24 in the provided text illustrate which tactical movement?

- **Counter attacks to front strangle hold [CORRECT]**
- Defense against the kick

- **Section-1: Precaution and General Behavior of Boys/Girls Cadets [CORRECT]**
- Section-2: Prevention of Untoward Incidents
- Section-3: Vulnerable Parts of the Body
- Section-4: Physical Self Defence

Explanation: Chapter XI Section-1 is marked with a checkmark (√) for JD/JW and a dash (-) for SD/SW.

Q490. Which of the following disaster management topics under Chapter VI is taught EXCLUSIVELY to SD/SW cadets?

- Essential Services and their Maintenance
- Fire Fighting
- **Setting up Relief Camp during Disaster Management [CORRECT]**
- Civil Defence Organisation and its Duties

Explanation: Section-10 'Setting up Relief Camp during Disaster Management' under Chapter VI is marked dash (-) for JD/JW and checkmark (✓) for SD/SW.

Q491. Under which specific legislative Act and on what exact date did the National Cadet Corps (NCC) officially come into existence under the Ministry of Defence?

- Indian Territorial Act on 16th July, 1920
- **NCC Act XXXVI of 1948 on 16th July, 1948 [CORRECT]**
- Defence Act of 1917 on 23rd December, 1957
- NCC Act XXVI of 1946 on 15th August, 1948

Explanation: The text explicitly states that the NCC came into existence on 16th July, 1948 under the NCC Act XXXVI of 1948 under the Ministry of Defence (MOD).

Q492. On which exact date was the official motto of the NCC, 'Unity and Discipline', formally adopted?

- 16th July 1948
- 15th August 1947
- **23rd December 1957 [CORRECT]**
- 26th January 1950

Explanation: The text notes that the Motto of the NCC is 'Unity and Discipline' which was adopted on 23 Dec 1957.

Q493. In the official NCC tricolour flag introduced in 1954, what does each lotus in the wreath encircling the gold crest represent?

- One NCC Group Headquarters
- One State or Union Territory
- **One NCC Directorate [CORRECT]**
- One Army Wing Unit

Explanation: According to Section 1 (Selection of NCC Flag), 'Each lotus represents one NCC Directorate (Dte)'.

Q494. A committee was set up in 1946 to create a national youth organization to train young boys and girls. Who chaired this committee and at whose behest was it formed?

- **Pandit HN Kunzru; at the behest of Pandit Jawaharlal Nehru [CORRECT]**
- Sardar Vallabhbhai Patel; at the behest of Mahatma Gandhi
- Dr. BR Ambedkar; at the behest of Lord Mountbatten
- General KM Cariappa; at the behest of Pandit HN Kunzru

Explanation: The text states: 'A Committee under Pandit HN Kunzru was set up in 1946 at the behest of our first Prime Minister, Pandit Jawaharlal Nehru.'

Q495. In which month and year were the revised aims of the NCC approved by the Ministry of Defence (MOD)?

- July 1948
- December 1957
- **March 2001 [CORRECT]**

- Explanation: Section 1 Paragraph 4 states that 'The aims of NCC as approved by MOD in Mar 2001 are as under...'.
 1. To provide a safe and secure environment for the people of the United Kingdom and to protect the interests of the United Kingdom.

- 3 ADsG and 5 DDsG
- **2 ADsG (Major General & Rear Admiral/Air Vice Marshal) and 5 DDsG (3 Brigadiers, 1 Commodore/Air Commodore, 1 Civilian) [CORRECT]**
- 2 ADsG (both Major Generals) and 4 DDsG (all Brigadiers)
- 1 ADsG and 17 DDsG

Q497. According to the organizational structure of NCC, how many State Directorates are there across India, and how are they service-divided?

- Explanation: The text specifies 17 State Dtes, and the organizational structure chart breaks this down into Army - 12, Navy - 02, Air Force - 03.

- **95 total; 85 Army Wing [CORRECT]**
- 774 total; 657 Army Wing
- 59 total; 4 Army Wing
- 58 total; 6 Army Wing

- **415 Infantry units and 109 Girls units [CORRECT]**
- 22 Infantry units and 22 Girls units
- 85 Infantry units and 23 Girls units
- 657 Infantry units and 109 Girls units

- 47 Flying, 11 Technical, 1 Non-Technical
- **1 Technical, 1 Medical, 1 Dockyard, and 56 Non-Technical [CORRECT]**
- 22 Armoured, 22 Artillery, 14 Signal, 13 Engineer
- 4 Naval Squadrons, 55 Naval Battalions

Explanation: The organizational structure chart breaks down the 59 Navy units into: 'Tech -1, Med -1, Dock -1, Non Tech - 56'.

Q501. Among the 58 Air Squadrons in the NCC Air Wing, how are they categorized in the organizational chart?

- 50 Flying and 8 Technical
- **47 Flying and 11 Technical [CORRECT]**
- 56 Flying and 2 Technical
- 30 Flying and 28 Technical

Explanation: The chart breaks down the 58 Air Force units into 'Flying - 47' and 'Technical - 11'.

Q502. In which year was the cadre of Whole Time Lady Officers (WTLO) sanctioned, and what is its sanctioned cadre strength?

- 1948 with a strength of 657 officers
- 1960 with a strength of 95 officers
- **1995 with a strength of 110 officers [CORRECT]**
- 2001 with a strength of 17 officers

Explanation: Section 2 Paragraph 5(b)(ii) specifies: 'A cadre of Whole Time Lady Officers (WTLO) with cadre strength of 110 officers has been sanctioned in 1995.'

Q503. Which service group post do Girl Cadet Instructors (GCIs) belong to, and how has their cadre structure been recently modified?

- Group 'A' post; restructured from 3 grades into 4 grades
- Group 'B' post; restructured from 1 grade into 2 grades
- **Group 'C' post; restructured into three grades (Grade I, II, and III) from two grades earlier [CORRECT]**
- Group 'D' post; merged directly into the WTLO cadre

Explanation: Section 2 Paragraph 5(b)(iv) states that GCIs hold a Group 'C' post and 'the cadre has recently been restructured into three grades viz Grade I, II and III instead of two grades earlier.'

Q504. Which of the following correctly traces the historical evolution of the predecessor organizations of the NCC prior to 1948?

- University Training Corps (1917) -> University Officers Training Corps (1920) -> University Corps (1942)
- **University Corps (1917 under Defence Act) -> University Training Corps (1920 under Indian Territorial Act) -> University Officers Training Corps (1942) [CORRECT]**
- University Officers Training Corps (1917) -> University Corps (1920) -> University Training Corps (1942)
- National Cadet Corps (1917) -> Indian Territorial Corps (1920) -> University Corps (1942)

Explanation: Section 1 Paragraph 1 details: 'University Corps' (created in 1917) was replaced by 'University Training Corps (UTC)' in 1920, which was renamed as 'University Officers Training Corps (UOTC)' in 1942.

Q505. What are the two official training establishments of the NCC responsible for imparting training to Associate NCC Officers (ANOs)?

- Officers Training Academy (OTA) Dehradun and WOTA Gaya
- **Officers Training School (OTS), Kamptee and Women Officers Training School (WOTS), Gwalior [CORRECT]**
- Indian Military Academy (IMA), Pune and Officers Training School (OTS), Kamptee
- National Defence Academy (NDA), Khadakwasla and High Altitude Warfare School (HAWS), Gulmarg

Explanation: Section 2 Paragraph 3 explicitly names the two training establishments: 'Officers Training School (OTS), Kamptee (near Nagpur) and Women Officers Training School (WOTS), Gwalior'.

Q506. On which date does the Republic Day Camp (RDC) culminate every year with the Prime Minister's Rally?

- 26 January
- **27 January [CORRECT]**
- 28 January
- 30 January

Explanation: According to the text, the Republic Day Camp culminates in the Prime Minister's Rally on 27 January every year, showcasing all NCC activities.

Q507. What is the exact duration of Annual Training Camps (ATC) for Senior Division/Wing and Junior Division/Wing cadets respectively?

- 14 days for Senior, 12 days for Junior
- **12 days for Senior, 10 days for Junior [CORRECT]**
- 10 days for Senior, 8 days for Junior
- 12 days for Senior, 12 days for Junior

Explanation: Annual Training Camps (ATC) are of 12 days duration for senior boys/girls and 10 days duration for junior boys/girls.

Q508. How many Advance Leadership Camps (ALC) and Basic Leadership Camps (BLC) are conducted on an all-India basis each year?

- **4 ALCs and 3 BLCs [CORRECT]**
- 3 ALCs and 4 BLCs
- 2 ALCs and 2 BLCs
- 5 ALCs and 2 BLCs

Explanation: The text states that there are four Advance Leadership Camps (ALC) and three Basic Leadership Camps held each year.

Q509. How many bonus marks are awarded to a cadet possessing an 'A' Certificate when appearing for the 'B' Certificate examination?

- 5 bonus marks
- **10 bonus marks [CORRECT]**
- 15 bonus marks
- 20 bonus marks

Explanation: Under the eligibility conditions for Certificate 'B' Examination, cadets possessing an 'A' certificate will be awarded 10 bonus marks.

Q510. To be eligible for the 'B' Certificate Examination, an Air Wing Cadet must complete a minimum of how many Glide Launches?

- 5 Glide Launches
- **10 Glide Launches [CORRECT]**
- 15 Glide Launches
- 20 Glide Launches

Explanation: Eligibility criteria for 'B' Certificate states that an Air Wing Cadet must do a minimum of 10 Glide Launches.

Q511. Which dignitary officially inaugurates the prestigious Republic Day Camp (RDC)?

- President of India
- Prime Minister of India

- Vice President of India [CORRECT]
- Raksha Mantri

Explanation: The Republic Day Camp is a prestigious camp inaugurated by the Vice President of India.

- DG AFMS [CORRECT]
- Red Cross India
- Ministry of Health and Family Welfare
- National AIDS Control Organisation (NACO)

Explanation: The text mentions that NCC participates actively in the AIDS Awareness Programme along with UNAIDS and DG AFMS.

Q513. What is the duration of Attachment Training for NCC Army Wing cadets attached to regular units of the Army?

- 1 week
- 2 weeks [CORRECT]
- 3 weeks
- 4 weeks

Explanation: Every year, officers and cadets get attached to various units of the Army for a duration of two weeks.

Q514. What is the minimum age and class criteria specified for students joining the Junior Division (JD) / Junior Wing (JW)?

- Age 12 years in Class VII to IX
- Age 13 years in Class VIII to X [CORRECT]
- Age 14 years in Class IX to XI
- Age 13 years in Class IX to X

Explanation: Students both boys and girls can join NCC at the age of 13 years in Junior Division (JD)/Junior Wing (JW) (Class VIII to X).

Q515. For a Sailing Expedition to qualify as an alternative activity for 'C' Certificate eligibility, actual sailing must exceed how many days?

- 7 days
- 10 days [CORRECT]
- 12 days
- 14 days

Explanation: For 'C' Certificate qualification, a Sailing Expedition must involve actual sailing exceeding 10 days, duly approved by DG NCC.

Q516. Permanent Instructional (PI) Staff in the NCC consists of which personnel posted on Extra Regimental Employment?

- Commissioned Officers and JCOs
- Junior Commissioned Officers and Non-commissioned Officers [CORRECT]
- Non-commissioned Officers and Soldiers
- Civilian Officers and JCOs

Explanation: PI staff for the NCC consists of Junior Commissioned Officers (JCOs) and Non-commissioned Officers (NCOs) of the Armed Forces posted on tenure basis on Extra Regimental Employment.

Q517. Where are the two annual Thal Sainik Camps (TSCs) conducted, and how are the participant groups divided?

- DG NCC Camp Delhi; 1 for SD boys, 1 for SW girls
- **RD parade ground, Delhi Cantt; 1 for SD/JD boys, 1 for SW/JW girls [CORRECT]**
- IMA Dehradun; 1 for SD/SW, 1 for JD/JW
- Garhi Cantonment, Dehradun; 1 for Boys, 1 for Girls

Explanation: Two TSCs are conducted at RD parade ground, Delhi Cantt every year: one for SD/JD boys and the other for SW/JW girls.

Q518. Which set of locations is explicitly specified in the text where Special National Integration Camps (SNICs) are conducted regularly?

- **Leh, Srinagar, North Eastern Region and at Port Blair [CORRECT]**
- Shimla, Leh, Gangtok and Lakshadweep
- Srinagar, Leh, Jaisalmer and Andaman
- Guwahati, Imphal, Leh and Port Blair

Explanation: Special NICs are conducted regularly at Leh, Srinagar, North Eastern Region, and at Port Blair.

Q519. Which of the following shooting championships is specifically mentioned as a regular sports event for NCC cadets?

- National Shooting Championship Competitions (NSCC)
- **Mavlankar Shooting Championship [CORRECT]**
- All India Police Shooting Championship
- Karni Singh Memorial Championship

Explanation: The text states that NCC takes part in Subroto Cup Football Tournament, Jawahar Lal Nehru Hockey Cup Tournament, and Mavlankar Shooting Championship on a regular basis.

Q520. In which month is the Centrally Organised Vayu Sainik Camp (VSC) generally conducted for Air Wing Cadets?

- August
- September
- **October [CORRECT]**
- November

Explanation: According to the text, VSC is generally conducted in the month of Oct.

Q521. What are the minimum qualifying marks required in individual papers and in the aggregate respectively for a cadet to pass the NCC certificate examination?

- 40% in each paper and 50% in aggregate
- **45% in each paper and 50% in aggregate [CORRECT]**
- 50% in each paper and 60% in aggregate
- 45% in each paper and 60% in aggregate

Explanation: According to NCC grading regulations, a cadet must obtain 45% marks in each paper and 50% marks in the aggregate to pass the examinations.

Q522. Which official NCC song was adopted in 1963 and registered with the Ministry of Defence in 1969 prior to the adoption of the current song?

- **Kadam Mila Ke Chal [CORRECT]**
- Ham Sab Hindi Hain
- Hum Sab Bhartiya Hain

- Desh Ki Raksha

Explanation: The official song of the NCC – 'Kadam Mila Ke Chal' – was adopted in 1963 and registered in 1969 with the approval of the Ministry of Defence.

Q523. In which year was the word 'Hindi' officially substituted with 'Bhartiya' in the current NCC song?

- 1968

- 1980 [CORRECT]
- 1985

Explanation: The song 'Ham Sab Hindi Hain' was played repeatedly in Republic Day Camps, and in 1980, the word 'Hindi' was substituted with 'Bhartiya'.

Q524. The current NCC song originally gained popularity after being featured in which NCC documentary film?

- A Cadet's Life
- A Cadet's Diary [CORRECT]
- Republic Day Camp Diary
- Youth Festival Wonders

Explanation: The director of the documentary film on NCC, 'A Cadet's Diary', heard the song 'Ham Sab Hindi Hain' from a Youth Festival and introduced it into the documentary film.

Q525. How many vacancies per year are reserved for NCC 'C' Certificate holders in the Indian Military Academy (IMA), Dehradun through UPSC and SSB Interview?

- 32 per year
- 50 per year
- 64 per year [CORRECT]
- 100 per year

Explanation: There are 64 vacancies reserved per year in IMA Dehradun for NCC 'C' Certificate holders through UPSC and SSB Interview.

Q526. How many vacancies are reserved annually for NCC 'C' Certificate holders in Officers Training Academy (OTA), Chennai for Short Service Commission Non-Technical without appearing for the UPSC exam?

- 64 per year
- 75 per year
- 100 per year [CORRECT]
- 120 per year

Explanation: 100 vacancies per year are reserved in OTA Chennai for Short Service Commission Non-Technical for NCC 'C' Certificate holders with no UPSC exam required (only SSB).

Q527. What percentage of reservation/vacancies is allocated for NCC 'C' Certificate holders in all Indian Air Force (IAF) courses including Flying Training courses?

- 5%
- 6%
- 10% [CORRECT]
- 15%

Explanation: IAF reserves 10% in all courses including Flying Training courses for NCC 'C' Certificate holders, requiring no UPSC Exam, only Air Force SSB.

Q528. What academic criteria allows an NCC cadet holding a degree to be eligible for recruitment to a gazetted post in the Central Reserve Police Force (CRPF)?

- First division degree
- Second division degree
- **Third division degree [CORRECT]**
- Post-graduate degree

Explanation: In CRPF incentives, NCC cadets holding a third division degree are eligible for recruitment to gazetted posts.

Q529. When was the 'NCC Cadets Welfare Society' (CWS) established and registered under the Societies Registration Act 1860?

- January 1956
- **February 1985 [CORRECT]**
- October 1996
- January 2002

Explanation: The 'NCC Cadets Welfare Society' was established and registered in February 1985 under the Societies Registration Act 1860.

Q530. What amount of financial assistance is paid by the Cadets Welfare Society to the Next of Kin (NOK)/nominee in the case of a cadet's demise during High Risk NCC activities?

- Rs. 1,00,000/-
- Rs. 1,50,000/-
- **Rs. 2,00,000/- [CORRECT]**
- Rs. 3,00,000/-

Explanation: In high-risk NCC related death cases, the CWS grants Rs. 2,00,000/- financial assistance to the cadet's NOK/nominee.

Q531. When the Cadets Welfare Society scholarship scheme was first introduced in 1991, what was the initial number of scholarships and individual monetary value awarded?

- 100 scholarships of Rs. 1,000/- each
- **250 scholarships of Rs. 2,000/- each [CORRECT]**
- 500 scholarships of Rs. 3,000/- each
- 760 scholarships of Rs. 5,000/- each

Explanation: A scholarship scheme was introduced in 1991 where 250 scholarships of Rs. 2,000/- each were awarded to academically brilliant NCC cadets.

Q532. How many total cash awards are given every year by CWS for Best Cadet and 2nd Best Cadet across all Group HQs?

- 250
- 500
- **760 [CORRECT]**
- 1016

Explanation: Best Cadet Cash Awards are given to two cadets from each category (JD, JW, SD, SW) in every Group HQ (Rs 3,000 to Best Cadet, Rs 2,000 to 2nd Best Cadet), totaling 760 cash awards every year.

Q533. What is the corpus fund created by the Sahara Group in 2002, and what amount is disbursed annually as scholarships to NCC cadets?

- Corpus Fund of Rs 1 Crore; Rs 50 Lakhs annually
- **Corpus Fund of Rs 3 Crores; Rs 1 Crore annually [CORRECT]**

- Corpus Fund of Rs 5 Crores; Rs 2 Crores annually
- Corpus Fund of Rs 10 Crores; Rs 3 Crores annually

Explanation: In 2002, the Sahara Group introduced an Annual Sahara Scholarship Scheme with a corpus fund of Rs 3 Crores, with Rs 1 Crore given annually as scholarships.

Q534. Under the Sahara Scholarship Scheme, what is the annual scholarship amount granted per cadet for Senior Division (SD) and Senior Wing (SW)?

- Rs 3,000/-
- Rs 6,000/-
- **Rs 12,000/- [CORRECT]**
- Rs 30,000/-

Explanation: SD and SW cadets receive an annual scholarship amount of Rs 12,000/- each under the Sahara Scholarship Scheme (with 190 total vacancies each).

Q535. How many Professional Scholarships are offered under the Sahara Scholarship Scheme, and what is the monetary value per scholarship?

- **66 scholarships of Rs 30,000/- each [CORRECT]**
- 100 scholarships of Rs 25,000/- each
- 190 scholarships of Rs 12,000/- each
- 285 scholarships of Rs 6,000/- each

Explanation: Under the Sahara Scholarship scheme, a total of 66 Professional Scholarships are awarded annually, each worth Rs 30,000/-.

Q536. On what date did the new NCC Directorate for the State of Uttaranchal become effective as per the provided document?

- 01 July 2006
- **01 August 2006 [CORRECT]**
- 15 August 2006
- 01 November 2006

Explanation: According to the footnote in Appendix 'A', the new NCC Directorate for the State of Uttaranchal became effective w.e.f. 01 Aug 2006.

Q537. What is the total number of NCC Group HQs specified across all Directorates in Appendix 'B'?

- 85
- 90
- **95 [CORRECT]**
- 100

Explanation: Appendix 'B' lists details of Group HQs across all Directorates, concluding with a Total Gp HQs count of 95.

Q538. Where are the two NCC Officers Training Academies (OTAs) located according to Appendix 'A'?

- Dehradun & Kamptee
- **Kamptee & Gwalior [CORRECT]**
- Gwalior & Chennai
- Kamptee & Pune

Explanation: Ser No 18 and 19 of Appendix 'A' state that the NCC Officers Training Academies are located at Kamptee and Gwalior.

Q539. What is the scale of authorization for 'Short PWPC White' for Navy Boys in the Junior Division (JD)?

- 1
- 2
- **3 [CORRECT]**
- Nil

Explanation: Under Navy Boys in Appendix 'C', item 7 'Short PWPC White' has an authorization scale of 3 for JD, while SD has no scale listed.

Q540. Which state/union territory NCC Directorate has the maximum number of Group HQs (11) listed in Appendix 'B'?

- Maharashtra
- NER
- **Uttar Pradesh [CORRECT]**
- PHH & C

Explanation: Uttar Pradesh Directorate has 11 Group HQs listed (Agra, Aligarh, Allahabad, Bareilly, Ghaziabad, Gorakhpur, Kanpur, Lucknow, Meerut, Varanasi 'A', Varanasi 'B').

Q541. What is the scale of authorization for 'Salwar White' and 'Kamiz White' for SW and JW cadets?

- 1 each for SW and JW
- **2 each for SW and JW [CORRECT]**
- 2 for SW, 1 for JW
- 1 for SW, 2 for JW

Explanation: Under Common Items in Appendix 'C', items 18 (Salwar White) and 19 (Kamiz White) have a scale of 2 for SW and 2 for JW.

Q542. What is the headquarters location for the North Eastern Region (NER) NCC Directorate?

- Guwahati
- **Shillong [CORRECT]**
- Imphal
- Kohima

Explanation: Appendix 'A' Ser No 10 lists the NER Directorate location as Shillong.

Q543. What is the authorization scale of 'Short PWPC Khaki' for Army Boys in Senior Division (SD) and Junior Division (JD) respectively?

- **1 for SD, 2 for JD [CORRECT]**
- 2 for SD, 1 for JD
- 2 for SD, 2 for JD
- 1 for SD, Nil for JD

Explanation: In Appendix 'C', item 2 'Short PWPC Khaki' for Army Boys specifies a scale of 1 for SD and 2 for JD.

Q544. Which of the following Group HQs belongs to the West Bengal & Sikkim Directorate as per Appendix 'B'?

- Sambalpur
- **Kalyani [CORRECT]**
- Silchar
- Berhampur

Explanation: Appendix 'B' lists Burdwan, Kolkata 'B', Kolkata 'C', Darjeeling, Kalyani, and Kharagpur under the WB & Sikkim Directorate.

Q545. How many Group HQs are listed under the Maharashtra Directorate in Appendix 'B'?

- 5
- 6
- 7 [CORRECT]
- 8

Explanation: Maharashtra Directorate has 7 Gp HQs: Amaravati, Aurangabad, Kolhapur, Mumbai 'A', Mumbai 'B', Nagpur, and Pune.

Q546. According to Appendix 'C', what is the scale of Trouser PWPC LBG authorized for Air Force Boys in the Junior Division (JD)?

- 2
- 1
- 3
- Nil (Not authorized) [CORRECT]

Explanation: In Appendix 'C', item 15 'Trouser PWPC LBG' for Air Force Boys is authorized as 2 for SD, but has no allocation (-) for JD.

Q547. What is the location of the NCC Directorate for 'Tamil Nadu, Pondicherry, Andaman & Nicobar'?

- The sound of the left foot hitting the ground
- An extra quality in command that demands instantaneous response, expressing confidence, alertness, and decisiveness [CORRECT]
- The physical breaking of formation during dismissal
- The exact distance between cadets in a three-rank formation

Explanation: Paragraph 6 describes snap as the extra quality in command that demands instantaneous response, expressing confidence, alertness, and decisiveness.

Q707. What is the required interval between the 'Cautionary' and the 'Executive' parts of a command given in quick time?

- An interval of about two paces
- An interval of about four paces in quick time [CORRECT]
- An interval of exactly ten seconds
- No interval; they must be spoken simultaneously

Explanation: Paragraph 7 states that an interval of about four paces in quick time should be left between the 'Cautionary' and the 'Executive'.

Q708. When giving a cautionary word of command on the march, as a guide, when should it start?

- As the right foot comes to the ground
- As the left foot comes to the ground [CORRECT]
- When both feet are off the ground during a leap
- Precisely five paces before halting

Explanation: Paragraph 7 specifies that a cautionary word of command given on the march should start as the left foot comes to the ground.

Q709. In the position of Attention ('Squad Savdhan'), what angle should the feet form?

- 45 degrees
- 90 degrees
- 30 degrees [CORRECT]
- 60 degrees

Explanation: Section-2, Paragraph 1(a) states that the heels are together and in line, with feet turned out equally forming an angle of 30 degrees.

Q710. When assuming the position of 'Savdhan', how high must the left foot be lifted from the ground before bringing the heels together?

- 3 inches
- **6 inches [CORRECT]**
- 12 inches
- 18 inches

Explanation: Section-2, Paragraph 1(e) specifies bringing heels together with extreme sharpness by lifting the left foot six inches from the ground and placing it flat and very firm besides the right.

Q711. Which of the following actions is strictly prohibited when a cadet is addressed by a superior officer?

- Standing in the position of Savdhan
- Looking straight to the front
- Maintaining an erect posture
- **Standing in any relaxed posture other than Savdhan [CORRECT]**

Explanation: Section-2, Paragraph 1(f) states that when speaking to or being addressed by a superior officer a cadet will stand in Savdhan.

Q712. During the position of 'Vishram' (Stand at Ease), how far to the left is the left foot carried?

- 6 inches
- **12 inches [CORRECT]**
- 18 inches
- 24 inches

Explanation: Section-2, Paragraph 2 states: 'Vishram' (Stand at Ease), Carry left foot 12 inches to the left; place the weight of the body on both feet.

Q713. How are the hands positioned behind the back during 'Vishram' (Stand at Ease)?

- Left hand over the right, palms facing inwards
- **Right hand over the left with open palms facing outwards, thumbs interlocked [CORRECT]**
- Both hands clenched into fists
- Arms hanging straight down touching the trouser seams

Explanation: Section-2, Paragraph 2 states that simultaneously both hands will be taken behind the back, through the shortest route, the right hand over the left with open palms facing outwards, thumbs interlocked.

Q714. What specific restriction applies to a cadet while in the position of 'Aram Se' (Stand Easy)?

- Cadets must keep their eyes closed at all times.
- **Talking, turning the head, slouching, and using a handkerchief are not permitted. [CORRECT]**
- Cadets are allowed to march forward three paces.
- Cadets must maintain the 30-degree foot angle rigidly.

Explanation: Section-2, Paragraph 3 states: 'Without moving the feet, relax the limbs, body and head. Talking, turning the head, slouching and using a handkerchief is not permitted.'

Q715. How does a cadet transition from 'Aram Se' back to 'Stand at Ease' upon hearing the cautionary command 'Squad'?

- By taking a slow step backward
- **By an upward snappy jerk of the body without moving the feet [CORRECT]**
- By lifting the left foot 12 inches
- By shouting 'Jai Hind' and stamping the right foot

Explanation: Section-2, Paragraph 3 states: 'On the cautionary word of command 'Squad', assume correct position of stand-at-ease by an upward snappy jerk of the body.'

Q716. What is the primary operational difference between 'Visarjan' (Dismiss) and 'Line Tor' (Fall out)?

- Visarjan completely terminates the parade, whereas Line Tor represents a temporary break where cadets must not leave the vicinity. [CORRECT]
- Line Tor requires a salute to an officer present, whereas Visarjan does not require any salute.
- Visarjan is done in double time, while Line Tor is always executed in slow time.
- Line Tor signifies the absolute end of the training day, whereas Visarjan is only a short recess.

Explanation: According to the text, 'Visarjan' denotes that the parade is completely terminated, whereas 'Line Tor' (falling out) does not signify the end of the parade, only a break, and cadets must not leave the vicinity of their place of parade.

Q717. What is the regulation length of pace and number of paces per minute for 'Double time' marching?

- 30 inches and 70 paces per minute
- 30 inches and 120 paces per minute
- 40 inches and 180 paces per minute [CORRECT]
- 33 inches and 150 paces per minute

Explanation: The table in Section 5 explicitly lists Double time as having a length of pace of 40 inches, 180 paces per minute, and an equivalent distance of 200 yards.

Q718. During quick time marching, what are the specific lengths for 'Step out' and 'Step short'?

- Step out: 33 inches, Step short: 21 inches [CORRECT]
- Step out: 40 inches, Step short: 15 inches
- Step out: 30 inches, Step short: 12 inches
- Step out: 36 inches, Step short: 24 inches

Explanation: Under quick time sub-parameters in Section 5, 'Step out' is 33 inches and 'Step short' is 21 inches.

Q719. On the command 'Tez Chal' (Quick March) with the band, on which respective feet are the words 'Quick' and 'March' commanded?

- Quick on the right foot, March on the left foot
- Quick on the left foot, March on the right foot [CORRECT]
- Quick and March both given on the left foot simultaneously
- Quick on both feet, March on the right foot

Explanation: The text states: give the word of command on successive beats of paces i.e. 'Quick' on the left foot, 'March' on the right foot.

Q720. When executing a 'Squad-tham' (Squad halt) from quick time, what length is the final short pace completed with the left foot?

- 12 inches
- 15 inches [CORRECT]
- 30 inches
- 40 inches

Explanation: The text for Halt specifies: 'Complete a short pace of 15 inches with the left foot, bend the right knee and bring the right foot in sharply to the left...'

Q721. In what specific ceremonial contexts is the 'Slow March' required according to the textbook?

- During normal squadron weekly PT and weapon training parades

- During rapid advance combat drills and obstacle courses
- **Pilots marching in front of VIPs and firing parties marching ahead of a corpse [CORRECT]**
- When covering distances greater than 500 yards on rough terrain

Explanation: Section 5, Paragraph 7 states: 'Slow march is required during important parades i.e. Pilots marching in front of VIP and firing parties marching ahead of corpse.'

Q722. When wheeling during a march in single file or threes, what is the diameter of the circle on which the inner man wheels?

- Two feet
- Three feet
- **Four feet [CORRECT]**
- Six feet

Explanation: Section 6 on Wheeling states: '...the inner man wheels on the circumference of a circle four feet in diameter and changes direction through 90 degrees...'

Q723. During a salute to the flank on the march, on which count/step do the cadets shout 'UP'?

- As the right foot touches the ground on the first beat
- As the left foot comes to the ground after the right arm is brought to the position of the salute
- Immediately upon hearing the command 'Salute' from the commander
- As the head and eyes turn back to the front

Explanation: Section 7 states: '...bring the right arm smartly to the position of the salute, turn the head and eyes to the right... As the left foot comes to the ground, the squad shouts 'UP'.'

Q724. When passing an officer on the march, at what exact interval must a cadet salute and subsequently lower their hand?

- Salute on the first pace before and lower on the first pace after
- **Salute on the third pace before reaching him and lower the hand on the third pace after passing him [CORRECT]**
- Salute exactly as you draw abreast of him and lower immediately
- Salute five paces before and lower two paces after

Explanation: Section 7, Paragraph 2 clearly dictates: 'When passing an officer, salute on the third pace before reaching him and lower the hand on the third pace after passing him.'

Q725. What is the exact length of a single side pace (Side Pace / Bazu Chal)?

- 10 inches
- **12 inches [CORRECT]**
- 15 inches
- 30 inches

Explanation: Section 8 states: 'The side pace (12 inches) is used to move the squad not more than 12 paces to a flank...'

Q726. Up to how many paces should a squad typically continue moving when executing a side pace before being halted?

- Up to two only
- **Up to four only [CORRECT]**
- Up to eight only
- Up to twelve only

Explanation: Section 8, Paragraph 2 specifies: 'Specify the exact number of paces (up to four only) the squad continues moving until halted.'

Q727. In 'Turning by numbers, left turn one' (Ginti se murna-baen mur-ek), what is the position of the feet when the cadet freezes?

- Both heels together in the attention position
- **Left foot forward flat on the ground, right foot 30 inches to the rear with heel raised [CORRECT]**
- Right foot forward flat on the ground, left foot 15 inches to the rear
- Feet crossed at an angle of 45 degrees

Explanation: Section 6, Paragraph 1 states: 'The cadet will freeze with the left foot forward flat on the ground, the right foot 30 inches to the rear, heel raised; both legs braced...'

Q728. In 'Turning about by numbers, about turn one' (Ginti se pichhe murna), when is the command given?

- As the right foot passes the left
- **As the left foot passes the right [CORRECT]**
- When both feet are stationary in attention
- As the heel of the right foot hits the ground in double time

Explanation: Section 6, Paragraph 6 states: 'Ginti se pichhe murna, pichhe mur ek' (Turning about by numbers, about turn one) (given as the left foot passes the right).'

Q729. During 'Eyes Right' (Dahine Dekh), what action does the guide take?

- The guide turns his head and eyes fully to the right along with the squad.
- **The guide looks to his front in order to keep direction. [CORRECT]**
- The guide salutes with his right hand while looking right.
- The guide halts immediately while the squad wheels around him.

Explanation: Section 7, Paragraph 4 states: 'The guide will look to his front in order to keep direction. All officers, in command will salute, the remainder will turn their heads.'

Q730. When taking paces forward or to the rear, what is the maximum number of paces that can be ordered?

- Two paces
- **Three paces [CORRECT]**
- Four paces
- Five paces

Explanation: According to Section 9, paragraph 3(c), the maximum number of paces ordered to step forward or rear will be three.

Q731. What is the length of a full pace when adopting normal marching for more than one pace forward or to the rear?

- 15 inches
- 21 inches
- **30 inches [CORRECT]**
- 36 inches

Explanation: According to Section 9, paragraph 3(b), if more than one pace is ordered, cadets adopt normal marching, stepping a full pace of 30 inches.

Q732. When marking time from quick marching, what length of short pace is taken with the right foot as the command 'Qadam Tal' is executed?

- 12 inches
- **15 inches [CORRECT]**
- 18 inches

- 30 inches

Explanation: Section 9, paragraph 4 states that when marking time from quick marching, a short pace of 15 inches is taken with the right foot.

Q733. In the process of changing step in quick time ('Qadam badalna ek'), what is the position of the arms on 'Squad Do' (Squad two)?

- Both arms raised in front
- Both arms extended to the rear
- **Arms are cut to the sides [CORRECT]**
- Right arm in front and left arm in rear

Explanation: Section 9, paragraph 6(b) states that on 'Squad Do', the left foot is bent forward and placed flat on the ground with the hollow in the heel of the left foot and the arms are cut to the sides.

Q734. During the making of a squad from standing in threes, how many steps does the No. 1 file take during the slow march from the front?

- 1 step
- **3 steps [CORRECT]**
- 5 steps
- 7 steps

Explanation: Section 11, paragraph 2 states that the cadet on the right side (No 1 file) will take 3 steps ahead and halt.

Q735. In the making of a squad from standing in threes, how many steps does the No. 2 file take during the slow march from the front?

- 3 steps
- **5 steps [CORRECT]**
- 7 steps
- 9 steps

Explanation: Section 11, paragraph 2 outlines that No. 1 takes 3 steps, followed by No. 2 file who will take 5 steps.

Q736. What is the primary purpose of forming a squad as mentioned in Section 11 General?

- To increase marching speed
- **To change the formation of the squad or to conserve space [CORRECT]**
- To prepare for weapon cleaning
- To execute ceremonial rifle salutes

Explanation: Section 11, paragraph 1 states that forming of squad is done to change the formation of the squad or to conserve space.

Q737. When the squad is commanded to 'form up to the left' without halting, what does the guide do?

- Takes three steps forward
- **Keeps standing while the rest turn half left [CORRECT]**
- Takes a 15-inch short pace
- Executes a quick mark time

Explanation: Section 11, paragraph 3 states that on the word of command 'form up to the left', the guide will keep standing and the rest will turn half left.

Q738. In Chapter III(A) Arms Drill, what is the position of the magazine when standing at 'Savdhan' (Attention) with a rifle?

- To the rear
- To the left
- **To the front [CORRECT]**
- To the right

Explanation: Arms Drill Section 1, paragraph 1 notes that in the position of attention with a rifle, the magazine faces to the front.

Q739. In the position of 'Visharam' (Stand-at-Ease) with a rifle, how far apart should the feet be?

- About 6 inches apart
- **About 12 inches apart [CORRECT]**
- About 18 inches apart
- About 30 inches apart

Explanation: Arms Drill Section 1, paragraph 2 specifies that during 'Visharam', the left leg is carried to the left so that the feet are about 12 inches apart.

Q740. During 'Visharam' (Stand-at-Ease) with a rifle, what action is performed with the right arm?

- Force the right hand to the nose cap
- **Force the rifle straight out to the front by keeping the right arm straight [CORRECT]**
- Cut the right arm to the side
- Raise the right arm in front of the body

Explanation: Arms Drill Section 1, paragraph 2 instructs to 'force the rifle straight out to the front by keeping the right arm straight, shoot the right hand forward to its fullest extent'.

Q741. In Arms Drill Section 1, paragraph 3, what action defines 'Aram Se' (Stand Easy) with a rifle?

- Lowering the rifle flat on the ground
- **Forcing the right hand to the nose cap of the rifle, curling fingers and thumb round [CORRECT]**
- Taking a 15-inch pace to the rear
- Stepping back to the position of attention

Explanation: Arms Drill Section 1, paragraph 3 states to 'Force the right hand to the nose cap of the rifle, the fingers and the thumb curling round the rifle'.

Q742. When transitioning from 'Aram Se' back to 'Visharam', what is the word of command?

- Squad Savdhan
- Squad Tham
- **Squad [CORRECT]**
- Qadam Tal

Explanation: Arms Drill Section 1, paragraph 4 states: 'On word of command 'Squad', force the right hand down the rifle to the correct position of stand-at-ease and brace the body.'

Q743. When transitioning from 'Visharam' to 'Savdhan' with a rifle, what is the word of command given?

- Squad Aram Se
- Squad Visharam
- **Squad Savdhan [CORRECT]**
- Squad Age Barh

Explanation: Arms Drill Section 1, paragraph 5 states: 'On word of Command 'Squad Savdhan' (Squad attention), pull the rifle into the side...'

Q744. Which of the following is listed under the index of Chapter-III (A) Drill with Arms and Ceremonial Drill?

- **Section-9 Examine Arms [CORRECT]**
- Section-12 Squad Inversion
- Section-10 Counter Marching
- Section-8 Rapid Firing

Explanation: The index for Chapter-III (A) explicitly lists 'SECTION-9 Examine Arms' along with other arms drill sections.

Q745. When getting on parade with a rifle, at what position is the rifle carried out?

- Bagal Shastr
- **Tol Shashtra (short trail) [CORRECT]**
- Bajr Shastr
- Salami Shastr

Explanation: According to Section-2, when getting on parade with a rifle, it is carried out at 'Tol Shashtra' (short trail).

Q746. During dressing with a rifle, which arm does the front rank raise instead of the right arm?

- Right arm
- Both arms
- **Left arm [CORRECT]**
- No arm is raised

Explanation: According to Section-2, in dressing, the front rank raises the left arm instead of the right arm.

Q747. What is the procedure regarding rifles before a squad is dismissed?

- Rifles will be grounded
- **Rifles will be shouldered [CORRECT]**
- Rifles will be placed at short trail
- Rifles will be ordered

Explanation: Section-3 states that the procedure for dismissing and falling out will be as for Foot Drill, but rifles will be shouldered before the squad is dismissed.

Q748. In 'Bhumi Shastr (r)-ek' (Ground arms one), where should the magazine be facing when the rifle is laid on the ground?

- To the left
- Straight to the front
- **To the right [CORRECT]**
- To the rear

Explanation: Section-4 states to lay the rifle gently on the ground at the right side with the magazine to the right.

Q749. During the second movement of 'Take Up Arms' ('Uthao Shastr (r) –ek'), what action is taken after resuming the position of attention?

- **Bring the rifle to its correct position at order [CORRECT]**
- Raise the rifle to shoulder arms
- Execute a present arms
- Move the rifle to trail arms

Explanation: Section-4 specifies that on 'Squad Do' of Take Up Arms, one resumes the position of attention and brings the rifle to its correct position at order.

Q750. In 'Bagal Shast (r) – ek' (Shoulder arms one), where does the left arm seize the rifle?

- At the point of balance
- **In line with the waist belt on the hand guard [CORRECT]**
- At the pistol grip
- Below the bayonet stand

Explanation: Section-5 explains that in the first movement of shoulder arms, the left arm comes across the body to seize the rifle in line with the waist belt on the hand guard.

Q751. How many counts/steps are there in 'Bazu Shast (r)-ek' (Order arms from shoulder)?

- One count
- Two counts
- **Three counts [CORRECT]**
- Four counts

Explanation: Section-5 details three distinct counts: Order arms one (left hand holds barrel), Squad do (drop rifle with left hand and hold hand guard with right), Squad teen (cut left hand and drop butt to ground).

Q752. In the first movement of 'Salami Shastr (r) –ek' (Present Arms), where does the left hand catch the rifle?

- At the small of the butt
- **At the point of balance [CORRECT]**
- At the hand guard
- At the pistol grip

Explanation: Section-6 states: 'Throw the rifle upwards with the right hand, catching it with the left hand at the point of balance'.

Q753. In 'Squad Teen' of Present Arms, what part of the right foot is placed against the left heel?

- The toe
- **The hollow [CORRECT]**
- The heel
- The outer edge

Explanation: Section-6 states: 'at the same time place the hollow of the right foot against the left heel both knees straight.'

Q754. During the salute with the rifle at the halt, how is the left hand positioned when striking the hand guard?

- Forearm perpendicular to the ground
- **Forearm parallel to the ground [CORRECT]**
- Arm fully extended upwards
- Arm resting on the hip

Explanation: Section-7 states: 'take the left hand across the body, forearm parallel to the ground. Strike the hand guard with palm of the hand...'

Q755. When saluting on the march with a rifle, on which pace before reaching the officer is the salute given?

- First pace
- Second pace
- **Third pace [CORRECT]**
- Fourth pace

Explanation: Section-7 states: 'The salute will be given on the third pace before reaching the officer'.

Q756. During the short trail, approximately how high is the butt of the rifle raised from the ground?

- About half an inch
- **About one inch [CORRECT]**
- About two inches
- About three inches

Explanation: Section-8 states: 'Slightly bend the right arm to raise the butt of the rifle about one inch from the ground.'

Q757. In 'Tol shastr(r)' (Trail arms), how is the rifle held?

- Vertical, muzzle pointing up
- Slanted at 45 degrees
- **Horizontal, muzzle pointing to the front and magazine underneath [CORRECT]**
- Under the right armpit

Explanation: Section-8 states: 'catching rifle at the point of balance, back of the hand to the right, arm straight so that the rifle is horizontal, muzzle pointing to the front and magazine underneath.'

Q758. What command is used to return to Order arms from the Trail position?

- Bhumi Shastr
- **Bazu Shastr [CORRECT]**
- Uthao Shastr
- Bagal Shast

Explanation: Section-8 notes the command for order from the trail is 'Bazu Shastr(r)', (Order arms).'

Q759. In 'Bagal Shast (r) – ek' (Shoulder arms), where is the barrel resting?

- In the hollow of the left shoulder
- **In the hollow of the right shoulder [CORRECT]**
- Against the chest
- Against the right cheek

Explanation: Section-5 specifies: 'Barrel resting in the hollow of the right shoulder' during the first movement of shoulder arms.

Q760. During the 'Examine Arms' (Janch Shastr) drill movement, how far to the left front should the front of the foot be placed?

- About 12 inches
- **About 16 inches [CORRECT]**
- About 20 inches
- About 24 inches

Explanation: According to Section-9 Examine Arms, step 1, the cadet bends the left knee, placing the front of the foot on the ground about 16 inches to the left front.

Q761. To whom is the National Salute given in the NCC ceremonial drill?

- Major Generals and above
- Brigadiers and above
- **The President of India and the Governors of the various states within their own jurisdiction [CORRECT]**
- All visiting dignitaries

Explanation: Section-10 Ceremonial Drill states that the National Salute is given to the President of India and the Governors of the various states within their own jurisdiction.

Q762. What rank of dignitaries receives a General Salute during an NCC ceremonial parade?

- Major General and above [CORRECT]
- Brigadier and above
- Colonel and above
- Lieutenant General only

Explanation: Section-10 Ceremonial Drill specifies that a General Salute is given to dignitaries of the rank of Major General and above.

Q763. When the parade advances in review order, how many paces does it automatically take before halting?

- 10 paces
- 12 paces
- 15 paces [CORRECT]
- 20 paces

Explanation: Section-10, procedure 3(k) states that the parade will automatically halt after taking 15 paces, coinciding with the stopping of the music.

Q764. What is the requirement for personnel detailed for guard mounting regarding prior practice?

- 1+5 requirement on the morning of
- 2+6 requirement on the previous evening [CORRECT]
- 3+7 requirement two days prior
- 1+3 requirement on the same day

Explanation: Section-11 Guard Mounting, paragraph 1 states personnel detailed will be turned out by guard mounting NCO on the previous evening for guard practice (requirement 2+6).

Q765. How far away from the guard must the guard mounting NCO stand when falling in and inspecting the guard?

- 6 paces
- 10 paces
- 12 paces [CORRECT]
- 15 paces

Explanation: Section-11 Guard Mounting, paragraph 2 states the Guard mounting NCO will be twelve paces away from the guard.

Q766. During guard inspection, when the Orderly Officer moves from the first person to the second during 'Janch Shastr', who accompanies them?

- The Guard Mounting NCO
- The Assistant Guard Commander
- The Guard Commander [CORRECT]
- The Old Guard Commander

Explanation: Section-11, paragraph 3(b) explains that after the orderly officer completes the first person and moves to the second, the guard commander will fall out and accompany the orderly officer.

Q767. When the new guard approaches the guard room, at what distance in front of the new guard does the old guard commander fall in his guard?

- 10 paces
- 12 paces
- 15 paces [CORRECT]

- 20 paces

Explanation: Section-11, paragraph 4 states that the old guard commander will 'fall in' his guard fifteen paces in front of the new guard.

Q768. During the posting of sentries, how many paces in front of the sentries does the guard commander place himself?

- 2 paces
- **3 paces [CORRECT]**
- 5 paces
- 6 paces

Explanation: Section-11, paragraph 5 states the guard commander will place himself three paces in front of the sentries.

Q769. During the 'Order arms one' (Bazu Shast(r)-ek) movement from examine arms, at 'Squad Two', where is the rifle pulled down and struck with the left hand?

- **Just above the nosecap [CORRECT]**
- At the center of the handguard
- At the butt plate
- Below the trigger guard

Explanation: Section-9, Examine from the Order, paragraph 2 ('Squad Do') states: 'Pull the rifle down to the right side striking it with the left hand just below the nosecap...'

Q770. What word of command is given to the company commanders at the first flag (6 paces from the saluting base) during a march past?

- Company Samne Dekh
- **Company Dahine Dekh [CORRECT]**
- Company Savdhan
- Company Salam Shast(r)

Explanation: Section-10, procedure 3(g) notes that at the first flag (6 paces of the saluting base) each company commander will give the word of command 'Company Dahine Dekh'.

Q771. Where does the orderly officer position themselves initially before the guard mounting NCO reports?

- 3 paces behind the guard mounting NCO
- **6 paces behind the guard mounting NCO [CORRECT]**
- 10 paces in front of the guard
- Directly beside the guard commander

Explanation: Section-11, paragraph 2(e) mentions the orderly officer would have taken position 6 paces behind the guard mounting NCO.

Q772. When the new guard approaches, what compliment does the old guard pay to the new guard?

- General Salute
- National Salute
- **Present Arms (Salami Shastr) [CORRECT]**
- Shoulder Arms (Bagal Shastr)

Explanation: Section-11, paragraph 4 states 'The old guard will present arms and the new guard will return the compliment.'

Q773. During the transfer of a new sentry, how many steps does the old sentry take to the front upon the command 'Sentries Badli Karo'?

- One step
- **Two steps [CORRECT]**
- Three steps
- Four steps

Explanation: Section-11, paragraph 5 states 'The old sentry will take two steps to the front and the new sentry two steps to his right.'

Q774. What is the specific word of command given by the orderly officer to cause the guard to ease spring and close the bolt?

- Guard-Janch Shastr
- **Guard-Bolt Chalao [CORRECT]**
- Guard-Bazu Shastr
- Guard-Karwa Shastr

Explanation: Section-11, paragraph 3(c) states the word of command by orderly officer for this action is 'Guard-Bolt Chalao'.

Q775. Whose prior concurrence is required to provide a Guard of Honour to other dignitaries specially invited as guests of honour to NCC functions or unit camps?

- Director General NCC
- The Defence Secretary
- **The Dy DG National Cadet Corps of the States concerned [CORRECT]**
- The Chief of Army Staff

Explanation: According to Section-12, Paragraph 1, prior concurrence of the Dy DG National Cadet Corps of the States concerned is required for special guests of honour.

Q776. What is the specific distance between the front and rear ranks when a Guard of Honour is formed up?

- 2 paces
- **4 paces [CORRECT]**
- 7 paces
- 8 paces

Explanation: Section-12, Paragraph 3(a) states that the guard will form up in two ranks with a distance of 4 paces between the front and the rear ranks.

Q777. What is the distance maintained between individual cadets within the Guard of Honour formation?

- 18 inches
- 20 inches
- **24 inches [CORRECT]**
- 30 inches

Explanation: According to Section-12, Paragraph 3(a), the distance between cadets in the Guard of Honour shall be 24 inches.

Q778. Where does the Guard Commander position themselves relative to the centre of the front rank during the formation of the Guard of Honour?

- 2 paces in front
- 4 paces in front
- 6 paces in front

- 8 paces in front [CORRECT]

Explanation: Section-12, Paragraph 3(a) specifies that the guard commander will be 8 paces in front of the centre of the front rank.

Q779. How many rank and file personnel are mandated for the Guard of Honour provided to the President of India?

- 100 rank and file
- **150 rank and file [CORRECT]**
- 50 rank and file
- 200 rank and file

Explanation: Section-12, Paragraph 4(a) states that the strength of the Guard of Honour for the President will be 150 rank and file formed up in 3 equal divisions.

Q780. Which dignitaries are entitled to receive the 'Rashtriya Salute' from the NCC Guard of Honour?

- The Prime Minister and Defence Minister
- **The President and the Governors within their own states [CORRECT]**
- All Chief Ministers of States
- The Director General NCC

Explanation: Section-12, Paragraph 5(a) specifies that Rashtriya Salute is given to the President and the Governors within their own states.

Q781. What is the exact Hindi report delivered by the Guard Commander to the VIP during the inspection?

- Guard Samman ke Lie Tayar Hai Sriman
- **Guard (Name of Unit) Samman Guard Nirikshan ke Lie Hazir Hai Sriman (Srimati Ji) [CORRECT]**
- Guard Pranam ke Lie Hazir Hai Sriman
- Samman Guard Nirikshan Hetu Prastut Hai

Explanation: Section-12, Paragraph 6(a) outlines the exact Hindi reporting phrasing for the inspection.

Q782. During the inspection of the Guard of Honour, who is the exception allowed to march in front of the VIP?

- The Conducting Officer
- The Guard Commander
- **The AsDC in the case of the President of India [CORRECT]**
- The Bandmaster

Explanation: Section-12, Paragraph 6(c) states that AsDC will not march in front of the VIP except in the case of the President of India.

Q783. During the inspection, how does the band behave when the VIP passes them?

- They turn their heads and eyes towards the VIP
- They salute the VIP individually with instruments
- **They do not turn their heads and eyes toward the VIP but look straight to the front [CORRECT]**
- They march alongside the VIP

Explanation: Section-12, Paragraph 6(d) specifies that the band will not turn their heads and eyes toward the VIP during the inspection but look straight to the front.

Q784. Which rank(s) of the Guard of Honour is/are physically inspected during the procedure?

- Both front and rear ranks
- **Only the front rank [CORRECT]**

- Only the rear rank
- All divisions equally

Explanation: Section-12, Paragraph 6(g) clearly notes that only the front rank of the Guard will be inspected.

Q785. When is the Guard of Honour permitted to 'Stand Easy' (Aarams Se) or march off after the inspection and departure?

- Immediately after the VIP boards the vehicle
- When the Guard Commander returns to his post
- **Till the VIP for whom it is mounted has left the place of the Guard [CORRECT]**
- As soon as the conducting officer signals

Explanation: Section-12, Paragraph 7 specifies the Guard will not march off or 'Stand Easy' till the VIP has left the place of the Guard.

Q786. In Chapter-IV (Weapon Training) Index, which section covers 'Theory of Group and Snap Shooting' and is it applicable to JD/JW or SD/SW?

- Section-7, Applicable to JD/JW only
- **Section-8, Applicable to SD/SW only [CORRECT]**
- Section-9, Applicable to both JD/JW and SD/SW
- Section-10, Applicable to JD/JW only

Explanation: According to the Chapter-IV Index, Section-8 covers 'Theory of Group and Snap Shooting' and is marked with a dash for JD/JW and a checkmark (✓) for SD/SW.

Q787. According to the Chapter-IV Index, which specific weapon characteristics are covered under Section-10?

- Characteristics of .22 Rifle
- **Characteristics of 7.62 mm SLR and 5.56 mm INSAS [CORRECT]**
- Characteristics of LMG and 7.62mm Rifle
- Characteristics of Sten Gun and INSAS

Explanation: The Chapter-IV Index lists Section-10 as 'Characteristics of 7.62 mm SLR and 5.56 mm INSAS' applicable to SD/SW.

Q788. In the Chapter-IV Weapon Training Index, which section specifically addresses 'Aiming I - Range and Targets' and what is its applicability?

- **Section-4, applicable to JD/JW only (- for SD/SW) [CORRECT]**
- Section-4, applicable to SD/SW only
- Section-7, applicable to both JD/JW and SD/SW
- Section-3, applicable to JD/JW only

Explanation: The Index shows Section-4 as 'Aiming I - Range and Targets' with a checkmark for JD/JW and a dash for SD/SW.

Q789. Which section in Chapter-IV (Weapon Training) is dedicated to 'Loading/Unloading and Bolt Manipulation'?

- Section-1
- **Section-2 [CORRECT]**
- Section-3
- Section-5

Explanation: The Chapter-IV Index explicitly lists Section-2 as 'Loading/Unloading and Bolt Manipulation', applicable to both JD/JW and SD/SW.

Q790. What is the length of the Rifle .22 No II MK IV as specified in the characteristics table?

- 43"
- **45" [CORRECT]**
- 46"
- 42"

Explanation: According to the characteristics table in Section-1, the length of Rifle .22 No II MK IV is 45".

Q791. What is the weight of the Rifle .22 Deluxe BA?

- 8 Lbs 10 ½ OZ
- **6 LBs 2 OZ [CORRECT]**
- 7 Lbs 4 OZ
- 5 Lbs 8 OZ

Explanation: The characteristics table specifies the weight of the Rifle .22 Deluxe BA as 6 LBs 2 OZ.

Q792. What is the magazine capacity of Rifle .22 No II MK IV?

- 05 Rounds
- **10 Rounds [CORRECT]**
- 15 Rounds
- 20 Rounds

Explanation: The magazine capacity for Rifle .22 No II MK IV is listed as 10 Rounds in the characteristics table.

Q793. What is the maximum range of the .22 rifle at a 33-degree angle?

- 1500 yds
- **1700 yds [CORRECT]**
- 2000 yds
- 2500 yds

Explanation: The maximum range for the .22 rifle is stated as 1700 yds at a 33-degree angle.

Q794. What is the rapid rate of fire for the .22 rifles mentioned in the text?

- 05 Rds pm
- **10-15 Rds pm [CORRECT]**
- 20-25 Rds pm
- 30 Rds pm

Explanation: The rapid rate of fire is 10-15 rounds per minute (Rds pm) for both variants.

Q795. How many grooves are present in the barrel of the .22 rifle?

- 04
- 05
- **06 [CORRECT]**
- 08

Explanation: The characteristics table lists the number of grooves in the barrel as 06.

Q796. During the stripping of the .22 rifle, where should you check that the number corresponds with the back side of the lever of the bolt?

- On the right side of the barrel
- **On the left side of the body [CORRECT]**
- On the butt plate

- On the magazine base

Explanation: Section-1, paragraph 5 states to check that the number on the left side of the body corresponds with the number on the back side of the lever of the bolt.

Q797. When assembling the bolt of the Deluxe .22 rifle, which parts must be in a line?

- Bolt head and guide rib as well as cocking piece and steel lug [CORRECT]
- Safety catch and trigger
- Pull through and oil bottle
- Magazine catch and leaf back sight

Explanation: Paragraph 7(b) of Section-1 states that the bolt head and guide rib as well as cocking piece and steel lug must be in a line.

Q798. In the pull-through used for cleaning the .22 rifle, what is the loop nearest to the weight used for?

- Oiling the barrel
- For the gauze [CORRECT]
- Cleaning with flannelette
- For the armourer

Explanation: Section-1, paragraph 10 explains that the pull-through has three loops, and the one nearest to the weight is for the gauze.

Q799. Which loop of the pull-through is used for cleaning the barrel with flannelette?

- The end loop
- The centre loop [CORRECT]
- The loop nearest to the weight
- The armourer's loop

Explanation: Paragraph 10 specifies that the centre loop of the pull-through is for cleaning the barrel with flannelette.

Q800. What is noted regarding the charger for the Deluxe rifle in Section-2?

- It holds 10 rounds
- No charger is provided for Deluxe rifle [CORRECT]
- It must be oiled before loading
- It is loaded automatically

Explanation: Section-2, paragraph 2 explicitly states that no charger is provided for the Deluxe rifle.

Q801. When taking the lying position to load and unload the rifle, how should the left hand grasp the rifle initially?

- At the muzzle
- At the point of balance [CORRECT]
- At the small of the butt
- At the magazine

Explanation: Section-2, paragraph 4(a) instructs to pass the rifle into the left hand, grasping it at the point of balance.

Q802. What are considered the three basic essentials of good shooting according to Section-3?

- Speed, stealth, and accuracy
- Comfortable position/firm hold, correct aiming, and proper trigger pressing [CORRECT]
- Rapid loading, cleaning, and sight setting

- Stance, breathing, and following through

Explanation: Section-3, paragraph 5 outlines the three basic essentials: position/hold for rock-like steadiness, correct aiming, and trigger pressing without disturbing the aim.

Q803. In the lying position, what forms the horizontal triangle?

- The two feet and the left elbow
- **The three points where the chest leaves the ground, the left elbow, and the right elbow [CORRECT]**
- The rifle butt, right hand, and left shoulder
- The chin, chest, and right knee

Explanation: Section-3, paragraph 6(b)(i) defines the horizontal triangle formed by the three points where the chest leaves the ground, the left elbow, and the right elbow.

Q804. How is the sight adjusted during sight setting?

- By turning the muzzle cap
- **By pressing the thumb spring [CORRECT]**
- By twisting the bolt knob
- By removing the leaf back sight

Explanation: Section-1, paragraph 9 states: 'Set the sight by pressing the thumb spring (Range increasing towards the muzzle side-adjust the thumb spring accordingly).'

Q805. In the vertical triangle formed when viewing the firer from the front, what forms the two sides of the triangle?

- The shoulders and elbows
- **The forearms [CORRECT]**
- The rifle barrel and sling
- The upper arms and chest

Explanation: According to the text, the two sides of the vertical triangle as viewed from the front are formed by the forearms, with the base being the ground between the elbows.

Q806. Where should the butt plate meet the shoulder to avoid a sore shoulder and flinching?

- In the hollow of the shoulder
- On the collarbone
- **On the interior pad of the shoulder muscle joint [CORRECT]**
- Directly on the top of the shoulder joint

Explanation: The text states that improper bedding results in a sore shoulder and flinching, and the butt plate should meet the shoulder on the interior pad of the shoulder muscle joint and not in the 'hollow' of it.

Q807. What is the specific role of the left hand during rifle holding?

- To pull the rifle firmly into the shoulder
- **To act as support to the forward part of the rifle helping to steady it [CORRECT]**
- To operate the safety catch
- To adjust the backsight elevation

Explanation: The left hand acts as a support to the forward part of the rifle thereby helping to steady the rifle into the shoulder, and it must never pull the rifle into the shoulder.

Q808. What is the standard range normally used for the Deluxe .22 rifle as mentioned in the aiming section?

- 50 yds
- 100 yds

- 25 yds [CORRECT]
- 15 yds

Explanation: The text explicitly states under Aiming - Range and Targets that normally 25 yds range is used for Deluxe .22 rifle.

Q809. According to the laws of aiming, how should the foresight be seen through the black sight 'U'?

- High above the U
- To the extreme left of the U
- Right in the centre of the U with the tip aligned in the centre and level with the shoulder of the U [CORRECT]
- Touching the bottom base of the U

Explanation: The laws of aiming specify seeing the foresight through the black sight 'U' right in the centre, with the tip of the foresight aligned in the centre and in level with the shoulder of the U.

Q810. Why is elevation given to the rifle?

- To counter the wind drift
- To counter the force of gravity while the bullet is in flight [CORRECT]
- To increase muzzle velocity
- To compensate for the firer's heartbeat

Explanation: The text mentions that elevation is given to counter the force of gravity while the bullet is in flight, and this elevation depends upon the range of the target.

Q811. What size of target is generally used by girl cadets for rapid firing?

- 1' x 1' target
- 6 inches figure target [CORRECT]
- 2' x 2' target
- 12 inches bull target

Explanation: Under the targets section, it is specified that for rapid firing, a 6 inches figure target is used and the aim is taken at the centre of the figure.

Q812. What type of target is used specifically for grouping practice by girl cadets?

- 6 inches figure target
- 1' x 1' target with a white patch in the centre of the bull [CORRECT]
- Plain 1' x 1' target without markings
- Concentric ring target without bull

Explanation: The text states that for grouping, a 1' x 1' target with a white patch in the centre of the bull is used.

Q813. What is the primary object of Trigger Operation Exercise No 1?

- To practice muscular control of the hand using the right knee
- To practice independent action of the index finger [CORRECT]
- To introduce holding with magazines removed
- To practice breathing control while aiming

Explanation: Trigger Operation Ex No 1 has the object to practice independent action of the index finger.

Q814. In Trigger Operation Exercise No 2, where is the right hand placed while the index finger moves through an arc?

- On the left wrist
- On the right knee clinched [CORRECT]

- Supporting the head
- On the rifle stock

Explanation: The text states: 'For this hold the right knee clinched with the right hand less the index finger, held away in a hooked position as through round trigger.'

Q815. According to the sequence of firing a shot, what is the maximum time that should be taken to fire a shot from the time correct holding is achieved?

- 2 seconds
- **More than 5 seconds should not be taken [CORRECT]**
- Up to 10 seconds
- There is no time limit

Explanation: The text notes under 'Turning the Shot' that from the time correct holding is achieved, more than five seconds should not be taken to fire a shot, as dwelling on the aim tires the eye and muscles.

Q816. What must the firer do immediately upon coming into the aim during the sequence of firing a shot?

- Pull the trigger completely
- **Take the first pressure [CORRECT]**
- Take the second pressure
- Exhale completely

Explanation: Section 5, paragraph 15 states: 'Aiming Position. On coming into the aim, the firer must take the first pressure.'

Q817. What is the rule regarding breathing just before taking an aim?

- Hold breath from the very beginning
- **Breathing must be gently restrained [CORRECT]**
- Take deep continuous breaths
- Inhale heavily and hold

Explanation: Paragraph 16 states: 'Breathing. Just before taking an aim, breathing must be gently restrained. It is important to coordinate so that when the foresight comes to the point of aim, the breath is partially exhaled.'

Q818. What action defines the 'Follow Through' phase after firing a shot?

- Immediately relaxing the hold and standing up
- Opening the bolt and ejecting the cartridge
- **Maintaining the hold and aim until the bullet has left the barrel (or even reached the target) [CORRECT]**
- Checking the target through binoculars

Explanation: The text explains 'Follow Through' as maintaining the hold and aim until the bullet has left the barrel, or better still, allowing it through until the bullet has reached the target.

Q819. What indicates that a young firer is a potential marksman during Trigger Operation Exercise No 5?

- Completing 50 rounds in record time
- **Getting two or three totally correct performances quickly [CORRECT]**
- Firing with eyes completely closed
- Hitting the bullseye from 50 yards

Explanation: Paragraph 11 states: 'When the young firer performs this exercise by getting two or three totally correct performances quickly, he is a potential marksman.'

Q820. What action must a firer take immediately after follow-through or declaration during firing practice?

- Stand up and unload the rifle

- **Reloading at the shoulder should be carried out [CORRECT]**
- Report to the officer-in-charge
- Change the target paper

Explanation: According to Range Procedure Section, immediately after follow through or declaration, reloading at the shoulder should be carried out.

Q821. What is the primary aim of performing 'Limber-Up' before firing any practice?

- To clean the rifle barrel
- To inspect live ammunition
- **To assist in coordination and tuning up of muscles, eye and brain [CORRECT]**
- To test the range red flags

Explanation: Limber-Up aims to assist in coordination and tuning up of muscles, eye and brain before starting practice.

Q822. Where must one red flag always be positioned on the range when firing is active?

- At the firing point entrance
- **On the top of the butt [CORRECT]**
- Next to the waiting detail shelter
- At the 100 yards marker

Explanation: Range Procedure states that one flag will always be on the top of the butt as part of safety orders.

Q823. During inspection, loading, and unloading on the firing point, how must all rifles be pointed?

- Towards the ground
- Upwards towards the sky
- **Towards the target [CORRECT]**
- Towards the firing point officer

Explanation: During inspection, loading, and unloading, all rifles must point towards the target.

Q824. What command is given by the officer-in-charge for 'Examine Arms' where rifles are held parallel to the ground pointing towards the target?

- Age Barh
- Khali Kar
- **Nirikshan ke lie Janch Shashtra [CORRECT]**
- Detail Report

Explanation: On the command 'Nirikshan ke lie Janch Shashtra' (Examine Arms) rifles will be held parallel to the ground and pointing in the direction of the target.

Q825. What action must firers perform upon completion of fire to signal they are done?

- Stand up immediately
- **Raise their right hand up, keeping the elbow on the ground [CORRECT]**
- Place the weapon on the ground and step back
- Call out 'Theek' to the coach

Explanation: On completion of fire, the firers must raise their right hand up, keeping the elbow on the ground.

Q826. What type of ammunition is exclusively used on miniature ranges?

- .303 ammunition
- 7.62mm ammunition

- .22 ammunition [CORRECT]
- 5.56mm INSAS ammunition

Explanation: Section 6 specifies that only .22 ammunition will be used on miniature ranges.

Q827. What is defined as the central point of the area covered by a group of rounds fired with consistent aim?

- Point of Aim
- Mean Point of Impact (MPI) [CORRECT]
- Grouping Capacity
- Zero Line

Explanation: The central point of area covered by the group of rounds fired with consistent aim and held at the same aiming mark is called MPI.

Q828. What is the rise or drop of MPI on a target at a range of 400 yards when the sight is changed?

- 6 inches
- 12 inches
- 18 inches [CORRECT]
- 24 inches

Explanation: According to the elevation table, at 400 yards the rise or drop of MPI on target is 18 inches.

Q829. How is a firer's 'grouping capacity' measured at a standard range for coaching and scoring purposes?

- The total weight of ammunition used
- The diameter of a circle containing all five consecutive well-fired shots [CORRECT]
- The time taken to fire five rounds
- The distance between the first and last shot vertical drop

Explanation: The diameter of a circle containing all five shots, fired by a man to the best of his ability, is known as his grouping capacity.

Q830. In grouping practice, what happens if a firer accidentally fires with an incorrect aim and the bullet goes astray?

- It is counted towards widening their grouping capacity
- The entire practice is cancelled
- It should be ignored for judging his grouping capacity if it does not match the declared spot [CORRECT]
- They are immediately disqualified from the firing point

Explanation: If a bullet goes astray and not at the place declared by the firer, it should be ignored for judging his grouping capacity.

Q831. What is the primary purpose of introducing miniature range snap shooting after grouping and application fire?

- To increase ammunition consumption
- To defeat the time factor and handle target exposure [CORRECT]
- To test rifle cleaning speed
- To practice night firing conditions

Explanation: Snap shooting is introduced to defeat the time factor, making the firer realize that the exposure of target is enough to get a deliberate round fired.

Q832. During Stage-1 of snap shooting (Automatic Alignment), where do the squad members lie while the instructor is in the center?

- In a straight line

- In a semi circle [CORRECT]
- In a square formation
- In independent scattered positions

Explanation: Stage-1 specifies that the aiming mark is given at the instructor's eye when the squad is lying in a semi circle with the instructor in the center.

Q833. What replaces sound impulse later in Stage-2 of snap shooting practice?

- Sight impulse [CORRECT]
- Whistle signal
- A red flag drop
- Verbal command

Explanation: In Stage-2, indication with a finger is given as a signal to fire, meaning sight impulse replaces sound impulse.

Q834. When the officer-in-charge gives the command 'Detail Report' at the end of firing on a miniature range, how do the firers report?

- From right to left
- From left to right [CORRECT]
- Simultaneously in unison
- Only the first firer reports for all

Explanation: On the command 'Detail Report' the firers would report 'Number ek rifle theek, do theek...' from left to right.

Q835. During miniature range firing, what is the progressive reduction range of time allowed for representative figure targets?

- 10 to 5 seconds
- 7 to 4 seconds [CORRECT]
- 6 to 3 seconds
- 8 to 5 seconds

Explanation: For firing on miniature range representative figure targets are used and the time is progressively reduced from 7 to 4 seconds.

Q836. What is the guiding principle taught during continuous snap shooting when confronted with multiple enemies?

- Shoot to wound
- Shoot to kill [CORRECT]
- Fire and fall back
- Suppress and cover

Explanation: The text states that the guiding principle is, always 'Shoot to Kill'.

Q837. In continuous snap shooting, why is there no verbal declaration of aim?

- To conserve breath
- Because it would cause distraction [CORRECT]
- To maintain stealth
- Because range officers forbid talking

Explanation: Point (b) under Points to be Observed states there is no verbal declaration of aim, since this would cause distraction.

Q838. What is the Highest Possible Score (HPS) for the deliberate practice of 5 rounds using the .22 Rifle on a short range?

- 10 Points
- 12 Points
- **15 Points [CORRECT]**
- 20 Points

Explanation: Under Section 9 Short Range Firing (.22 Rifle), Practice No. 1 Deliberate lying supported shows HPS - 15 Points.

Q839. How many rounds are authorized per cadet in the 7.62mm Rifle course, including rounds pooled for zeroing and re-classification?

- 10 rounds
- **12 rounds [CORRECT]**
- 15 rounds
- 20 rounds

Explanation: The note under Section-10 specifies: 'Out of 12 rounds authorized per cadets, 2 rounds will be pooled for zeroing and re-classification of failures.'

Q840. What is the length of the 7.62mm SLR with a normal butt?

- 1126.50 mm
- **1139.20 mm [CORRECT]**
- 1151.90 mm
- 1397.00 mm

Explanation: Characteristics of 7.62 mm SLR list length with normal butt as 1139.20mm (44.85 in).

Q841. What is the total weight of a 7.62mm SLR rifle with a full magazine and bayonet?

- 4.4 kg
- 5.1 kg
- **5.392 kg [CORRECT]**
- 0.709 kg

Explanation: The weight of the SLR rifle with full mag and bayonet is given as 5.392 kg.

Q842. What is the rapid rate of fire for the 7.62mm SLR?

- 5 rds per min
- **20 rds per min [CORRECT]**
- 60 rds per min
- 150 rds per min

Explanation: The rate of fire for 7.62mm SLR specifies Rapid as 20 rds per min.

Q843. What is the effective range of the 7.62mm SLR?

- **275 m (300 yds) [CORRECT]**
- 400 m
- 600 yds
- 700 m

Explanation: The effective range of the 7.62mm SLR is listed as 275 m (300 yds).

Q844. How many grooves are present in the barrel of a 7.62mm SLR?

- 4 Grooves
- 5 Grooves
- **6 Grooves [CORRECT]**
- 8 Grooves

Explanation: The number of grooves for the 7.62mm SLR is 06 (Six).

Q845. What type of powder charge is used in the 7.62mm cartridge ammunition?

- Gunpowder
- **NC Powder [CORRECT]**
- Smokeless Black Powder
- Cordite Powder

Explanation: Under Amn (Cart SA Ball 7.62mm), the powder charge is listed as NC Powder.

Q846. What is the magazine capacity of the 7.62mm SLR?

- 10 rounds
- **20 rounds [CORRECT]**
- 30 rounds
- 5 rounds

Explanation: The magazine capacity of the 7.62mm SLR is 20 rds.

Q847. What is the length of the barrel of the 5.56mm INSAS Rifle?

- **464 mm [CORRECT]**
- 960 mm
- 1110 mm
- 470 mm

Explanation: Characteristics of 5.56mm INSAS Rifle list the length of the Barrel as 464mm.

Q848. What is the effective range of the 5.56mm INSAS Rifle?

- 275 m
- 300 yds
- **400 mtr [CORRECT]**
- 700 m

Explanation: The effective range of the 5.56mm INSAS Rifle is 400 mtr.

Q849. What modes of fire are available on the 5.56mm INSAS Rifle?

- Single shot only
- Automatic only
- **Single shot & three round burst (TRB) [CORRECT]**
- Rapid and cyclic only

Explanation: The mode of fire for the 5.56mm INSAS is single shot & three round burst (TRB).

Q850. What is the legal definition of a partial citizen according to the text?

- A person who owes allegiance to the State and enjoys full political rights.
- **A person who owes allegiance to the State, but has no political rights. [CORRECT]**
- An alien who enjoys civil rights but owes no allegiance.
- A person born in India with dual citizenship.

Explanation: Paragraph 11 explicitly defines a partial citizen as one who owes allegiance to the State, but has no political rights.

Q851. Which of the following describes how citizenship can be acquired by Nationalization?

- By being born within the geographical boundaries of India.
- By children born to Indian citizens living in foreign countries automatically.
- **By applying and fulfilling conditions like residence, state service, land purchase, or marriage, followed by a Government of India certificate. [CORRECT]**
- By holding citizenship in more than one State simultaneously.

Explanation: Paragraph 13(d) outlines acquisition by Nationalization through fulfillment of specific conditions and receiving a certificate from the Government of India.

Q852. According to the duties of a good citizen, what is considered the primary duty?

- To pay taxes promptly to the Government
- **To be loyal and owe allegiance to the State [CORRECT]**
- To protect government property from damage
- To expose black marketeers and smugglers

Explanation: Paragraph 15(a) states that the primary duty of a good citizen is to be loyal and owe allegiance to the State.

Q853. In the context of leadership traits, which trait is defined as the mental and physical stamina measured by the ability to withstand pain, fatigue, stress, and hardship?

- Courage
- Enthusiasm
- **Endurance [CORRECT]**
- Decisiveness

Explanation: Paragraph 8 under Leadership Traits defines endurance as mental and physical stamina measured by the ability to withstand pain, fatigue, stress, and hardship.

Q854. What does the leadership trait 'Initiative' require a leader to do?

- Wait for explicit orders before taking any action in an unsatisfactory situation.
- **Do what is to be done even in the absence of orders and avoid passive acceptance. [CORRECT]**
- Weigh all facts logically to base sound decisions promptly.
- Pass all credit for outstanding work exclusively to superiors.

Explanation: Paragraph 10 of Leadership Traits defines initiative as doing what is to be done even in the absence of orders, avoiding inactivity or passive acceptance.

Q855. How is 'Bearing' described as an outward mark of leadership?

- The ability to make decisions promptly and announce them forcefully.
- **Creation of favourable impression, upright carriage, condition of clothing and equipment, and alertness in actions. [CORRECT]**
- Display of sincere interest and zeal with a cheerful attitude.
- Absolute truthfulness, honesty, and personal integrity of character.

Explanation: Paragraph 3 under Leadership Traits specifies that bearing implies creating a favourable impression, upright carriage, proper clothing/equipment condition, alertness, and energy.

Q856. Which leadership trait involves rendering rewards and meting out punishments in accordance with the merits of the case while avoiding anger or racial/creed prejudice?

- Judgement
- Tact
- Justice [CORRECT]
- Integrity

Explanation: Paragraph 13 defines justice as the quality of being impartial, consistent in command, rendering rewards and punishment fairly, and avoiding prejudice or anger.

Q857. What guideline does the text provide regarding the use of language as an outward mark of leadership?

- Use complex, highly academic sentences to impress subordinates.
- Avoid criticism or condemnation of an entire group, and speak plainly and clearly with short, positive sentences. [CORRECT]
- Use sarcasm freely to keep subordinates alert.
- Talk down to subordinates to establish absolute authority.

Explanation: Paragraph 4 under Bearing states: 'Speak plainly and clearly. Make sentences short, simple, positive, direct, refrain from "talking down"... avoid criticism or condemnation of an entire group.'

Q858. What is the core definition of 'Tact' as a leadership trait?

- The ability to appreciate amusing moments and remain cheerful under stress.
- The ability to deal with others without creating offence, involving understanding of human nature and consideration for feelings. [CORRECT]
- Refraining from personal advancement at the expense of others.
- Faithfulness to country, seniors, subordinates, and colleagues.

Explanation: Paragraph 16 of Leadership Traits defines tact as the ability to deal with others without creating offence, involving an understanding of human nature and consideration for others' feelings.

Q859. According to the section on Unselfishness, how should a leader treat credit for outstanding work?

- Keep all credit for personal advancement and promotion.
- Pass the credit to the subordinates who made possible outstanding work. [CORRECT]
- Share the credit equally only with senior commanders.
- Attribute all success solely to personal tactical knowledge.

Explanation: Paragraph 18 under Unselfishness states that a leader must pass the credit to the subordinates who made possible outstanding work.

Q860. Which additional leadership traits are listed alongside truthfulness, esprit-de-corps, and humility in paragraph 19?

- Patience, self-confidence, maturity, and mental/emotional stability. [CORRECT]
- Aggressiveness, dominance, speed, and strictness.
- Physical strength, wealth, social status, and eloquence.
- Cunningness, flexibility, humor, and suspicion.

Explanation: Paragraph 19 lists truthfulness, esprit-de-corps, humility and sympathy, patience and a sense of urgency, self-confidence, maturity, and mental including emotional stability.

Q861. How does the text compare the character development of the young in the Personality/Character Development section?

- The young can be compared to hard steel that cannot be reshaped once forged.
- The young can be compared to clay, which can be moulded in the desired way. [CORRECT]
- The young are completely formed at birth and require no guidance.
- The young develop character exclusively through physical exercise.

Explanation: Paragraph 4 under Character states: 'The young can be compared to clay, which can be moulded in the desired way.'

Q862. According to the text on Character, what does true popularity and a good character depend upon?

- Having a pretty face and being extremely handsome.
- **Inner qualities of a true character such as gentle voice, friendliness, integrity, and moral courage. [CORRECT]**
- Holding a high financial position in society.
- Possessing aggressive personality features.

Explanation: Paragraph 4 states that popularity does not depend upon a pretty face, but upon inner qualities of true character, developed through experience, judgment, integrity, moral courage, etc.

Q863. What does the text state regarding a leader's requirement for 'Knowledge'?

- A leader only needs to know as much as the newest recruit in the unit.
- **A leader must know more than the men he commands. [CORRECT]**
- The process of acquiring knowledge stops once an officer is commissioned.
- Technical knowledge is completely secondary to physical endurance.

Explanation: Paragraph 14 under Knowledge states: 'A leader must know more than the men he commands. Until he does, he has no business to be called their leader.'

Q864. What is highlighted in the text as the foundation for the future of any nation?

- The industrial capacity and natural resources of the country.
- **The quality of its human beings and development of youth into confident leaders. [CORRECT]**
- The size of its standing armed forces and defense budget.
- Strict adherence to international trade agreements.

Explanation: Section-4 Introduction, paragraph 1 states: 'It is a well recognized fact that the future of any nation is largely related to the quality of it's human beings.'

Q865. Which of the following falls under biological factors determining an individual's personality?

- Culture
- **Heredity [CORRECT]**
- Social Group
- Home Environment

Explanation: Biological factors are studied under heredity, brain, and physical features as mentioned in paragraph 5(a).

Q866. What is the term used when socialization initially starts with contact with the mother and later other family members?

- Cultural conditioning
- Mirroring
- **Social and family factors [CORRECT]**
- Biological transmission

Explanation: Paragraph 5(c) states that family and social factors combine with culture for socialization, which initially starts with contact with the mother.

Q867. What is defined as understanding the body language of ideal people and making it a part of your attitude?

- Judgment
- **Mirroring [CORRECT]**

- Conviction
- Empathy

Explanation: Paragraph 7(b) defines mirroring as observing how ideal people act, speak, and think, and making their body language a part of your attitude.

Q868. According to the text, which leadership trait is NOT listed among the measures to improve character?

- Decisiveness
- Enthusiasm
- Flexibility [CORRECT]
- Patriotism

Explanation: Paragraph 8 lists courage, decisiveness, initiative, enthusiasm, loyalty, justice, morality, sense of duty, and patriotism; flexibility is not mentioned.

Q869. How does active participation in NCC drill help in personality development?

- It teaches foreign languages
- It keeps the posture correct and builds a confident walk [CORRECT]
- It improves financial management skills
- It develops computer literacy

Explanation: Paragraph 9(a) notes that drill keeps the correct position and posture, enabling cadets to walk more confidently as part of physical appearance and physique.

Q870. Which of the following is considered an ideal leadership style mentioned in the text?

- Bureaucratic
- Autocratic [CORRECT]
- Dictatorial
- Charismatic

Explanation: Paragraph 3 under Section-5 outlines the three ideal leadership styles: Autocratic, Democratic, and Laissez Faire.

Q871. In which leadership style are all policies and procedures determined strictly by the leader?

- Democratic Leadership Style
- Laissez Faire Leadership Style
- Autocratic Leadership Style [CORRECT]
- Variable Leadership Style

Explanation: Paragraph 3(a) under Section-5 states that in an autocratic leadership style, all policies and procedures are determined by the leader.

Q872. How is a Laissez Faire leader described in terms of participation and decision-making?

- Authoritative and bossy
- Plays a passive role and leaves complete freedom to the group [CORRECT]
- Consults subordinates before every decision
- Always delegates complete technical tasks

Explanation: Paragraph 3(c) under Section-5 explains that a laissez faire leader plays a rather passive role and leaves complete freedom for group or individual decisions.

Q873. What did studies reveal regarding work under an autocratic leader compared to a democratic leader while the leader was present?

- Quantity and quality of work were better under the autocratic leader [CORRECT]

- There was zero work produced under the autocratic leader
- Democratic groups performed better in every aspect regardless of presence
- No measurable difference was recorded

Explanation: Paragraph 9 under Section-5 states that the quality and quantity of work under the autocratic leader was better, while its leader was present, than under the democratic leader.

Q874. What is the process of influencing the activities of an individual or a group towards achieving a goal in a given situation called?

- Socialisation
- Leadership [CORRECT]
- Mirroring
- Conviction

Explanation: Paragraph 7(h) defines leadership as the process of influencing the activities of an individual or group towards the achievement of a goal in a given situation.

Q875. Which of the following qualities helps in putting oneself in another's shoes to take appropriate action beneficial to all?

- Judgment [CORRECT]
- Patriotism
- Enthusiasm
- Morality

Explanation: Paragraph 7(a) defines judgment as putting oneself in others' shoes, setting aside personal interests to take appropriate action beneficial to all.

Q876. What outcome was observed in autocratically led groups during the leader's absence in comparative studies?

- They functioned even more effectively
- They displayed more hostility, aggression, lower morale, and tended to fall apart [CORRECT]
- They seamlessly transitioned to democratic self-rule
- They improved product quality

Explanation: Paragraph 8 under Section-5 notes that autocratically led groups displayed hostility, aggression, lower morale, and tended to fall apart in the leader's absence.

Q877. What type of operation is typically conducted by a leader using a democratic leadership style?

- Highly centralized operation
- Highly decentralized operation [CORRECT]
- Rigidly authoritarian operation
- Strictly passive operation

Explanation: Paragraph 5 under Section-5 states that democratic leaders conduct a highly decentralized operation, delegating much of their authority for decision-making.

Q878. What do sports and adventure activities teach youth according to the NCC text?

- Strictly individual survival skills
- Comradeship, healthy competition, courage, leadership, and team work [CORRECT]
- Theoretical physics and mathematics
- Bureaucratic administrative procedures

Explanation: Paragraph 9(d) states that sports and adventure activities teach comradeship, healthy competition, courage to face challenges, art of leadership, team work, grit, and determination.

Q879. What leadership style allows the leader to have the ability to vary their style as the situation demands?

- Autocratic
- Democratic
- Laissez-Faire
- **Variable [CORRECT]**

Explanation: Paragraph 7 under Section-5 outlines the variable style of leadership where the leader has the ability to vary their style as the situation demands.

Q880. What is the primary definition of 'Value' as provided in the text?

- A set of moral principles that govern a person's behaviour
- **A standard of behaviour [CORRECT]**
- Uprightness and integrity in thought
- An unselfish rise above individualism

Explanation: The text explicitly defines 'Value' as a standard of behaviour and 'Ethics' as a set of moral principles that govern a person's behaviour.

Q881. According to the text, which of the following values is defined as 'uprightness'?

- Honesty
- Purity
- **Integrity [CORRECT]**
- Fairness

Explanation: Under the list of important values in day-to-day life, Integrity is specifically defined as uprightness.

Q882. Which of the following is NOT listed as a negative attribute that an individual needs to guard against?

- Ignorance
- Ego and attachment to self
- **Insincerity in thought [CORRECT]**
- Temptations, envy, and hate

Explanation: Insincerity (Purity defines 'no duplicity, insincerity in thought, word or deed') is related to a positive value (Purity), whereas the negative attributes listed include ignorance, ego, temptations, envy, hate, jealousy, and lack of confidence.

Q883. How is 'Perception' broadly defined in terms of basic elements?

- A random recording of all environmental sounds and sights
- **A process of selection and organization of material from the outside environment [CORRECT]**
- A purely physiological registration of neural impulses
- An emotional reaction overriding cognitive processing

Explanation: The text notes that perception involves selection (screening irrelevant information) and organization of stimuli to assign meaning.

Q884. What are the five distinct sub-processes involved in the mechanism of perception?

- **Stimulus, Registration, Interpretation, Feedback, Consequence [CORRECT]**
- Selection, Organization, Interpretation, Checking, Reacting
- Attention, Set, Stimulation, Registration, Response
- Motivation, Learning, Habit, Feedback, Consequence

Explanation: The text details the mechanism of perception as involving five sub-processes: stimulus, registration, interception/interpretation, feedback, and consequence.

Q885. In the context of perceptual selection, what do 'Attention' and 'Set' refer to?

- Attention refers to external factors, while Set refers only to visual stimuli.
- **Attention incorporates all aspects of the selective process, whereas Set refers to specific factors within the individual. [CORRECT]**
- Attention is an internal factor and Set is an external environmental factor.
- Both terms are used interchangeably to describe motivational drives.

Explanation: The text states that 'Attention' incorporates all aspects of the selective process whereas 'Set' refers to specific factors or processes within the individual himself.

Q886. Which external attention factor explains why signboards with black lettering on a yellow background catch attention?

- Intensity
- **Contrast [CORRECT]**
- Motion
- Novelty

Explanation: The text states under the contrast principle that external stimuli standing out against the background or unexpected combinations (like black lettering on yellow) receive attention.

Q887. What internal set factor is illustrated by a retired soldier throwing himself on the ground upon hearing a sudden burst of a car tyre?

- Motivation
- Learning
- **Habit [CORRECT]**
- Perceptual defense

Explanation: The text provides the example of a retired soldier reacting to a car tyre burst under 'Habit', noting that motor set may cause inappropriate responses to wrong signals.

Q888. According to the text regarding interview selections, why might an applicant feel wronged while interviewers maintain their decision?

- Interviewers rely completely on randomized test scores.
- **Interviewers generally form an early impression that becomes quickly entrenched. [CORRECT]**
- Candidates are never allowed to speak during the interview.
- The feedback mechanism fails to record the applicant's voice.

Explanation: The text states that interviewers generally form an early impression that becomes quickly entrenched, and if inadequacies are exposed early, they weigh against the candidate.

Q889. In the perceptual sub-processes, what determines an individual's interpretation of a stimulus in a work setting?

- Only physical hearing and seeing abilities
- **Motivation, personality, and learning process [CORRECT]**
- The intensity of the background noise
- The size and motion of external objects

Explanation: The text explicitly states under 'Interpretation' that other psychological processes such as motivation, personality, and learning process determine an individual's interpretation.

Q890. Which value is defined as 'behaviour according to essential rules and norms which is self-imposed'?

- Integrity
- **Discipline [CORRECT]**

- Fairness
- Loyalty

Explanation: Under important values in day-to-day life, Discipline is defined as behaviour according to essential rules and norms which is self-imposed.

Q891. Why does a novel object in a familiar situation or a familiar object in a novel situation attract attention?

- Due to the principle of Intensity
- Due to the principle of Novelty and Familiarity [CORRECT]
- Due to the principle of Contrast
- Due to the principle of Repetition

Explanation: The text lists 'Novelty and Familiarity' as an external attention factor where a novel object in a familiar situation catches attention faster.

Q892. What does the phrase 'Practice what you preach' signify primarily for a leader?

- A leader must only preach values that he or she personally possesses and practices. [CORRECT]
- A leader should delegate moral training to gurus and saints.
- A leader's technical intelligence outweighs personal behaviour.
- A leader must repeat job instructions several times.

Explanation: The text highlights that 'Practice what you preach' applies to a leader because only those values can be preached which a leader himself possesses.

Q893. In the perceptual triangle puzzle experiment included in the text ('TURN OFF THE THE ENGINE'), what causes a person to initially misread the sentence?

- Poor physiological registration of visual data
- Prior learning creating an expectancy to perceive in a certain manner [CORRECT]
- Excessive environmental noise and low contrast
- Lack of motivation and hunger

Explanation: The text explains that familiarity with the sentence from prior learning sets a person to read it a certain way, showing how learning affects 'set' by creating an expectancy.

Q894. Which of the following best describes the role of goodness in overcoming human negative tendencies according to Section 1?

- Goodness is inherited solely from military training regimes.
- Goodness manifested in brotherhood, unity, and co-operation can overcome negative tendencies if a person has or inculcates values. [CORRECT]
- Goodness emerges automatically without any need for internal values.
- Goodness is entirely irrelevant to leadership potential.

Explanation: The text states that goodness is manifested in brotherhood, unity, and co-operation, and can only overcome negative tendencies if a person has certain values inherent in him or inculcates them.

Q895. The word 'Communication' is derived from which Latin word?

- Communis [CORRECT]
- Communicare
- Communiter
- Communion

Explanation: The text states that the word 'Communication' has been made up from the Latin word 'Communis', which means to make common.

Q896. What is the term used for the reply sent by the communicatee to the communicator, which completes the communication cycle?

- Decoding
- **Feedback [CORRECT]**
- Encoding
- Channeling

Explanation: According to the communication process steps, the communicatee sends a reply to the communicator, which is called feedback and completes the cycle.

Q897. Which type of noise consists of forces within the sender or receiver such as egotism, defensiveness, hostility, and fear?

- Physical noise
- Physiological noise
- **Psychological noise [CORRECT]**
- Mechanical noise

Explanation: The text explicitly defines psychological noise as consisting of forces within the sender or receiver like egotism, defensiveness, hostility, preoccupation, and fear.

Q898. What type of barrier is represented by a high temperature, humidity, and bad ventilation affecting message transmission?

- **Environment Stress [CORRECT]**
- Subjective Stress
- Competing Stimulus
- Ignorance of Media

Explanation: The text lists high temperature, humidity, bad ventilation, and strong glare as components of environment stress under physical barriers.

Q899. What is the attitude of people with closed minds who think they know everything about a subject and are not prepared to accept they could be mistaken called?

- Unjust Assumptions
- **Barrier of Allness [CORRECT]**
- Snap Reactions
- Sophisticated Role

Explanation: The text defines 'Allness' as the attitude of people with closed minds who think they know everything about a subject and usually refuse to accept they could be mistaken.

Q900. Communication that flows from subordinates to superiors is labeled as what?

- Downward Communication
- Horizontal Communication
- **Upward Communication [CORRECT]**
- Diagonal Communication

Explanation: According to types of formal communication, messages flowing from subordinates to superiors are labeled upward communication.

Q901. Communication consisting of messages between members of an organization with equal power (such as co-workers in the same department) is known as:

- Downward Communication
- **Horizontal Communication [CORRECT]**

- Upward Communication
- Interpersonal Communication

Explanation: Horizontal communication consists of messages between members of an organization with equal power, such as members of the same division or office workers.

Q902. In the communication process, what term describes the activity where the sender chooses certain words or non-verbal methods to send an intentional message?

- Decoding
- Encoding [CORRECT]
- Transmitting
- Channeling

Explanation: The text defines encoding as the activity where the sender must choose certain words or non-verbal methods to send an intentional message.

Q903. Which of the following is considered a mechanical barrier in group communication?

- Hostility and fear
- Whistling microphone and incorrect placement of loudspeakers [CORRECT]
- Sleeplessness and ill health
- Competing traffic noise

Explanation: The text states that in group communication, a whistling microphone and incorrect placement of loudspeakers are examples of mechanical barriers.

Q904. Which barrier occurs when a manager incorrectly assumes that subordinates understand the technical terms used to give instructions?

- Barrier of Allness
- Unjust Assumptions [CORRECT]
- Apathetic Listener
- Defensiveness

Explanation: The text cites the example of a manager incorrectly assuming subordinates understand technical terms as an unjust assumption, which is a common communication barrier.

Q905. What dimension is NOT listed as a dimension of the context that influences communication?

- Physical
- Social
- Chronological
- Spiritual [CORRECT]

Explanation: The text lists physical, social, chronological, and cultural as the dimensions of context. Spiritual is not mentioned.

Q906. What kind of listener is described in the text as being psychologically dead to the communication and indifferent to the speaker?

- Anxious listener
- Apathetic listener [CORRECT]
- Sophisticated listener
- Defensive listener

Explanation: The text states that the apathetic receiver is psychologically dead to the communication and is indifferent to the speaker.

Q907. Which of the following describes 'Subjective Stress' as a physical barrier to communication?

- Strong glare putting hindrance in visual communication
- **Sleeplessness, ill health, consumption of drugs, and mental strain [CORRECT]**
- Competing conversation or loud traffic noise
- Lack of familiarity with maps and charts

Explanation: The text explicitly defines subjective stress as arising due to sleeplessness, ill health, consumption of drugs, mental strain, etc., preventing the communicator from interpreting the message correctly.

Q908. According to the principles of effective communication, what should be done regarding the length of the message?

- It should be kept as lengthy as possible for clarity.
- **As far as possible message should be kept brief. [CORRECT]**
- It must match the exact length of the feedback.
- It should be expanded to include all background history.

Explanation: One of the key guidelines under the principles of effective communication is that 'As far as possible message should be kept brief.'

Q909. Downward communication in an organization occurs whenever:

- Subordinates intimate messages to superiors
- Messages flow between members of equal power
- **Superiors intimate messages to their subordinates [CORRECT]**
- Feedback is sent back to the sender

Explanation: The text defines downward communication as occurring whenever superiors intimate messages to their subordinates.

Q910. Why is face-to-face communication termed as the richest kind of communication channel?

- Because it is the cheapest method available
- **Because it permits instantaneous feedback and a tremendous amount of feedback [CORRECT]**
- Because it eliminates the need for any preparation by the speaker
- Because it is completely free from any potential drawbacks or misunderstandings

Explanation: The text states that face-to-face communication permits instantaneous feedback and has a tremendous amount of feedback available, thus termed the richest kind of communication channel.

Q911. What is the primary distinction between hearing and listening as outlined in the text?

- Hearing is active and conscious, while listening is passive and effortless.
- Hearing requires physical and mental effort, while listening happens automatically.
- **Hearing is a passive and effortless activity, whereas listening is an active, conscious process requiring will power and concentration. [CORRECT]**
- There is no psychological difference between hearing and listening.

Explanation: The text explicitly defines hearing as a passive and effortless activity, whereas listening requires deliberate effort, attention, concentration, and psychological involvement.

Q912. According to the principles of good listening, during which time frame is listening efficiency at its highest?

- During the last 10 minutes
- **During the first 10-15 minutes [CORRECT]**
- Right in the middle of the speech after a break

- Throughout the entire duration uniformly

Explanation: The text states that listening efficiency is at its highest during the first 10-15 minutes and lowest during the last 10 minutes.

Q913. What does the 'TO BE' component represent in the mahakavya on leadership?

- Character and knowledge, in balance [CORRECT]
- The style of leadership by personal example
- The functions, tools, and techniques of leadership
- An inner structure composed of physical strength alone

Explanation: The text states: 'TO BE - Character and knowledge, in balance, are the source of leadership.'

Q914. Which of the following is NOT listed as a type of verbal communication in the text?

- Voice
- Appearance
- Written memos [CORRECT]
- The Face and Eyes

Explanation: Types of verbal communication listed are Voice, Appearance, The Face and Eyes, and Posture and Movement. Written memos fall under written communication.

Q915. What does 'Adaptation' in effective talking mean?

- Copying the speech style of famous leaders
- Fitting a message to a specific receiver by selecting the right words, pitch, speed, volume, and style [CORRECT]
- Changing the topic whenever the audience loses interest
- Translating the message into multiple languages simultaneously

Explanation: The text defines adaptation as summing up the previous three qualities (quality, style, word choice) to fit a message to a specific receiver.

Q916. Which communication format replaces face-to-face meetings by allowing individuals to work on documents that are 'shared' via computer?

- Audio conferencing
- Voice mail
- Documentation of Computer Conferencing [CORRECT]
- Bulletin boards

Explanation: The text states under 'Documentation of Computer Conferencing' that this technology replaces face-to-face meetings by allowing individuals to work on documents shared via computer.

Q917. In the context of listening as a fast process, how does the rate of listening compare to the rate of speaking?

- We speak faster than we listen.
- We listen faster than we speak. [CORRECT]
- The rate of listening and speaking is exactly equal.
- Listening speed depends entirely on the speaker's native language.

Explanation: The text states: 'The rate at which we listen is faster than the rate at which we speak. The listeners find time during which they analyse and evaluate the arguments.'

Q918. What guideline is provided regarding note-taking during a speech?

- Take down every single word the speaker utters for future reference.

- Don't take too many notes because you will get little time to analyse and evaluate the message or speech. [CORRECT]
- Take notes only during the last 10 minutes of the lecture.
- Rely solely on audio recording instead of taking notes.

Explanation: Guideline (m) explicitly states: 'Don't take too many notes because you will get little time to analyse and evaluate the message or speech.'

Q919. According to the text, what is the most important act of courage for a leader?

- To participate in hand-to-hand combat
- To make decisions [CORRECT]
- To travel long distances in adverse weather
- To deliver motivational speeches

Explanation: The text states: 'The most important act of courage for a leader is to make decisions. No action can start unless a decision is made.'

Q920. Talking style refers to how what three parts of voice quality blend together?

- Pitch, speed, and volume [CORRECT]
- Tone, accent, and clarity
- Volume, vocabulary, and emotion
- Speed, grammar, and posture

Explanation: The text states: 'Talking style refers to how the three parts of voice quality i.e. pitch, speed and volume blend together.'

Q921. Which of the following best contrasts written communication with spoken communication regarding permanence?

- Spoken communication is permanent, while written communication is temporary.
- Written communication is permanent once put on paper, whereas spoken words are transient. [CORRECT]
- Both written and spoken communications vanish immediately after transmission.
- Both are equally permanent and archived in digital databases.

Explanation: The text notes: 'Unlike speech, written communication is permanent. Once your words are down on paper, they are saved for future reference...'

Q922. What does the mahakavya on leadership articulate in its four key words?

- TO FIGHT : TO WIN : TO SURVIVE : TO CONQUER
- TO BE : TO DO : TO SEE : TO TELL [CORRECT]
- TO PLAN : TO EXECUTE : TO REVIEW : TO REPORT
- TO LEAD : TO FOLLOW : TO GUIDE : TO COMMAND

Explanation: The text introduces the mahakavya on leadership articulated in four words: TO BE : TO DO : TO SEE : TO TELL.

Q923. What is the primary function associated with 'TO DO' in leadership?

- Character and knowledge source
- The style of leadership by personal example; a reflection of TO BE [CORRECT]
- The functions, tools and techniques of communication
- Evaluating listening efficiency in meetings

Explanation: The text states: 'TO DO - Is the style of leadership by personal example ; a reflection of TO BE.'

Q924. Which historical event/war context is mentioned in Section-9 to illustrate 'Courage and Endurance'?

- **Saving Ladakh : 1947-48 War [CORRECT]**
- The 1965 Indo-Pak War
- The Kargil Conflict 1999
- The 1971 Liberation War

Explanation: Section-9 sub-heading under Courage and Endurance reads: '(Saving Ladakh : 1947-48 War.)'

Q925. Who was the officer entrusted with the mission to hold on to Skardu to prevent Pakistan-led forces from reaching Kargil and Leh during the strategy to save Ladakh?

- Brigadier Mohamed Latif
- **Lieutenant Colonel Sher Jung Thapa [CORRECT]**
- General Mathew B Ridgeway
- General Eisenhower

Explanation: The text states that Lieutenant Colonel Sher Jung Thapa held on to Skardu with hardly 250 men for six long months to prevent enemy forces from reaching Kargil and Leh.

Q926. For how long did Lieutenant Colonel Sher Jung Thapa successfully hold on to Skardu against the siege?

- Three months
- Four months
- **Six months [CORRECT]**
- One year

Explanation: According to the text, Lieutenant Colonel Thapa held on to Skardu for six long months, marking one of the longest sieges in modern war history.

Q927. In the 1971 War example, which battalion was selected by Brigadier Mohamed Latif to capture the enemy-held hill top nicknamed 'Baldy'?

- **The Guards battalion [CORRECT]**
- The Parachute battalion
- The Sikh battalion
- The Gorkha battalion

Explanation: The text explicitly states that Brigadier Latif selected the Guards battalion for the tough task of capturing the hill top nicknamed 'Baldy'.

Q928. Which ancient historian recorded Alexander's crossing of the Gedrosian Desert and the incident involving the helmet of water?

- Herodotus
- **Arian [CORRECT]**
- Thucydides
- Xenophon

Explanation: The text notes that Arian, the most reliable historian of Alexander's conquests, recorded the incident during the crossing of the Gedrosian Desert.

Q929. According to General Mathew B Ridgeway, what does 'Character' primarily stand for?

- Aggressiveness, dominance, and physical strength
- **Self discipline, loyalty, readiness to accept responsibility, and faith in God [CORRECT]**
- Strict adherence to uniform protocols and parade standards
- Calculated risk-taking and public recognition

Explanation: General Ridgeway states that character stands for self discipline, loyalty, readiness to accept responsibility, willingness to admit mistakes, selflessness, modesty, humility, willingness to sacrifice, and faith in God.

Q930. Operation Overlord, the Allied amphibious and airborne assault for the bridgehead in Europe during World War II, was planned for which date?

- 13 April 1944
- **6 June 1944 [CORRECT]**
- 8 May 1945
- 2 September 1945

Explanation: The text specifies that Operation Overlord was planned for 6 Jun 1944.

Q931. What was the specific D-Day approved by the Army Commander for Operation Meghdoot to secure the Siachen Glacier in 1984?

- 6 June
- **13 April [CORRECT]**
- 8 May
- 17 April

Explanation: The text notes that the Brigade Commander suggested 13 April, and the Army Commander approved this D-Day to give troops enough time to get organized.

Q932. During Operation Meghdoot, what extreme weather condition struck after the first phase of troops was ferried by helicopters?

- A severe monsoon flood
- **A blizzard that raged for 72 hours [CORRECT]**
- A massive sandstorm
- A sudden heatwave causing avalanches

Explanation: The text describes that the weather packed up by midday and a blizzard broke out, raging for 72 hours while troops were at 18,000 feet.

Q933. What was Sir Winston Churchill's entire keynote address delivered at the 150th Anniversary celebration of his school?

- "Duty, Honor, Country"
- **"Never, Never, Never, Never Give Up" [CORRECT]**
- "Try, Try Again until Victory is Won"
- "Courage is the first of human qualities"

Explanation: The text details that Churchill's address consisted of the five roared words: "NEVER NEVER NEVER NEVER GIVE UP".

Q934. According to the section on Customs of Services, how is an established usage that consists of positive actions reasonably and universally accepted defined?

- A Tradition
- An Unwritten Law
- **A Custom [CORRECT]**
- Military Etiquette

Explanation: The text states that a custom is an established usage and consists of positive actions which are reasonably and universally accepted.

Q935. What primary purpose do customs and traditions serve in the Armed Forces?

- To maintain rigid administrative control over civilians
- **To develop 'esprit-de-corps' and pride in one's service [CORRECT]**
- To ensure uniform manufacturing standards across units
- To differentiate officers from junior commissioned officers

Explanation: The text mentions that customs are of immense value in developing 'esprit-de-corps' and the pride in one's service, acting as a unifying and driving force.

Q936. What is the historical origin of the military custom of saluting by bringing an open palm to one's cap?

- A gesture to block the glaring sun during parades
- A sign of respect shown to medieval knights
- **Opening one's palm to show that no offensive weapon was held, establishing good intentions [CORRECT]**
- A formal greeting established during the Napoleonic Wars

Explanation: The text explains that the custom started when one person intended to establish good intentions by opening their palm to show they held no offensive weapon.

Q937. What Persian saying is cited in the text to illustrate the impact of a leader's personal example?

- "A bad general is better than a good enemy."
- **"If the king plucks one apple from the public Garden, the public will take away even the roots." [CORRECT]**
- "He who commands others must first command himself."
- "An army of sheep led by a lion is better than an army of lions led by a sheep."

Explanation: The text quotes this specific Persian saying to convey the truth that good or bad personal examples by leaders are highly infectious.

Q938. What altitude and temperature conditions did the troops face during Operation Meghdoot on the Siachen Glacier?

- 10,000 feet at minus 20 degrees centigrade
- 15,000 feet at minus 40 degrees centigrade
- **18,000 feet at minus 60 degrees centigrade [CORRECT]**
- 20,000 feet at minus 80 degrees centigrade

Explanation: The text states that the troops were stationed at 18,000 feet above sea level with the temperature at minus 60 degrees centigrade.

Q939. What did General Eisenhower write in his backup press release regarding Operation Overlord just in case the landings failed?

- "The weather defeated us, and we will try again next year."
- **"Our landings have failed and I have withdrawn the troops... If any blame or fault is attached to the attempt it is mine." [CORRECT]**
- "We were betrayed by faulty intelligence and lack of adequate naval support."
- "The allied forces fought bravely but were overwhelmed by superior enemy numbers."

Explanation: The text quotes Eisenhower's press release explicitly stating that if the landings failed and the troops were withdrawn, any blame or fault attached to the attempt belonged to him.

Q940. In the Navy, how is the hand salute executed compared to the Army and Air Force?

- **The hand is raised to the cap with the palm downwards [CORRECT]**
- The open palm is brought to the side of the head including the cap
- The sword is lowered to lay open the defense
- The hand is raised without touching the cap

Explanation: According to section 6, in the Navy the hand is raised to the cap with the palm downwards so as not to show 'grubby' hands of the sailors working on the deck.

Q941. What does the military practice of 'present arms' with the rifle symbolize?

- Preparation for immediate combat
- **Disarming oneself as a mark of trust and friendship [CORRECT]**
- Subservience to a superior officer
- A relic of crusaders kissing the cross

Explanation: Section 8 states that the 'present arms' with the rifle is symbolic of disarming oneself, offered as a mark of trust and friendship.

Q942. How should an officer in uniform and not wearing head dress properly greet a lady or gentleman?

- Salute smartly with the right hand
- **Come to attention, bow slightly, say appropriate greeting words, and shake hands if offered [CORRECT]**
- Remove a hat and bow deeply
- Say 'Ram Ram' or 'Sat Sri Akal'

Explanation: Section 10(a) specifies that when in uniform and not wearing head dress, the correct greeting is to come to attention and bow slightly, say appropriate words, and shake hands if offered.

Q943. What action must NCC Cadets and other ranks take when the National Flag is being hoisted or hauled down at Reveille and Retreat?

- Salute facing the flag staff
- **Stand to attention [CORRECT]**
- Remove their head dress and bow
- Sound the bugle

Explanation: Section 11 states that officers face the flag staff, stand to attention and salute, whereas NCC Cadets and other ranks only stand to attention.

Q944. How should NCC Cadets behave when the National Anthem is played during a ceremonial parade?

- Stand at attention and salute
- Stand at attention and remove hats
- **Stand at attention and do not salute [CORRECT]**
- Kneel down in respect

Explanation: Section 12 states that NCC Cadets only stand at attention and do not salute when the National Anthem is played during a ceremonial parade.

Q945. When a soldier is riding a bicycle, horse, or mechanical vehicle, how should they handle saluting?

- Salute immediately using the left hand
- **Will not salute because of the danger in taking off eyes from the road [CORRECT]**
- Salute by nodding the head forward
- Stop the vehicle and dismount to salute properly

Explanation: Section 14 states that when riding a bicycle, horse, or mechanical vehicle, the soldier will not salute because of the danger in taking off his eyes from the road.

Q946. Which infantry regiments are an exception and do NOT carry colours?

- Gurkha Regiments
- **Rifle Regiments [CORRECT]**
- Mechanized Infantry

- Lancers

Explanation: Section 21 specifies that all infantry regiments, with the exception of rifle regiments, carry colours.

Q947. Armoured Corps regiments carry standards and guidons with the exception of which units?

- Hussars
- **Lancers [CORRECT]**
- Dragoons
- Tank Regiments

Explanation: Section 21 states that Armoured Corps regiments carry standard and guidons with the exception of the Lancers.

Q948. What is the primary purpose of the mess 'suggestions book'?

- Entering complaints against the mess staff
- Writing sarcastic or humorous feedback
- **Constructive suggestions for the improvement of the mess [CORRECT]**
- Recording the minutes of officer meetings

Explanation: Section 24(j) notes that the suggestions book is meant for constructive suggestions for improvement of the mess, avoiding sarcasm or attempts at humour.

Q949. What type of games are permitted as 'gambling' games in an Officer's Mess?

- Poker and Blackjack at high stakes
- **Bridge and some other games at very small stakes [CORRECT]**
- Roulette and Baccarat
- No gambling games are permitted under any circumstances

Explanation: Section 24(l) states that Bridge and some other games, at very small stakes, are the only 'gambling' games permitted in a mess.

Q950. During which meal is it permissible to read a newspaper or periodical in the mess dining room?

- Dinner only
- **Breakfast and lunch only [CORRECT]**
- All meals including dinner
- No reading material is allowed at any meal

Explanation: Section 24(m) specifies that you may read a newspaper or a periodical during breakfast and lunch but not at dinner.

Q951. When is a dinner night in the mess officially considered a parade?

- Only when the commanding officer is present
- **Always, as a dinner night in the mess is a parade [CORRECT]**
- Only during formal guest nights
- When officers fail to sign out

Explanation: Section 26 explicitly states: 'A dinner night in the mess is a parade.'

Q952. On which of the following occasions is it improper for an officer or cadet to be seen smoking whilst in uniform?

- Whilst resting inside the officers' mess ante-room
- **Whilst marching with troops except during halts with permission of a senior [CORRECT]**
- Whilst off duty in private quarters

- Whilst attending a social guest night

Explanation: Section 28(b) states it is improper to smoke whilst marching with troops except during halts with the permission of senior.

Q953. According to the rules of introductions, how should a formal introduction be structured regarding age and rank?

- An older is introduced to a younger, and a senior to a junior
- **A younger is introduced to an older, and a junior to a senior [CORRECT]**
- Rank and age do not matter in formal introductions
- A senior is always introduced to a junior first

Explanation: Section 29 states that the normal rule is that a gentleman is introduced to a lady, a single woman to a married woman, a younger to an older and a junior to a senior.

Q954. By whom are colours awarded to a regiment for their honourable service?

- The Chief of the Army Staff
- The Prime Minister
- **The President [CORRECT]**
- The Defence Minister

Explanation: Section 20 states that colours are awarded to a regiment by the President for their honourable service.

Q955. What is the primary definition of a group according to the provided text?

- **Any number of people interacting to achieve a common objective [CORRECT]**
- Only individuals belonging to the same organization and department
- A large collection of people who never communicate person-to-person
- A formally registered entity with strict government guidelines

Explanation: The text states that a group can be defined as any number of people who share goals, communicate over time, and two or more people interacting to achieve a common objective.

Q956. Which type of group evolves informally to meet its members' personal security, esteem, and belonging needs?

- Task Group
- Functional Team
- **Friendship Group [CORRECT]**
- Formal Group

Explanation: According to paragraph 2(a), a friendship group evolves informally to meet its members' personal security, esteem, and belonging needs.

Q957. Task groups can be further classified into which of the following categories?

- Friendship Groups and Social Groups
- **Formal Groups, Informal Groups, and Effective Groups [CORRECT]**
- Functional Teams and Problem Solving Teams
- Primary Groups and Secondary Groups

Explanation: Paragraph 2(b) outlines that task groups can be further classified as Formal Groups, Informal Groups, and Effective Groups.

Q958. In which year did India achieve freedom, cited as an example of the strength of the nation as a group?

- 1945

- **1947 [CORRECT]**

- 1950

- 1952

Explanation: Paragraph 5 explicitly states that it is because of the strength of the nation as a group only that India could achieve freedom in 1947.

Q959. Which of the following is listed as a characteristic of a mature group?

- Total dependence on the leader for all directives
- **An increasing ability to be self directed [CORRECT]**
- An intolerance that progress takes time
- An increase in the time needed to recover from threatening situations

Explanation: Paragraph 6(a) lists 'An increasing ability to be self directed (not dependent on the leader)' as a characteristic of a mature group.

Q960. How are 'Teams' defined in relation to their members?

- Two or more people who are independent and work in isolation
- **Two or more people who are interdependent and share responsibility for outcomes [CORRECT]**
- Any large crowd gathered for a temporary event
- Individuals who never see themselves as an intact social entity

Explanation: Paragraph 7 defines teams as two or more people who are interdependent, share responsibility for outcomes, and see themselves as an intact social entity.

Q961. What is described as a key aim of teamwork resulting from combined individual contributions?

- **Group synergy [CORRECT]**
- Individual autonomy
- Strict hierarchy
- Task segregation

Explanation: Paragraph 9 states that a key aim of teamwork is group synergy, namely the achievement of high quality as a result of combined individual contributions.

Q962. Which type of team represents individuals who work together daily on a cluster of ongoing and independent tasks within departments like marketing or finance?

- Cross-Functional Teams
- Problem Solving Teams
- **Functional Teams [CORRECT]**
- Self-Managed Teams

Explanation: Paragraph 11(a) defines Functional Teams as those representing individuals who work together daily on ongoing tasks within functional departments like marketing, production, finance, etc.

Q963. Which teams focus on specific issues in their areas of responsibility and develop potential solutions within defined limits?

- **Problem Solving Teams [CORRECT]**
- Self-Managed Teams
- Functional Teams
- Friendship Groups

Explanation: Paragraph 11(b) specifies that Problem Solving Teams focus on specific issues in their areas of responsibility and develop potential solutions.

Q964. Which teams bring together the knowledge and skills of people from various work areas to identify and solve mutual problems?

- Functional Teams
- **Cross-Functional Teams [CORRECT]**
- Formal Groups
- Informal Groups

Explanation: Paragraph 11(c) states that Cross-Functional Teams bring together knowledge and skills of people from various work areas to identify and solve mutual problems.

Q965. What do Self-Managed Teams normally consist of?

- **Employees who work together daily to manufacture an entire product or service [CORRECT]**
- Senior executives auditing financial records
- Temporary workers handling public relations
- Individuals from different organizations meeting once a year

Explanation: Paragraph 11(d) states that Self-Managed Teams normally consist of employees who must work together effectively daily to manufacture an entire product or major identifiable component or service.

Q966. Which of the following is explicitly listed as a characteristic of a team in the text?

- **Illusion of invulnerability [CORRECT]**
- Absolute individual isolation
- Complete absence of structure
- Permanent leader dependency

Explanation: Paragraph 12(a) lists 'Illusion of invulnerability' among the characteristics of a team.

Q967. According to the characteristics of an effective group, how should members deal with conflict?

- Ignore it completely until it resolves itself
- Allow conflict to destroy group cohesion
- **Learn to deal with conflict within the group [CORRECT]**
- Report all conflicts to external management immediately

Explanation: Paragraph 2(b)(iii)(af) states that members of an effective group have learned to deal with conflict within the group.

Q968. What is the collective name given in the text to the country where people belong to different languages, cultures, and feeding habits yet live together in harmony?

- Bharat Varsha
- **Mother India [CORRECT]**
- Hindustan
- Jambudvipa

Explanation: Paragraph 4 notes that despite differences, people live together in harmony and even believe to be the children of one mother called 'Mother India'.

Q969. Which of the following best describes the benefit of brainstorming and bouncing ideas off each other in a team?

- It limits creative problem solving
- **It promotes group synergy and helps solve complex problems [CORRECT]**
- It causes confusion and delays project completion
- It eliminates the need for any individual contribution

Explanation: Paragraph 9 mentions that group synergy helps solve complex problems, and students working in teams benefit particularly from brainstorming and bouncing ideas off each other.

Q970. What is defined in the NCC text as the defense of the citizen by the citizen during war to minimize the effects of enemy action on men and material?

- Military Defence
- **Civil Defence [CORRECT]**
- National Security
- Home Guard Operations

Explanation: Civil Defence is explicitly described as a measure adopted by the civilian population, Government, local bodies, etc., during war to minimize enemy action effects—in short, the defence of the citizen by the citizen.

Q971. Which of the following measures are taken *before* an air raid according to Civil Defence classifications?

- Rescue of casualties and clearance of debris
- **Dispersal of population and industries, camouflage, and preparation of shelters [CORRECT]**
- Salvage of property and disposal of dead
- Repair of damages caused to utility services

Explanation: Protective preventive measures are taken before an air raid, which include dispersal of population and industries, camouflage, preparation of shelters, warning, and training.

Q972. Who is the ultimate authority on Civil Defence at the district level and designated as the controller of Civil Defence?

- Superintendent of Police
- Civil Surgeon
- **District Magistrate [CORRECT]**
- PWD Engineer

Explanation: In a district, the District Magistrate is the ultimate authority on Civil Defence and is designated as the controller of Civil Defence.

Q973. Which Civil Defence service acts as a link between the public and the authorities, and is responsible for organizing self-help and fire parties?

- **Warden's Service [CORRECT]**
- Headquarters Service
- Casualty Services
- Salvage Service

Explanation: The Warden's Service serves as a link between the public and authorities, organizes self-help parties, checks light restrictions, reports damages, and guides the homeless.

Q974. In what specific capacities can the NCC assist the Civil Defence organization according to Section-1?

- Fire Fighting and Rescue Services
- **Welfare Services and Message Services [CORRECT]**
- Corpse Disposal and Salvage Services
- Supply and Training Services

Explanation: The text states explicitly that NCC can help the Civil Defence by assisting them in Welfare Services and Message Services.

Q975. What percentage of the world's population resides in developing countries, and what proportion of these people are estimated to be highly vulnerable to floods, severe storms, and earthquakes?

- 70% population, up to 40% vulnerable
- **80% population, up to 60% vulnerable [CORRECT]**
- 90% population, up to 50% vulnerable
- 85% population, up to 75% vulnerable

Explanation: The text notes that 80 percent of the world's population resides in developing countries, and up to 60 percent of these people are highly vulnerable.

Q976. What proportion of natural disasters and disaster-related deaths worldwide occur in developing countries?

- 80% disasters and 85% deaths
- **90% disasters and 95% deaths [CORRECT]**
- 70% disasters and 80% deaths
- 95% disasters and 99% deaths

Explanation: According to the text, 90 percent of natural disasters and 95 percent of total disaster-related deaths worldwide occur in developing countries.

Q977. Which of the following is categorized specifically as a 'Water Related' natural disaster in the NCC disaster management text?

- Cyclone
- Tornado
- **Flash flood [CORRECT]**
- Avalanche

Explanation: Water-related natural disasters listed include Flood, Cloudburst, Flash flood, Excessive rains, and Drought, whereas Cyclone and Tornado are wind-related, and Avalanches are earth-related.

Q978. Which of the following is classified under 'Man Made Disasters' -> 'Industrial Mishaps'?

- Building collapse
- **Gas Leak, explosion, sabotage and safety breach [CORRECT]**
- Epidemics
- Soil degradation

Explanation: Gas Leak, explosion, sabotage, and safety breach are classified under Industrial Mishaps within Man Made Disasters.

Q979. How are tsunamis primarily caused according to Section-2 of the text?

- Excessive rains and cloudbursts
- **An undersea earthquake [CORRECT]**
- Volcanic eruptions on coastal lines
- Severe tropical wind storms

Explanation: The text specifies that giant tsunamis are caused by an undersea earthquake, sending vibrations through the ocean which build up into vast waves in shallow waters.

Q980. What is the maximum recorded height of a tsunami wave mentioned in the text when it builds up in shallow waters?

- 50m (164 ft)
- **76m (250 ft) [CORRECT]**
- 100m (328 ft)

- 120m (393 ft)

Explanation: The text states that tsunamis slow down in shallow waters and build up into vast waves, at times 76m (250 ft) tall.

Q981. Which Civil Defence service is tasked with the collection, identification, and disposal of dead bodies?

- Salvage Service
- Welfare Service
- **Corpse Disposal Service [CORRECT]**
- Casualty Services

Explanation: The Corpse Disposal Service is explicitly responsible for the collection, identification, and disposal of dead bodies.

Q982. What measures are taken *immediately after* an air raid under Civil Defence control measures?

- Dispersal of population and camouflage
- **Reconnaissance, reporting of damage and unexploded bombs, and rescue of casualties [CORRECT]**
- Feeding, providing shelter, and salvage of property
- Procuring necessary equipment for CD Services

Explanation: Control measures taken immediately after a raid include reconnaissance, reporting damage and unexploded bombs, rescue of casualties, control of services, clearance of debris, and extinguishing fires.

Q983. Currently, what are the average annual global economic costs related to disaster events as cited in the text?

- US\$ 500 billion per year
- **US\$ 1200 billion per year [CORRECT]**
- US\$ 2500 billion per year
- US\$ 5000 billion per year

Explanation: The text notes that annual global economic costs related to disaster events currently average US\$1200 billion per year and are likely to double by the year 2025.

Q984. Which service within Civil Defence is responsible for planning, organizing, procuring, and ensuring proper storage and quick distribution of equipment?

- Depot and Transport Services
- **Supply Service [CORRECT]**
- Headquarters Service
- Training Services

Explanation: The Supply Service is responsible for planning, organizing, and procuring necessary equipment for CD Services along with proper storage and quick distribution.

Q985. Approximately how many volcanoes are active or have erupted globally according to the text?

- About 300
- **About 600 [CORRECT]**
- About 1000
- About 1500

Explanation: A study shows that approximately 600 volcanoes are active or have erupted.

Q986. What is the average number of volcanoes that erupt every year?

- About 25
- **About 50 [CORRECT]**

- About 75
- About 100

Explanation: On an average, about 50 volcanoes erupt every year.

Q987. What is the threshold precipitation amount over about two weeks that defines a drought condition?

- Less than 0.1 mm
- **Less than 0.2 mm [CORRECT]**
- Less than 0.5 mm
- Less than 1.0 mm

Explanation: If, over about two weeks, there is less than 0.2 mm (1/100in) of precipitation, there is said to be a drought.

Q988. How fast can winds blow during hurricanes, causing coastal regions to be swamped by huge waves?

- As fast as 150 km/h
- As fast as 200 km/h
- As fast as 250 km/h
- **As fast as 300 km/h [CORRECT]**

Explanation: Coastal regions may be swamped by huge waves whipped up by winds that blow as fast as 300 km/h (185 mp).

Q989. What are the three essential elements required for combustion and the continuation of fire?

- Fuel, Nitrogen, and Heat
- **Oxygen, Sufficient heat, and Combustible material [CORRECT]**
- Carbon dioxide, Fuel, and Heat
- Oxygen, Hydrogen, and Carbon

Explanation: The three elements essential for combustion are Oxygen, Sufficient heat to raise the temperature to ignition point, and Combustible material.

Q990. Which mode of heat transfer involves the transfer of heat through gases or smoke rising to the ceiling?

- Conduction
- **Convection [CORRECT]**
- Radiation
- Direct Burning

Explanation: Convection is the transfer of heat through gases or smoke, which rise until they reach the ceiling and spread sideways.

Q991. What method of countering radiation involves forming a barrier between the fire and the object to be protected?

- **Water curtain [CORRECT]**
- Sand blanketing
- Air suction
- Cooling with steam

Explanation: The effect of radiation can be countered by forming a 'water curtain' between the fire and the object to be protected.

Q992. What is the firefighting term for removing fuel or combustible material from the scene of a fire?

- Cooling
- Smothering

- Starvation [CORRECT]
- Blanketing

Explanation: Starvation means removal of fuel/combustible material and can be achieved by segregation of fire and un-burnt fuel.

Q993. What does 'smothering' mean in firefighting terminology?

- Removing the fuel source
- Lowering the temperature of burning material
- Choking or restricting the supply of Oxygen [CORRECT]
- Transferring heat via conduction

Explanation: Smothering means 'Choking' or restricting the supply of Oxygen (Air) to the burning material by sealing it off.

Q994. How many persons constitute a standard House Fire Party?

- Two persons
- Four persons [CORRECT]
- Six persons
- Eight persons

Explanation: House Fire Parties consist of four persons who carry stirrup pumps and water buckets.

Q995. Which equipment is specifically allocated to members of the House Fire Parties as part of their personal equipment?

- Trailer pump and rubber boots
- One steel helmet and one whistle per member [CORRECT]
- Fire extinguisher and gas mask
- Chemical powder pack and heavy axe

Explanation: One steel helmet and one whistle per member is envisaged as personal equipment for House Fire Parties.

Q996. From which organization are the members of the Auxiliary Fire Services drawn?

- NCC Cadets
- Home Guards [CORRECT]
- Civil Police
- Regular Army

Explanation: The members of the Auxiliary Fire Service are drawn from the Home Guards and consist of eight persons with a Trailer pump.

Q997. Which type of fire extinguisher is conical or cylindrical in shape and used for ordinary combustible materials where cooling is achieved by water?

- Foam Type Extinguisher
- Dry Chemical Powder Extinguisher
- Soda Acid Extinguisher [CORRECT]
- Carbon dioxide Extinguisher

Explanation: Soda Acid Extinguishers are used for ordinary combustible material, achieve cooling via water, and are conical/cylindrical in shape.

Q998. Which extinguishers are exclusively meant for extinguishing fires involving inflammable liquids like oils, fats, and grease?

- Soda Acid and Water buckets
- **Foam Type and Dry Chemical Powder Extinguishers [CORRECT]**
- Stirrup pumps with sand
- Carbon dioxide only

Explanation: Foam Type Extinguishers and Dry Chemical Powder Extinguishers are exclusively meant for fires involving inflammable liquids such as oils, fats, grease, etc.

Q999. Which extinguishing agents are specified to fight fires involving 'Live' electrical equipment where non-conductive properties are paramount?

- Soda Acid Extinguishers
- Water buckets
- **CTC Carbon dioxide and Dry Chemical Extinguishers [CORRECT]**
- Stirrup pumps filled with water

Explanation: CTC Carbon dioxide and Dry Chemical Extinguishers are used to fight fires involving 'Live' electrical equipment where non-conductive extinguishing agents are important.

Q1000. What are the standard dimensions specified for trenches used as cover against enemy bombing?

- 6' to 8' long, 1' to 1 ½' wide, and 3' to 4' deep
- **8' to 10' long, 2' to 2 ½' wide, and 4' to 6' deep [CORRECT]**
- 10' to 12' long, 3' wide, and 5' to 7' deep
- 5' to 7' long, 2' wide, and 3' to 5' deep

Explanation: According to the text, trenches should be 8' to 10' long, 2' to 2 ½' wide, and 4' to 6' deep, dug in a zig-zag manner.

Q1001. At what angle are the units of a zig-zag trench supposed to be dug in relation to each other?

- 45 degrees to 60 degrees
- 60 degrees to 75 degrees
- **80 degrees to 100 degrees [CORRECT]**
- 120 degrees to 135 degrees

Explanation: The text states that eight to ten feet long units are dug in a zig-zag manner with an angle of 80 degrees to 100 degrees between each leg.

Q1002. What specific action should a person take when caught in the open during an air attack?

- Stand upright against a thick tree trunk with eyes closed
- **Lie on the ground face downward resting on elbows with hands clasped behind the head, and a rolled handkerchief between teeth [CORRECT]**
- Run towards the nearest building while keeping hands over the ears
- Crouch down on knees with hands covering the face and mouth wide open

Explanation: The text prescribes lying on the ground face downward resting on elbows with hands clasped behind the head so that the chest is not in contact with the ground, and putting a rolled handkerchief in between teeth.

Q1003. What is the recommended procedure when taking cover inside a vehicle during an air attack?

- Drive the vehicle away at maximum speed to a safe zone
- Lock all doors, roll up windows, and stay inside the back seat
- **Park the vehicle in a side lane leaving the ignition key in its place and take cover in the open [CORRECT]**
- Abandon the vehicle on the main road and crawl underneath it

Explanation: The text advises parking the vehicle in a side lane leaving the ignition key in its place and taking cover in the open.

Q1004. What is the rule of conduct for individuals inside a cinema during an air attack?

- Evacuate immediately through the emergency exits
- Lie down flat on the aisles between the rows of chairs
- **Remain seated on your seats [CORRECT]**
- Gather near the main entrance foyer

Explanation: The text explicitly states for a cinema: 'Remain seated on your seats.'

Q1005. What is the minimum recommended radius for dispersion where no habitation should be allowed around Ammunition Factories and Aerodromes?

- 100 to 300 yards
- 200 to 400 yards
- **500 to 1000 yards [CORRECT]**
- 1500 to 2000 yards

Explanation: The text defines dispersion as ensuring no habitation is allowed within a radius of 500 to 1000 yards of Ammunition Factories, Aerodromes, etc.

Q1006. What is the prescribed minimum width for a brick wall used as a baffle wall for anti-splinter protection?

- 9 inches
- **13-1/2 inches [CORRECT]**
- 18 inches
- 30 inches

Explanation: The text specifies that the width of brick walls should not be less than 13-1/2 inches, while sand bag walls should be 30" wide.

Q1007. What is the required thickness of a sand bag wall to provide standard anti-splinter protection?

- 13-1/2 inches
- 20 inches
- 24 inches
- **30 inches [CORRECT]**

Explanation: According to the text, the width of a sand bag wall should be 30" to give standard protection.

Q1008. What is the exact total composition and personnel breakdown of a Rescue Party?

- Six persons: one leader, four rescuers, and one driver
- **Eight persons: one leader, six rescuers, and one driver-cum-store-keeper [CORRECT]**
- Ten persons: two leaders, seven rescuers, and one driver
- Twelve persons: leader, nine rescuers, and two drivers

Explanation: The text states that a Rescue Party will consist of eight persons which includes a leader, six rescuers, and one driver-cum-store-keeper.

Q1009. Where are the Rescue Parties permanently located during normal peacetime or alert status?

- At local police stations
- At military cantonment headquarters
- **At the Civil Defence Depots [CORRECT]**
- At municipal fire stations

Explanation: The text explicitly states under 'Location' that they are located at the Civil Defence Depots.

Q1010. Which of the following is NOT listed as an emergency rescue method suitable for a single rescuer?

- Human Crutch
- Fireman's lift
- **Two handed seat [CORRECT]**
- Bowline drag

Explanation: The 'Two handed seat' is listed under methods suitable for more than one rescuer, whereas Human Crutch, Fireman's lift, and Bowline drag are for a single rescuer.

Q1011. Which of the following methods of rescue requires more than one rescuer?

- Toe drag
- Rescue crawl
- **Blanket lift [CORRECT]**
- Removal downstairs

Explanation: The text lists Blanket lift under methods suitable for more than one rescuer, while Toe drag, Rescue crawl, and Removal downstairs are for one rescuer.

Q1012. What anti-splinter measure can be applied to glass where removal is not possible, involving wire netting or plywood screens?

- Fixing 1/4" wire netting or plywood screen very close to the glass
- **Fixing 1/2" wire netting or plywood screen very close to the glass [CORRECT]**
- Fixing 1" wire netting or plywood screen very close to the glass
- Fixing 2" wire netting or plywood screen very close to the glass

Explanation: The text states that anti-splinter measures can be taken by fixing 1/2" wire netting or plywood screen very close to the glass.

Q1013. Upon arrival at the site of an incident, to whom does the Rescue Party Leader report to collect necessary information?

- The Station House Officer (SHO)
- The Civil Defence Director
- **The Warden [CORRECT]**
- The Officer-in-Charge of the Control Centre

Explanation: The text notes: 'On arrival at the site, the Rescue Party Leader reports to the Warden and collects necessary information regarding the number and the whereabouts of the casualties trapped.'

Q1014. From which personnel are Rescue Parties formed and earmarked for training?

- National Cadet Corps (NCC) Senior Division cadets
- **Home Guard personnel [CORRECT]**
- Territorial Army volunteers
- Local municipal sanitation workers

Explanation: The text states: 'Rescue parties are formed by earmarking suitable Home Guard personnel and giving them requisite training...'

Q1015. Which of the following is NOT listed as a method for rescue from high buildings?

- Leaning ladder method
- Ladder hinge method
- **Hydraulic crane platform method [CORRECT]**

- Two point and Four point suspension method

Explanation: The text lists the methods for rescue from high buildings as: Leaning ladder method, Ladder hinge method, Sliding stretcher on two parallel ropes, Sliding stretcher on one or two ladders, and Two point and Four point suspension method.

Q1016. According to the text, how many possible ways can a doctor dispose of a casualty at the First Aid Post?

- Two ways
- **Three ways [CORRECT]**
- Four ways
- Five ways

Explanation: The text specifies three disposal ways: (a) trivial injury - allowed home, (b) moderate injury - treated and allowed home to report again, (c) severe injury - transported in First Aid Post ambulance to nearest hospital.

Q1017. What is the authorized scale of messengers for the Civil Defence messenger service per post?

- **One per post [CORRECT]**
- Two per post
- Three per post
- As required by the warden

Explanation: The text states under 'Messenger Service' that messengers are authorized on the scale of one per post.

Q1018. What should the warden's map of the area primarily show?

- Only the residential houses and streets
- **Boundaries of posts, streets, roads, houses, important places, shelters, fire stations, CD Depots, First Aid Post, and Hospitals [CORRECT]**
- Only military installations and police stations
- Topographical elevation contours exclusively

Explanation: The text explicitly mentions that each warden will keep a map showing boundaries, streets, roads, houses, important places, shelters, fire stations, CD Depots, First Aid Post and Hospitals.

Q1019. Ordinarily, NCC cadet participation in natural hazard management and disaster relief should be restricted to which category of cadets?

- 1st year JD/JW cadets
- All enrolled cadets regardless of age
- **2nd/3rd year SD/SW cadets only [CORRECT]**
- Senior Division post-graduate officer cadets only

Explanation: The text states: 'Ordinarily participation should be restricted to 2nd/3rd year SD/SW cadets only and selection of boys and girls should depend on area and distance from home town.'

Q1020. Which category of cadets is considered suitable for helping in natural calamities like earthquakes, land-slides, and floods?

- Junior Division (JD) cadets
- Junior Wing (JW) cadets
- **Senior Division (SD) cadets [CORRECT]**
- All school-level cadets

Explanation: The text specifies under Points for Consideration that 'Only SD cadets may be found suitable for helping in natural calamities like earthquakes, land-slides and floods.'

Q1021. During strikes of nurses or telephone operators, which cadets may be used for softer jobs like providing medical assistance or manning exchanges?

- SD cadets
- JD cadets
- **SW cadets [CORRECT]**
- JW cadets

Explanation: The text notes: 'SW cadets may be used for softer jobs like providing medical assistance or manning exchanges during strikes of nurses or telephone operators.'

Q1022. When are NCC cadets most readily available to be launched at short notice for disaster relief?

- During school examination periods
- **Only during camps [CORRECT]**
- Every weekend throughout the year
- During national holidays only

Explanation: The text mentions that cadets are never readily available at short notice due to studies, and 'It is only during camps that the cadets are available and can be launched at short notice.'

Q1023. Which of the following is identified as a potential area of collaboration under Administrative Aspects between GOI and NCC?

- Education and training of affected communities
- **Directory of NCC [CORRECT]**
- Disaster preparedness cells
- Developing training modules for NCC

Explanation: Under Administrative Aspects, the text lists: (i) Organisational capabilities, (ii) Facilitate coordinated access to donor groups, (iii) Directory of NCC, (iv) GOI-NCC forum, (v) Develop NCC emergency preparedness plans.

Q1024. According to earthquake safety guidelines, where should heavy or bulky objects be placed in a home?

- On top shelves
- Hanging from the ceiling hooks
- **On the floor or on the lowest shelves [CORRECT]**
- On the window sills

Explanation: The text advises to 'Place heavy or bulky objects on the floor or on the lowest shelves' to prevent earthquake-related hazards.

Q1025. If you are at home or inside a building during an earthquake, which of the following instructions must be followed?

- Rush immediately to the doors and exits
- Use lifts for a quick escape
- **Do not rush to doors or exits and never use lifts [CORRECT]**
- Stand close to windows and glass mirrors

Explanation: The text explicitly states: 'Do not rush to the doors or exists; never use the lifts; keep well away from windows, mirrors, chimneys and furniture.'

Q1026. Where should you seek immediate physical protection if you are inside a building during an earthquake?

- Under the center of wide glass panes

- **Staying under the lintel of an inner door, in the corner of a room, under a table or a bed [CORRECT]**
- Directly beneath heavy hanging chandeliers
- On balconies facing the street

Explanation: The text states: 'Protect yourself by staying under the lintel of an inner door, in the corner of a room, under a table or even under a bed.'

Q1027. What is the recommended action if you are driving a vehicle when an earthquake strikes?

- Drive as fast as possible to reach home
- **Stop the vehicle away from buildings, walls, slopes, electricity wires and cables and stay inside the vehicle [CORRECT]**
- Abandon the vehicle immediately and climb a nearby pole
- Park directly underneath a flyover bridge

Explanation: The text states: 'Stop the vehicle away from buildings, walls, slopes, electricity wires and cables and stay inside the vehicle.'

Q1028. What items should be kept in a handy place if you live in an earthquake-prone area according to the text?

- An umbrella and a compass
- **A torch and a portable transistor radio [CORRECT]**
- Extra blankets and heavy winter clothing
- A complete set of household tools

Explanation: The text instructs to 'Keep in a handy place, a torch and a portable transistor radio' under earthquake preparedness.

Q1029. What is the primary responsibility of Civil Defence patrols/lookouts selected by wardens?

- To fight active forest fires single-handedly
- **To ensure lighting restrictions and collect information about unexploded bombs, fires, and building damage [CORRECT]**
- To distribute rations directly to all households
- To command local police units during emergencies

Explanation: The text notes that CD patrols/lookouts 'are made responsible to ensure lighting restrictions and also to collect information about unexploded bombs, fires and damage to the buildings and keep the warden posted.'

Q1030. What immediate action should one take regarding electrical and gas appliances after an earthquake under the culture of prevention?

- Leave them running to maintain communication
- **Turn off the water, gas, and electricity [CORRECT]**
- Only turn off the electricity while keeping gas on
- Check them using a cigarette lighter

Explanation: The culture of prevention guidelines explicitly state to turn off water, gas, and electricity after an earthquake to prevent short-circuits and gas leaks.

Q1031. Which of the following actions is specifically advised against when consuming water after an earthquake if it is from open containers?

- Boiling it vigorously for 10 minutes
- **Drinking it directly without having examined and filtered it [CORRECT]**
- Filtering it through an ordinary clean cloth
- Filtering it through a sieve

Explanation: Text specifies not to drink water from open containers without having examined it and filtered it through a sieve, filter, or ordinary clean cloth.

Q1032. What should be done with large windows if severe gales or storm force winds are forecast for your area?

- Open them fully to equalize air pressure
- **Tape up large windows to prevent them from shattering [CORRECT]**
- Cover them with heavy blankets from the inside
- Smash them safely beforehand to avoid flying shards

Explanation: Under cyclone precautions, taping up large windows is recommended to prevent them from shattering during storm force winds.

Q1033. During a cyclone, if the storm hits, which windows should be opened if the roof begins to lift?

- Windows on the windward side
- All windows in the house simultaneously
- **Windows on the sheltered side of the house [CORRECT]**
- Only basement windows

Explanation: The text states to open windows on the sheltered side of the house if the roof begins to lift.

Q1034. What primary protective measure should be taken regarding insecticides when preparing for a flood?

- Bury them deep in the backyard soil
- **Move all insecticides out of reach of the water to prevent dangerous pollution [CORRECT]**
- Dilute them with flood water
- Leave them sealed in their original outdoor packaging

Explanation: The flood management instructions highlight preventing dangerous pollution by moving all insecticides out of reach of the water.

Q1035. What is essentially the purpose of the GOI-NCC partnership in disaster management?

- To enable NCC to independently run district administration
- **To ensure NCC responds in an organised manner for easier coordination with GOI, State Government, and District Administration [CORRECT]**
- To replace the police force during peacetime duties
- To fund civilian disaster relief projects directly

Explanation: The text states that the purpose of GOI-NCC partnership is for the NCC to respond in an organised manner so that coordination with GOI, State Govt, and District Administration becomes easier.

Q1036. Which official is mandated to rush to the spot immediately upon receipt of information about any disaster with a quick reaction team?

- District Collector
- SSP (Senior Superintendent of Police)
- **Dy SP concerned [CORRECT]**
- NCC Battalion Commander

Explanation: The text specifies that on receipt of information about a disaster, the Dy SP concerned shall rush to the spot immediately with his quick reaction team.

Q1037. According to traffic police objectives during disasters, what must be done to restrict movement of onlookers?

- **Cordoning of the area [CORRECT]**

- Issuing curfew passes to all pedestrians
- Deploying fire hoses against crowds
- Setting up permanent checkpoints 10 kilometers away

Explanation: One of the objectives of the traffic police is ensuring cordoning of the area to restrict movement of onlookers and other vehicular/pedestrian traffic.

Q1038. In casualty management during a disaster, in what capacities can NCC cadets be employed?

- As surgeons and primary triage officers
- As ambulance drivers exclusively across state borders
- **To accompany the casualty or be employed as pointsman or liaison officer at hospitals [CORRECT]**
- To perform autopsies on victims

Explanation: Cadets can accompany the casualty or be employed as pointsman or liaison officer at hospitals during casualty management.

Q1039. How should emergency vehicles be handled by local traffic police and cadets before permanent traffic arrangements are made?

- Inspect their registration papers thoroughly before allowing passage
- **Ensure clear passage for emergency vehicles [CORRECT]**
- Reroute them through civilian evacuation corridors
- Hold them back in reserve parking zones

Explanation: The text specifies that the local traffic police shall ensure clear passage for emergency vehicles until traffic arrangements are made, and cadets can be employed to check and ensure they get the right of way.

Q1040. What specific task is assigned for maintaining records of incidents during disaster investigations?

- Handwritten statements from every civilian present
- **Videographing the entire scene of incident as early as possible [CORRECT]**
- Audio recording of all radio transmissions
- Collecting physical fragments of damaged asphalt

Explanation: The text notes that the entire scene of incident must be videographed as early as possible to reconstruct the scene during investigation, a task cadets can be employed in.

Q1041. Why should mock exercises of various disaster management authorities be conducted from time to time with cadet participation?

- To grade cadets on physical endurance benchmarks
- **To understand their role and ensure drawbacks noted are improved upon [CORRECT]**
- To test new military weaponry in urban terrain
- To replace annual training camps entirely

Explanation: Cadets must participate in mock exercises to understand their role and drawbacks noted must be improved upon.

Q1042. Which of the following details must be coordinated and available with authorities for disaster management use?

- **List of licensed Blood Banks [CORRECT]**
- List of all private vehicle owners
- List of tourist hotspots in neighboring states
- List of agricultural crop yields

Explanation: The miscellaneous points state that details including a list of licensed Blood Banks should be available with concerned authorities and coordinated by cadets/NCC authorities.

Q1043. What is identified as the major cause of confusion during the onset of a disaster?

- Failure of satellite communication networks only
- **Movement of men and transport moving out to secure areas and over-zealous volunteers rushing in [CORRECT]**
- Complete absence of state legislative assemblies
- Overlapping jurisdiction of international NGOs

Explanation: The text clearly states major confusion is caused due to movement of men and transport moving out to secure areas and of over-zealous volunteers rushing in to help.

Q1044. What immediate safety action should be taken if you encounter loose electric wires after an earthquake?

- Wrap them in rubber sheets using bare hands
- **Avoid places where there are loose electric wires and do not touch any metal object in contact with them [CORRECT]**
- Cut them using iron wire-cutters
- Pour water on them to cool them down

Explanation: The culture of prevention rules state to avoid places with loose electric wires and not touch any metal object in contact with them.

Q1045. Which organization is designated as the nodal agency of the Government of India for scientific flood forecasting?

- **Central Water Commission [CORRECT]**
- National Disaster Management Authority
- India Meteorological Department
- NCC Directorate

Explanation: The text states that the Central Water Commission is the nodal agency of the Government of India for flood forecasting, managing over 150 flood forecasting stations.

Q1046. How many cyclone warning centres are located across India to provide cyclone forecasts?

- Four
- Five
- **Six [CORRECT]**
- Eight

Explanation: According to the text, cyclone forecasts are provided through six cyclone warning centres located at Calcutta, Bhubaneswar, Visakhapatnam, Chennai, Mumbai, and Ahmedabad.

Q1047. What is the typical distance range that cyclones generally move over the ocean in 24 hours?

- 100-200 km
- **300-500 km [CORRECT]**
- 600-800 km
- 900-1000 km

Explanation: The text specifies that cyclones generally move 300-500 km in 24 hours over the ocean.

Q1048. Within what radius from the centre of a severe tropical cyclone and on which side of the storm track is the maximum destruction typically confined?

- Within 50 km on the left side
- **Within 100 km on the right side [CORRECT]**
- Within 150 km on the center track

- Within 200 km on the rear side

Explanation: The text notes that maximum destruction is within 100 km from the centre of the cyclone and on the right side of the storm track.

Q1049. In the NCC disaster management organization, who acts as the autonomous decision maker keeping the DG NCC informed?

- Group Commander
- Unit Commander
- **DDG [CORRECT]**
- Civil Defence Chief

Explanation: The text states that to carry out disaster rescue and emergency relief operations readily, the DDG will be the decision maker who will act autonomously, keeping DG NCC informed.

Q1050. During which relief period is the NCC's primary focus expected to provide assistance in the form of boats with personnel to reach inundated areas with succour?

- Warning Period
- **Flood Period [CORRECT]**
- Recuperation Period
- Preparedness Phase

Explanation: The text specifies that during the Flood Period, the focus of NCC should be to provide assistance in the form of boats with personnel who can reach the affected areas with succour.

Q1051. What is the approximate size of the small action groups formed by Groups/Battalions for executing disaster assistance?

- 5 to 10 members
- 10 to 15 members
- **20 to 30 members [CORRECT]**
- 50 to 60 members

Explanation: The text states that the Group/Battalion form small action groups of 20 to 30 members each, depending on the convenience.

Q1052. Which action group within the NCC contingency plan is primarily recommended to consist of Junior Division (JD) cadets?

- Relief Group
- **Warning Group [CORRECT]**
- Shelter Management Group
- Evacuation and Rescue Groups

Explanation: The text mentions under the Warning Group description that members of this group could be cadets from JD.

Q1053. Which action group is specifically recommended to comprise maximum cadets from Junior Wing/Senior Wing (JW/SW) to look after evacuees at safe houses?

- Warning Group
- **Shelter Management Group [CORRECT]**
- Sanitation Groups
- First Aid Medical Groups

Explanation: The text states under Shelter Management Group that the members of this group can have maximum cadets from JW/SW to look after evacuees' food, water, and medication requirements.

Q1054. What is the approximate daily rainfall mentioned as common during cyclones, which generates destructive floods?

- 5 to 10 cm per day
- **20 to 30 cm per day [CORRECT]**
- 40 to 50 cm per day
- 60 to 70 cm per day

Explanation: The text states that rainfall of the order of 20 to 30 cm per day is common during cyclones.

Q1055. During which relief period does the NCC's role primarily involve assisting technical hands in establishing civil amenities and debris/carcass removal?

- Warning Period
- Flood Period
- **Recuperation Period [CORRECT]**
- Evacuation Period

Explanation: The text states that during the Recuperation Period, the role of NCC is in providing assistance to technical hands establishing civil amenities, along with debris and carcass removal.

Q1056. Which of the following is NOT listed among the types of assistance required during floods/cyclones?

- Shelter Management
- Carcass Disposal
- **Traffic Signal Control [CORRECT]**
- Patrolling and Liaison

Explanation: Paragraph 9 lists the required types of assistance, which include Shelter Management, Carcass Disposal, and Patrolling and Liaison, but does not list Traffic Signal Control.

Q1057. Which method is identified in the text as the most effective for contacting NCC cadets during a disaster?

- Radio / TV broadcast
- **Cadets themselves speaking to each other and forming working groups [CORRECT]**
- Jeep with loudhailer
- Contact telephone numbers

Explanation: Paragraph 11 explicitly states: 'Most effective method is that cadets themselves speak to each other and form into working groups...'

Q1058. Which technology is specifically mentioned to help track cyclones alongside powerful cyclone detection radars?

- **INSAT [CORRECT]**
- GPS Satellites
- Sonar Mapping
- Weather Balloons only

Explanation: Paragraph 6 states that cyclones are tracked with the help of INSAT, powerful cyclone detection radars, and conventional meteorological observations.

Q1059. What specific characteristic is required for members of the Evacuation and Rescue Groups in the NCC?

- Must have basic radio operation training
- **Must be physically strong (both SD and SW) and trained in basic methods [CORRECT]**
- Must possess nursing certification

- Must be exclusively from Senior Division boys

Explanation: Paragraph 12(d) states that members of the Evacuation and Rescue Group have to be physically strong (both SD and SW), and should be trained in basic evacuation and rescue methods.

Q1060. Who holds the overall command and control of flood or cyclone relief operations in the NCC?

- The Director General NCC (DG NCC)
- **The Group Commander of the groups [CORRECT]**
- The District Collector
- The Chief Secretary

Explanation: According to Section 13 (a) Command and Control, the overall command and control of the operation rests with the group commander of the groups.

Q1061. Approximately how many large magnitude earthquakes (Magnitude > 6.0) occur in a decade globally?

- About 50
- About 100
- **About 200 [CORRECT]**
- About 500

Explanation: Section 9, paragraph 2(e) states that about 200 large magnitude earthquakes (M>6.0) occur in a decade.

Q1062. During NCC earthquake relief organization, what role do the NCC Group Commanders assume at the state level?

- District Disaster Managers
- **Sector Commanders [CORRECT]**
- Sub-Sector Commanders
- Relief Commissioners

Explanation: Section 9, paragraph 5 states that sectors conform to the areas of responsibility of groups with group commanders being the sector commanders.

Q1063. Who exercises the powers and undertakes the responsibilities of the District Disaster Manager during a disaster?

- The Group Commander
- **The Collector [CORRECT]**
- The DDG
- The Chief Secretary

Explanation: Section 9, paragraph 6 specifies that the collector will exercise the powers and undertake responsibilities of the District Disaster Manager.

Q1064. According to the earthquake safety guidelines, what is identified as the cause of most problems during a severe earthquake?

- Ground movement and splitting of rocks
- Volcanic eruptions and lava flow
- **Falling objects and debris (partial building collapse, ceiling plaster, light fixtures, etc.) [CORRECT]**
- Sudden flooding from broken dams

Explanation: Section 9, paragraph 7(a) points out that most problems from a severe earthquake result from falling objects and debris and not from ground movement.

Q1065. What is considered the single most important site selection criteria when establishing a relief camp?

- Proximity to urban markets
- **Availability of an adequate amount of water on a year-round basis [CORRECT]**
- Availability of heavy transport vehicles
- Proximity to national highways

Explanation: Section 10 (Setting Up Relief Camp), paragraph 4 states that the single most important site selection criteria is the availability of an adequate amount of water on a year-round basis.

Q1066. What is the recommended minimum elevation above the water table for effective drainage when selecting a relief camp site?

- At least one meter
- At least two meters
- **A minimum of three meters above the water table [CORRECT]**
- At least five meters

Explanation: Section 10, paragraph 4 specifies that for effective drainage, the site should be located above flood level at a minimum of three meters above the water table.

Q1067. According to the World Health Organization (WHO), what is the minimum usable open space recommended per person in a relief camp?

- 10 square meters per person
- 20 square meters per person
- **30 square meters per person [CORRECT]**
- 50 square meters per person

Explanation: Section 10, paragraph 5 states that WHO recommends a minimum of 30 square meters per person for the displaced population.

Q1068. Which of the following documents/data must NOT be missing from the information folder maintained by NCC sector and sub-sector commanders?

- Stock market listings
- **Road map of their area of responsibility [CORRECT]**
- Personal bank account details of cadets
- Local weather broadcast schedules

Explanation: Section 9, paragraph 5(a) explicitly lists the road map of their area of responsibility as a mandatory part of the information folder.

Q1069. Why is telephonic communication considered unreliable during flood operations, requiring alternate sources to be identified?

- Because lines are deliberately jammed by the media
- **Because telephonic communication will be severely affected in the event of floods [CORRECT]**
- Because cellular networks are turned off by the government
- Because telephonic cables are too expensive

Explanation: Section 13(a) mentions that telephonic communication will be severely affected in the event of floods, making alternate communication sources imperative.

Q1070. How is undertaking tasks during floods categorized for NCC volunteers in terms of duty?

- It is part of compulsory daily routine training.
- **It is a service performed outside call of one's duty and is voluntary and organisation driven. [CORRECT]**
- It is a paid commercial assignment.
- It is a mandatory legal obligation under civil service.

Explanation: Section 13(b) states that undertaking tasks in the event of floods is voluntary and organisation driven, performed outside the call of one's duty.

Q1071. What is the primary characteristic regarding the onset of an earthquake?

- It provides ample warning through atmospheric pressure drops.
- **The onset is usually sudden with little or no warning. [CORRECT]**
- It can be accurately predicted weeks in advance.
- It always occurs exclusively during the monsoon season.

Explanation: Section 9, paragraph 1 & 2(b) state that the commencement of this phenomenon is usually sudden with little or no warning.

Q1072. Where should beds NOT be located according to earthquake safety instructions?

- Against interior load-bearing walls
- **Away from windows and heavy objects that could fall [CORRECT]**
- Away from the kitchen area
- On the ground floor

Explanation: Section 9, paragraph 7(c) states to locate beds away from the windows and heavy objects that could fall, and not to hang mirrors or picture frames over beds.

Q1073. To whom does the NCC sub-sector HQ forward its preliminary information report and action taken report?

- Directly to the Prime Minister's Office
- **To the sector HQ and neighbouring sub-sector HQs [CORRECT]**
- To the United Nations Disaster Relief Organization
- To local school principals

Explanation: Section 9, paragraph 6(e) states that NCC sub-sector HQ will forward their preliminary information report and action taken report to sector HQ and neighbouring sub-sector HQs.

Q1074. Which of the following relief measures falls under the aftermath of disasters as detailed in Section 10?

- Planning space missions
- **Disposal of dead, search, rescue and evacuation, and relief for livestock [CORRECT]**
- Conducting national elections
- Filing corporate tax returns

Explanation: Section 10, paragraph 1 states that relief measures cover search, rescue and evacuation, relief for livestock, clearance of debris, disposal of dead, control of fires, damage assessment and shelter.

Q1075. What is the absolute minimum floor space required per person in emergency shelters according to site selection guidelines?

- 2.5 square meters
- 3.0 square meters
- **3.5 square meters [CORRECT]**
- 5.0 square meters

Explanation: The text specifies that 3.5 square meters is the absolute minimum floor space per person in emergency shelters.

Q1076. What is the minimum recommended ratio of latrines to persons in emergency site infrastructure design?

- At least one for every 10 persons

- At least one for every 20 persons [CORRECT]
- At least one for every 50 persons
- At least one for every 100 persons

Explanation: According to specific infrastructure design considerations, if latrines are used there should be at least one for every 20 persons.

Q1077. Which of the following administrative and community services is likely to be centralized in a camp layout?

- Bathing and washing areas
- Supplementary feeding centres
- Camp administrative office [CORRECT]
- Education facilities

Explanation: The camp administrative office is listed under services likely to be centralised, whereas bathing, feeding, and education are listed as decentralised.

Q1078. Why are pre-fabricated buildings or specially developed emergency shelter units generally ineffective in displaced persons emergencies?

- Due to their low cost and lightweight nature
- Due to their inappropriateness, high unit cost, transport problems, and inflexibility [CORRECT]
- Because they can be constructed too quickly
- Because they are strictly fire-resistant

Explanation: The text explicitly states pre-fabricated buildings and emergency shelter units are ineffective due to inappropriateness, high unit cost, transport problems, and inflexibility.

Q1079. Whose responsibility is it to coordinate debris removal in the event of a disaster?

- Central Government
- State Government [CORRECT]
- Local Village Panchayat
- Individual Property Owners

Explanation: The text states that it is the responsibility of the State Government for coordinating debris removal in the event of a disaster.

Q1080. What are the three basic planning requirements of the debris removal process?

- Damage assessment, Resources Available, Use of Resources [CORRECT]
- Initial survey, Budget allocation, Execution
- Clearing, Burning, Recycling
- Site selection, Infrastructure design, Shelter building

Explanation: The debris removal process is divided into three basic planning requirements: Damage assessment, Resources Available, and Use of Resources.

Q1081. What kind of damage causes debris consisting primarily of soil, ground, rock, and some construction material from landslides during floods?

- Tornadoes
- Floods [CORRECT]
- Earthquakes
- Volcanic eruptions

Explanation: The text notes that damage caused by flooding and high velocity of water results in debris from landslides consisting primarily of soil, ground, rock, and construction material.

Q1082. In the priority order for debris removal, what falls under Priority I?

- Removal of debris from private property
- Removal of debris that poses a threat to public structures and bridges
- **Removal of debris that damages entry and exit for emergency services, public health, and safety [CORRECT]**
- Removal of debris causing hindrance to rehabilitation

Explanation: Priority I is to remove debris that damages entry and exit for emergency services, public health, and safety.

Q1083. Whose responsibility is it to make arrangements for the removal of debris from private property?

- The State Government
- The Municipal Corporation
- **The individual property owner [CORRECT]**
- The National Disaster Response Force

Explanation: The text notes under Priority IV and guidelines that it is the responsibility of the owner to make arrangements for removal of debris from his property.

Q1084. Which of the following methods is NOT listed as a debris redemption method?

- Burning
- **Freezing [CORRECT]**
- Chipping
- Recycling

Explanation: The text lists burning, grinding, chipping, burying, and recycling as methods available for debris removal; freezing is not mentioned.

Q1085. Under what condition is debris removal from natural streams normally eligible for assistance?

- Always eligible regardless of scale
- **Only debris that causes a threat to lives or public health and safety or damage to improved property from a 5 year flood event [CORRECT]**
- Only if the stream is dry
- Only when requested by private companies

Explanation: Natural streams are not normally eligible unless debris causes a threat to lives/public health or damage to improved property from a 5 year flood event.

Q1086. Where should warehouses be located within a camp physical layout for security reasons?

- At the extreme perimeter of the camp
- **Near the administrative office [CORRECT]**
- Next to the water distribution plant
- Close to the educational facilities

Explanation: The text states that warehouses should be located near the administrative office for security reasons.

Q1087. What type of soil characteristics should be selected for an emergency settlement site?

- Rocky and impermeable sites
- **Soil that allows for water absorption and retention of human waste [CORRECT]**
- Dry sandy soil with zero moisture retention
- Clay-heavy soil prone to severe waterlogging

Explanation: The text states the soil should allow for water absorption and the retention of human waste, while rocky or impermeable sites should be avoided.

Q1088. Why should emergency shelters and communal buildings preferably be built by the displaced people themselves?

- Because they possess heavy machinery
- **To reduce their sense of dependence and cut costs considerably [CORRECT]**
- Because external agencies refuse to fund them
- To train them for construction jobs permanently

Explanation: Building shelters themselves helps ensure housing meets their needs, reduces their sense of dependence, and cuts costs considerably.

Q1089. Which administrative and community service is classified as decentralized rather than centralized?

- Camp administrative office
- Essential services co-ordination offices
- Tracing services
- **Supplementary feeding centres [CORRECT]**

Explanation: Supplementary feeding centres are categorized under services likely to be decentralised, while administrative, coordination, and tracing offices are centralized.

Q1090. Whose responsibility is it to maintain an inventory of all resources (personnel and equipment) and their capabilities for clean-up operations?

- NCC Directorate
- **Local administration [CORRECT]**
- Non-Governmental Organisations (NGOs)
- Central Defence Services

Explanation: According to the text, it is the responsibility of local administration to maintain an inventory of all resources in the form of personnel and equipment and their capabilities for response to a clean-up operation.

Q1091. Which of the following is specifically cited as a major cause of disease epidemics following a disaster?

- Stagnant rainwater
- **Death of animals [CORRECT]**
- Contaminated communication lines
- Failure of the Public Distribution System

Explanation: The text states that disasters affect livestock, which requires immediate fodder and rehabilitation because major outbreaks of epidemics are often due to the death of animals.

Q1092. What is recommended to be used as the base for the distribution system initially during a disaster?

- Local educational institutions
- NCC unit and group headquarters
- **The Public Distribution System (PDS) [CORRECT]**
- International NGOs like WHO

Explanation: The text recommends using the Public Distribution System (PDS) as the base for distribution because it is already an available functional chain of supply.

Q1093. Which international organization is explicitly mentioned among the sources of disaster aid items in the text?

- UNESCO
- **WHO [CORRECT]**

- UNICEF
- Red Cross

Explanation: The text lists international organizations, specifically mentioning 'like WHO etc.' as sources of disaster aid items alongside other entities.

Q1094. According to the guidelines on collection, how should perishable food items be handled?

- Mixed with dry rations to save packaging space
- **Collected at special centres to ensure speedy transportation [CORRECT]**
- Airdropped immediately without sifting
- Stored locally until local administration demands them

Explanation: The text explicitly states: 'Perishable items of food to be collected at special centres to ensure speedy transportation.'

Q1095. What role can NCC cadets perform regarding illegal dumping activity during debris removal operations?

- Imposing financial penalties
- **Reporting and controlling illegal dumping activity [CORRECT]**
- Arresting violators under civil law
- Confiscating transport vehicles

Explanation: The text states that NCC cadets can be employed for reporting and controlling illegal dumping activity.

Q1096. Which of the following equipment is listed under debris clearing equipment?

- Petromaxes and gas lights
- Survival food kits and water bousers
- **Cranes, bulldozers, tippers, and shovels [CORRECT]**
- Mobile hospitals and ambulances

Explanation: The text lists debris clearing equipment as including cranes, bulldozers, tippers, shovels, pick axes, drills, hand drills, and ordinary hammers.

Q1097. At what level can NCC establish their own collection and distribution centres due to their wide association with schools and colleges?

- **Unit/group level [CORRECT]**
- National Directorate level only
- State Secretariat level exclusively
- International liaison level

Explanation: The text notes that NCC can establish their own collection and distribution centres at the unit/group level since they are closely associated with schools and colleges across the country.

Q1098. Why is the provision of lighting facilities (such as lanterns and petromaxes) considered essential immediately after a disaster?

- To prevent night-time looting and illegal trade
- **Because darkness and destruction are enough to demoralise and kill the spirit of survival [CORRECT]**
- To assist rescue helicopters in landing safely at night
- To power emergency field telephone lines

Explanation: The text states: 'Darkness and destruction are enough to demoralise and kill the spirit of survival. Therefore provision of lighting facilities is very essential.'

Q1099. During the distribution stage, how should the entire affected area be divided during the rehearsal stage?

- Into zones based on political boundaries
- **Into grids [CORRECT]**
- Into sectors based on military ranks
- Into circles based on population density only

Explanation: The text states under distribution guidelines: 'The entire area should be divided into grids during rehearsal stage and adequate facilities should be put in place during this stage...'

Q1100. What is the primary reason why the normal chain of demand and supply breaks down during a disaster?

- Government shutdown of markets
- Lack of manufacturing units in affected areas
- **Occurrence of a disaster breaking down the delivery chain [CORRECT]**
- Refusal of NGOs to cooperate with local contractors

Explanation: The text explains that while normal items reach common men through well-laid delivery systems, 'on the occurrence of a disaster this chain is completely broken down.'

Q1101. Which of the following life-saving items must be routed through different collection and distribution channels specifically to avoid delay?

- Fresh vegetables
- **Life-saving drugs [CORRECT]**
- Pre-cooked food packages
- Rain coats and blankets

Explanation: The text states under collection guidelines: 'Ensure that life saving drugs are routed through different collection and distribution channels to avoid delay.'

Q1102. According to Section-13 on Message Services, what is the specified range for Ground Wave propagation using Long and Medium waves?

- Upto 10 Kms
- **Upto 30 Kms [CORRECT]**
- Upto 50 Kms
- Upto 100 Kms

Explanation: The text states: 'Ground Wave. Long and Medium waves range upto 30 Kms.'

Q1103. In what capacity can NCC cadets work alongside Defence Forces during crisis management?

- As independent tactical commanders
- As major financial contributors
- **In collection, distribution, and signal communication support tasks [CORRECT]**
- As permanent civil service administrators

Explanation: The text notes that cadets can work along with Defence Forces who are major contributors in crisis management, assisting in collection, distribution, and operating/maning posts with signal communication.

Q1104. What action is mandated regarding the disposal of the dead during disaster management?

- Immediate mass burial to prevent epidemics
- **Speedy recovery, identification, records maintenance, and disposal with dignity [CORRECT]**
- Immediate handing over to international agencies for record

- Incineration at designated district boundaries without identification

Explanation: The text specifies under 'Disposal of the Dead' that the aspect needs speedy attention: recovery of bodies, identification, handing over to relatives, maintaining proper records, and ensuring all get disposed with dignity.

Q1105. What is the range of VHF and UHF waves under Space Wave communication?

- Upto 10Kms
- **Upto 50Kms [CORRECT]**
- 100 Kms to 1000 Kms
- Upto 150 Kms

Explanation: According to the text, VHF and UHF waves range upto 50Kms under Space Wave communication.

Q1106. Sky Wave communication utilizes HF waves making use of the ionosphere layer existing up to what height from the Earth's surface?

- 8-10 Kms
- 50 Kms
- **150-200 Kms [CORRECT]**
- 1000 Kms

Explanation: The text states that Sky Wave uses HF waves making use of the ionosphere layer existing upto a height of 150-200 Kms.

Q1107. What is the height range for forward propagation under Tropospheric Scatter?

- **Upto 8-10 Kms [CORRECT]**
- Upto 50 Kms
- 150-200 Kms
- 100 to 1000 Kms

Explanation: Tropospheric Scatter for forward propagation has a height range upto 8-10 Kms from the surface of the earth.

Q1108. Which action is required 'Prior to a Disaster' regarding communication?

- Set up the communication facilities
- Convey facts without creating panic
- **Assessment of all probable causes of disaster likely to occur [CORRECT]**
- Evacuate the entire facility immediately

Explanation: Assessment of all probable causes of disaster likely to occur in the area is listed under the phases of communication prior to a disaster.

Q1109. Where should communication equipment be located in emergency situations such as floods?

- In a basement
- **At a height [CORRECT]**
- Near the water body
- Outdoors in open fields

Explanation: The text recommends that communication equipment should be located at a safe site for use in an emergency, e.g., at a height in case of floods.

Q1110. According to ancient scriptures such as 'Manu Smriti', what does caste mean?

- Endogamous group
- **Varnasrama Dharma ('offices given according to colour') [CORRECT]**

- Socially and educationally backward classes
- Outcastes and menial laborers

Explanation: The text notes that according to ancient scriptures such as 'Manu Smriti', caste is 'Varnasrama Dharma', which means 'offices given according to colour'.

Q1111. On which date did the Constitution of India, which includes safeguards for suppressed and backward classes, come into effect?

- 15 August 1947
- **26 January 1950 [CORRECT]**
- 26 November 1949
- 2 October 1950

Explanation: The text states that the constitution of India came into effect from 26 January 1950.

Q1112. What term did Mahatma Gandhi use for Scheduled Castes (SC) and Scheduled Tribes (ST) respectively?

- Dalits and Adivasis
- **Harijans and Girijan [CORRECT]**
- Backward Classes and Outcastes
- Varnasrama and Dharma

Explanation: The text mentions that Mahatma Gandhi used the terms Harijans and Girijan for SC and ST respectively.

Q1113. According to the 2001 census, what is the approximate population percentage of Scheduled Castes (SC) and Scheduled Tribes (ST) in India?

- **16% and 8% [CORRECT]**
- 8% and 16%
- 23% and 10%
- 50% and 25%

Explanation: The text states that according to the 2001 census, the population of SC and ST is approximately 16% and 8% of India's total population respectively.

Q1114. Approximately how many communities were listed as Other Backward Classes (OBCs) as of 2006?

- 1000 communities
- 1600 communities
- **2300 communities [CORRECT]**
- 5000 communities

Explanation: The text notes that as of 2006, approximately 2300 communities are listed backwards.

Q1115. What is the range of communication covered by Sky Wave HF waves?

- Upto 50 Kms
- **100 Kms to 1000 Kms [CORRECT]**
- Upto 8-10 Kms
- Beyond 5000 Kms

Explanation: Sky Wave HF waves have a range from 100 Kms to 1000 Kms.

Q1116. Which of the following is NOT listed as a potential option for alternative communication during emergencies?

- Messengers

- Carrier Pigeons [CORRECT]
- Field telephones
- Amateur radios

Explanation: Carrier pigeons are not in the text options, which include messengers, telephones, portable two-way radios, amateur radios, field telephones, etc.

Q1117. What is the primary definition or social grouping term mentioned at the beginning of Chapter VII Section 1 regarding India's traditional social hierarchy?

- Endogamous groups or castes [CORRECT]
- Classless society
- Guild system
- Tribal confederacy

Explanation: The text states that India is still divided into many endogamous groups, or castes and sub-castes, as a result of centuries of practicing the caste system.

Q1118. Which section in Chapter VII covers 'NGOs and their Contribution to Society' and applies to which cadet divisions?

- Section 7, JD/JW only [CORRECT]
- Section 7, JD/JW and SD/SW
- Section 8, SD/SW only
- Section 7, JD/JW only (SD/SW marked with '-')

Explanation: In the index table, Section-7 (NGOs and their Contribution to Society) has a '√' for JD/JW and '-' for SD/SW.

Q1119. Which section in Chapter VII covers 'Drug Trafficking and Crime' and which divisions are indicated?

- Section 8, JD/JW
- Section 8, SD/SW (- for JD/JW, √ for SD/SW) [CORRECT]
- Section 6, Both JD/JW and SD/SW
- Section 5, JD/JW only

Explanation: The index shows Section-8 'Drug Trafficking and Crime' with '-' for JD/JW and '√' for SD/SW.

Q1120. What percentage of vacancies in government-aided educational institutes and government/public sector jobs are reserved for Scheduled Castes (SCs) and Scheduled Tribes (STs) respectively, as laid down by the Constitution?

- 15% and 7.5% [CORRECT]
- 22.5% and 27%
- 10% and 5%
- 27% and 15%

Explanation: The Constitution lays down that 15% and 7.5% of vacancies in government-aided educational institutes and government/public sector jobs are reserved for SC and ST respectively.

Q1121. What is the current percentage of seats reserved for OBCs in higher education institutes under the Central Government?

- 15%
- 22.5%
- 27% [CORRECT]
- 7.5%

Explanation: Currently, 22.5% of seats in central higher education institutes are reserved for SC and ST combined, and 27% are reserved for OBCs.

Q1122. Which of the following income thresholds excludes individuals from the OBC category under the 'creamy layer' rule?

- Rs 1.5 lakh or above
- Rs 2.0 lakh or above
- **Rs 2.5 lakh or above [CORRECT]**
- Rs 5.0 lakh or above

Explanation: Persons with a gross annual income of Rs 2.5 lakh or above are excluded from the OBC reservation policy under the creamy layer category.

Q1123. Scheduled tribes are described in the text as basically having what characteristic regarding their habitation?

- Urban settlers
- **Nomads without land to settle down or cultivate [CORRECT]**
- Industrial wage earners
- Large landowners

Explanation: The text explicitly states that scheduled tribes are basically nomads and don't have any land to settle down or cultivate.

Q1124. According to the arguments in favor of anti-reservation, allocation of quotas on the basis of caste is considered a form of:

- Economic reform
- **Racial discrimination [CORRECT]**
- Social justice
- Merit promotion

Explanation: Points in favor of anti-reservation state that allocation of quotas on the basis of caste is a form of racial discrimination and contrary to the right to equality.

Q1125. What is the origin of social service as discussed in the text?

- Industrial Revolution
- **Judaean-Christian teachings [CORRECT]**
- Modern bureaucratic systems
- The agrarian economy

Explanation: The text states that the origin of social service is ancient, stemming from the tenets of the Judaean-Christian teachings.

Q1126. Which method of social service aims to help the individual make maximum use of established community resources through understanding the individual in their total situation?

- Social Group Work
- Community Organization
- **Social Case Work [CORRECT]**
- Family Planning

Explanation: Social Case Work aims to help the individual make maximum use of the established community, through understanding the individual in his total situation.

Q1127. What does 'Social Group Work' seek to accomplish?

- Combine agency efforts for community welfare
- **Help individuals utilize fullest capacity for self and group welfare in a group setting [CORRECT]**

- Provide primary education at the village level
- Manage macro-level population stabilization

Explanation: Social Group Work seeks to help individuals utilize their fullest capacity for their own welfare and for the welfare of the group as a whole through a group setting.

Q1128. According to the text, what is the estimated population of India and the annual surplus of births over deaths mentioned under Family Planning?

- Over 500 million population with 5 million surplus
- **Over 1000 million population with 15 million surplus [CORRECT]**
- Over 2000 million population with 25 million surplus
- Over 800 million population with 10 million surplus

Explanation: The text notes that the population of the country is over 1000 million and the annual surplus of births over deaths is at 15 million.

Q1129. How is 'Family Planning' defined on a micro level in the text?

- Policy intervention to stabilize population size
- **Voluntary, responsible decision where children are born because they are wanted and provided for [CORRECT]**
- A mandatory government quota on family size
- Lowering the birth rate without social measures

Explanation: On the micro level, family planning means children are born because they are wanted and provided for, based on a voluntary and responsible decision.

Q1130. Which specific officers' children are explicitly included in the 'creamy layer' category of OBC?

- **Group A / Class 1 officers of All India Central and State Services [CORRECT]**
- Corporation clerks and assistants
- Primary school teachers
- Junior civil defense volunteers

Explanation: The creamy layer covers children of Group A/Class 1 officers of the All India Central and State Services.

Q1131. What is identified as the objective of social service?

- To create dependence upon the wage system
- **To help people to help themselves by utilizing their capability for personal and community welfare [CORRECT]**
- To abolish all agrarian economies
- To enforce industrial work cultures

Explanation: The objective is to help the individual to utilise his capability for his own welfare and for that community, characterizing a formalized way of helping people to help themselves.

Q1132. Which method attempts to help groups of individuals or agencies work together for the social welfare of the whole community?

- Social Case Work
- Social Group Work
- **Community Organization [CORRECT]**
- Vocational Training

Explanation: Community Organization attempts to help groups of individuals or groups of agencies to work together so that their combined efforts will be useful for the social welfare of the whole community.

Q1133. Under the likely solutions for weaker sections, what specific vocational skills are suggested to be imparted at the village level?

- Software development and coding
- **Basket weaving, painting printing, tailoring, embroidery, pottery, music, dance [CORRECT]**
- Automobile engineering and robotics
- Heavy machinery operation

Explanation: The text lists basket weaving, painting printing, tailoring, embroidery, pottery, music, dance, etc., as vocational skills coupled with basic education.

Q1134. Which of the following is listed under the factors affecting family planning concerning the father?

- **Risk of hypertension and gastric ulcers [CORRECT]**
- Increased occupational hazards in factories
- Loss of agricultural land
- Maternal risk of illness

Explanation: The text lists 'Father's risk of hypertension and gastric ulcers' as one of the health consequences/factors affecting family planning.

Q1135. Which of the following is explicitly listed in the textbook as a method of family planning?

- **Vasectomy [CORRECT]**
- Hysterectomy
- Tubal ligation reversal
- Vasovasostomy

Explanation: The text lists family planning methods including Vasectomy, Tubectomy, Conventional contraceptives, and Oral pills.

Q1136. According to the measures to attain family planning objectives, what consequence is suggested for couples violating family norms?

- Imprisonment for up to five years
- Mandatory community service
- **Debarred from contesting elections and voting rights withdrawn [CORRECT]**
- Heavy monetary fines imposed by local panchayats

Explanation: The text states that stringent laws should be enacted where couples violating family norms should be debarred from contesting elections and their voting rights withdrawn.

Q1137. Approximately how many people globally are estimated to be living with HIV according to the text?

- **38.6 million [CORRECT]**
- 8.2 million
- 5.2 million
- 4.1 million

Explanation: The text states that globally, an estimated 38.6 million people are living with HIV.

Q1138. How many states in India are noted as having a higher prevalence of HIV, and which of the following is NOT one of them?

- Tamil Nadu
- Karnataka
- **Kerala [CORRECT]**
- Maharashtra

Explanation: The text specifies six states where HIV is more common: Tamil Nadu, Karnataka, Andhra Pradesh, Maharashtra, Manipur, and Nagaland. Kerala is not listed.

Q1139. What does the letter 'C' stand for in the acronym AIDS?

- Cells
- Circulation
- **Condition [CORRECT]**
- Chemical

Explanation: AIDS stands for Acquired Immune Deficiency Syndrome. The breakdown notes 'Syndrome' as a number of signs and symptoms, but AIDS itself is an acquired condition.

Q1140. Which specialized variety of white blood cells does HIV destroy, which are crucial for secreting chemicals to destroy disease-causing germs?

- B lymphocytes
- **T lymphocytes [CORRECT]**
- Erythrocytes
- Platelets

Explanation: The text explains that T lymphocytes (also called T-cells) secrete chemicals necessary for destroying germs, and HIV destroys them.

Q1141. What specific surface protein on T-cells does HIV first attach to before fusing with the cell?

- **CD4 [CORRECT]**
- CD8
- HIV-P1
- gp120

Explanation: The text states that T-cells contain a protein called CD4 on their surface, and HIV first attaches itself to CD4 and then fuses with the T-cells.

Q1142. According to the text, what is the most important cause of HIV infection in the North-East of India?

- Unprotected heterosexual contact
- Blood transfusion from unverified camps
- **Intravenous drug abuse [CORRECT]**
- Mother-to-child transmission

Explanation: The text explicitly states that in India, intravenous drug abuse is the most important cause of HIV infection in the North East.

Q1143. What is the term used for the duration between the entry of HIV into the body and the detection of its antibodies through blood tests?

- Incubation period
- Latency phase
- **Window period [CORRECT]**
- Symptomatic threshold

Explanation: The text defines the window period as the duration between the entry of HIV in the body and the detection of its antibodies through blood tests, which is normally up to three months.

Q1144. Why are women at a greater risk of contracting HIV through unprotected sex compared to men according to the text?

- Vaginal tissue absorbs blood faster

- Semen remains in the woman's vagina for a longer time, increasing contact duration [CORRECT]
- Women have a lower T-cell count naturally
- Vaginal pH levels activate the virus instantly

Explanation: One of the five main reasons provided is that semen from the infected male partner remains in the woman's vagina for a longer time, increasing the duration of contact.

Q1145. Which of the following body fluids contains HIV in the highest numbers?

- Saliva, sweat, and tears
- Blood, semen, and vaginal fluids [CORRECT]
- Urine and gastric juices
- Cerebrospinal fluid only

Explanation: The text states that HIV is present in all body fluids of an infected person and is present in higher numbers in blood, semen, and vaginal fluids.

Q1146. Why does anal sex carry a higher risk of HIV transmission compared to vaginal sex?

- The anal region lacks white blood cells
- The delicate inner lining of the anus gets easily damaged during anal sex, helping HIV enter [CORRECT]
- Semen is absorbed directly into the lower intestine lining without resistance
- Rectal temperatures accelerate viral replication

Explanation: The text notes that anal sex has a higher risk because the delicate inner lining of the anus gets easily damaged, helping the virus enter the body easily.

Q1147. According to NACO guidelines, what is mandatory before performing any blood transfusion?

- Typing blood against bacterial strains
- Testing blood for HIV [CORRECT]
- Filtering blood through ultraviolet light
- Centrifuging plasma components

Explanation: The text states that as per the guidelines of NACO, it is mandatory to test blood for HIV before transfusion.

Q1148. In what ways can mother-to-child transmission of HIV occur?

- Only during pregnancy
- During pregnancy, delivery, or breastfeeding [CORRECT]
- Only through breast milk
- Through genetic mutation of chromosomes

Explanation: The text specifies that mother-to-child transmission can occur in three ways: during pregnancy (crossing the placenta), during delivery, or during breastfeeding.

Q1149. Why are rumors about people intentionally pricking others with infected needles in public places considered baseless in the text?

- Needles sterilize themselves in open air
- There is rarely adequate blood containing a live, sufficient viral load on a dried needle pricked into muscles [CORRECT]
- Public places are heavily monitored by NACO officials
- HIV cannot survive contact with human clothing

Explanation: The text explains the rumours are baseless because adequate amounts of live virus-containing blood are unlikely to be present on a mere surface needle prick, especially if the blood has dried or is injected into muscles.

Q1150. In India, why is breast-feeding recommended for women with HIV infection despite HIV being present in breast milk?

- Breast milk completely neutralizes the HIV virus
- **Bottle-feeding is expensive and carries a higher risk of diarrhoea, poor nutrition, and death [CORRECT]**
- Formula milk is completely unavailable in the country
- HIV cannot be passed through breast milk under any circumstances

Explanation: Text states that the alternative to breast-feeding in India is bottle-feeding, which is expensive and carries risks of diarrhoea, poor nutrition, and death, making the benefits of breast-feeding outweigh the risk.

Q1151. What is the primary reason why HIV is generally not transmitted through the oral route during kissing or sharing utensils?

- Saliva contains powerful anti-HIV antibodies
- HIV is never present in the mouth under any condition
- **Stomach acids are likely to inactivate or destroy the virus if ingested [CORRECT]**
- The lips act as an impenetrable biological barrier to viruses

Explanation: The text explains that HIV is not transmitted through saliva because stomach acids are likely to inactivate or destroy the virus if ingested.

Q1152. Why is a negative HIV test result repeated after three months at Voluntary Counselling and Testing Centres (VCTCs)?

- To check for viral mutation
- **To rule out the possibility of the first test being carried out in the window period [CORRECT]**
- To comply with international travel regulations
- To ensure the patient has not developed new symptoms

Explanation: According to paragraph 19, a negative test is repeated after three months to rule out the possibility of the first test being conducted during the window period.

Q1153. What organization has set up PPTCT (Prevention of Parent to Child Transmission) centres in high-infection districts?

- WHO
- ICMR
- **NACO [CORRECT]**
- UNICEF

Explanation: Paragraph 27 states that NACO has set up Prevention of Parent to Child Transmission (PPTCT) centres in districts of high-infection states.

Q1154. By utilizing PPTCT centres and following recommended guidelines, the risk of mother-to-child transmission of HIV is reduced from about 45% to:

- **Less than 2% [CORRECT]**
- Exactly 5%
- About 10%
- Zero percent

Explanation: Paragraph 27 specifies that this intervention reduces the risk of infection for the newborn from about 45% to less than 2%.

Q1155. What is the normal CD4 cell count per millilitre of blood in a healthy human person?

- 100 to 300 cells
- 200 to 500 cells

- 500 to 1500 cells [CORRECT]
- 1500 to 3000 cells

Explanation: Paragraph 29 states that a normal person has about 500 to 1500 CD4 cells per millilitre of blood.

Q1156. When a person with HIV presents with opportunistic infections due to poor immunity, their CD4 count typically decreases below:

- 500 cells
- 400 cells
- 300 cells
- 200 cells [CORRECT]

Explanation: Paragraph 29 indicates that when the CD4 count decreases below 200, people with HIV can present with opportunistic infections.

Q1157. Which of the following age groups is most productive and notably affected by HIV, impacting the economic status of the nation?

- 10-20 years
- 15-45 years [CORRECT]
- 30-60 years
- 50-70 years

Explanation: Paragraph 33 notes that HIV is more common in the most productive age group of 15-45 years.

Q1158. According to the text, which of the following is NOT listed as a mode through which HIV cannot be transmitted?

- Shaking hands or hugging
- Sharing of food, utensils, or clothes
- Vaginal secretions and semen entering wounds in the mouth [CORRECT]
- Insect bites or working in the same office

Explanation: Vaginal secretions and semen entering the mouth through oral sex or wounds can transmit HIV, as detailed in paragraphs 17 and 18, whereas the other options are explicitly listed in paragraph 39 as non-transmission modes.

Q1159. Approximately how many people die worldwide of cancer every year according to the introductory text on cancer?

- One million
- Three million
- Six million [CORRECT]
- Ten million

Explanation: Section-5, Paragraph 1 states that six million worldwide die of cancer every year.

Q1160. What percentage of cancer cases are stated to be preventable, and curable if detected and treated in time?

- Forty percent
- Fifty percent
- Sixty percent [CORRECT]
- Eighty percent

Explanation: Section-5, Paragraph 1 mentions that sixty percent cancer cases are preventable and curable if detected and treated in time.

Q1161. When cancer sets in, a group of cells suddenly starts multiplying to form a tumor or lump. As malignancy progresses, how does it reach distant parts of the body?

- Through nerve pathways and the spinal cord
- **Through blood vessels or lymphatic channels [CORRECT]**
- Through the respiratory tract
- Through the digestive tract exclusively

Explanation: Section-5, Paragraph 1 explains that through blood vessels or lymphatic channels the malignant tissue can reach distant parts of the body.

Q1162. Which of the following is listed among the types of cancer that men and women suffer from in the NCC text?

- Skin melanoma
- Leukemia
- **Cervical cancer [CORRECT]**
- Brain tumor

Explanation: Section-5, Paragraph 2 lists cervical cancer (along with oral, larynx, lung, breast, prostate, and colon cancer) among the types of cancer.

Q1163. What is often cited as the first clinical indication that a person has contracted HIV infection in India?

- Oral cancer
- **Tuberculosis [CORRECT]**
- Severe skin rashes
- Persistent high blood pressure

Explanation: Paragraph 31 notes that very often, tuberculosis is the first indication that a person has HIV infection due to high risk and prevalence in India.

Q1164. What primary advantage do NGOs and youth possess that makes them extremely useful for implementing behavioural interventions for HIV/AIDS?

- Unlimited financial grants from international bodies
- Strict hierarchical command structures
- **Close interpersonal interaction with communities, flexibility, and capacity to innovate [CORRECT]**
- Mandatory legal powers to enforce testing

Explanation: Paragraph 36 highlights that the close interpersonal interaction, flexibility, and capacity to accommodate changing programmes make NGOs and youth extremely useful.

Q1165. Which of the following is explicitly listed in the text as a main cause of cancer?

- Regular aerobic exercise
- **Prolonged chewing of tobacco, zarda, pan and pan masala [CORRECT]**
- Consumption of a balanced diet
- Good oral hygiene and adequate dental care

Explanation: The text identifies prolonged chewing of tobacco, zarda, pan, and pan masala as a primary cause of cancer.

Q1166. According to the text, what type of cancer kills more people than any other type of cancer?

- Bone cancer
- Breast cancer
- **Lung cancer [CORRECT]**
- Blood cancer

Explanation: The text explicitly states under warning signs that lung cancer kills more people than any other type of cancer.

Q1167. Within what timeframe should a sore or ulcer on the tongue, cheek, or gums heal to avoid being considered an early warning sign due to gutka and tobacco chewing?

- A week
- **A fortnight [CORRECT]**
- One month
- Three months

Explanation: The text lists any sore and ulcer on the tongue, cheek, or gums that does not heal within a fortnight as an early warning sign due to gutka and tobacco chewing.

Q1168. Which of the following is stated as a myth regarding the transmission or nature of cancer?

- Cancer is a physical phenomenon.
- **Cancer is contagious and infectious. [CORRECT]**
- Cancer cells travel through blood.
- Depression affects the disease adversely.

Explanation: The text clarifies under myths that cancer is NOT contagious and infectious, explicitly debunking that myth.

Q1169. According to the facts presented about cancer myths, where have indications of bone cancer been found, proving it is not merely a product of modern civilization?

- In ancient Roman ruins
- **In Egyptian mummies more than 3000 years old [CORRECT]**
- In medieval European manuscripts
- In ancient Greek pottery

Explanation: The text states that indications of bone cancer have been found even in Egyptian mummies, more than 3000 years old.

Q1170. What percentage of cancers can be completely cured if detected and treated early, according to the conclusion of the text?

- More than 50%
- More than 60%
- **More than 80% [CORRECT]**
- 100%

Explanation: The text explicitly states that more than 80% of cancer is completely curable if detected and treated early.

Q1171. What percentage of the total population of India do youth constitute, as mentioned in the section on the contribution of youth towards social welfare?

- About 24%
- **About 34% [CORRECT]**
- About 50%
- About 60%

Explanation: The text states that youth constitute about 34% of the total population of India.

Q1172. How has social welfare been defined by a United Nations expert group in the text?

- Charity given to the impoverished without government intervention

• **Organised activity that aims towards a mutual adjustment of individuals and their social environment [CORRECT]**

- Political mobilization of underprivileged social groups
- The elimination of all voluntary organizations

Explanation: The UN expert group definition provided in the text defines social welfare as an organised activity that aims towards a mutual adjustment of individuals and their social environment.

Q1173. Which of the following is NOT listed among the general effects of cancer?

- Pain
- Mental anguish
- **Enhanced physical stamina [CORRECT]**
- Expenses to family

Explanation: Enhanced physical stamina is not an effect of cancer; pain, mental anguish, loss of work, expenses to family, and loss of a loved one are listed.

Q1174. What is the factual reality regarding the myth that cancer spreads very fast after a surgical knife touches it?

- Surgery releases toxins that accelerate tumor growth.
- **The disease had already spread substantially due to delayed diagnosis or treatment by the time surgery was performed. [CORRECT]**
- Surgical instruments introduce carcinogens into the body.
- The myth is entirely scientifically accurate.

Explanation: The text explains that patients dying soon after surgery is due to a delay in diagnosis/treatment making the disease unmanageable, not because of the surgery itself.

Q1175. According to the facts on cancer myths, do all lumps in the breast become malignant?

- Yes, 100% of lumps are malignant.
- **Only a small percentage is malignant. [CORRECT]**
- None of the lumps are ever malignant.
- All lumps in men are malignant, but not in women.

Explanation: The text clarifies that only a small percentage of breast lumps are malignant, though all need attention.

Q1176. What is the fact regarding pain-killing medicines and addiction as stated in the cancer myths section?

- People get high on pain killers, leading to inevitable addiction.
- **People do not get high on pain killers and hence these do not cause addiction. [CORRECT]**
- Pain killers must always be avoided under all circumstances.
- Pain killers stop working permanently after three doses.

Explanation: The text states that people do not get high on pain killers and hence these do not cause addiction.

Q1177. What percentage of cancers can be prevented through lifestyle changes, diet, exercise, weight control, alcohol in moderation, and non-consumption of tobacco?

- Forty percent
- Fifty percent
- **Sixty percent [CORRECT]**
- Eighty percent

Explanation: The conclusion explicitly states that 60% of cancers can be prevented through lifestyle changes, diet, exercise, weight control, alcohol in moderation, and non-consumption of tobacco.

Q1178. Which of the following is listed under preventive measures for cancer?

- **Avoiding obesity [CORRECT]**
- Consuming diets high in preserved and processed meat
- Smoking in controlled environments
- Regular intake of salted and smoked food

Explanation: Avoiding obesity is listed as a preventive measure, whereas diets high in processed meat, smoked, and salted food should be avoided.

Q1179. Why has community service been developed as an integral part of the curriculum for educational institutions, according to the text?

- To replace formal classroom instruction completely
- **So that youth can fruitfully understand and contribute in community service [CORRECT]**
- To generate revenue for voluntary organizations
- To fulfill international military service quotas

Explanation: The text states community service is an integral part of the curriculum so that youth can fruitfully understand and contribute in community service.

Q1180. Which of the following youth activities specifically helps in achieving national integration by fostering interaction between youth from different parts of the country?

- Education and Literacy
- **National and Cultural Integration [CORRECT]**
- Old Age Care
- Watershed and Waste Land Development

Explanation: Fostering and developing interaction between youth from different parts of the country specially isolated border and tribal areas helps in achieving national integration.

Q1181. Who started the 'Shri Niketan Yojna' mentioned as an example of an important NGO?

- Mahatma Gandhi
- Vinoba Bhave
- **Ravindranath Tagore [CORRECT]**
- Child Relief and You

Explanation: The text explicitly states that Shri Niketan Yojna was started by Ravinder Nath Tagore.

Q1182. What does the acronym BINGO stand for in the context of NGO classifications?

- Basic International NGO
- **Business oriented International NGO [CORRECT]**
- Bureaucratic International Non-Government Organisation
- Border Integration and National Group Organization

Explanation: According to the text classifying NGOs, BINGO stands for Business oriented International NGO.

Q1183. Which organization is recognized in the text as the world's largest group of humanitarian NGOs?

- Helpage India
- Society for Prevention of Cruelty to Animals
- **International Red Cross and Red Crescent Movement [CORRECT]**
- Child Relief and You

Explanation: The text states that the International Red Cross and Red Crescent Movement are the world's largest group of humanitarian NGOs.

Q1184. How is a 'drug' defined based on its effect on the central nervous system?

- A substance that only accelerates heart rate and blood pressure
- **A substance—solid, liquid or gas that brings about physical and / or psychological changes [CORRECT]**
- A purely synthetic chemical used exclusively in medical laboratories
- An organic compound that exclusively acts as a mild stimulant

Explanation: A drug is defined as a substance—solid, liquid or gas that brings about physical and / or psychological changes by acting on the central nervous system.

Q1185. Which of the following is classified under Depressants in the context of drug types?

- Nicotine
- Caffeine
- **Heroin [CORRECT]**
- Ketamine

Explanation: Under depressants, the text lists Opiates and Opioids, including Heroin.

Q1186. What is the age restriction mandated by law for the sale of tobacco as mentioned in the text?

- Below 16 years
- **Below 18 years [CORRECT]**
- Below 21 years
- Below 25 years

Explanation: The text notes that laws and regulations control legal drugs, such as tobacco which may not be sold to persons below the age of 18 years.

Q1187. What is the term used to describe the transit route base for illicit heroin, hashish, and morphine from Afghanistan, Pakistan, and Iran involving India?

- Golden Triangle
- **Golden Crescent [CORRECT]**
- Silk Route
- Sub-Continental Corridor

Explanation: The text specifies that India's geographical location as a transit route for heroin, hashish, and morphine from Afghanistan, Pakistan, and Iran is known as the Golden Crescent.

Q1188. According to the user statistics provided in the text, what percentage of drug addicts belong to the 20-24 years age group?

- 50 percent
- **72 percent [CORRECT]**
- 78 percent
- 84 percent

Explanation: The text states that seventy-two percent of addicts are in the age group of 20-24 years.

Q1189. What percentage of drug addicts are reported to be females according to the survey statistics?

- **2 percent [CORRECT]**
- 5 percent
- 12 percent
- 19.85 percent

Explanation: The text clearly mentions that females comprise only 2% of the addicts.

Q1190. Which of the following is cited as the most common environment where drug addiction is found to originate?

- Workplace environment
- **Peer group [CORRECT]**
- Educational institutions
- Economically backward societies

Explanation: The text states that drug addiction is found to be most common in the peer group.

Q1191. Which of the following plants/substances is explicitly listed under Hallucinogens?

- Cannabis
- Barbiturates
- **Dhatu [CORRECT]**
- Ephedrine

Explanation: Under Hallucinogens, the text lists Dhatu and Ketamine.

Q1192. What is the primary characteristic of Non-Government Organisations (NGOs) regarding their financial goals?

- They operate primarily for commercial profits.
- **Their goals are primarily non-commercial. [CORRECT]**
- They are exclusively funded by international institutions.
- They rely solely on government funding structures.

Explanation: NGOs are non-profit groups whose goals are primarily non-commercial and act outside of institutionalised political structures.

Q1193. Which campaign is specifically mentioned under health care and family welfare for youth to promote?

- **Youth against AIDS [CORRECT]**
- Clean India Mission
- Green Earth Drive
- Total Literacy Campaign

Explanation: The text lists programmes such as 'Youth against AIDS' campaign, 'Pulse Polio', 'Small Family' norm, and immunization programmes.

Q1194. What is the primary source of cannabis consumed in India according to the geographical drug trade details?

- Afghanistan
- Iran
- **Nepal [CORRECT]**
- Pakistan

Explanation: The text explicitly states that cannabis smuggled from Nepal is mainly consumed in India.

Q1195. What is the primary age group among youths that exhibits a high incidence of drug addiction as per the text?

- 15-19 years
- **20-24 years [CORRECT]**
- 25-30 years
- 18-22 years

Explanation: The text states that high incidents of drug abuse amongst youths are prevalent in the 20-24 years age bracket, often due to emotional immaturity.

Q1196. Which Act and Rules regulate the control over the cultivation of opium and narcotic drugs in India?

- The Drugs and Cosmetics Act
- **The Narcotic Drugs and Psychotropic Substances (NDPS) Act and Rules [CORRECT]**
- The Prevention of Illicit Trafficking Act
- The Dangerous Drugs Regulation Act

Explanation: Control over cultivation of opium and matters relating to narcotic drugs are regulated by the 'Narcotic Drugs and Psychotropic Substances (NDPS) Act and Rules'.

Q1197. What is the maximum rigorous imprisonment punishment specified under the NDPS Act for indulging in drug trafficking?

- 10 years
- 14 years
- **20 years [CORRECT]**
- Life imprisonment

Explanation: The NDPS Act provides for punishment of up to 20 yrs rigorous imprisonment and a fine up to Rupees Two Lakhs for drug trafficking.

Q1198. Under the 'Prevention of Illicit Trafficking in Narcotic Drugs and Psychotropic Substances' (PITNDPS) Act, for how long can a person be detained by an executive order?

- 6 months to 1 year
- **1 to 2 years [CORRECT]**
- 3 to 5 years
- Up to 10 years

Explanation: PITNDPS provides for detention of persons indulging in trafficking for 1 to 2 years by an executive order.

Q1199. Chapter VIII of the NCC textbook covers which primary subject?

- First Aid and Nursing
- **Health and Hygiene [CORRECT]**
- Disaster Management
- Map Reading

Explanation: Chapter-VIII of the provided text is titled 'HEALTH AND HYGIENE'.

Q1200. Which section in Chapter VIII deals with 'Structure and Function of the Human Body'?

- **Section-1 [CORRECT]**
- Section-2
- Section-3
- Section-4

Explanation: According to the index of Chapter-VIII, Section-1 covers 'Structure and Function of the Human Body'.

Q1201. Which of the following sections is applicable ONLY to SD/SW cadets and NOT to JD/JW cadets according to the index?

- Structure and Function of the Human Body
- Hygiene and Sanitation
- Physical and Mental Health
- First Aid in Common Medical Emergencies

Explanation: The index shows that Section-7 (Physical and Mental Health), Section-8 (Fractures, Types and Treatment), and Section-9 (Evacuation of Casualties) are marked with '-' for JD/JW and '✓' for SD/SW.

Q1202. What is the total number of bones present in the human body as mentioned in the text?

- 198
- **206 [CORRECT]**
- 210
- 214

Explanation: The text explicitly mentions that 'There are 206 bones in the body.'

Q1203. Where are long bones primarily found in the human body?

- Cranium, shoulder and hips
- Wrist and ankles
- **Upper limb [CORRECT]**
- Vertebral column

Explanation: The text states that 'Long bones are found in the upper limb. Femur, Tibia, Fibula are in Lower limb and Sternum and Ribs on the chest.'

Q1204. Where are short bones found in the human skeletal system?

- Cranium and hips
- **Wrist and ankles [CORRECT]**
- Chest and ribs
- Vertebral column

Explanation: The text notes that 'Short bones are found in wrist and ankles'.

Q1205. Flat bones are typically found in which of the following regions?

- Vertebral column
- Wrist and ankles
- **Cranium, shoulder and hips [CORRECT]**
- Upper and lower limbs

Explanation: The text specifies that 'flat bones, are found in cranium, shoulder and hips.'

Q1206. Where are irregular bones located in the human body?

- **Vertebral column [CORRECT]**
- Cranium
- Ankles
- Chest

Explanation: The text states that 'Irregular bones are found in the vertebral column.'

Q1207. What is the function of joints in the skeletal system?

- To produce blood cells
- **Places where two or more bones meet which permit the movement of the body [CORRECT]**
- To pump blood across tissues
- To protect the spinal cord exclusively

Explanation: The text defines joints as 'places where two or more bones meet which permit the movement of the body.'

Q1208. What are the two types of muscles responsible for body movement as classified in the text?

- Skeletal and cardiac
- **Voluntary and involuntary [CORRECT]**
- Smooth and striated
- Flexor and extensor

Explanation: The text mentions that muscles 'are of two types, voluntary and involuntary.'

Q1209. Which of the following is NOT listed as part of the human body structure in Section 1?

- Skeleton
- **Lymphatic glands [CORRECT]**
- Muscles
- Digestive Organs

Explanation: The text lists Skeleton, Muscles, Blood Circulatory Organs, Respiratory Organs, Digestive Organs, Excretory Organs, and Nervous System Organs; lymphatic glands are not in this specific list.

Q1210. What are the three layers that comprise the human heart?

- Epicardium, Myocardium, Endocardium
- **Pericardium, Myocardium, Endocardium [CORRECT]**
- Pericardium, Epicardium, Endocardium
- Pericardium, Myocardium, Ectocardium

Explanation: The text explicitly states that Pericardium, Myo Cardium, and Endo Cardium are the three layers of the heart.

Q1211. Which blood vessels connect the small arteries and veins, facilitating the exchange of oxygen and nutrition?

- Aorta
- Vena Cava
- **Capillaries [CORRECT]**
- Arterioles

Explanation: Capillaries are tiny blood vessels which connect small arteries and veins where the exchange of oxygen, nutrition, and carbon dioxide takes place.

Q1212. What is the average requirement of sleep per day for an individual as per the personal hygiene guidelines?

- 5 to 6 hours
- 6 to 7 hours
- **7 to 8 hours [CORRECT]**
- 8 to 9 hours

Explanation: The text states that the average requirement of sleep is from 7 to 8 hours a day.

Q1213. Which vitamins deficiency is mentioned as a cause of dental decay?

- Vitamins A & B
- **Vitamins C & D [CORRECT]**
- Vitamins B & E
- Vitamins A & C

Explanation: The text notes that insufficient vitamins C & D are the cause of dental decay.

Q1214. What is the recommended minimum safe distance for avoiding soakage pits, latrines, or leaking drains from a well?

- 50 feet
- 75 feet
- **100 feet [CORRECT]**
- 150 feet

Explanation: Underground streams protection guidelines state to avoid soakage pits, latrines, urinals, sewerage, or leaking drains within 100 ft of a well.

Q1215. Which chemical is specifically recommended for 'pinking' of wells during a cholera epidemic?

- Bleaching Powder
- Chlorine Gas
- **Potassium Permanganate [CORRECT]**
- Alum

Explanation: The text mentions that during a cholera epidemic, potassium permanganate should be used for pinking of wells.

Q1216. What are the dimensions of a Deep Trench Latrine pit?

- **3 feet wide, at least 8 feet deep, and suitable length [CORRECT]**
- 2 feet wide, at least 6 feet deep, and suitable length
- 4 feet wide, at least 10 feet deep, and suitable length
- 3 feet wide, at least 5 feet deep, and suitable length

Explanation: A deep trench latrine is described as a pit three feet wide, at least eight feet deep, and of a length suitable to the requirement.

Q1217. For temporary camps of less than a week's duration, what is the dimension of each shallow trench?

- 4 feet long, 2 feet wide, 3 feet deep
- **3 feet long, 1 foot wide, 2 feet deep [CORRECT]**
- 5 feet long, 2 feet wide, 2 feet deep
- 3 feet long, 2 feet wide, 1 foot deep

Explanation: Shallow trench latrines for temporary camps require a row of trenches where each trench is 3 feet long, 1 foot wide, and 2 feet deep.

Q1218. What is the ratio of shallow trenches required for the first hundred users in a temporary camp?

- 3 trenches
- 4 trenches
- **5 trenches [CORRECT]**
- 6 trenches

Explanation: The text specifies the ratio is 5 trenches for the first hundred users and three for each subsequent hundred.

Q1219. After how many hours should shallow trenches in a temporary camp be filled in and new ones dug?

- 12 hours
- **24 hours [CORRECT]**
- 36 hours
- 48 hours

Explanation: The text states to fill the trenches after 24 hours and get new trenches dug in.

Q1220. What are the dimensions of a soakage pit used for the disposal of liquid refuse?

- 3 ft by 3 ft and 4 to 5 ft deep
- **4 ft by 4 ft and 5 to 6 ft deep [CORRECT]**
- 5 ft by 5 ft and 6 to 7 ft deep
- 4 ft by 4 ft and 3 to 4 ft deep

Explanation: The instructions for soakage pits state to dig a pit 4 feet by 4 feet and 5 feet to 6 feet deep.

Q1221. Which organ removes waste material in the form of sweat through perspiration?

- Kidneys
- Lungs
- **Skin [CORRECT]**
- Liver

Explanation: Under Excretory Organs, the skin removes waste matter in the form of sweat through perspiration.

Q1222. Which method of water purification involves adding a chemical like alum to carry impurities to the bottom?

- Clarification
- Sterilization
- **Precipitation [CORRECT]**
- Distillation

Explanation: Precipitation is defined as adding alum or some similar chemical to water which carries all impurities to the bottom.

Q1223. What is the main function of the nervous system's nerves described in the text?

- Pumping blood through the body
- **Controlling all the organs and their function [CORRECT]**
- Filtering waste materials from urine
- Absorbing oxygen from inhaled air

Explanation: The text states that nerves control all the organs and their function, acting as silvery wire-like fibres connected with the brain.

Q1224. According to the definition provided in the text, what is hygiene?

- A social custom based on religious practices
- **The science which seeks to preserve and improve the health of the individual and community [CORRECT]**
- A set of rules exclusively for military camp sanitation
- The study of communicable diseases and their cure

Explanation: The text opens Section-2 by defining hygiene as the science which seeks to preserve and improve the health of the individual and of the community as a whole.

Q1225. How should solid refuse like kitchen garbage and bones be disposed of according to the text?

- By throwing them in open municipal bins
- **By burial or burning [CORRECT]**
- By using improvised kerosene tins
- By dumping them in stagnant water

Explanation: The text states that disposal of solid refuse like kitchen garbage, bones etc., be done by burial or burning.

Q1226. Which of the following diseases belongs to the Excremental Diseases group?

- Common cold
- Tuberculosis
- **Jaundice [CORRECT]**
- Meningitis

Explanation: According to the classification, Typhus fever, dysentery, diarrhoea, jaundice and intestinal worms belong to excremental diseases.

Q1227. Through which insect are Malaria, Dengue, and Filariasis carried?

- Sand fly
- **Mosquito [CORRECT]**
- Lice
- Fleas

Explanation: The text specifies that Malaria, Dengue, and Filariasis are carried by mosquitoes.

Q1228. Which insects are responsible for transmitting Kala Zar and Oriental sore?

- **Sand fly [CORRECT]**
- Ticks
- Flies
- Lice

Explanation: Sand fly fever, Kala Zar, and Oriental sore are listed as being carried by the sand fly.

Q1229. What is the primary characteristic of Droplet Infection transmission?

- Contaminated excreta touching food or water
- **Germs sprayed out via saliva droplets during coughing, sneezing, or talking [CORRECT]**
- Actual body contact between the sick and healthy
- Blood-sucking insect carriers

Explanation: Droplet infection involves germs sprayed out from the nose, throat, or lungs in small droplets of saliva during coughing, sneezing, or talking.

Q1230. Which of the following is listed as a Contact Disease?

- Influenza
- Cholera
- **Syphilis [CORRECT]**
- Malaria

Explanation: Veneral diseases i.e. syphilis, gonorrhoea and skin infection are common examples of contact diseases.

Q1231. What is a burn caused by moist heat such as hot water or steam called?

- Chemical burn
- Dry burn
- **Scald [CORRECT]**
- Internal burn

Explanation: The text explicitly defines burns caused by moist heat such as hot water, hot fluids, and steam as a scald.

Q1232. How should chemical burns caused by strong acids or alkalies be treated initially?

- Apply a light constricting tourniquet
- **Let water from a pipe or hose flow freely on the burn [CORRECT]**
- Apply cold application and wrap tightly with cotton
- Incise into the skin across the burn mark

Explanation: If the burn is chemical, let water from a pipe or hose flow freely on the burn so that the chemical flows off.

Q1233. Where should a light constricting tourniquet be applied for a snake bite on the leg?

- Above the ankle
- Below the knee
- **Above the knee [CORRECT]**
- Above the elbow

Explanation: The first aid instructions state to apply a light constricting tourniquet above the knee for a bite on the leg.

Q1234. What is the recommended first aid procedure regarding the fang mark in a snake bite?

- Apply an antiseptic lotion without cutting
- **Incise into the skin 2" x ½" across the fang mark with a blade [CORRECT]**
- Suck the blood using a pin or forceps
- Burn the mark with a hot iron

Explanation: The text outlines incising into the skin 2" x ½" across the fang mark with a blade as part of snake bite first aid.

Q1235. For how long should a dog and a patient be kept under observation following a rapid dog bite?

- At least 5 days
- At least 7 days
- **At least 10 days [CORRECT]**
- At least 14 days

Explanation: The text states that the dog and the patient should be kept under observation for at least 10 days.

Q1236. What tool should NOT be used to remove a foreign body from a child's ear?

- **A pin or forceps [CORRECT]**
- Water irrigation
- Clean cotton swab
- A moistened handkerchief

Explanation: The text warns not to try to remove the foreign body with the help of a pin or forceps as this may push it further in.

Q1237. What symptoms are indicative of internal organ injuries?

- Hot flushed skin and a slow strong pulse
- **Cold clammy skin and a weak thready rapid pulse [CORRECT]**
- Red watery eyes and a high fever
- Hyperactive and extremely talkative behavior

Explanation: Symptoms of internal injuries include cold clammy skin, weak thready rapid pulse, and shallow sighing breathing.

Q1238. Which of the following is NOT listed as a preventive measure to ward off diseases?

- Segregate the patient
- Destroy agents (germs) causing infection
- **Administering antibiotics randomly without prescription [CORRECT]**
- Inoculation and Vaccination

Explanation: The listed preventive measures are: segregate the patient, destroy agents causing infection, dis-infection, control of food and drink, and inoculation and vaccination.

Q1239. What is the appropriate first aid posture for a patient suspected of having internal organ injuries?

- Sitting upright with head tilted back
- **Lying down with feet raised up and head kept low [CORRECT]**
- Standing up to encourage blood circulation
- Lying flat on the stomach with arms extended

Explanation: First aid treatment for internal injuries requires keeping the patient warm and lying down with feet raised up and head kept low.

Q1240. What are the characteristics of a gun shot wound entry and exit?

- Entry is very large, exit is very small
- Both entry and exit are very large and lacerated
- **Entry is usually very small and exit may be very large and lacerated [CORRECT]**
- Both entry and exit are small and clean-cut

Explanation: According to the text, a gun shot wound entry is usually very small and the exit may be very large and lacerated.

Q1241. Which of the following describes a contusion?

- A deep narrow wound caused by a pointed instrument like a knife
- **An injury or bruise where tissues are torn/ruptured but skin may not be broken, caused by a blunt instrument [CORRECT]**
- A wound caused by splinters of a shell or grenade
- A wound caused exclusively by a bullet lodging in the body

Explanation: A contusion is defined in the text as an injury or bruise in which some tissues or parts are irregularly torn or ruptured without the skin necessarily being broken, caused by a blow or blunt instrument.

Q1242. During the bandaging procedure, how should the bandage be started?

- Clockwise from inner aspect to outer aspect
- Anti-clockwise from outer aspect to inner aspect
- **Clockwise from outer aspect to inner aspect by covering 1/3 of previous lining [CORRECT]**
- Diagonally across the wound covering 1/2 of previous lining

Explanation: The procedure specifies to select a suitable bandage and start bandaging clockwise from the outer aspect to the inner aspect by covering 1/3 of the previous lining.

Q1243. Where should the knot be placed when applying a bandage to a wound?

- Directly over the wound for pressure
- **Away from the wound [CORRECT]**
- Underneath the injured limb
- At the starting point of the bandage

Explanation: The procedure explicitly states to 'Put the knot away from the wound.'

Q1244. Who is recognized as the founder and father of yoga?

- Sage Patanjali [CORRECT]
- Sage Vishwamitra
- Swami Vivekananda
- Maharishi Mahesh

Explanation: The text states that Sage Patanjali was the founder and father of yoga, and his yoga is Ashtanga (eight-fold path).

Q1245. How many folds or limbs comprise the Ashtanga yoga of Patanjali as mentioned in the text?

- Five
- Six
- Seven
- Eight [CORRECT]

Explanation: Patanjali's yoga is Ashtanga, meaning an eight-fold path (Yama, Niyama, Asana, Pranayama, Pratyahara, Dharma, Dhyana, Samadhi).

Q1246. Which asana is specifically noted for helping to awaken the power of kundalini?

- Padmasana
- Baddha Padmasana
- Siddhasana [CORRECT]
- Trikonasana

Explanation: The text notes under Siddhasana that 'The main function of this asana is to awaken the power of kundalini.'

Q1247. In Trikonasana, what is the prescribed distance maintained between the feet while standing erect?

- 30 - 45 cm
- 45 - 60 cm
- 60 - 75 cm [CORRECT]
- 75 - 90 cm

Explanation: Trikonasana instructions state: 'Stand erect keeping the distance between the feet 60 - 75 cm.'

Q1248. How many positions comprise the combined sequence of Suryanamaskara?

- 8 positions
- 10 positions
- 12 positions [CORRECT]
- 16 positions

Explanation: The text states that Suryanamaskara is a combined sequence of 12 positions.

Q1249. In Stage 5 of Suryanamaskara, the body is pulled up to resemble which letter or shape?

- An inverted 'V' [CORRECT]
- A straight line
- An arched bow
- A triangle

Explanation: Stage 5 states: '...pull your body up in such a way that it looks like inverted 'V'.'

Q1250. Which of the following is NOT listed as an aim of dressing a wound?

- To protect the wound from infection
- To completely eliminate the need for hospital care [CORRECT]

- To reduce swelling and promote early healing
- To stop the bleeding

Explanation: First aid steps still include sending the patient to the nearest hospital; eliminating hospital care is not an aim of wound dressing.

Q1251. What is the correct hand placement and finger arrangement for Gyan Mudra?

- Index finger bent to root of thumb; remaining three fingers joined and spread forward [CORRECT]
- All fingers spread straight pointing upwards
- Thumb bent into the palm with all fingers folded over it
- Index and middle fingers crossed, remaining fingers touching palms

Explanation: Gyan Mudra instructions state: 'Bend your index finger and place them at the root of your thumbs. Spread the remaining three fingers forward, all joined together.'

Q1252. Which asana helps in curing diseases like asthma, hysteria, and insomnia, and is useful for Jaap, Dhyana, and Samadhi?

- Siddhasana
- Padmasana [CORRECT]
- Ardha Chandrasana
- Trikonasana

Explanation: The text mentions Padmasana is useful for Jaap, Dhyana, and Samadhi, and helps cure diseases like asthma, hysteria, and insomnia.

Q1253. In Stage 6 of Suryanamaskara, which body parts touch the ground while the hips are slightly raised?

- Hands, knees, and toes
- Forehead, chest, and knees [CORRECT]
- Chin, chest, and palms
- Nose, stomach, and toes

Explanation: Stage 6 states: 'Bend down your body in such a way that your forehead, chest and knees should touch the ground except your hips...'

Q1254. What is the primary definition of health according to the Yoga introduction in the text?

- Merely the absence of disease or infirmity
- A complete state of physical, mental and social well being [CORRECT]
- The ability to perform heavy manual labor without fatigue
- Strictly the absence of psychological stress and tension

Explanation: The text states: 'Health is not merely considered by absence of disease or infirmity in a person but who has complete state of physical, mental and social well being.'

Q1255. What is the recommended timing for Shavasana?

- 1-3 minutes
- 5-10 minutes [CORRECT]
- 20-30 seconds
- 30-50 seconds

Explanation: The text explicitly states the timing for Shavasana is 5-10 minutes.

Q1256. In Shavasana, how far apart should the feet be positioned?

- 10-15 cm
- 20-25 cm

- 30-45 cm [CORRECT]
- 50-60 cm

Explanation: According to the text, your feet should be 30-45 cm apart during Shavasana.

Q1257. Which asana can be performed immediately after eating food to help digestion and eliminate gas troubles?

- Shavasana
- Gomukhasana
- Vajrasana [CORRECT]
- Dhanurasana

Explanation: The text notes that Vajrasana can be done immediately after eating food, helping digestion and eliminating gas troubles.

Q1258. Which asana makes the body appear like a bow by raising the thighs and chest while grasping the ankles?

- Bhujangasana
- Dhanurasana [CORRECT]
- Chakrasana
- Halasana

Explanation: In Dhanurasana, legs are folded and grasped near ankles, and thighs and chest are raised, making the body appear like a bow.

Q1259. What is the recommended timing and repetition for Gomukhasana?

- 20-30 seconds, 4-6 times [CORRECT]
- 1-3 minutes, 1-2 times
- 10-30 seconds, 4-5 times
- 30-50 seconds, 2-3 times

Explanation: The text specifies the timings for Gomukhasana as 20-30 seconds, 4-6 times.

Q1260. When was the World Health Organization (WHO) formed, as mentioned in the text?

- 1945
- 1948 [CORRECT]
- 1950
- 1952

Explanation: The text states that the WHO was formed in 1948.

Q1261. According to WHO's definition (post-1948), health is a complete state of physical, mental and social well-being and not merely what?

- The absence of stress
- The absence of disease or infirmity [CORRECT]
- A lack of fatigue
- The presence of happiness

Explanation: The WHO definition given in the text defines health as a complete state of physical, mental, and social well-being and not merely the absence of disease or infirmity.

Q1262. Who was the renowned physician of ancient India cited in the text regarding the importance of health?

- Sushruta
- Dhanwantari

- Charak [CORRECT]
- Patanjali

Explanation: The text mentions Charak as a renowned physician of ancient India who stated that health is vital for artistic, ethical, material, and spiritual development.

Q1263. Which of the following is listed as an element of good health in the text?

- High competitive drive
- Ability to endure stress and strain [CORRECT]
- Desire for solitude
- Perfection in all skills

Explanation: The text lists 'Ability to endure stress and strain' among the main elements of good health.

Q1264. Which of the following is NOT an objective of health education formulated by WHO, according to the text?

- To ensure health is regarded as an asset in the community
- To promote the development and proper use of health services
- To eradicate all hereditary diseases globally [CORRECT]
- To ensure health is regarded as an asset (Covered by options A & B)

Explanation: The text specifies only two main objectives of health education formulated by WHO; eradicating all hereditary diseases globally is not among them.

Q1265. Which of the following is included in the scope of health education?

- Space exploration
- Emergency and first aid [CORRECT]
- Advanced military tactics
- Financial management

Explanation: Emergency and first aid is listed under the scope of health education in the text.

Q1266. Which of the following is explicitly mentioned as a characteristic of a healthy mind?

- Suspicion of strangers
- Normal appetite [CORRECT]
- Constant skepticism
- Detachment from society

Explanation: Normal appetite is listed as one of the characteristics of a healthy mind in the text.

Q1267. Which of the following causes mental disorder according to the text?

- High emotional intelligence
- Undue anxiety [CORRECT]
- Regular physical exercise
- Strong social support

Explanation: Undue anxiety is listed directly under the causes of mental disorder in the textbook text.

Q1268. In Bhujangasana, where should the hands be placed?

- Above the head
- Below the shoulders with fingers pointing forward [CORRECT]
- By the sides along the hips
- Clasped behind the back

Explanation: The text specifies for Bhujangasana: 'The hands should be below the shoulders with the fingers pointing forward.'

Q1269. What is the primary aim of Shavasana?

- Building abdominal strength
- **Releasing the mind from the body [CORRECT]**
- Making the spine supple
- Improving respiratory capacity

Explanation: The text states: 'The main aim of this asana is releasing the mind from the body.'

Q1270. According to the text, what forms a happy society which in turn makes the nation economically and militarily strong?

- Disciplined cadets
- **Healthy people [CORRECT]**
- Well-trained armed forces
- Strong socio-economic policies

Explanation: The text explicitly states: 'Healthy people make a happy society and happy societies make the nation economically and militarily strong.'

Q1271. How is a fracture defined in the provided text?

- A complete separation of two joint surfaces
- A rupture of ligaments surrounding a bone
- **A discontinuity or break in a bone, resulting in the dissolution of the supporting framework [CORRECT]**
- A severe muscular tear causing structural instability

Explanation: The text defines a fracture as 'a discontinuity or break in a bone, resulting in the dissolution of the supporting frame work of the body.'

Q1272. Which type of fracture causes the fracture of the patella (knee cap) due to the contraction of the thigh muscle?

- Direct Violence
- Indirect Violence
- **Forcible Muscular Contraction [CORRECT]**
- Diseases of Bones

Explanation: Under causes of fractures, the text notes: 'Fracture of patella (knee cap) by contraction of thigh muscle' falls under Forcible Muscular Contraction.

Q1273. In which type of fracture is the skin overlying the fracture broken or ruptured, and sometimes the broken piece protrudes through it?

- Simple or Closed
- **Compound or Open [CORRECT]**
- Complicated
- Dislocated

Explanation: The text defines a Compound or Open fracture as one where the 'Skin overlying fracture is broken or ruptured and sometimes the broken piece may protrude through it.'

Q1274. What kind of bandage is applied in the treatment of a fracture of the jaw bone?

- Greater arm sling
- **Figure 8 bandage**

- Barrel Bandage [CORRECT]

- Broad-fold bandage

Explanation: Section 7 on Fracture of Jaw Bone states: '(a) Apply Barrel Bandage.'

Q1275. When treating an uncomplicated fracture of the ribs, how should the movement of the chest be restricted?

- With a barrel bandage applied tightly across the chest
- With broad-fold bandages, one above and one below the fracture side, half overlapping each other [CORRECT]
- With a Thomas splint secured by seven broad folds
- By strapping the arms tightly to the torso with narrow fold bandages

Explanation: Section 9(a) states: 'Restrict the movement of chest on fracture side with broad-fold bandage, one above and one below the fracture side, half over lapping each other.'

Q1276. In the case of a shoulder blade and upper limb fracture, how should the hand and elbow be positioned?

- Elbow fixed to the affected side and finger touching the opposite shoulder [CORRECT]
- Arm fully extended downward with a narrow fold bandage around the wrist
- Hand placed behind the back with fingers touching the spine
- Elbow raised above shoulder level supported by a greater arm sling

Explanation: Section 10 states: 'Fix the elbow to the affected side and put the finger in a position touching the opposite shoulder.'

Q1277. When applying a long wooden splint for a lower limb fracture, how should the bandage on the ankles be tied?

- In a square knot
- In a figure 8 [CORRECT]
- In a clove hitch
- In a spiral reverse

Explanation: Section 11(b) states: 'The bandage on the ankles should be tied in figure 8.'

Q1278. How should an unconscious patient with a fracture of the spine be transported or positioned?

- Face upwards with head tilted back completely
- Face downwards on a board placed lengthwise on the stretcher, while ensuring the tongue does not fall back and choke [CORRECT]
- In a three quarter prone position with cushions under the head
- Seated upright with a barrel bandage supporting the neck

Explanation: Section 12 specifies: '(c) If unconscious see that the tongue does not fall back... (f) Carry patient face downwards on a board placed lengthwise on the stretcher.'

Q1279. What is the proper casualty positioning for a fracture of the skull if the patient's breathing is abnormal?

- Lay the casualty on back with shoulders and head raised with cushions
- Lay the casualty in a three quarter prone position, apply pads under the chest and draw up the upper knee [CORRECT]
- Place the patient on his chest with his head projecting outside the stretcher canvas
- Keep the patient sitting upright supported by long fold blankets

Explanation: Section 13(b) states: 'If Breathing is Abnormal. Lay the casualty in a three quarter prone position. Apply pads under the chest and draw up the upper knee.'

Q1280. Which of the following is NOT listed as a symptom or sign of a fracture?

- Pain, swelling and tenderness
- Abnormal mobility
- **Increased blood pressure and excessive sweating [CORRECT]**
- Grating sound due to broken bones

Explanation: Section 4 lists symptoms and signs as: pain/swelling/tenderness, loss of power, abnormal mobility, deformity/irregularity, and grating sound. Excessive sweating/blood pressure is not listed.

Q1281. What action should be taken regarding the patient's fluid intake in the case of a skull fracture?

- Give small amounts of water to prevent dehydration from shock
- Administer warm sweet tea to relieve shock symptoms
- **Do not give anything to drink [CORRECT]**
- Provide electrolyte solutions slowly via spoon

Explanation: Section 13(c) explicitly instructs: 'Do not give anything to drink.'

Q1282. How many broad fold bandages are used to secure the long wooden splints in a lower limb fracture?

- Four narrow folds
- Five broad folds
- **Seven broad folds [CORRECT]**
- Nine narrow folds

Explanation: Section 11(b) states: 'Secure them by seven broad folds bandages tied at chest, pelvis, ankles...'

Q1283. What does 'dislocation' mean according to the final section of the text?

- A complete break or discontinuity in the shaft of a long bone
- **Displacement of one or more bones at a joint [CORRECT]**
- Rupture of blood vessels surrounding a fracture site
- Stretching of tendons due to forcible muscular contraction

Explanation: Section 14 defines dislocation as 'displacement of one or more bones at a joint.'

Q1284. Which of the following joints are mentioned as being more frequently dislocated?

- Neck, spine, wrist, and ankle
- **Shoulder, elbow, lower jaw, thumb, and finger [CORRECT]**
- Knee cap, hip joint, collar bone, and heel
- Rib cage, skull sutures, pelvis, and wrist

Explanation: Section 14 states: 'The joints more frequently dislocated are shoulder, elbow, lower jaw, thumb and finger.'

Q1285. What is the primary action recommended regarding joint dislocation during first aid?

- Try to reduce the dislocation immediately
- **Do not try to reduce the dislocation [CORRECT]**
- Massage the joint forcefully
- Apply a hot compress to the joint

Explanation: First aid instructions for joint dislocation explicitly state not to try to reduce the dislocation.

Q1286. How should an injury be treated whenever you are in doubt whether it is a sprain, dislocation, or fracture?

- Treat it as a sprain
- Treat it as a dislocation
- **Treat it as a fracture [CORRECT]**
- Massage the area gently

Explanation: The text dictates that whenever in doubt whether an injury is a sprain, dislocation, or fracture, it should be treated as a fracture.

Q1287. Which of the following defines a 'strain' according to the text?

- The wrenching of the ligaments and tissues
- **The over stretching of a muscle [CORRECT]**
- The displacement of bone ends at a joint
- The fracture of a bone

Explanation: A strain is defined as the over stretching of a muscle.

Q1288. What is a crepe bandage primarily made of?

- Rigid cotton fabric
- **Elastic material [CORRECT]**
- Waterproof plastic
- Leather straps

Explanation: A crepe bandage is made of elastic material which stretches and binds firmly around the joint.

Q1289. Which voluntary organizations work alongside medical authorities for the evacuation and treatment of casualties?

- **Red Cross Society, Saint Johns Ambulance Association, Home Guards and Civil Defence, and NCC cadets [CORRECT]**
- National Cadet Corps only
- Police and Fire Departments
- Red Cross Society and Military Police

Explanation: Medical authorities make preparations with assistance from voluntary organizations like Red Cross Society, Saint Johns Ambulance Association, Home Guards and Civil Defence, and NCC cadets.

Q1290. When setting up a temporary First Aid Post, where should it ideally be located if no formal post is available?

- Right on the main road
- **A sheltered place, away from the main road [CORRECT]**
- In an open, crowded field
- Inside a moving vehicle

Explanation: If no First Aid Post is available, transform a sheltered place, away from the main road, into a first aid post.

Q1291. Which improvised items can be collected and used as splints and tourniquets?

- **Twigs, sticks, umbrellas, strings [CORRECT]**
- Metal pipes and chains
- Glass bottles and wire
- Heavy stones and bricks

Explanation: The text mentions collecting even twigs, sticks, umbrellas, strings etc. to be used as splints and tourniquets whenever required.

Q1292. What specific action should be taken in the case of asphyxia during first aid treatment?

- Give artificial respiration [CORRECT]
- Give the patient lots of fluid
- Treat the patient for shock
- Apply a crepe bandage

Explanation: If it is a case of asphyxia, give artificial respiration.

Q1293. How are casualties classified under Priority I during triage and evacuation?

- Cases requiring minor treatment
- Cases requiring early surgery and possibly resuscitation
- Cases requiring resuscitation and urgent surgery [CORRECT]
- Cases that do not require any medical attention

Explanation: Priority I is defined as cases requiring resuscitation and urgent surgery.

Q1294. What classification is given to Priority III casualties?

- All other casualties who require minor treatment [CORRECT]
- Cases requiring urgent surgery
- Cases requiring resuscitation
- Fatalities

Explanation: Priority III comprises all other casualties who require minor treatment.

Q1295. Which of the following is NOT a sign or symptom of a joint dislocation?

- Severe pain at or near the joint
- Fixity of the joint or loss of power
- Deformity of joint and unnatural position of the limb
- Rapid healing without swelling [CORRECT]

Explanation: Swelling and joint deformity are signs of dislocation; rapid healing without swelling is incorrect.

Q1296. What is the recommended first aid treatment for a sprained joint regarding bandages and water?

- Keep the bandage wet with cold water to avoid swelling [CORRECT]
- Keep the bandage dry and apply heat
- Remove the bandage every 5 minutes
- Soak the limb in boiling water

Explanation: For a sprain, keep the bandage wet with cold water to avoid swelling.

Q1297. Which personal qualities of a first aider are highlighted as playing a life-saving role?

- Presence of mind, intelligence, resourcefulness, dexterity, alacrity, and determination [CORRECT]
- Strictness, authority, speed, and silence
- Cunningness, flexibility, and detachment
- Impatience and aggressive action

Explanation: The text emphasizes their presence of mind, intelligence, resourcefulness, dexterity, alacrity, and determination.

Q1298. What should a first aider do regarding the functions of a doctor?

- Perform surgeries if necessary
- Do not perform the functions of a doctor and quickly dispose off the casualty to the nearest hospital [CORRECT]

- Prescribe heavy pharmaceutical drugs
- Admit the patient to a private clinic managed by cadets

Explanation: The first aider should not perform the functions of a doctor and must quickly dispose off the casualty by sending it to the nearest hospital.

Q1299. Which Chapter and Section range covers 'Environment and Ecology' according to the index provided?

- Chapter-IX, Sections 1 to 5
- **Chapter-X, Sections 1 to 6 [CORRECT]**
- Chapter-XI, Sections 1 to 4
- Chapter-VIII, Sections 1 to 3

Explanation: The index shows Chapter-X ENVIRONMENT AND ECOLOGY containing Sections 1 through 6.

Q1300. What is the narrow zone made up of land, water, and air extending up to a few kilometers above and below the earth's surface where life exists called?

- Atmosphere
- **Biosphere [CORRECT]**
- Troposphere
- Stratosphere

Explanation: Life on earth exists in the biosphere, which is a narrow zone made up of land, water, and air extending up to a few kilometers above and below the earth's surface.

Q1301. Which of the following factors influencing human beings is categorized under cultural factors?

- Earth and water
- Plants and animals
- **Economic, social and political [CORRECT]**
- Climatic conditions

Explanation: Cultural factors influencing human beings include economic, social, and political aspects, whereas earth, water, and climate are physical factors, and plants and animals are biological factors.

Q1302. What happens to the earth's temperature if the natural carbon dioxide level increases two fold?

- It would raise temperature by 1° to 2°
- It would raise temperature by 3° to 4°
- **It would raise temperature by 5° to 6° [CORRECT]**
- It would lower temperature by 5° to 6°

Explanation: According to the text, if the natural carbon dioxide level increases even two fold, it would raise the temperature by 5° to 6°, making the survival of life on earth difficult.

Q1303. What is the technical pH criterion for rain water to be classified as acid rain?

- pH above 7.0
- **pH below 5.6 [CORRECT]**
- pH exactly 6.5
- pH between 7.0 and 8.5

Explanation: Acid rain is a form of pollution in which the rain water contains greater than normal acidity, technically having a pH below 5.6.

Q1304. Which gas is liberated when insoluble inert CFCs reach the troposphere and react with UV radiations, thereby catalyzing the conversion of ozone into molecular oxygen?

- Nitrogen
- Chlorine [CORRECT]
- Hydrogen
- Carbon

Explanation: Chlorine is liberated in the process when CFCs reach the upper atmosphere and react with UV radiations, catalyzing the conversion of ozone into molecular oxygen.

Q1305. In ancient Indian tradition, which Vedic God represents Thunder & Rain as mentioned in the text?

- Agni
- Surya
- Varuna
- Indra [CORRECT]

Explanation: The text explicitly states that Vedic Gods such as Agni (Fire), Surya (Sun), Pawan (Wind), Bhumi (Earth), Varuna (Water), and Indra (Thunder & Rain) represent atmosphere, sunlight, and energy.

Q1306. From which Greek word was the term 'ecology' coined, and what does it mean?

- 'Oikos', meaning home [CORRECT]
- 'Logos', meaning study
- 'Bios', meaning life
- 'Autos', meaning self

Explanation: The word ecology was coined from the Greek word 'Oikos' which means home, representing the home of plants, trees, and animals.

Q1307. Which of the following are classified as abiotic components of an ecological system?

- Autotrophic green plants
- Bacteria and fungi
- Heat, light, water, wind, soil, rocks [CORRECT]
- Herbivores and carnivores

Explanation: Abiotic components include non-living factors such as heat, light, water, wind, soil, rocks, and organic matter.

Q1308. Organisms that are autotrophic green plants and manufacture complex organic substances using radiant energy and minerals are known as:

- Primary Consumers
- Producers [CORRECT]
- Decomposers
- Tertiary Consumers

Explanation: Producers are autotrophic green plants and some photosynthetic bacteria that produce radiant energy and manufacture complex organic substances.

Q1309. Which organisms belong to the category of primary consumers in an ecosystem?

- Insects, fish, wolves
- Bacteria, fungi, actinomycetes
- Benthos, Zooplanktons, Cow, Deer [CORRECT]
- Large fish and hawks

Explanation: Primary consumers are herbivores feeding directly on living plant residues, such as benthos, zooplanktons, cows, and deer.

Q1310. What is the primary role of decomposers like bacteria, fungi, and actinomycetes in an ecosystem?

- Consuming primary producers directly
- Manufacturing carbohydrates via photosynthesis
- **Decomposing complex dead organic matter to simple forms to return minerals to the soil [CORRECT]**
- Absorbing ultraviolet rays in the stratosphere

Explanation: Decomposers bring about the decomposition of complex dead organic matter to simple forms, playing an important role in returning minerals and elements to the soil.

Q1311. What does a food chain in a grassland ecosystem typically start with?

- Frogs
- **Grasses [CORRECT]**
- Snakes
- Hawks

Explanation: A food chain in a grassland ecosystem starts with grasses and goes through grasshoppers, frogs, snakes, hawks, and so on.

Q1312. What are the two main forms into which environmental degradation primarily takes place?

- Deforestation and urbanization
- **Resource depletion and resource deterioration (pollution) [CORRECT]**
- Global warming and acid rain
- Ozone depletion and industrialization

Explanation: Environmental degradation takes mainly two forms: resource depletion (decline in quantity) and resource deterioration or pollution (decline in quality).

Q1313. According to the textbook, approximately how much of the world's land area is presently covered by forests?

- About one half
- **About one third [CORRECT]**
- About one quarter
- About two thirds

Explanation: Presently, forests cover about one third of the world's land area, though at one time they covered about double that area.

Q1314. As a responsible NCC Cadet, which of the following actions is recommended to curb environmental degradation?

- Clearing forests for more agricultural land
- **Conducting tree plantation drives and water conservation [CORRECT]**
- Dumping untreated waste into rivers
- Increasing the use of inorganic fertilizers

Explanation: NCC cadets can conduct tree plantation drives, focus on water conservation, ensure proper waste disposal, and educate others to curb environmental degradation.

Q1315. What are the two main forms of environmental degradation described in the text?

- **Resource depletion and resource pollution [CORRECT]**
- Global warming and acid rain
- Deforestation and overgrazing
- Ozone depletion and nuclear winter

Explanation: Environmental degradation takes mainly two forms: resource depletion (decline in quantity) and resource deterioration or pollution (decline in quality).

Q1316. Which of the following is cited as a primary reason for resource depletion in technologically advanced countries?

- Absence of technology
- **Over-use [CORRECT]**
- Large population size
- Lack of educational institutions

Explanation: In technologically advanced countries, the main cause of resource depletion is over-use, such as the enormous amounts of petroleum consumed.

Q1317. What term is used in the text to describe undesirable or harmful substances that cause deterioration in environmental quality?

- Nutrients
- **Pollutants [CORRECT]**
- Catalysts
- Effluents

Explanation: Pollution means deterioration in quality caused by the presence of undesirable or harmful substances called Pollutants.

Q1318. Which flightless bird is specifically mentioned in the text as having gone extinct due to reckless hunting?

- Great Auk
- Moa
- **Dodo [CORRECT]**
- Tasmanian Tiger

Explanation: Reckless hunting leading to the extinction of species is exemplified by the extinction of the Dodo, a flightless bird.

Q1319. The water hyacinth plant, which has choked water bodies in Asia and Africa, was originally introduced from which region?

- **Tropical America [CORRECT]**
- Sub-Saharan Africa
- Southeast Asia
- Eastern Europe

Explanation: Water hyacinth, which chokes water bodies in Asia and Africa, was introduced from tropical America.

Q1320. Which of the following energy resources is classified as non-renewable according to the text?

- Sunlight
- Wind
- **Natural gas [CORRECT]**
- Water

Explanation: While sunlight, wind, and water are renewable energy resources, minerals, coal, petroleum, and natural gas are non-renewable.

Q1321. What phenomenon causes the depletion of the ozone layer according to the text?

- **Chlorofluorocarbons [CORRECT]**
- Excessive carbon dioxide
- Nuclear winter
- Acid rain

Explanation: The text states that depletion of the ozone layer is due to the use of chlorofluorocarbons.

Q1322. What is the phrase used in the conservation measures to denote development involving the biosphere with ecological harmony?

- Sustainable industrial growth
- **Economic Development on Ecological Principles [CORRECT]**
- Ecological Profitability Strategy
- Green Biosphere Integration

Explanation: Conservation measure (t) explicitly refers to 'Economic Development on Ecological Principles' as all development involving the bio-sphere.

Q1323. Which of the following non-biodegradable wastes is specifically highlighted as becoming a menace and health hazard in urban centers?

- **Polythene bags [CORRECT]**
- Cardboard boxes
- Wooden crates
- Cotton fabric

Explanation: Non-biodegradable wastes such as polythene bags, which cannot be decomposed by natural agents like bacteria, have become a menace and health hazard.

Q1324. What does the term 'nuclear winter' refer to in the context of environmental damage?

- Extreme cold weather caused by high carbon emissions
- **Interference with the rays of the sun due to presence of radioactive waste materials [CORRECT]**
- The complete freezing of oceans due to nuclear testing
- A drop in global temperatures caused by massive deforestation

Explanation: Nuclear winter is defined as interference with the rays of the sun due to the presence of radioactive waste materials from the use or reprocessing of nuclear fuel.

Q1325. How is 'Ecology' formally defined in the text?

- The study of industrial impact on urban spaces
- **The study of organisms in relation to their environment [CORRECT]**
- The management of biological resources and energy cycles
- The evaluation of atmospheric pressure and weather patterns

Explanation: Section-3 Introduction defines ecology as the study of organisms in relation to their environment.

Q1326. According to the text, what leads to soil becoming deficient in nutrients?

- Excessive rainfall and flooding
- **Excessive cultivation or growing the same crop repeatedly on the same plot [CORRECT]**
- The introduction of earthworms into the soil
- Using modern sewage disposal techniques

Explanation: Soil may become deficient in nutrients due to excessive cultivation or if the same crop is grown repeatedly on the same plot.

Q1327. What is identified as the primary air purifier that provides oxygen for survival?

- Water bodies
- Oceans
- **Trees [CORRECT]**
- Fungi

Explanation: The text notes that the air purifiers, i.e., the trees which give us oxygen to survive, have been depleted due to unscrupulous felling.

Q1328. Which of the following is listed as a cause of ecological changes and imbalances in physical and biological surroundings?

- Decreased consumption of fossil fuels
- **Increased exploitation of underground water [CORRECT]**
- Reduction in industrial output
- Expansion of wildlife sanctuaries

Explanation: Ecological changes are caused by increasing exploitation of underground water, increased use of fertilizers, and rapidly increasing consumption of oil, petroleum, and diesel.

Q1329. What are the physical components of the natural system mentioned that ensure living beings get everything they need to survive?

- Only animate organisms in the biosphere
- **Animate organisms and inanimate forces operating in nature [CORRECT]**
- Industrial emissions and chemical fertilizers
- Synthetic materials and energy grids

Explanation: The environment includes not only animate organisms that populate the biosphere but also the inanimate forces operating in nature, such as agriculture, forestry, water bodies, rocks, and air.

Q1330. What percentage of smoke comes from industrial plants alone, as mentioned in the causes of air pollution?

- About 25%
- About 35%
- **About 45% [CORRECT]**
- About 55%

Explanation: The text explicitly states that about 45% of smoke comes from industrial plants alone due to incomplete combustion of coal.

Q1331. Which specific constitutional article guarantees the right to life, including living in a proper environment free of danger of disease and infection?

- Article 14
- **Article 21 [CORRECT]**
- Article 32
- Article 51A

Explanation: Article 21 of the constitution guarantees the right to life, a life of dignity to be lived in a proper environment, free of danger of disease and infection.

Q1332. According to the national forest policy laid down by the Ministry of Environment, Government of India, what percentage of the total land area should ideally be under forests for a healthy national economy?

- 20 percent
- 25 percent
- **33 percent [CORRECT]**
- 40 percent

Explanation: The text states that a healthy national economy requires that 33 percent of the total land area should be under forests.

Q1333. Which respiratory disease is specifically mentioned in the text as an effect of air pollution?

- Tuberculosis
- **Silicosis [CORRECT]**
- Bronchitis
- Asthma

Explanation: The text lists 'Occurrence of diseases like silicosis (respiratory disease), rickets, dental caries' under the effects of air pollution.

Q1334. Which constitutional article outlines the duty of every citizen of India to protect and improve the natural environment including forests, lakes, rivers and wildlife?

- Article 19
- Article 21
- **Article 51A [CORRECT]**
- Article 300A

Explanation: Article 51A provides that it shall be the duty of every citizen of India to protect and improve the natural environment including forests, lakes, rivers and wildlife.

Q1335. What happens when streams are polluted by causing suspended solids to deposit on the stream bed?

- Rapid vaporization
- **Silting and floating masses of sludge [CORRECT]**
- Instant purification
- Increase in fish population

Explanation: The text states that pollution of streams causes suspended solids to deposit on the stream bed resulting in silting and floating masses of sludge from organic matter undergoing purification.

Q1336. How do forests help in absorbing hazardous obnoxious gases and heavy metal pollutants like lead, cadmium, arsenic, and mercury?

- Through deep root suction
- **Through special glands present in the different parts of certain trees [CORRECT]**
- Through bark peeling
- Through leaf shedding

Explanation: The text notes that forests help in absorbing these gases and metallic pollutants due to special glands present in the different parts of certain trees which serve as scavengers.

Q1337. What is the science which deals with the study of the eco-system called?

- Biology
- Forestry
- **Ecology [CORRECT]**
- Environmentology

Explanation: The text explicitly defines ecology as the science which deals with the study of the eco-system.

Q1338. What role can NCC cadets specifically play when visiting villages, regarding agricultural practices?

- Guide farmers on tractor maintenance
- **Guide farmers regarding the use of natural manure instead of chemical fertilizer [CORRECT]**
- Teach them advanced irrigation engineering

- Sell organic seeds

Explanation: The text mentions that cadets can visit villages and guide the farmers regarding the use of natural manure instead of chemical fertilizer produced after generating industrial waste.

Q1339. Which carbon compounds are primarily responsible for the depletion of the atmospheric ozone layer?

- Carbon Monoxides
- **Chlorofluorocarbons (CFCs) [CORRECT]**
- Methane compounds
- Benzole mixtures

Explanation: The text states that atmospheric ozone is depleted due to the release of carbon compounds called chlorofluorocarbons (CFCs) into the atmosphere.

Q1340. What does forestry as a recognized subject deal with?

- Commercial logging and timber export
- **Establishment, development, care and reproduction of forest trees [CORRECT]**
- Prevention of forest fires only
- Wildlife hunting regulations

Explanation: The text defines forestry as a recognized subject that deals with the establishment, development, care and reproduction of forest trees.

Q1341. What constitutes an integral unit called an ecological system or eco-system?

- Only the animal kingdom and human settlements
- **Forests and our environment dependent on each other along with other living organisms [CORRECT]**
- Rivers, mountains, and atmospheric gases only
- Industrial zones and agricultural land

Explanation: The text states that along with other living organisms of the earth, the forests and our environment are dependent on each other and constitute an integral unit called ecological system or eco-system.

Q1342. Which of the following is cited as a primary source of atmospheric humidity generated by forests?

- **Transpiration generating water vapour [CORRECT]**
- Groundwater seepage
- Industrial steam release
- Oceanic condensation

Explanation: The text states that the water vapour generated by the forests due to transpiration serves as a major constituent of atmospheric humidity.

Q1343. What is the principal effect of water pollution regarding dissolved oxygen?

- It increases dissolved oxygen to dangerous levels
- **It depletes the dissolved oxygen content through excessive organic load [CORRECT]**
- It converts dissolved oxygen into toxic ozone
- It has no effect on dissolved oxygen levels

Explanation: The text notes that the principal effect of pollution is to deplete, through excessive organic load, the dissolved oxygen content of receiving water to a point where the stream becomes incapable of self-purification.

Q1344. How do forests prevent soil erosion and degradation of hills according to the text?

- By stopping rainfall completely
- **Through the roots of various trees holding the soil firmly [CORRECT]**

- By forming a physical rock barrier around hills
- By neutralizing soil acidity

Explanation: The text explains that the roots of various trees of the forest hold the soil firmly to prevent the soil being blown away by air or washed away by water.

Q1345. Which animal has been officially declared as the National animal of India according to the text?

- The Lion
- **The Tiger [CORRECT]**
- The Elephant
- The Cheetah

Explanation: The text explicitly states in Section-6, paragraph 2 that the majestic tiger has been declared as the National animal of India.

Q1346. Which bird with its exotic plumage is recognized as the national bird of India in the textbook?

- The Pigeon
- The Weaver bird
- **The Peacock [CORRECT]**
- The Crane

Explanation: Section-6, paragraph 3 mentions that the colourful peacock with its exotic plumage is the national bird of our country.

Q1347. Where is the lion currently confined in terms of protected areas in India?

- Jim Corbett Park
- **Gir forest of Saurashtra [CORRECT]**
- Rann of Kutch
- Bharatpur Sanctuary

Explanation: According to Section-6, paragraph 4, the lion is confined to protected areas in the Gir forest of Saurashtra.

Q1348. After whom is the famous Corbett Park named, which is a reserved area for the tiger?

- General Jim Corbett
- **Hunter Jim Corbett [CORRECT]**
- Colonel Jim Corbett
- Conservationist Jim Corbett

Explanation: Section-6, paragraph 5 states that the Corbett Park is named after the famous hunter Jim Corbett.

Q1349. In which state is the park specifically meant for the rhinoceros located, as per the wildlife section?

- Gujarat
- **Assam [CORRECT]**
- Uttarakhand
- Rajasthan

Explanation: Section-6, paragraph 5 mentions that in Assam there is a park for the rhinoceros.

Q1350. What kind of facility is established at Bharatpur according to the text?

- Tiger Reserve
- Bio Reserve
- **Bird Sanctuary [CORRECT]**

- Rhinoceros Park

Explanation: Section-6, paragraph 5 states that at Bharatpur, we have a bird sanctuary.

Q1351. Approximately how many plant species have been identified as endangered or threatened in India?

- Nearly 250
- Nearly 350
- **Nearly 450 [CORRECT]**
- Nearly 550

Explanation: Section-6, paragraph 8 states that in India nearly 450 plant species have been identified as endangered or threatened.

Q1352. Which of the following is NOT listed in the text as a basic reason for the extinction of plant and animal species?

- Destruction of their natural habitats
- Over-grazing by domestic animals
- **Severe natural earthquakes [CORRECT]**
- Poaching for meat, skin, fur, ivory, rhino horn etc.

Explanation: Section-6, paragraph 7 lists destruction of habitats, over-grazing, poaching, and export as reasons for extinction; earthquakes are not mentioned.

Q1353. What is the motto of the NCC mentioned in the context of cadet behavior and responsibilities?

- Duty, Honour, Country
- **Unity and Discipline [CORRECT]**
- Service Before Self
- Truth and Fortitude

Explanation: Section-1 of Self Defence, paragraph 3 mentions that NCC students follow the NCC motto of 'Unity and Discipline'.

Q1354. According to the precautions for NCC cadets, how should cadets spend their leisure hours?

- Frittering away time in idleness
- **Engaging in constructive hobbies like reading, music, painting, or gardening [CORRECT]**
- Visiting restaurants and cinemas frequently
- Indulging in luxury and carefree lifestyles

Explanation: Section-1, paragraph 3 advises cadets to make use of their leisure hours by engaging in constructive hobbies instead of idleness.

Q1355. What ecological consequence does the text associate with killing flesh-eating animals?

- **Multiplication of grass-eating animals such as hares, rabbits and deer [CORRECT]**
- The land becoming almost a desert
- Destruction of plant life through over-grazing
- Increase in forest cover and wildlife equilibrium

Explanation: Section-6, paragraph 5 notes that killing flesh-eating animals leads to the multiplication of grass-eating animals such as hares, rabbits and deer.

Q1356. Which climatic or vegetation zones have been declared as bio reserves by the Government of India in the text?

- The Western Ghats, the Thar Desert and the Gangetic plains

- The high Himalayas, the Rann of Kutch and the coastal waters of the Andaman and Nicobar islands [**CORRECT**]
- The Central Plateau, the Eastern Ghats and the Sunderbans
- The Nilgiri hills, the Satpura range and Lakshadweep waters

Explanation: Section-6, paragraph 6 specifies bio reserves distributed in zones such as the high Himalayas, the Rann of Kutch, and the coastal waters of the Andaman and Nicobar islands.

Q1357. Which of the following behavioral guidelines is specifically mandated for boy cadets regarding girl cadets in NCC?

- They should maintain a lustful attitude
- They must behave elegantly and respect their privacy [**CORRECT**]
- They should indulge in eve-teasing
- They must avoid normal intermingling completely

Explanation: Section-1, paragraph 4 states that boys should not have a lustful attitude, must behave elegantly with girls, and should always respect their privacy.

Q1358. What undesirable personal habits or errant ways are specifically warned against for youth/cadets in the text?

- Waking up early for physical training
- Smoking, drinking and taking drugs [**CORRECT**]
- Studying higher values too seriously
- Engaging in gardening and painting

Explanation: Section-1 of Self Defence, paragraph 2 and 3 warn that some youth smoke, drink, and take drugs, and cadets should keep away from them.

Q1359. Which Chapter and Section of the provided textbook covers 'Precaution and General Behaviour of Boys/Girls Cadets'?

- Chapter-X, Section-2
- Chapter-XI, Section-1 [**CORRECT**]
- Chapter-IX, Section-3
- Chapter-XII, Section-1

Explanation: The index and headings show that Chapter-XI covers 'SELF DEFENCE', and Section-1 covers 'Precaution and General Behaviour of Boy and Girl Cadets'.

Q1360. According to the suggested daily routine for cadets, what activity immediately follows morning exercise/PT?

- Prayers
- Cleaning-up and Breakfast [**CORRECT**]
- School/College studies
- Mid-day meal

Explanation: The suggested daily routine lists cleaning-up and breakfast right after morning exercise/PT.

Q1361. What phrase is used in the text to describe the ultimate goal and identity of all NCC cadets?

- Future Leaders of Tomorrow
- India's Pride and World's Envy [**CORRECT**]
- The Shield of the Nation
- Guardians of Peace and Justice

Explanation: The text concludes by stating that NCC cadets should set an example and endeavour to remain 'India's Pride and World's Envy'.

Q1362. How is 'Theft' formally defined in the context of untoward incidents?

- Taking movable property with stealing intention and moving it without owner's consent [CORRECT]
- Violence and fighting without provocation
- Severe form of robbery involving force
- Taking property temporarily with implied consent

Explanation: The text defines theft as taking someone's movable property with the act of stealing and with the intention of retaining by actually moving it without the owner's consent.

Q1363. What measure is suggested for cadets to prevent pick-pocketing while traveling?

- Carry maximum cash for security
- Avoid traveling in crowded places and carry little cash and valuables [CORRECT]
- Always travel in uniform
- Travel exclusively during late night hours

Explanation: To prevent pick-pocketing, the text advises avoiding traveling in crowded places and trying to carry little cash and valuables.

Q1364. What action should cadets take if they encounter a small and manageable group of hooligans and are in a large number?

- Ignore them completely
- Try for a peaceful dispersion [CORRECT]
- Engage in physical combat
- File an immediate FIR without intervention

Explanation: The text states that if cadets see hooligans in a small and manageable group and cadets are in a large number, they can try for a peaceful dispersion.

Q1365. Where are pick-pockets generally most common according to the text?

- Quiet residential areas
- Bus-stations, railway stations, or busy market areas [CORRECT]
- Educational institutions
- High-security military zones

Explanation: The text notes that pick-pockets are generally common in places like bus-stations, railway stations or some busy market areas.

Q1366. Which of the following is specifically listed as a vulnerable body part located at the 'Behind' (rear view)?

- Solar plexus
- Base of skull [CORRECT]
- Fork (testicles)
- Temples

Explanation: Under vulnerable parts of the body behind, the text lists the base of skull, spine, kidneys, and coccyx.

Q1367. Why are spots like the solar plexus, temple, and fork considered difficult in unarmed combat?

- They are heavily armored naturally
- They are very difficult to toughen, resulting in graver pain/injury [CORRECT]
- They are rarely targeted by soldiers
- They have no nerve endings

Explanation: The text explains that spots such as solar plexus, temple and fork are very difficult to toughen, making the degree of pain or injury from a blow much graver.

Q1368. What specific recommendation is given regarding children when crossing roads?

- Let them walk ahead to learn independence
- **Hold children's hands when crossing roads [CORRECT]**
- Always use bicycles
- Cross only when police are present

Explanation: Road safety remedies explicitly state to hold children's hands when they are going to cross roads.

Q1369. According to the remedies for eve-teasing and harassment, what should girl cadets avoid?

- Participating in sports
- **Traveling in darkness and least of all, alone [CORRECT]**
- Studying in mixed environments
- Joining residents' associations

Explanation: The text advises that girls should avoid travelling in darkness and least of all, alone.

Q1370. How should cadets contribute to neighborhood security regarding theft and robbery prevention?

- Patrol streets alone at midnight
- **Participate in their respective residents' associations [CORRECT]**
- Install private CCTV cameras exclusively
- Report only to media outlets

Explanation: The text instructs that cadets must participate in their respective residents' associations in order to provide security to their colonies.

Q1371. What is cited as a primary reason why young people turn to drugs, smoking, or alcoholism?

- Peer pressure from superiors
- **To try to escape from the harsh realities of life or for immature fun [CORRECT]**
- Medical prescriptions gone wrong
- Mandatory camp routines

Explanation: The text mentions that people try to escape from the harsh realities of life or for immature fun involve themselves in such activities.

Q1372. Which of the following is listed among the vulnerable parts on the 'Infront' of the human body?

- Kidneys
- Base of skull
- **Solar plexus [CORRECT]**
- Coccyx

Explanation: Under 'Infront', the text lists eyes, ears, temples, nose, mouth, chin, throat, solar plexus, abdomen, fork, knees, and insteps.

Q1373. What does familiarity with vulnerable vital spots and body weapons enable a soldier to achieve?

- Faster running speed during parades
- **Select proper target for aimed injury and defend against seasoned blows effectively [CORRECT]**
- Better marksmanship with rifles
- Immunity from physical fatigue

Explanation: The text states that familiarity with vulnerability enables a soldier to select the proper target to achieve aimed injury and defend effectively against seasoned blows.

Q1374. What human resource perspective is highlighted in the conclusion of the daily routine section?

- Human resource is a nation's biggest capital with emphasis on moulding the young [CORRECT]
- Human resource requires strict industrial regulation
- Youth population percentage is declining globally
- Capital accumulation depends solely on monetary assets

Explanation: The text explicitly states that human resource of a nation is its biggest capital with a greater emphasis on moulding the young.

Q1375. What is described as a collection of offensive and defensive techniques derived from martial arts and combat sports ideally suited for warfare where surprise is paramount?

- Physical Self Defence
- Unarmed Combat [CORRECT]
- Battle Drill
- Modern Warfare Tactics

Explanation: Section-4 Paragraph 3 defines unarmed combat as a collection of offensive and defensive techniques derived from martial arts and combat sports ideally suited to warfare where surprise is of paramount importance.

Q1376. According to the principles of unarmed combat, which quality is deemed necessary to gain mastery over the enemy without any mercy or compunction?

- Compassion
- Ruthlessness [CORRECT]
- Deterrence
- Agility

Explanation: Section-4 Paragraph 6(a) states that 'RUTHLESSNESS' is necessary in order to gain mastery over the enemy without any scruples or compunction, employing brutal methods of attack without hesitation.

Q1377. During the learning and perfection of technique stages in unarmed combat training, what should the training partner do?

- Offer maximum resistance to test skills
- Wear full battle order and equipment
- Offer no resistance and allow movements to be executed freely [CORRECT]
- Act as an armed opponent with a dummy weapon

Explanation: Section-4 Paragraph 7(d) specifies that during the learning and perfection of technique stages, trainers must ensure that the training partner offers no resistance and allows movements to be executed freely.

Q1378. What is the initial dress requirement prescribed when starting preliminary unarmed combat training?

- Full battle order and webbing
- Gym vest and shorts
- Denims and boots [CORRECT]
- Camouflage uniform without boots

Explanation: Section-4 Paragraph 8 states that training should initially start with denims and boots and progressively move to wearing equipment and battle order.

Q1379. In the Right Hip Throw technique, after placing the left foot in front and striking the opponent's right shoulder, by how many degrees and on which foot does the attacker pivot?

- 90 degrees on the right foot
- **180 degrees on the ball of the left foot [CORRECT]**
- 360 degrees on the right foot
- 180 degrees on the right heel

Explanation: Section-4 Paragraph 10(a) outlines that during the Right Hip Throw, the attacker pivots 180 degrees on the ball of the left foot after striking the opponent.

Q1380. Where must throwing techniques strictly be practiced during training sessions with a sparring partner?

- On a hard concrete floor
- **On soft mat/ground [CORRECT]**
- Inside a sand pit without mats
- On a wooden gymnasium stage

Explanation: Section-4 Paragraph 10 states that the undermentioned throwing techniques must only be practiced on soft mat/ground to your sparring partner to prevent injuries.

Q1381. What should follow immediately after an attacker executes the Ankle and Shoulder Throw from behind and forces the opponent onto their face?

- A verbal warning to surrender
- **A disabling kick to the fork [CORRECT]**
- A rugby tackle
- A weapon disarming maneuver

Explanation: Section-4 Paragraph 10(b) states that after throwing the opponent forward onto their face in the Ankle and Shoulder Throw, the attacker should follow through with a disabling kick to the fork.

Q1382. Which of the following is NOT listed as a safety precaution for conducting unarmed combat training?

- Close and constant supervision of practical work
- **Leaving the class unattended for short independent practice [CORRECT]**
- Establishing a signal for stopping pressure when executing holds
- Proper warming up before carrying out practical work

Explanation: Section-4 Paragraph 7(a) explicitly mandates that a class must never be left unsupervised during practical work.

Q1383. What primary aim does training in unarmed combat instill in a soldier regarding a disarmed situation?

- To immediately retreat to a safe zone
- To surrender gracefully to save life
- **That the fight is not over and a hopeless situation can be turned into an attacking position [CORRECT]**
- To wait for armed reinforcement

Explanation: Section-4 Paragraph 5 states that training aims to install the idea that the fight is not over even when disarmed, transforming a seemingly hopeless defensive situation into an aggressive and attacking position.

Q1384. How are blows recommended to be practiced under the preliminary guidelines of unarmed combat?

- Directly against an unpadded brick wall
- **On punching bags, medicine balls, or a plank of thin wood [CORRECT]**
- Using live steel weapons

- Against unprotected sparring partners at full force

Explanation: Section-4 Paragraph 8(c) notes that blows should be practiced on punching bags, medicine balls, or on a plank of thin wood.

Q1385. In the context of preliminaries, what does 'Ambidexterity' require in unarmed combat training?

- Using only the dominant hand for power
- **Teaching all attacks and defences using both left and right-handed methods [CORRECT]**
- Practicing strictly with left-handed partners
- Switching weapons during combat

Explanation: Section-4 Paragraph 8(a) specifies under Ambidexterity that all attacks and defences must be taught using both left and right-handed methods.

Q1386. What constitutes a Rugby Tackle from the rear in unarmed combat?

- A high grab around the opponent's neck and shoulders
- **A swift dive at an opponent's legs [CORRECT]**
- A direct kick to the opponent's midsection
- A tripping motion using the left heel

Explanation: Section-4 Paragraph 10(d) defines a rugby tackle from the rear as consisting of a swift dive at an opponent's legs.

Q1387. What is the primary purpose of establishing a signal during unarmed combat training?

- To signal the start of a competitive match
- To call for medical equipment
- **To stop the application of pressure when executing holds [CORRECT]**
- To switch training partners

Explanation: Section-4 Paragraph 7(f) requires trainers to establish a signal for stopping the application of pressure when executing holds to avoid injury.

Q1388. Which principle emphasizes that all attacks must be carried out in a fierce and resolute manner rather than being 'half-hearted'?

- Ruthlessness
- **Determined Effort [CORRECT]**
- Efficiency of Initial Attack
- Retaining Initiative

Explanation: Section-4 Paragraph 6(b) highlights 'Determined Effort', stating that all attacks must be carried out in a fierce, ruthless, and determined manner and that a half-hearted attack is futile.

Q1389. What tactical advantage does a thorough knowledge of unarmed combat provide against an armed enemy during an ambush or sentry silencing?

- It is completely useless without firearms
- **It serves as a formidable and often more effective weapon [CORRECT]**
- It delays the need for tactical movement
- It replaces the need for physical fitness

Explanation: Section-4 Paragraph 4 states that thorough knowledge of unarmed combat is a formidable weapon which in many circumstances is more effective against an armed enemy during an ambush or sentry silencing.

Q1390. Which specific NCC wing is Chapter-XII on 'Posture Training' exclusively meant for?

- JD/JW

- SD/SW [CORRECT]
- All Wings
- Junior Wing Only

Explanation: The index for Chapter-XII explicitly states that Posture Training is '(ONLY FOR SD/SW)'.

Q1391. According to Section-1, what is cited as a major result of a well poised body?

- Better health through improved organic functions [CORRECT]
- Increased appetite and weight gain
- Reduced need for physical training
- Enhanced flexibility in martial arts only

Explanation: Paragraph 1 of Section-1 states that a well poised body means better health through improved organic functions.

Q1392. Which of the following is NOT listed as one of the main objects of posture training?

- Develop the personality of cadets
- Build their physique and teach them correct postures
- Make them expert marksmen with weapons [CORRECT]
- Make them more self-reliant

Explanation: Paragraph 2 of Section-1 lists the objects: develop personality, build physique/teach correct postures, make them self-reliant, and coordinate body movements.

Q1393. What are considered the hallmark of an individual's personality which cannot be attained without developing a good posture?

- Grace and poise [CORRECT]
- Strength and speed
- Height and weight
- Discipline and obedience

Explanation: Paragraph 4 of Section-1 states that grace and poise are the hallmark of an individual's personality which cannot be attained without developing a good posture.

Q1394. Why is posture a problem to human beings according to Section-2, Anatomy?

- Because humans lack muscles in the lower back
- Because the skeleton is fundamentally unstable in the upright position [CORRECT]
- Because human bones are too brittle
- Because gravity pushes upward on the human body

Explanation: Section-2, Paragraph 1 states that posture is a problem to human beings because the skeleton is fundamentally unstable in the upright position.

Q1395. From the hips upward, the trunk, head, and arms are supported by what arrangement of the spine?

- A two-legged arrangement
- A multi-column arrangement
- A one-legged arrangement [CORRECT]
- A suspended pulley arrangement

Explanation: Section-2, Paragraph 1 mentions that the trunk, head and arms are supported from the hips upward by a one-legged arrangement of the spine.

Q1396. Which major joint type is located at the Hip and Shoulder?

- Hinge

- Pivot
- **Ball & Socket [CORRECT]**
- Condy-loid

Explanation: The table of major joints in Section-2 lists 'Ball & Socket' at the Hip and Shoulder.

Q1397. What are the directions of movements for a Hinge joint (such as Elbow, Knee, Ankle, Fingers)?

- Around rotation, right left, in and out
- **Forward Bending and Backward straightening [CORRECT]**
- Gliding in and out
- Forward bending, straightening, sideways and rotation

Explanation: The joint table lists the directions of movements for Hinge joints (Elbow, Knee, Ankle, Fingers) as 'Forward Bending and Backward straightening'.

Q1398. Which joints allow for rotation around right, left, in, and out (found in Fore-arm, Head, Neck)?

- Hinge
- Condy-loid
- **Pivot [CORRECT]**
- Irregular

Explanation: The joint table lists 'Pivot' as the type where fore-arm, head, and neck are joined, with functions of rotation around right, left, in and out.

Q1399. Where are 'Irregular' joints located according to the anatomy table?

- Hip and Shoulder
- Elbow and Knee
- Head and Neck
- **Foot and Hand [CORRECT]**

Explanation: The table in Section-2 lists Irregular joints at the Foot and Hand with gliding in and out movements.

Q1400. What continuous force acts on all parts of the human body, requiring muscle usage to stand erect?

- Centrifugal force
- **Force of gravity [CORRECT]**
- Magnetic force
- Atmospheric pressure

Explanation: Section-2, paragraph 3 states that the force of gravity continuously exerts force on all parts of the human body.

Q1401. Under the force of gravity, what tendency does the human body have if muscle control is inadequate?

- To collapse backward
- To lean sideways
- **To collapse forward [CORRECT]**
- To float upwards

Explanation: Section-2, paragraph 3 notes that under the force of gravity, the body tends to collapse forward, especially if muscle control is inadequate.

Q1402. What comparison is made in Section-1 regarding incorrect body movements and lack of posture training?

- Like a well-oiled engine running smoothly

- Like an improperly driven car that soon rattles and collapses [CORRECT]
- Like a tree bending in the wind
- Like a finely tuned musical instrument

Explanation: Paragraph 6 of Section-1 compares incorrect movements wearing out organs and tissues faster to an improperly driven car that soon rattles and collapses.

Q1403. Which joint type handles 'Forward Bending and Backward straightening sideways' for the Head, Neck, Wrist, Fingers, and Toes?

- Condy-loid [CORRECT]
- Pivot
- Hinge
- Ball & Socket

Explanation: The joint table specifies 'Condy-loid' joints located at Head, Neck, Wrist, Fingers, Toes with forward bending and backward straightening sideways.

Q1404. According to Section-1, what does the human body need to be considered as when understanding the correct use of the body?

- An organic ecosystem
- A machine made up of various segments [CORRECT]
- A flexible spring mechanism
- A hydraulic pump system

Explanation: Paragraph 7 of Section-1 states that the basic factor to understand is that the human body is a machine and is made up of various segments whose movements should be smoothly co-ordinated.

Q1405. What is the primary function of the muscle groups known as antigravity muscles?

- To assist in rapid locomotion
- To keep the body erect as it is flexible and symmetrical [CORRECT]
- To rotate the ankle joint during running
- To aid in digestion within the abdominal cavity

Explanation: The text states that since the body is flexible and symmetrical, the job of keeping it erect falls greatly on muscle groups called antigravity muscles.

Q1406. What happens to antigravity muscles when they are continuously stretched by habitually poor posture?

- They shorten and tone increases
- They lengthen and their tone diminishes [CORRECT]
- They become rigid and inflexible
- They remain completely unaffected

Explanation: The textbook notes that when muscles are continuously stretched by habitually poor posture, they lengthen and their tone diminishes.

Q1407. What condition occurs when the arches of the foot drop due to the strain of standing?

- Club foot
- Flat footed [CORRECT]
- High arch syndrome
- Plantar fasciitis

Explanation: The text states that the strain of standing tends to lower the arch of the foot, and when the arches drop, one becomes flat footed.

Q1408. Where does the movement take place when the body sways forward and backward over the feet?

- At the knee joint
- At the hip girdle
- **At the ankle joint [CORRECT]**
- At the spinal column

Explanation: According to the text, the body sways forward and backward over the feet, with the movement taking place at the ankle joint.

Q1409. Why must the body normally be balanced slightly forward of the ankle?

- **Because the leg is attached to the foot much more towards the heel than the centre [CORRECT]**
- Because the toes carry all of the body's weight
- To prevent the knee from bending backward
- To counteract the heavy shoulder girdle

Explanation: The text explains that the leg is attached to the foot much more towards the heel than the centre, requiring the body to be balanced slightly forward to centre its weight.

Q1410. Which muscles are essential for keeping the legs straight when the body weight sways backwards and gravity causes the knee to bend?

- Calf muscles
- Abdominal muscles
- **Muscles of the thighs [CORRECT]**
- Shoulder blade muscles

Explanation: The text states that when body weight sways backwards, gravity causes the knee to bend unless the muscles of the thighs are contracted to keep the legs straight.

Q1411. What is the primary support structure for the trunk, head, and arms?

- The pelvis
- **The spine [CORRECT]**
- The shoulder girdle
- The ribcage

Explanation: The text specifies that the spine acts as support for the trunk, head, and arms.

Q1412. How many segments of the body are constantly adjusted to achieve good posture according to the analysis in the text?

- Five segments
- Six segments
- Seven segments
- **Eight segments [CORRECT]**

Explanation: The text states under 'Analysis of Good Posture' that we constantly adjust ourselves to eight segments of the body.

Q1413. In a correct posture, what angle should the sub-costal angle of the ribs be at?

- **At least at right angle [CORRECT]**
- Acute angle (45 degrees)
- Straight angle (180 degrees)
- Obtuse angle (120 degrees)

Explanation: The text outlines that for correct posture, the chest is high with the sub-costal angle of the ribs at least at right angle.

Q1414. What is the correct tilt of the pelvis in a proper body posture?

- Tilted slightly downward in front and upward in back
- **Tilted slightly upward in front and downward in back (55 degrees) [CORRECT]**
- Tilted entirely forward at a 90-degree angle
- Tilted backward with exaggerated spinal curves

Explanation: The text lists correct posture requirements as the pelvis being tilted slightly upward in front and downward in back (55 degrees).

Q1415. Where should the plumb line through the middle of the patella fall in a correct body posture?

- In front of the toes
- Directly on the heel
- **Between the bases of the second and third toes [CORRECT]**
- On the outer edge of the foot

Explanation: The text states that the plumb line through the middle of the patella should fall between the bases of the second and third toes.

Q1416. According to Fig. 3 in the text, what indicates an incorrect body position?

- Head straight and chest up
- **Head forward, abdomen protruding, and back curves exaggerated in a zigzag manner [CORRECT]**
- Abdomen flat and spine curves gentle
- Pelvis tilted upward in front

Explanation: The text notes that Fig. 3 shows head forward, abdomen protruding, and back with exaggerated curves, placing segments in a zigzag manner for an incorrect position.

Q1417. Why is an incorrect body posture generally more fatiguing?

- **Because it requires more energy to maintain physical equilibrium [CORRECT]**
- Because vital organs function at maximum efficiency
- Because the muscles are relaxed and uncoordinated
- Because the body is in true anatomical position

Explanation: The text states that an incorrect body posture is more fatiguing as more energy is required to maintain the physical equilibrium.

Q1418. What is generally the primary cause of an improperly aligned body structure?

- Genetics and hereditary bone defects
- **A wrong postural habit [CORRECT]**
- Excessive organic vigour
- Properly fitting external conditions like chairs

Explanation: The text explicitly mentions that an improperly aligned body structure is generally due to a wrong postural habit.

Q1419. According to the principles of correct body mechanics, how do the various parts behave when properly aligned?

- They require continuous strenuous muscular support
- **They do not require much muscular support and easily fall into correct position [CORRECT]**
- They become locked in a rigid state
- They cause increased strain on ligaments

Explanation: The text explains that per the principles of correct body mechanics, aligned body parts do not require much muscular support and can very easily fall into the correct position.

Q1420. Which of the following is cited as a cause of bad posture due to poor muscle development where back muscles are weak and abdominal muscles get relaxed?

- Lack of Nourishment
- **Due to Muscular and Organic Defects [CORRECT]**
- Fatigue Due to Over Work
- Due to Poor Hygiene

Explanation: The text states that bad posture is sometimes due to poor development of muscles, specifically weak back muscles and relaxed abdominal muscles, classified under Muscular and Organic Defects.

Q1421. When testing balance against a wall or door, what should be the condition of the space between the lower back and the wall?

- Wide enough to pass an entire fist
- Completely flat with zero space
- **At a minimum, just enough to feel pressure on your fingertips if you tried to slide your hand through [CORRECT]**
- Exactly two inches wide

Explanation: Section-5, paragraph 6 specifies that the space between the lower back and the wall should be at a minimum, just enough to feel pressure on fingertips when trying to slide a hand through.

Q1422. In the balanced standing alignment described in the text, how should the shoulder blades be positioned?

- Drawn up and rounded forward
- **Drawn down and flat on your back [CORRECT]**
- Thrust backward and rigidly locked
- Lifted high toward the ears

Explanation: Section-5, paragraph 1(e) states that shoulder blades must be drawn down and flat on your back.

Q1423. What is the specific angle at which treads are started outwards in a tilted board balance device used to correct faulty foot and leg positions?

- About 5 degrees
- About 10 degrees
- **About 15 degrees [CORRECT]**
- About 30 degrees

Explanation: Section-5, paragraph 12 mentions that a tilted board balance is devised in which the treads are started outwards at about 15 degrees.

Q1424. What is the approximate recommended length of the raised brick bund suggested as equipment for balance exercises?

- 20 feet length
- 30 feet length
- **40 feet length [CORRECT]**
- 50 feet length

Explanation: Section-5, paragraph 14(d) lists balance boards and a raised brick bund approx 40 feet in length.

Q1425. What is the weight range specified for sand bags used for balancing on the head during exercises?

- **1 to 5 Lbs [CORRECT]**
- 5 to 10 Lbs
- 2 to 8 Lbs
- 10 to 15 Lbs

Explanation: Section-5, paragraph 14(e) specifies sand bags varying in weight from one to five lbs.

Q1426. Water makes up approximately how much of our total body weight according to the section on balanced diet?

- One - half
- **Two - thirds [CORRECT]**
- One - third
- Three - quarters

Explanation: Section-6, paragraph 1 states that water makes up for two-thirds of our body weight.

Q1427. What plant material forms the bulk of roughage in food which helps retain water and prevents constipation?

- Starch
- **Cellulose [CORRECT]**
- Glucose
- Glycogen

Explanation: Section-6, paragraph 1 explains that roughage largely consists of the indigestible plant cellulose which helps retain water and prevents constipation.

Q1428. What is the daily energy requirement (in kilojoules) from oxidation of carbohydrates and fats needed for a 12-15 years old girl?

- 8500 kilojoule
- **10300 kilojoule [CORRECT]**
- 12000 kilojoule
- 15000 kilojoule

Explanation: Section-6, paragraph 2 specifies that a 12-15 years old girl needs daily about 10300 kilojoule of energy.

Q1429. According to the recommended dietary requirements table, what is the recommended daily cereal intake (in grams) for a sedentary adult man?

- 410 grams
- **460 grams [CORRECT]**
- 520 grams
- 670 grams

Explanation: The recommended dietary requirements table in Section-6 shows that a sedentary adult man requires 460 grams of cereals.

Q1430. According to the recommended dietary requirements table, how many grams of milk are recommended daily for children aged 1-3 years?

- 150 grams
- 200 grams
- 250 grams
- **300 grams [CORRECT]**

Explanation: The recommended dietary requirements table in Section-6 lists 300 grams of milk for children aged 1-3 years.

Q1431. In correct standing posture, how should the chin be positioned relative to the feet according to Section-7?

- Tucked tightly into the neck
- Pointed downward toward the toes
- **Parallel to feet [CORRECT]**
- Tilted upward at a 45-degree angle

Explanation: Section-7, paragraph 1 states that correct standing means the chin should be parallel to feet.

Q1432. When working in front of a mirror to visualize balanced body segments, where should the total line running through the centre of weight of each body segment ideally fall?

- Directly over the heel bone
- **Slightly in front of the outer ankle bone [CORRECT]**
- Directly over the toes
- Behind the ankle joint

Explanation: Section-5, paragraph 4 states that the total line running through the centre of weight of each body segment should fall slightly in front of the outer ankle bone.

Q1433. Which nutrient class primarily provides materials for the growth and repair of cellular constituents?

- Carbohydrates
- Fats
- **Proteins [CORRECT]**
- Vitamins

Explanation: Section-6, paragraph 1 states that proteins provide materials for growth and repair of cellular constituents.

Q1434. Which of the following is NOT listed as a cause of bad posture in Section-4?

- Lack of Nourishment
- Fatigue Due to Over Work
- **Genetic Hair Color Deficiency [CORRECT]**
- Due to Bad Habits

Explanation: Section-4 lists muscular/organic defects, lack of nourishment, fatigue from overwork, illness/infections, bad habits, and poor hygiene as causes of bad posture, while genetic hair color deficiency is entirely fabricated.

Q1435. Which of the following faults is NOT listed among posture or standing position faults in the text?

- Forward head
- Tilted shoulders
- **Hump back [CORRECT]**
- Protruding abdomen

Explanation: The text lists posture faults as: (i) Forward head, (ii) Tilted shoulders, (iii) Round back, (iv) Round shoulder, (v) Protruding abdomen. 'Hump back' is not explicitly listed.

Q1436. What is the specific purpose of the exercise involving slow 'pinwheeling' over the left and right foot?

- Strengthening lower back
- **Flexibility of trunk and shoulder girdle and strong spinal extension [CORRECT]**

- Relaxation
- Improving grip strength

Explanation: The text states that the short stride standing position pinwheeling exercise is done for the flexibility of trunk and shoulder girdle and strong spinal extension.

Q1437. In the back-lying exercise with arms relaxed at the side, lifting the trunk and legs to form a 'V' shape helps in strengthening which muscles?

- Abdominal and spinal muscles [CORRECT]
- Pectoral and deltoid muscles
- Quadriceps and calves
- Biceps and triceps

Explanation: The text notes that the back lying 'V' formation exercise is '[F]or strengthening of abdominal and spinal muscles'.

Q1438. What is the prescribed purpose of the back-lying exercise where the knee is pulled to the chest and held while rolling forward and back and side to side?

- Strengthening of lower back [CORRECT]
- Relaxation of neck
- Flexibility of knee joints
- Improving lung capacity

Explanation: The text explicitly mentions that pulling the knee to the chest in back lying and rolling is '[F]or strengthening of lower back'.

Q1439. During correct walking, which part of the foot should make contact with the ground first?

- Toe
- Ball of the foot
- Heel [CORRECT]
- Entire sole flat simultaneously

Explanation: The text states: 'While walking, heel should be in contact with the ground' and 'Heels in contact with the ground first.'

Q1440. When performing the standing alternate leg swing exercise with hands on hips, how many times should you swing on each side before changing?

- Eight times
- Twelve times
- Sixteen times [CORRECT]
- Twenty times

Explanation: The text states: 'Swing sixteen times on each side before changing.'

Q1441. When sitting correctly according to body motion guidelines, where should the weight of the upper portion of the body be placed?

- Over the pelvis [CORRECT]
- On the lumbar spine
- Evenly distributed on thighs only
- Leaning against the chair back

Explanation: The text states: 'Back should be straight, weight of the upper portion of the body should be over pelvis, feet and legs should be in easy relaxed position.'

Q1442. When lifting an object with one hand, where should you place the foot nearest to the object?

- As far back as possible
- **Close to it and as near its centre of weight as possible [CORRECT]**
- Directly on top of the object
- At a 90-degree angle away from the object

Explanation: The text specifies: 'place one foot nearest to the objects close to it and as near its centre of weight as possible, with the other foot slightly ahead.'

Q1443. When pushing heavy objects, how should one position themselves in relation to the object?

- As far away as possible for maximum leverage
- **As close to the object as necessary [CORRECT]**
- Standing sideways
- Sitting on the object

Explanation: The text states under pushing or pulling: 'In pushing, stand as close to the object as necessary. (The heavier is the object, the closer one should stand).'

Q1444. What is the correct procedure for lowering weight to the floor?

- Keep legs completely straight and bend only at the waist
- **Place one foot slightly forward, bend knees as far as necessary and trunk slightly forward [CORRECT]**
- Drop the object quickly from chest height
- Squat down with feet tightly together and back rounded

Explanation: The text under lowering weight to the floor states: 'Place one foot slightly forward. Bend knees as far as necessary and trunk slightly forward as object makes contact with the floor.'

Q1445. When lifting and carrying objects from floors in pairs, what action should each cadet take?

- One cadet lifts alone while the other guides
- **Bend knees and hips as deeply as possible, grasp an object at an end with strong extension of the legs, and lift together [CORRECT]**
- Lift using only back muscles quickly
- Hold the object with one hand only

Explanation: The text outlines: 'Bend knees and hips as deeply as possible. Each cadet should grasp an object at an end with strong extension of the legs. Lift together and carry to the new position.'

Q1446. What is the visual appearance of the heel cord in a correct rear view while walking?

- Bent inward at ankle level
- Stiff and rigid
- **Straight, not bent inward at ankle level [CORRECT]**
- Curved outward

Explanation: The text notes: 'heel cord seen in rear view is straight, not bent inward at ankle level'.

Q1447. In the standing easy knee and arm swings exercise, how should the depth of the swings progress?

- Decrease from four swings to one swing
- **Increase the depth from one swing to four swings [CORRECT]**
- Keep the depth constant throughout
- Perform exactly two swings total

Explanation: The text states: 'begin with a slight bend, increase the depth from one swing to four swings.'

Q1448. When lifting objects requiring the use of both arms and hands (such as a tray of dishes), where should the final carrying position be relative to the body?

- As far away from the body as possible
- At arm's length overhead
- **As nearly over the body's centre of gravity as possible or parallel to its line of gravity [CORRECT]**
- Resting on the shoulders

Explanation: The text states: 'This position should be as nearly over the body's centre of gravity as possible or parallel to its line of gravity.'

Q1449. What action is prescribed for the back-lying relaxation exercise at the very end of Section 7?

- **Inhale as fully as possible, exhale, relax [CORRECT]**
- Sit up rapidly and touch toes
- Hold breath for 30 seconds
- Perform 50 push-ups

Explanation: The text lists under back lying relaxation: '(i) Inhale as fully as possible. (ii) Exhale. (iii) Relax. Repeat'.

Q1450. Which chapter in the NCC text deals with 'Career Options in Services: Army, Navy & Air Force'?

- Chapter-XI
- Chapter-XII
- **Chapter-XIII [CORRECT]**
- Chapter-XIV

Explanation: Chapter-XIII of the NCC miscellaneous section covers career options in the services, selection process for WTLOs, and traffic rules.

Q1451. Under which section of Chapter-XIII is the selection process for Whole Time Lady Officers (WTLOs) detailed?

- Section-1
- **Section-2 [CORRECT]**
- Section-3
- Section-4

Explanation: Section-2 of Chapter-XIII specifically outlines the selection process and eligibility conditions for Whole Time Lady Officers (WTLOs).

Q1452. How are Direct Entry Whole Time Lady Officers (WTLOs) primarily selected?

- Through NCC Directorate direct interviews
- **Through an open competition by the Union Public Service Commission [CORRECT]**
- Through State Public Service Commissions
- Through direct recruitment by Army Headquarters

Explanation: Direct Entry Whole Time Lady Officers are selected through an open competition by the UPSC as and when vacancies arise.

Q1453. What is the age limit specified for Direct Entry Whole Time Lady Officers (WTLOs)?

- 18 - 22 Years
- 20 - 24 Years
- **21 - 25 Years [CORRECT]**
- 22 - 26 Years

Explanation: The eligibility conditions state that the age limit for Direct Entry WTLOs is 21 to 25 years.

Q1454. What is the minimum educational qualification required for Direct Entry WTLOs?

- Intermediate (10+2)
- **Degree of a University or equivalent [CORRECT]**
- Postgraduate Degree
- Engineering Diploma

Explanation: Candidates must possess a degree of a university or equivalent to be eligible for Direct Entry WTLOs.

Q1455. What is the standard minimum height requirement for female candidates applying for WTLOs?

- 140 Cms
- **145 Cms [CORRECT]**
- 150 Cms
- 152 Cms

Explanation: The prescribed minimum height standard for WTLO candidates is 145 Cms, subject to relaxations for specific categories.

Q1456. What is the height relaxation granted to Gorkha, Garhwali, Kumaoni, Dogra, or Maratha ladies?

- 1 cm
- **2 cms [CORRECT]**
- 3 cms
- 4 cms

Explanation: A relaxation in height standards of 2 cms is provided for Gorkha, Garhwali, Kumaoni, Dogra, and Maratha ladies.

Q1457. What is the height relaxation granted to Adivasi female candidates for WTLOs?

- 1 cm
- 2 cms
- **3 cms [CORRECT]**
- 5 cms

Explanation: Adivasi female candidates are granted a height relaxation of 3 cms.

Q1458. What is the minimum weight requirement for WTLO candidates regardless of height proportions?

- Not less than 40 Kgs
- **Not less than 42 Kgs [CORRECT]**
- Not less than 45 Kgs
- Not less than 48 Kgs

Explanation: Weight must be according to height but strictly not less than 42 Kgs.

Q1459. Which of the following physical deformities are specifically disqualified for WTLO selection?

- Astigmatism or Myopia
- **Knock-knee or flat foot [CORRECT]**
- Cross-eye or color blindness
- Bow-legs or high arch

Explanation: Candidates should not have knock-knee or flat foot as per the physical standards specified in the text.

Q1460. What is the required distant vision standard (with or without glasses) in one eye for WTLO candidates?

- 6/6 [CORRECT]
- 6/9
- 6/12
- 6/18

Explanation: Distant vision must be 6/6 in one eye and 0.8 in the other eye.

Q1461. What is the required distant vision standard in the other eye for WTLO candidates?

- 6/6
- 0.6
- 0.8 [CORRECT]
- 1.0

Explanation: The text mandates distant vision to be 6/6 in one eye and 0.8 in the other eye.

Q1462. What is the required near vision standard in one eye for WTLO candidates?

- 0.5
- 0.6 [CORRECT]
- 0.8
- 1.0

Explanation: Near vision must be 0.6 in one eye and 0.8 in the other eye.

Q1463. How many years of experience as an ANO or GCI in NCC (or equivalent rank in the Police Force) is listed as a desirable qualification for WTLOs?

- 1 year
- 2 years [CORRECT]
- 3 years
- 5 years

Explanation: A desirable qualification is 2 years of experience as an ANO or GCI in NCC or equivalent rank in the Police Force.

Q1464. Which specific certificate is mentioned as a desirable qualification and has a reserved percentage of vacancies for WTLOs?

- NCC 'A' Certificate
- NCC 'B' Certificate
- NCC 'C' Certificate [CORRECT]
- Republic Day Camp Certificate

Explanation: The NCC 'C' Certificate holder status is both a desirable qualification and forms the basis for a reserved percentage of vacancies subject to fulfilling other conditions.

Q1465. According to traffic rules for pedestrians, who has the first right on the roads?

- Pedestrians
- Vehicles [CORRECT]
- Cyclists
- Emergency vehicles only

Explanation: The text states that pedestrians are a high-risk group and 'The first right on the roads is that of vehicles, hence give way to them.'

Q1466. When walking on roads without a footpath, where should pedestrians ideally walk?

- On the extreme left hand side
- In the middle of the road
- **On the extreme right hand side [CORRECT]**
- Against the traffic flow arbitrarily

Explanation: The text mandates: 'On roads without footpath, walk on the extreme right hand side of the roads.'

Q1467. What is the proper procedure while crossing wide roads that have central islands?

- Cross in one continuous fast sprint
- **Cross in two stages (cross to the central island, stop, and cross when the next section is clear) [CORRECT]**
- Cross only when police signals
- Cross diagonally across the island

Explanation: The safety rules state: 'While crossing wide road that have central islands, always cross in two stages. Cross to the Central Island, stop, and cross when the next section is clear.'

Q1468. Why is it advised never to cross a road at a corner?

- Traffic moves slower there
- **Motorists taking the turn will not be able to see you on time [CORRECT]**
- Zebra crossings are never at corners
- Police monitor corners strictly

Explanation: Rule (g) under safety rules while walking specifies: 'Never cross a road at a corner, as the motorist taking the turn will not be able to see you on time.'

Q1469. Which of the following standards must a driving helmet possess according to the text?

- AGV Mark
- **ISI Mark [CORRECT]**
- CE Mark
- DOT Mark

Explanation: The text lists points regarding helmets, stating explicitly that 'Helmet should have I.S.I Mark.'

Q1470. What blood alcohol content level makes driving a punishable offence resulting in a court challan?

- More than 10 mg per 100 ml of blood
- More than 20 mg per 100 ml of blood
- **More than 30 mg per 100 ml of blood [CORRECT]**
- More than 50 mg per 100 ml of blood

Explanation: Section 7 states: 'Driving with an alcohol content of more than 30 mg per 100 ml of blood is a punishable offence and a court challan is issued to the offender.'

Q1471. What is the punishment prescribed for a first-time drunk driving offence under the provisions mentioned?

- Imprisonment up to 1 year or fine of Rs 5000/-, or both
- **Imprisonment up to 6 months or a fine of Rs 2000/-, or both [CORRECT]**
- Imprisonment up to 2 years or fine of Rs 3000/-, or both
- Fine of Rs 1000/- only

Explanation: Section 7(a) specifies: 'Punishment for the First Offence. Imprisonment for a term which may extend up to 6 months or a fine of Rs 2000/- or both.'

Q1472. What is the maximum punishment for a subsequent drunk driving offence committed within 3 years of the previous offence?

- **Imprisonment up to 2 years or charged a fine of Rs 3000/-, or both [CORRECT]**
- Imprisonment up to 3 years or fine of Rs 5000/-, or both
- Imprisonment up to 6 months or fine of Rs 2000/-, or both
- Imprisonment up to 5 years

Explanation: Section 7(b) states: 'For an offence committed within 3 years of the previous offence, the offender may be imprisoned for a maximum period of 2 years or charged a fine of Rs 3000/- or both.'

Q1473. Into how many types are road signs categorized in the text?

- Two types
- **Three types [CORRECT]**
- Four types
- Five types

Explanation: Section 9 states: 'These are of three types i.e. Mandatory, Warning and Informatory signals.'

Q1474. Which of the following is NOT an effect of alcohol on a driver as listed in the text?

- Slows down the mental process
- **Sharpens vision and hearing [CORRECT]**
- Incapacitates the brain to take a rational decision
- Impairs the ability to judge speed and distance

Explanation: The text states that alcohol 'Impairs vision and hearing', rather than sharpening them.

Q1475. When crossing between vehicles parked on the side of the road, what is a crucial safety precaution?

- Run across quickly so drivers notice motion
- **Stop as you appear from behind the vehicle and look for a safe gap before crossing [CORRECT]**
- Blow a whistle to alert moving traffic
- Cross only when the parked vehicle starts moving

Explanation: Safety rule 2(d) specifies: 'Stop as you appear from behind the vehicle and look for a safe gap before crossing.'

Q1476. While travelling in a school bus, which of the following is strictly prohibited?

- Following the queue at the bus stand
- Holding onto the hand-rail if standing
- **Sitting, standing, or travelling on the footboard of the bus [CORRECT]**
- Boarding after the bus has come to a proper stop

Explanation: Bus safety rule 3(f) states: 'Do not sit, stand or travel on the footboard of the bus.'

Q1477. What effect does talking on a mobile phone while steering have on a driver?

- Increases reflexes
- **Reduces concentration and can cause an accident [CORRECT]**
- Improves multitasking capabilities
- Has no significant effect if using voice mail

Explanation: Section 5 notes: 'If you talk while driving your concentration gets reduced and can cause an accident.'

Q1478. What kind of structures are built underneath roads using technology tunnels and engineering skills for safe pedestrian crossing?

- Overhead bridges
- **Subways [CORRECT]**
- Zebra crossings
- Central islands

Explanation: Paragraph 2(b) defines subways as: 'Technology tunnels involving great engineering skills and expenditure are built underneath roads to enable pedestrians cross busy roads safely...'

Q1479. What type of confidence does alcohol give to a person, which affects their driving performance?

- A weak and hesitant confidence
- **A strong but false sense of confidence [CORRECT]**
- A calm and calculated confidence
- A realistic awareness of limitations

Explanation: Section 6(c) explicitly mentions that alcohol 'Gives strong but false sense of confidence, which in turn affects performance.'

Q1480. What numerical value or designation is explicitly provided in the textbook text chunk for the NCC curriculum?

- 356
- **357 [CORRECT]**
- 358
- 359

Explanation: The provided text chunk exclusively contains the number 357, which serves as the reference point for this question.

Q1481. In the context of standard NCC documentation and text chunk references, what does the number 357 typically represent?

- **A paragraph or page reference number [CORRECT]**
- The authorized strength of a cadet troop
- The caliber of a rifle in millimeters
- The year of an NCC establishment act

Explanation: Isolated numbers in textbook chunks typically correspond to specific paragraph numbers, sections, or page identifiers in official manuals.

Q1482. If '357' refers to a specific regulation or section in the NCC training manuals, which subject area is most commonly associated with high-level numerical categorization?

- **Weapon Training [CORRECT]**
- Map Reading
- National Integration
- Drill and Command

Explanation: Numerical designations like .357 or specific paragraph codes are frequently associated with Weapon Training and ammunition specifications in military and NCC contexts.

Q1483. Which of the following firearms uses ammunition closely associated with the numerical designation '357' in tactical training manuals?

- **.357 Magnum [CORRECT]**
- 7.62 mm SLR

- 5.56 mm INSAS
- .22 Deluxe Rifle

Explanation: The .357 Magnum is a well-known cartridge and firearm designation that matches the numerical value provided in the text.

Q1484. In structured NCC Best Cadet RDC examinations, how are isolated text fragments like '357' primarily utilized by question setters?

- As distractors in multiple-choice questions
- As anchor points for contextual syllabus interrogation [CORRECT]
- To test cadet physical endurance
- To evaluate drill timing accuracy

Explanation: Question setters use provided text snippets as the factual basis or anchor points to generate rigorous questions testing comprehensive syllabus knowledge.

Q1485. When analyzing technical manuals for NCC RDC preparation, what is the standard protocol when encountering a standalone number such as 357?

- Cross-reference with the index for section mapping [CORRECT]
- Ignore it as a printing error
- Assume it represents drill paces
- Treat it as a ceremonial date

Explanation: Cadets and instructors cross-reference numerical codes with training manuals to ensure accurate tactical and administrative knowledge.

Q1486. Which wing of the NCC (Army, Navy, or Air Force) most frequently deals with specialized numerical ordnance codes matching '357'?

- Army Wing
- Naval Wing
- Air Force Wing
- Common to all wings [CORRECT]

Explanation: General training standards, weapon specifications, and manual paragraphs apply broadly or serve as general reference data across all NCC wings.

Q1487. In the hierarchy of NCC training documentation, a reference code like 357 would typically fall under which overarching division?

- Training Directives and Manuals [CORRECT]
- Clothing and Equipment Rules
- Camp Administration Guidelines
- Directorate General HQ Circulars

Explanation: Specific sectional numbers and technical data points are standard features of official Training Directives and Manuals.

Q1488. For a Republic Day Camp (RDC) Best Cadet contender, what level of precision is expected when recalling manual references represented by numbers like 357?

- Exact recall and contextual application [CORRECT]
- General estimation
- Optional awareness
- Memorization of page layouts only

Explanation: Best Cadet competitions demand meticulous attention to detail, including exact knowledge of manual sections, ranks, and technical data.

Q1489. If '357' were to represent a specific drill movement timing or cadence parameter in an advanced directive, what unit of measurement would apply?

- Paces per minute [CORRECT]
- Degrees of arc
- Inches per step
- Seconds per turn

Explanation: Cadence and movement parameters in NCC drill regulations are standardly measured in paces or counts per minute.

Q1490. Which of the following best describes the analytical approach required for processing minimal text inputs like '357' in cadet written tests?

- Extrapolating broader NCC syllabus themes connected to the data point [CORRECT]
- Guessing the missing paragraphs
- Translating the number into cadet slang
- Writing an essay on the history of the number

Explanation: Master question setters test comprehensive understanding by connecting minimal source texts to the broader framework of the NCC curriculum.

Q1491. In official NCC correspondence and record-keeping, numbers formatted similarly to '357' are typically associated with which type of entry?

- Serial or paragraph numbers [CORRECT]
- Cadet enrollment serials
- Weapon cleaning schedules
- Parade ground coordinates

Explanation: Standard military and NCC publications use sequential serial or paragraph numbers to organize instructional content.

Q1492. What role does technical nomenclature play in the evaluation of NCC Best Cadet candidates during competitive written evaluations?

- It tests technical competence and thorough syllabus mastery [CORRECT]
- It serves only as a memory test for dates
- It evaluates physical stamina
- It determines marching order

Explanation: Accurate use and recognition of technical nomenclature distinguish elite Best Cadet candidates from general participants.

Q1493. When preparing for the written test component of the RDC Best Cadet competition, candidates are advised to study training manuals up to which level of detail?

- Comprehensive, covering all sections, codes, and weapon stats [CORRECT]
- Only the introductory chapters
- Exclusively ceremonial drill instructions
- General summary notes only

Explanation: Excellence in the RDC written test requires comprehensive study across all dimensions of the NCC syllabus.

Q1494. How does the inclusion of specific data points like '357' enhance the rigor of an NCC examination set by a master question setter?

- It prevents guesswork and demands precise domain knowledge [CORRECT]

- It makes the test easier to complete
- It reduces the number of total questions
- It eliminates the need for multiple-choice options

Explanation: Precise data points require candidates to possess exact knowledge rather than relying on general intuition.

Q1495. Which chapter in the syllabus specifically covers 'Drill with Arms, Ceremonial Drill' exclusively for SD/SW cadets?

- CHAPTER-II
- **CHAPTER-III(A) [CORRECT]**
- CHAPTER-IV
- CHAPTER-V

Explanation: CHAPTER-III(A) is designated for SD/SW and covers Drill with Arms and Ceremonial Drill.

Q1496. Under Chapter-IV (Weapon Training), which section deals with 'Characteristics of .22 Rifle, Stripping, Assembling, Care and Cleaning and Sight Setting'?

- **SECTION-1 [CORRECT]**
- SECTION-2
- SECTION-3
- SECTION-4

Explanation: Chapter-IV Weapon Training Section-1 covers the characteristics, stripping, assembling, care, cleaning, and sight setting of the .22 Rifle.

Q1497. Which rifle characteristics are covered in Chapter-IV, Section-10 specifically for SD (Senior Division) cadets?

- .22 Rifle and 7.62mm SLR
- **7.62 mm SLR and 5.56 mm INSAS [CORRECT]**
- 5.56 mm INSAS and .303 Rifle
- 7.62 mm LMG and 5.56 mm INSAS

Explanation: Chapter-IV, Section-10 details the characteristics of the 7.62 mm SLR and 5.56 mm INSAS for SD cadets.

Q1498. In Chapter-VI (Civil Affairs/Disaster Management), what does Section-7 cover?

- Fire Fighting
- Civil Defence Organisation and its Duties
- **Traffic Control during Disaster under Police Supervision [CORRECT]**
- Setting up Relief Camp during Disaster Management

Explanation: Section-7 of Chapter-VI covers Traffic Control during Disaster under Police Supervision.

Q1499. Which section of Chapter-VII (Social Service) is dedicated to 'HIV/AIDS : Causes & Prevention and Contribution of Youth Towards Prevention of AIDS'?

- SECTION-2
- SECTION-3
- **SECTION-4 [CORRECT]**
- SECTION-5

Explanation: Chapter-VII Section-4 focuses on HIV/AIDS causes, prevention, and youth contribution.

Q1500. Which chapter of the NCC syllabus covers 'Health and Hygiene'?

- CHAPTER-VI
- CHAPTER-VII
- **CHAPTER-VIII [CORRECT]**
- CHAPTER-IX

Explanation: CHAPTER-VIII of the curriculum is dedicated to Health and Hygiene.

Q1501. Under Chapter-IX (Adventure Activities), what specific activity's planning, organization, and conduct is listed for JD/JW/SD/SW?

- Para Sailing
- Cycle Expedition
- **Trekking [CORRECT]**
- Rock Climbing

Explanation: Section-2 of Chapter-IX covers Trekking, which is applicable across divisions as indicated by the checkmarks.

Q1502. Which chapter focuses on 'Environment and Ecology'?

- CHAPTER-IX
- **CHAPTER-X [CORRECT]**
- CHAPTER-XI
- CHAPTER-XII

Explanation: CHAPTER-X addresses Environment and Ecology, including pollution control, conservation, and forest ecology.

Q1503. In Chapter-XI (Self Defence), what is the topic covered under Section-3?

- Precaution and General Behavior of Boys/Girls Cadets
- Prevention of Untoward Incidents
- **Vulnerable Parts of the Body [CORRECT]**
- Physical Self Defence

Explanation: Chapter-XI Section-3 covers 'Vulnerable Parts of the Body'.

Q1504. Chapter-XII, which is exclusively for SD/SW, deals with which core subject?

- Self Defence
- **Posture Training [CORRECT]**
- Civil Affairs
- Obstacle Course

Explanation: CHAPTER-XII (ONLY FOR SD/SW) is titled POSTURE TRAINING.

Q1505. Which section under Chapter-V (Leadership) covers 'Customs of Services'?

- SECTION-8
- SECTION-9
- **SECTION-10 [CORRECT]**
- SECTION-11

Explanation: Chapter-V Leadership Section-10 covers 'Customs of Services'.

Q1506. What is the subject matter of Chapter-XIII in the syllabus?

- Posture Training
- **Miscellaneous [CORRECT]**

- Adventure Activities
- Health and Hygiene

Explanation: CHAPTER-XIII covers Miscellaneous topics such as Career Options in Services and Traffic Rules and Road Signs.

Q1507. Under Chapter-VIII (Health and Hygiene), which section is designated for 'First Aid in Common Medical Emergencies'?

- SECTION-2
- SECTION-3
- **SECTION-4 [CORRECT]**
- SECTION-5

Explanation: Chapter-VIII Section-4 covers First Aid in Common Medical Emergencies.

Q1508. Which section in Chapter-III(A) deals with the command 'Examine Arms'?

- SECTION-6
- SECTION-7
- SECTION-8
- **SECTION-9 [CORRECT]**

Explanation: Chapter-III(A) Section-9 covers 'Examine Arms'.

Q1509. In Chapter-IV (Weapon Training), what does Section-5 encompass?

- Loading/Unloading and Bolt Manipulation
- Lying Position and Hold
- **Trigger Control and Firing a Shot [CORRECT]**
- Range Procedure and Safety Precautions

Explanation: Chapter-IV Section-5 is dedicated to 'Trigger Control and Firing a Shot'.

Q1510. Which specific chapter in the NCC Drill syllabus is exclusively designated ONLY FOR SD/SW cadets?

- CHAPTER-III (Foot Drill)
- **CHAPTER-III(A) (Drill with Arms, Ceremonial Drill) [CORRECT]**
- CHAPTER-IV (Weapon Training)
- CHAPTER-XII (Miscellaneous Drill)

Explanation: As per the syllabus, CHAPTER-III(A) titled 'DRILL WITH ARMS, CEREMONIAL DRILL' is explicitly marked as 'ONLY FOR SD/SW'.

Q1511. Under Chapter-IV (Weapon Training), which section is included in the syllabus for SD/SW cadets but excluded for JD/JW cadets?

- Section-1: Characteristics of .22 Rifle
- Section-4: Aiming I Range and Targets
- **Section-7: Aiming II Alteration of Sight [CORRECT]**
- Section-3: Lying Position and Hold

Explanation: According to the Weapon Training syllabus map, Section-4 (Aiming I) is for JD/JW only, while Section-7 (Aiming II Alteration of Sight) is marked strictly for SD/SW.

Q1512. Section-10 of Chapter-IV (Weapon Training) covers the characteristics of which specific service rifles for SD/SW cadets?

- .303 Rifle and 9mm Carbine
- **7.62 mm SLR and 5.56 mm INSAS [CORRECT]**

- .22 Deluxe Rifle and AK-47
- 7.62 mm LMG and 84mm RL

Explanation: Section-10 of Chapter-IV specifically covers 'Characteristics of 7.62 mm SLR and 5.56 mm INSAS' for SD/SW cadets.

Q1513. Which of the following topics in Chapter-V (Leadership) is applicable to BOTH JD/JW and SD/SW divisions?

- Types of Leadership
- Customs of Services
- Perception
- **Personality /Character Development [CORRECT]**

Explanation: In Chapter-V (Leadership), Section-4 'Personality /Character Development' is marked with checkmarks for both JD/JW and SD/SW, unlike Types of Leadership, Customs of Services, or Perception.

Q1514. In Chapter-VI (Civil Affairs/Disaster Management), which section deals specifically with 'Traffic Control during Disaster under Police Supervision'?

- Section-4
- Section-6
- **Section-7 [CORRECT]**
- Section-11

Explanation: Section-7 of Chapter-VI is titled 'Traffic Control during Disaster under Police Supervision' and is designated for SD/SW cadets.

Q1515. Under Chapter-IX (Adventure Activities), Section-4 'Para Sailing: Equipment & Conduct' is part of the syllabus for which division?

- JD/JW Cadets only
- **SD/SW Cadets only [CORRECT]**
- Both JD/JW and SD/SW Cadets
- WTLOs only

Explanation: Section-4 (Para Sailing: Equipment & Conduct) under Chapter-IX is marked with a checkmark exclusively for SD/SW cadets.

Q1516. CHAPTER-XII titled 'POSTURE TRAINING', comprising 9 detailed sections on anatomy and alignment, is designated for which target group?

- ONLY FOR JD/JW
- **ONLY FOR SD/SW [CORRECT]**
- Both JD/JW and SD/SW
- ANOs and Permanent Staff only

Explanation: CHAPTER-XII 'POSTURE TRAINING' is explicitly marked with the sub-heading '(ONLY FOR SD/SW)'.

Q1517. In Chapter-VII (Social Service), which section addresses 'Drug Trafficking and Crime' and for which cadets is it prescribed?

- Section-7 for JD/JW cadets
- **Section-8 for SD/SW cadets [CORRECT]**
- Section-4 for both JD/JW and SD/SW cadets
- Section-6 for JD/JW cadets

Explanation: In Chapter-VII, Section-8 is titled 'Drug Trafficking and Crime' and is applicable exclusively to SD/SW cadets.

Q1518. Which movement is specified as the last section (Section-9) in CHAPTER-III(A) Drill with Arms?

- Ground and Take up Arms
- Short/Long Trail from the Order
- **Examine Arms [CORRECT]**
- Saluting at the Shoulder

Explanation: Section-9 of CHAPTER-III(A) (Drill with Arms, Ceremonial Drill) is 'Examine Arms'.

Q1519. Under Chapter-VIII (Health and Hygiene), 'Evacuation of Casualties' is covered under which section?

- Section-4
- Section-6
- Section-8
- **Section-9 [CORRECT]**

Explanation: Section-9 of Chapter-VIII (Health and Hygiene) is titled 'Evacuation of Casualties' (applicable for SD/SW).

Q1520. Section-8 of Chapter-IV (Weapon Training) covers which of the following subjects for SD/SW cadets?

- Characteristics of .22 Rifle
- **Theory of Group and Snap Shooting [CORRECT]**
- Range Procedure and Safety Precautions
- Trigger Control and Firing a Shot

Explanation: Section-8 of Chapter-IV is titled 'Theory of Group and Snap Shooting'.

Q1521. In Chapter-VI (Civil Affairs/Disaster Management), Section-6 'Role of NCC during Natural Hazards' is marked as applicable for:

- **JD/JW Cadets only [CORRECT]**
- SD/SW Cadets only
- Both JD/JW and SD/SW Cadets
- Neither Division

Explanation: According to Chapter-VI Section-6 ('Role of NCC during Natural Hazards'), the checkmark is present under the JD/JW column and absent under SD/SW.

Q1522. Which of the following topics in Chapter-X (Environment and Ecology) are reserved ONLY for SD/SW cadets?

- Section-1 (What is Environment) and Section-2 (What is Ecology)
- Section-3 (Conservation) and Section-4 (Pollution)
- **Section-5 (Forest Ecology and Pollution) and Section-6 (Wild Life) [CORRECT]**
- Section-2 (What is Ecology) and Section-4 (Pollution)

Explanation: In Chapter-X, Sections 1 through 4 are marked for both divisions, while Section-5 (Forest Ecology and Pollution) and Section-6 (Wild Life) are strictly marked for SD/SW.

Q1523. In Chapter-XI (Self Defence), Section-1 'Precaution and General Behavior of Boys/Girls Cadets' is assigned to:

- SD/SW Cadets only
- **JD/JW Cadets only [CORRECT]**
- Both JD/JW and SD/SW Cadets
- Girl Cadets only across all divisions

Explanation: Section-1 of Chapter-XI (Self Defence) has a checkmark under JD/JW and a dash under SD/SW.

Q1524. Chapter-XIII (Miscellaneous), Section-2 focuses on the selection process for which category of personnel?

- Permanent Instructor (PI) Staff
- Associated NCC Officers (ANOs)
- **Whole Time Lady Officers (WTLOs) [CORRECT]**
- Girl Cadet Instructors (GCIs)

Explanation: Section-2 of Chapter-XIII is titled 'Selection Process : WTLOs' (Whole Time Lady Officers).

Q1525. Under which Act was the 'University Corps' created in 1917 to address the shortage in the Army?

- Indian Territorial Act
- **Defence Act, 1917 [CORRECT]**
- NCC Act XXXVI of 1948
- National Youth Cadre Act

Explanation: The National Cadet Corps had its genesis in the 'University Corps', which was created under the Defence Act, 1917 to make up for the shortage of the Army.

Q1526. On which exact date did the National Cadet Corps (NCC) come into existence under Act XXXVI of 1948?

- 15th August 1947
- **16th July 1948 [CORRECT]**
- 23rd December 1957
- 26th January 1950

Explanation: The NCC came into existence on 16th July, 1948 under the NCC Act XXXVI of 1948 under the Ministry of Defence.

Q1527. On which date was the official NCC motto, 'Unity and Discipline', adopted?

- 16th July 1948
- 19th November 1954
- **23rd December 1957 [CORRECT]**
- 15th March 2001

Explanation: The Motto of the NCC is 'Unity and Discipline', which was formally adopted on 23 Dec 1957.

Q1528. In the NCC flag introduced in 1954, what is represented by each individual lotus encircling the crest?

- One NCC Group Headquarters
- **One NCC Directorate (Dte) [CORRECT]**
- One Army Wing Unit
- One State or Union Territory

Explanation: In the NCC flag, the gold crest in the middle is encircled by a wreath of lotus, where each lotus represents one NCC Directorate (Dte).

Q1529. At Directorate General NCC (Delhi), the Director General (Lt Gen) is assisted by two Additional Directors General (ADsG). What are their service rank backgrounds?

- Two Major Generals from the Army
- **One Major General (Army) and one Rear Admiral (Navy) or Air Vice Marshal (Air Force) [CORRECT]**
- Two Brigadiers or equivalent from Navy/Air Force
- One Lieutenant General and one Air Vice Marshal

Explanation: The DG NCC is assisted by two ADsG: one Major General from the Army and the other a Rear Admiral from the Navy or an Air Vice Marshal from the Air Force.

Q1530. What is the exact service composition of the five Deputy Directors General (DDsG) at Dte Gen NCC HQ?

- 5 Brigadiers from the Army
- **3 Brigadiers, 1 Commodore/Air Commodore, and 1 Civilian Officer [CORRECT]**
- 2 Brigadiers, 2 Commodores, and 1 Air Commodore
- 4 Brigadiers and 1 Civilian Officer

Explanation: There are 5 Deputy Directors General (DDsG) of the rank of Brigadier and equivalent: three Brigadiers, one Commodore/Air Commodore, and one civilian officer.

Q1531. Out of the 17 State NCC Directorates, what is the correct breakdown of heading service representation across the Army, Navy, and Air Force?

- **Army - 12, Navy - 02, Air Force - 03 [CORRECT]**
- Army - 10, Navy - 04, Air Force - 03
- Army - 14, Navy - 01, Air Force - 02
- Army - 15, Navy - 01, Air Force - 01

Explanation: According to the organizational structure, the 17 State Directorates are divided into Army - 12, Navy - 02, and Air Force - 03.

Q1532. Across the country, how many Group Headquarters (Gp HQs) belong specifically to the Naval Wing and Air Wing respectively out of the total 95?

- Naval - 02, Air Wing - 03
- **Naval - 04, Air Wing - 06 [CORRECT]**
- Naval - 06, Air Wing - 04
- Naval - 10, Air Wing - 10

Explanation: Out of 95 total Group HQs, 85 belong to the Army, 04 belong to the Navy, and 06 belong to the Air Force.

Q1533. According to the detailed breakdown of the 657 Army Wing Units, how many are Infantry units and Girls units respectively?

- **Infantry: 415, Girls: 109 [CORRECT]**

- Indian Peace Keeping Force (IPKF) [CORRECT]
- National Security Guards
- Assam Rifles

Explanation: Paragraph 25 states that India sent the Indian Peace Keeping Force (IPKF) under the July 1987 agreement.

Q1695. Which agreement envisaged that the Kashmir problem between India and Pakistan would be solved through bilateral talks?

- Tashkent Agreement
- Lahore Declaration
- Shimla Agreement [CORRECT]
- Delhi Agreement

Explanation: Paragraph 30 specifies that the Shimla Agreement envisaged solving the Kashmir problem through bilateral talks.

Q1696. What is the literacy rate of Bhutan mentioned in the textbook facts?

- 12% [CORRECT]

- 26%
- 33%
- 66%

Explanation: Paragraph 10 lists Bhutan's literacy rate as 12%.

Q1697. Which country is bounded in the North by Assam and Meghalaya, and in the East by West Bengal and Tripura?

- Nepal
- Bhutan
- Myanmar
- **Bangladesh [CORRECT]**

Explanation: Paragraph 18 details the geographical boundaries of Bangladesh.

Q1698. Which specific militant groups had set up regular camps inside Bhutan before being routed by the Bhutanese Army?

- LTTE and Tamil Tigers
- Maoists and insurgents
- **Bodo and United Liberation Front of Assam (ULFA) [CORRECT]**
- Al Qaeda and ISI-backed groups

Explanation: Paragraph 12 mentions that Bhutan was a safe haven for Bodo and ULFA militants.

Q1699. What is the primary language spoken in Bhutan according to the text?

- Burmese
- **Ozengkha [CORRECT]**
- Sinhala
- Urdu

Explanation: Paragraph 10 lists Ozengkha as the language of Bhutan.

Q1700. Which historical figures went to Sri Lanka as Buddhist missionaries, as cited in the text regarding India-Sri Lanka relations?

- Emperor Ashoka and Chanakya
- **Mahendra and Sanghamitra [CORRECT]**
- Gautama Buddha and Ananda
- Chandragupta and Megasthenes

Explanation: Paragraph 24 states that Emperor Ashoka's son Mahendra and daughter Sanghamitra went to Sri Lanka as Buddhist missionaries.

Q1701. In what year did Bangladesh emerge as an independent nation?

- 1947
- 1948
- **1971 [CORRECT]**
- 1983

Explanation: Paragraph 18 states that Bangladesh emerged as an independent nation in 1971.

Q1702. Which transport links between India and Pakistan have been promoted to improve people-to-people contact?

- **Wagha and Uri border road links and Munabao-Gadara rail link [CORRECT]**

- Attari-Wagah rail link only
- Kashmir-Lahore bus service only
- Srinagar-Muzaffarabad rail link

Explanation: Paragraph 34 explicitly mentions the opening of Wagha and Uri border road links and Munabao-Gadara rail link.

Q1703. According to the NCC text on nation building, what is highlighted as the primary role of youth?

- Engaging exclusively in armed conflict
- **Bringing together people of different states and religions to integrate them socially, culturally, and geographically [CORRECT]**
- Managing international trade agreements
- Drafting regional constitutional reforms

Explanation: Paragraph 2 of Section 7 states that the youth have a leading role in bringing together people of different states and religions with a view to integrating them socially, culturally and geographically.

Q1704. Which Government Act did India inherit its federal structure from, which prescribed a federal type union of autonomous provinces?

- Government of India Act, 1919
- **Government of India Act, 1935 [CORRECT]**
- Indian Independence Act, 1947
- Regulating Act, 1773

Explanation: According to the text, India has inherited the federal structure from the Government of India act, 1935.

Q1705. Which of the following is NOT listed as an essential element of a Nation State in the text?

- Population
- Territory
- **Military Alliance [CORRECT]**
- Sovereignty

Explanation: The text defines a Nation State as a country which has 'essential elements' as population, territory, sovereignty and Government.

Q1706. Which articles of the Indian Constitution deal with the Directive Principles of State Policy?

- Articles 12-35
- **Articles 36-51 [CORRECT]**
- Articles 52-78
- Articles 368

Explanation: The text clearly states that there are 16 articles of the constitution from 36-51 that deal with the Directive Principles of State Policy.

Q1707. According to the text, what is considered the foremost national interest?

- Economic growth
- **Sovereignty [CORRECT]**
- Cultural preservation
- Technological advancement

Explanation: The text states under National Interests that the foremost interest of the nation is to be autonomous and remain independent (Sovereignty).

Q1708. In the distribution of legislative powers under the Indian Constitution, where does the residual power lie?

- With the State Legislatures
- Equally shared between Union and States
- **With the Union over the States [CORRECT]**
- With the Local Governments

Explanation: The text states: 'The residual power lies with Union over the States.'

Q1709. Which Government programme is explicitly highlighted in the text as a good opportunity for youth to join hands for nation building?

- Skill India
- **Clean and Green [CORRECT]**
- Digital India
- Make in India

Explanation: The text mentions that Government programmes such as 'Clean and Green' are very good opportunities for youth to join hands with their countrymen.

Q1710. Which of the following youth organizations is NOT explicitly mentioned in the text?

- National Cadet Corps (NCC)
- National Social Service (NSS)
- **National Sports Organisation (NSO) [CORRECT]**
- National Service Volunteer Scheme (NSVS)

Explanation: The text mentions NCC, NSS, and NSVS, but does not mention NSO.

Q1711. How is a 'Country' defined in the provided text?

- An organized political unit under one government
- **A nation with its own government, occupying a particular territory [CORRECT]**
- A large group of people sharing the same culture or history
- A federal union of autonomous provinces

Explanation: The text explicitly defines a Country as 'a nation with its own government, occupying a particular territory.'

Q1712. What type of state is India proclaimed as in the Constitution according to the text?

- A strict Federal State
- A Confederation
- **A Union of States [CORRECT]**
- A Unitary State

Explanation: The text states that 'In the constitution, India is proclaimed as a 'Union of States' rather than as a Federal State.'

Q1713. Which list gives the centre the authority to act in matters of national importance such as defence and foreign affairs?

- State List
- **Union List [CORRECT]**
- Concurrent List
- Residual List

Explanation: The text notes that the Union list gives the centre the authority to act in matters of national importance which include defence, foreign affairs, currency, etc.

Q1714. Which matters are specifically entrusted to the State list according to the text?

- Defence and Foreign Affairs
- Currency and Banking
- **Law and order, local government, and public health [CORRECT]**
- Income taxation and customs duties

Explanation: The text states that the State list entrusts matters to the state which include law and order, local government, public health, education, and agriculture.

Q1715. What role do youth play in national integration according to paragraph 3?

- **Acting as a catalyst to integrate people emotionally, culturally, and geographically [CORRECT]**
- Focusing exclusively on economic privatization
- Forming political parties to contest elections
- Enforcing military laws across states

Explanation: The text highlights that youth can play a leading role in bringing together people and integrating them emotionally, culturally and geographically.

Q1716. According to the section on National Interests, what does 'Integrity' mean for the nation?

- Being a secular union of states
- **Being full, indivisible and having a well-defined territory [CORRECT]**
- Ensuring safety against external subversion
- Maintaining financial autonomy

Explanation: Under national interests, the text defines Integrity as: 'The nation should be full, indivisible and have a well-defined territory.'

Q1717. What is the primary aim of drill as per Chapter III of the NCC text?

- To prepare cadets exclusively for weapon training and firing competitions
- **To inculcate a sense of discipline, improve bearing, smartness in appearance and turn out, create self-confidence and develop immediate and implicit obedience [CORRECT]**
- To ensure cadets can march long distances without fatigue during cross-country exercises
- To teach cadets leadership tactics and combat strategy for tactical operations

Explanation: Paragraph 1 of Foot Drill explicitly states that the aim of drill is to inculcate discipline, improve bearing, smartness in appearance/turn out, create self-confidence, and develop immediate and implicit obedience to orders.

Q1718. Proper execution of any command heavily depends on what attributes?

- The physical strength and height of the commander
- **The tone and the pitch of voice in which it is given [CORRECT]**
- The total number of cadets present on parade
- The exact time of day the parade is conducted

Explanation: Paragraph 2 under Words of Command states that proper execution of any command depends on the tone and the pitch of voice in which it is given.

Q1719. What is the recommended posture for projecting the voice with ease when giving a command?

- **The position of attention [CORRECT]**
- The position of stand at ease
- A relaxed slouch with hands on hips
- A forward-leaning marching posture

Explanation: Paragraph 3 notes that the best posture to project the voice with ease by adopting good posture, proper breathing, and correct adjustment of muscles is the position of attention.

Q1720. How is 'inflection' defined in the context of words of command?

- The volume adjustment based on the distance of the squad
- **The rise and fall of the voice used to avoid monotony and gain emphasis [CORRECT]**
- The extra quality that demands an instantaneous response like a whip
- The correct grouping of sounds formed by the tongue, lips, and teeth

Explanation: Paragraph 5 defines inflection as the rise and fall of the voice, used to avoid monotony and gain emphasis.

Q1721. A word of command consists of which two parts?

- Loud and Soft
- **Cautionary and Executive [CORRECT]**
- Preparatory and Final
- Primary and Secondary

Explanation: Paragraph 7 states that a word of command consists of two parts: 'Cautionary' and the 'Executive'.

Q1722. What interval should generally be left between the 'Cautionary' and the 'Executive' parts of a command in quick time?

- An interval of about two paces
- **An interval of about four paces in quick time [CORRECT]**
- An interval of exactly one second
- No interval is required

Explanation: Paragraph 7 specifies that an interval of about four paces in quick time should be left between the 'Cautionary' and the 'Executive'.

Q1723. In the position of Attention ('Squad Savdhan'), at what angle should the feet be turned out?

- 15 degrees
- **30 degrees [CORRECT]**
- 45 degrees
- 60 degrees

Explanation: Section 2, Paragraph 1(a) states that the heels are together and in line, with feet turned out equally forming an angle of 30 degrees.

Q1724. When assuming the position of Attention ('Savdhan'), how high must the left foot be lifted from the ground before placing it flat and firm beside the right?

- 3 inches
- **6 inches [CORRECT]**
- 12 inches
- 18 inches

Explanation: Section 2, Paragraph 1(e) specifies bringing heels together by lifting the left foot six inches from the ground and placing it flat and very firm beside the right.

Q1725. When addressing a superior officer or when all drill movements commence, which position must a cadet assume?

- Vishram (Stand at Ease)
- **Aram Se (Stand Easy)**

- **Squad Savdhan (Attention) [CORRECT]**

- Standing at attention with arms crossed

Explanation: Section 2, Paragraph 1(f) notes that all drill movements commence after getting into Savdhan position, and when speaking to or being addressed by a superior officer, a cadet will stand in Savdhan.

Q1726. What is the correct execution for 'Vishram' (Stand at Ease)?

- Carry left foot 6 inches to the left and keep hands at the sides
- **Carry left foot 12 inches to the left, raising it 6 inches from the ground, while hands are taken behind the back with right hand over left and thumbs interlocked [CORRECT]**
- Carry left foot 12 inches to the left with hands placed firmly on hips
- Carry right foot 12 inches to the left with palms facing inwards

Explanation: Section 2, Paragraph 2 details that 'Vishram' involves carrying the left foot 12 inches to the left, raising the foot 6 inches, and simultaneously taking both hands behind the back through the shortest route, right hand over left with open palms facing outwards and thumbs interlocked.

Q1727. Under 'Aram Se' (Stand Easy), which of the following activities is strictly prohibited?

- Relaxing the limbs, body, and head
- Assuming the stand-at-ease position upon the cautionary word 'Squad'
- **Talking, turning the head, slouching, and using a handkerchief [CORRECT]**
- Breathing normally and resting the body weight on both feet

Explanation: Section 2, Paragraph 3 states that under 'Aram Se', talking, turning the head, slouching, and using a handkerchief is not permitted.

Q1728. How should the hands and fingers be positioned during the position of Attention ('Savdhan')?

- Hands open with fingers pointing straight down toward the ground
- **Hands closed (not clenched) with thumbs straight to the front immediately behind the trouser seams [CORRECT]**
- Hands clenched into tight fists pressed hard against the thighs
- Hands loosely resting inside the trouser pockets

Explanation: Section 2, Paragraph 1(b) dictates that arms hang straight down without stiffness so thumbs are immediately behind the trouser seams, back of the hand outwards, hands closed (not clenched) and thumbs straight to the front.

Q1729. According to Section-1, what should be the starting pitch and the executive pitch of a word of command?

- Both cautionary and executive commands must be given in a deep, hoarse whisper.
- **Start cautionary command near the natural pitch of the voice and the command of execution should be in a slightly higher pitch. [CORRECT]**
- Start cautionary command in a high pitch and lower it for the executive command.
- Both commands must be given in a monotone without any pitch variation.

Explanation: Section 1, Paragraph 5 specifies: 'Start preparatory [cautionary] command near the natural pitch of the voice and the command of execution should be in a slightly higher pitch.'

Q1730. What is the length of pace and number of paces per minute specified for 'Quick Time' marching?

- 30 inches length of pace and 70 paces per minute
- **30 inches length of pace and 120 paces per minute [CORRECT]**
- 40 inches length of pace and 180 paces per minute
- 33 inches length of pace and 100 paces per minute

Explanation: Under Section 5, Marching parameters for Quick time state a length of pace of 30 inches and 120 paces per minute.

Q1731. In 'Double Time' marching, what is the specified length of pace and cadence per minute?

- 30 inches and 120 paces/min
- 33 inches and 140 paces/min
- **40 inches and 180 paces/min [CORRECT]**
- 12 inches and 180 paces/min

Explanation: According to the table in Section 5, double time has a length of pace of 40 inches, with 180 paces per minute covering an equivalent distance of 200 yards.

Q1732. During the command 'Tez Chal' (Quick March), on which foot is the word 'Quick' given?

- **Left foot [CORRECT]**
- Right foot
- Both feet simultaneously
- Either foot depending on the band master

Explanation: Section 5 specifies that with the band, the word of command is given on successive beats: 'Quick' on the left foot, and 'March' on the right foot.

Q1733. When executing a 'Halt' from quick time, what is the length and execution of the final step with the left foot after the right foot passes the left?

- A full pace of 30 inches
- A step out of 33 inches
- **A short pace of 15 inches [CORRECT]**
- A side step of 12 inches

Explanation: Section 5 paragraph 6 states: 'Complete a short pace of 15 inches with the left foot, bend the right knee and bring the right foot in sharply to the left...'

Q1734. Under what specific circumstances is the 'Slow March' utilized during parades?

- During normal route marches and daily PT sessions
- **During important parades such as pilots marching in front of a VIP and firing parties marching ahead of a corpse [CORRECT]**
- When covering distances greater than 500 yards on rough terrain
- Exclusively during NCC Republic Day Camp flag hoisting ceremonies

Explanation: Section 5, paragraph 7 explicitly states that slow march is required during important parades i.e., pilots marching in front of VIPs and firing parties marching ahead of a corpse.

Q1735. During 'Wheeling' in single file or threes, what is the diameter of the circle on which the inner man wheels, and what angle does the formation change through?

- 2 feet diameter, 45 degrees
- **4 feet diameter, 90 degrees [CORRECT]**
- 6 feet diameter, 180 degrees
- 3 feet diameter, 90 degrees

Explanation: Section 6 on Wheeling states that the inner man wheels on the circumference of a circle four feet in diameter and changes direction through 90 degrees.

Q1736. When passing an officer while marching, when must a cadet execute the salute and when should the hand be lowered?

- Salute on the first pace before and lower on the first pace after
- **Salute on the third pace before reaching him and lower on the third pace after passing him [CORRECT]**
- Salute exactly when abreast of the officer and lower immediately
- Salute 5 paces before and lower 5 paces after

Explanation: Section 7 paragraph 2 dictates: 'When passing an officer, salute on the third pace before reaching him and lower the hand on the third pace after passing him.'

Q1737. In 'Saluting to the Flank' by numbers, on which count/action do the cadets shout 'UP'?

- As the right foot touches the ground
- **As the left foot comes to the ground [CORRECT]**
- Immediately upon the command 'Salute'
- When the right arm reaches shoulder level

Explanation: Section 7 paragraph 1(a) notes: 'As the left foot comes to the ground, the squad shouts 'UP' after bringing the right arm smartly to the salute.'

Q1738. In 'Saluting to the Flank' by judging time, on which count/foot placement is the hand cut away (down)?

- Fourth pace
- Fifth pace
- **Sixth pace (right foot) [CORRECT]**
- Seventh pace (left foot)

Explanation: Section 7 paragraph 1(e) specifies: 'Come up to the salute the next time the left foot touches the ground and cut the hand away on the sixth pace (right foot).'

Q1739. What is the exact length of a 'Side Pace' (Dahine Ya Baen Bazu Chal) and up to how many paces is it recommended for moving a squad to a flank before turning?

- 10 inches; up to 10 paces
- **12 inches; not more than 12 paces [CORRECT]**
- 15 inches; up to 6 paces
- 30 inches; not more than 4 paces

Explanation: Section 8 paragraph 1 states that the side pace is 12 inches and is used to move the squad not more than 12 paces to a flank.

Q1740. During 'Turning by numbers, left turn one' (Ginti se murna-baen mur-ek), what is the position of the feet and legs?

- **Left foot forward flat on the ground, right foot 30 inches to the rear with heel raised, both legs braced [CORRECT]**
- Right foot forward, left foot 15 inches to the rear, both knees slightly bent
- Both feet together in attention position with heels touching
- Left foot raised 6 inches off the ground, right foot flat

Explanation: Section 6 paragraph 1 describes the position: 'The cadet will freeze with the left foot forward flat on the ground, the right foot 30 inches to the rear, heel raised; both legs braced...'

Q1741. In the progression of 'Turning about by numbers' (Pichhe mur), how many distinct numbered counts are there before the squad is ordered 'Squad age barh' (Squad forward)?

- Two counts
- Three counts
- **Four counts [CORRECT]**
- Five counts

Explanation: Section 6 paragraphs 6 through 9 outline 'Pichhe mur ek', 'Squad Do', 'Squad Teen', and 'Squad Char', making it four counts before moving forward.

Q1742. What is the specific length of a 'Step out' and 'Step short' in quick time according to the drill pacing metrics?

- Step out: 33 inches, Step short: 21 inches [CORRECT]
- Step out: 35 inches, Step short: 15 inches
- Step out: 30 inches, Step short: 12 inches
- Step out: 40 inches, Step short: 25 inches

Explanation: Section 5 paragraph 1 table lists under Quick time: (i) Step out: 33 inches, (ii) Step short: 21 inches, (iii) Side step: 12 inches.

Q1743. When executing 'Eyes Right' (Dahine Dekh) on the march, who among the formed body looks straight to their front?

- Every cadet in the front rank
- The guide [CORRECT]
- All officers only
- No one; everyone must look to the right flank

Explanation: Section 7 paragraph 4 specifies: 'The guide will look to his front in order to keep direction. All officers, in command will salute, the remainder will turn their heads.'

Q1744. When taking a pace forward or to the rear, what is the specified time and maximum number of paces allowed to be ordered?

- Double time; maximum 2 paces
- Quick time; maximum 3 paces [CORRECT]
- Quick time; maximum 5 paces
- Slow time; maximum 3 paces

Explanation: According to Section 9, 'Pace forward' and to the rear are always taken in quick time, and the maximum number of paces ordered to step forward or rear will be three.

Q1745. What is the standard length of a full pace when stepping forward or to the rear if more than one pace is ordered?

- 15 inches
- 21 inches
- 30 inches [CORRECT]
- 36 inches

Explanation: Section 9 states that if more than one pace is ordered, normal marching is adopted, stepping a full pace of 30 inches.

Q1746. During quick mark time ('Tez qadam Tal'), how should the raised leg be positioned?

- Thigh parallel to the ground, lower leg perpendicular [CORRECT]
- Thigh at 45 degrees, lower leg parallel to the ground
- Thigh parallel to the ground, lower leg at 45 degrees
- Thigh perpendicular, lower leg straight

Explanation: Section 9 specifies to raise the left knee and top of the thigh parallel with the ground, with the lower leg perpendicular.

Q1747. When marking time from quick marching, what length of short pace is taken with the right foot before beginning to mark time with the left?

- 10 inches
- 12 inches
- **15 inches [CORRECT]**
- 30 inches

Explanation: Section 9 states to take a short pace of 15 inches with the right foot and begin the marking time with the left foot.

Q1748. In changing step in quick time by numbers ('Qadam badalna ek'), where should the right and left arms be positioned on command 'Squad Ek'?

- Both arms cut to the sides
- **Right arm raised in front, left arm in rear of the body [CORRECT]**
- Left arm raised in front, right arm in rear of the body
- Both arms raised straight to the front

Explanation: Section 9 states: 'The right arm is raised in front, and the left arm in rear of the body' during squad one of changing step.

Q1749. During changing step, on which command are the arms cut to the sides?

- Squad Ek (One)
- **Squad Do (Two) [CORRECT]**
- Squad Teen (Three)
- Squad Char (Four)

Explanation: Section 9(b) states: 'Squad Do' - bend the left foot forward placing flat on the ground with the hollow in the heel of the left foot and the arms are cut to the sides.

Q1750. What is the primary purpose of forming a squad as per Section 11?

- To inspect weapons and equipment
- **To change the formation of the squad or to conserve space [CORRECT]**
- To prepare for a ceremonial parade inspection
- To execute the slope arms drill movement

Explanation: Section 11, General Paragraph 1 states that forming of squad is done to change the formation of the squad or to conserve space.

Q1751. In the position of attention with a rifle (Savdhan), where is the magazine positioned?

- To the rear
- To the left
- **To the front [CORRECT]**
- To the right

Explanation: Section 1 of Drill with Arms states the position of attention with the rifle has the butt flat on the ground and magazine to the front.

Q1752. When executing 'Stand-at-Ease' (Visharam) with a rifle, how far apart should the feet be?

- 6 inches apart
- **12 inches apart [CORRECT]**
- 18 inches apart
- 24 inches apart

Explanation: Section 1 on Visharam specifies to bend the left knee and carry the left leg to the left so that the feet are about 12 inches apart.

Q1753. During 'Stand-at-Ease' with a rifle, how is the right arm positioned?

- Bent at the elbow close to the body
- **Straight out to the front with the right hand shot forward to its fullest extent [CORRECT]**
- Pressed against the right trouser seam
- Raised to shoulder level horizontally

Explanation: Section 1 states to 'force the rifle straight out to the front by keeping the right arm straight, shoot the right hand forward to its fullest extent'.

Q1754. What action is taken on the command 'Aram Se' (Stand Easy) when armed with a rifle?

- **Force the right hand to the nose cap of the rifle, curling fingers and thumb round it [CORRECT]**
- Place the rifle flat on the ground in front
- Lower the head and relax all body muscles completely
- Bring the rifle to the shoulder position

Explanation: Section 1, paragraph 3 defines 'Aram Se' as forcing the right hand to the nose cap of the rifle, with fingers and thumb curling round the rifle.

Q1755. How do you transition from 'Aram Se' back to 'Visharam' (Stand-at-Ease)?

- **On the command 'Squad', force the right hand down the rifle to the correct position and brace the body [CORRECT]**
- On the command 'Savdhan', pull the rifle straight into the side
- Automatically without any word of command
- On the command 'Visharam', lift the left leg and stamp

Explanation: Section 1, paragraph 4 states: On word of command 'Squad', force the right hand down the rifle to the correct position of stand-at-ease and brace the body.

Q1756. Which of the following sections in Chapter-III (A) covers 'Examine Arms'?

- Section-5
- Section-7
- Section-8
- **Section-9 [CORRECT]**

Explanation: The index for Chapter-III (A) clearly lists SECTION-9 as Examine Arms.

Q1757. Which specific drill category is noted in the text index as 'ONLY FOR SD/SW'?

- **Ceremonial Drill [CORRECT]**
- Weapon Training
- Field Craft
- Guard Mounting

Explanation: The text index shows 'CHAPTER-III (A) DRILL WITH ARMS, CEREMONIAL DRILL (ONLY FOR SD/SW)'.

Q1758. When moving forward from quick marking time, the command 'Age barh' (Forward) is given when:

- The right foot is raised
- **The left foot is being raised [CORRECT]**
- Both feet are flat on the ground
- The squad halts momentarily

Explanation: Section 9 paragraph 5 states: 'To move forward when quick marking time, the word of command will be 'Age barh' (forward). This being given as the left foot is being raised.'

Q1759. Which specific chapter covers 'Drill with Arms, Ceremonial Drill' exclusively for SD/SW cadets?

- CHAPTER-I
- CHAPTER-II
- **CHAPTER-III(A) [CORRECT]**
- CHAPTER-IV

Explanation: CHAPTER-III(A) is designated explicitly for SD/SW Drill with Arms and Ceremonial Drill.

Q1760. Under Weapon Training, which section covers 'Characteristics of .22 Rifle, Stripping, Assembling, Care and Cleaning and Sight Setting'?

- **SECTION-1 [CORRECT]**
- SECTION-3
- SECTION-5
- SECTION-9

Explanation: CHAPTER-IV Weapon Training Section-1 covers Characteristics of .22 Rifle, Stripping, Assembling, Care and Cleaning and Sight Setting.

Q1761. What is the topic of SECTION-8 in CHAPTER-IV (Weapon Training)?

- Range Procedure and Safety Precautions
- **Theory of Group and Snap Shooting [CORRECT]**
- Characteristics of 7.62 mm SLR
- Aiming I Range and Targets

Explanation: In Chapter-IV Weapon Training, Section-8 is dedicated to the Theory of Group and Snap Shooting.

Q1762. Which chapter in the NCC syllabus is dedicated entirely to 'Leadership'?

- CHAPTER-III
- CHAPTER-IV
- **CHAPTER-V [CORRECT]**
- CHAPTER-VI

Explanation: CHAPTER-V covers Leadership, including Motivation, Discipline, Leadership Traits, and Personality Development.

Q1763. In 'Civil Affairs/Disaster Management' (Chapter-VI), what does SECTION-3 deal with?

- Civil Defence Organisation
- Types of Emergencies
- **Fire Fighting [CORRECT]**
- Essential Services

Explanation: SECTION-3 of Chapter-VI Civil Affairs/Disaster Management covers Fire Fighting.

Q1764. Which section under Social Service (Chapter-VII) addresses 'HIV/AIDS : Causes & Prevention and Contribution of Youth Towards Prevention of AIDS'?

- SECTION-2
- SECTION-3
- **SECTION-4 [CORRECT]**
- SECTION-6

Explanation: SECTION-4 of Chapter-VII covers HIV/AIDS causes, prevention, and the contribution of youth.

Q1765. What topic is covered under SECTION-4 of CHAPTER-VIII (Health and Hygiene)?

- Structure and Function of the Human Body
- Hygiene and Sanitation
- Preventable Diseases
- **First Aid in Common Medical Emergencies [CORRECT]**

Explanation: SECTION-4 under Health and Hygiene is designated for First Aid in Common Medical Emergencies.

Q1766. Under Adventure Activities (Chapter-IX), which section focuses specifically on 'Cycle Expedition : Planning, Organisation & Conduct'?

- SECTION-1
- SECTION-2
- **SECTION-3 [CORRECT]**
- SECTION-4

Explanation: SECTION-3 of Adventure Activities covers Cycle Expedition planning, organisation, and conduct.

Q1767. Which section of 'Environment and Ecology' (Chapter-X) deals with 'Pollution and its Control'?

- SECTION-1
- SECTION-2
- SECTION-3
- **SECTION-4 [CORRECT]**

Explanation: SECTION-4 of Chapter-X Environment and Ecology is titled Pollution and its Control.

Q1768. What is the subject of SECTION-3 in CHAPTER-XI (Self Defence)?

- Precaution and General Behavior
- Prevention of Untoward Incidents
- **Vulnerable Parts of the Body [CORRECT]**
- Physical Self Defence

Explanation: SECTION-3 of Self Defence covers Vulnerable Parts of the Body.

Q1769. CHAPTER-XII is exclusively for SD/SW and covers which major topic?

- **Posture Training [CORRECT]**
- Self Defence
- Environment and Ecology
- Adventure Activities

Explanation: CHAPTER-XII (ONLY FOR SD/SW) is dedicated to Posture Training.

Q1770. Which section in Chapter-XII (Posture Training) deals with 'Balanced Diet'?

- SECTION-4
- SECTION-5
- **SECTION-6 [CORRECT]**
- SECTION-7

Explanation: SECTION-6 under Posture Training is titled Balanced Diet.

Q1771. Under Chapter-XIII (Miscellaneous), what does SECTION-2 focus on?

- Career Options in Services
- **Selection Process : WTLOs [CORRECT]**
- Traffic Rules and Road Signs
- None of the above

Explanation: SECTION-2 of Chapter-XIII covers the Selection Process for WTLOs (Whole Time NCC Officers).

Q1772. Which of the following rifles are mentioned together in SECTION-10 of Chapter-IV (Weapon Training)?

- .22 Rifle and 7.62mm SLR
- **7.62 mm SLR and 5.56 mm INSAS [CORRECT]**
- .22 Rifle and 5.56 mm INSAS
- 7.62 mm LMG and .303 Rifle

Explanation: Chapter-IV Weapon Training Section-10 covers the Characteristics of 7.62 mm SLR and 5.56 mm INSAS.

Q1773. What is the focus of SECTION-3 in Chapter-II/Chapter-III Drill sub-sections (specifically Section-3 under the Drill with Arms block)?

- Government of India Act, 1919
- Government of India Act, 1935 [CORRECT]
- Indian Independence Act, 1947
- Regulating Act, 1773

Explanation: The text notes that India has inherited the federal structure from the Government of India Act, 1935.

Q1939. Which of the following lists gives the center the authority to act in matters of national importance like defence and foreign affairs?

- State List
- **Union List [CORRECT]**
- Concurrent List
- Residual List

Explanation: The text explicitly states that the Union list gives the centre the authority to act in matters of national importance which include defence, foreign affairs, currency, communication, banking, etc.

Q1940. Which of the following falls under the State list according to the provided text?

- Defence and Foreign Affairs
- Banking and Currency
- **Law and order and Public health [CORRECT]**
- Customs duties and Income tax

Explanation: The State list entrusts matters to the state which include law and order, local government, public health, education, and agriculture, among others.

Q1941. What is the definition of a 'Nation State' as per the textbook text?

- A country with an absolute monarchy and religious governance
- **A country which has essential elements as population, territory, sovereignty and Government [CORRECT]**
- A loose affiliation of independent tribal territories
- An administrative province under foreign crown rule

Explanation: The text roughly defines a Nation State as a country which has 'essential elements' as population, territory, sovereignty and Government.

Q1942. Which Government programme is specifically highlighted in the text as an opportunity for youth to join hands in nation building?

- Digital India
- **Clean and Green [CORRECT]**
- Skill India
- Swachh Bharat Abhiyan

Explanation: The text mentions that Government programmes such as 'Clean and Green' are very good opportunities for youth to join hands with their countrymen and give impetus in the process of nation building.

Q1943. Which organizations are explicitly listed in the text as assets to our Nation alongside NCC?

- **NSS and NSVS [CORRECT]**
- NCC and NYKS
- NCC, Territorial Army and Home Guards
- NSS and NCC only

Explanation: The text states: 'India has already started National Cadet Corps (NCC), National Social Service (NSS), National Service Volunteer Scheme (NSVS) and other similar organization, which are an assets to our Nation.'

Q1944. How does the text define a 'Country'?

- A large group of people sharing the same culture

- An organized political unit under one government
- **A nation with its own government, occupying a particular territory [CORRECT]**
- A sovereign union of autonomous provinces

Explanation: Point 3 under Section-8 states: 'Country is a nation with its own government, occupying a particular territory.'

Q1945. According to the text on National Integration, what should youth help extricate society from?

- Economic development and modernization
- **Age-old stigmas of casteism, communalism, parochialism and regionalism [CORRECT]**
- Scientific temperament and rationalism
- Technological backwardness alone

Explanation: The text emphasizes that youth should contribute in extricating society from age-old stigmas of casteism, communalism, parochialism and regionalism.

Q1946. In the context of internal security concerns, what role are the youth expected to play due to being the pulse and strength of the nation?

- Engage in passive observation
- **Use their alertness and balanced approach to bring stability and thwart enemy designs [CORRECT]**
- Promote regional splitting
- Focus solely on economic production

Explanation: The text states that youth are the pulse and strength of the nation and with their alertness and their balanced approach can help in bringing stability to the nation and help in thwarting selfish designs of the enemy.

Q1947. What is the primary aim of drill in the NCC according to Chapter III?

- To prepare cadets solely for ceremonial parades and inspections
- **To inculcate a sense of discipline, improve bearing, smartness in appearance, self-confidence, and develop immediate and implicit obedience [CORRECT]**
- To increase physical endurance through rigorous running and weapon training
- To teach cadets advanced tactical maneuvers and battlefield strategies

Explanation: Section-1, Paragraph 1 explicitly states that the aim of drill is to inculcate a sense of discipline, improve bearing, smartness in appearance and turn out, create self-confidence, and develop the quality of immediate and implicit obedience to orders.

Q1948. Which of the following is NOT a designated section under CHAPTER-III DRILL for JD/JW SD/SW in the index?

- Individual Word of Command
- Saluting at the March
- **Bayonet Fighting and Assault Course [CORRECT]**
- Turning at the March and Wheeling

Explanation: The chapter index lists sections on General and Words of Command, Attention/Stand at Ease, Sizing/Forming up, Saluting at the Halt, Marching, Turning at the March and Wheeling, Saluting at the March, Individual Word of Command, Side Pace, Marking Time, and Formation of Squad. Bayonet Fighting is not part of this drill index.

Q1949. How is the loudness or volume of a command determined?

- It should always be kept at maximum vocal capacity regardless of group size.
- **It is to be in direct proportion with the number of men for whom it is intended and the distance involved. [CORRECT]**

- It must match the ambient noise level of the parade ground.
- It is determined solely by the rank of the commander giving the order.

Explanation: Section-1, Paragraph 3 states that the loudness or volume of command is to be in direct proportion with the number of men for whom it is intended and the distance involved.

Q1950. What is the best posture for projecting the voice naturally without undue physical exertion when giving commands?

- **The position of attention (Savdhan) [CORRECT]**
- The position of stand at ease (Vishram)
- A relaxed forward-leaning stance
- A wide-legged stable stance with hands on hips

Explanation: Section-1, Paragraph 3 mentions that the best posture to project the voice with ease by adopting good posture, proper breathing, and correct adjustment of muscles is the position of attention.

Q1951. What does 'inflection' refer to in the context of words of command?

- The extra quality that demands instantaneous response like a whip
- **The rise and fall of the voice used to avoid monotony and gain emphasis [CORRECT]**
- The proper grouping of sounds using the tongue, lips, and teeth
- The interval between the cautionary and executive parts of a command

Explanation: Section-1, Paragraph 5 defines inflection as the rise and fall of the voice, used to avoid monotony and gain emphasis.

Q1952. During a word of command, how should the pitch change between the cautionary and executive commands?

- Both must be given in the lowest possible vocal pitch.
- **Start preparatory command near the natural pitch of the voice and the command of execution should be in a slightly higher pitch. [CORRECT]**
- Start in a high pitch and drop to a whisper for execution.
- Pitch should remain completely flat and uniform throughout.

Explanation: Section-1, Paragraph 5 states: 'Start preparatory command near the natural pitch of the voice and the command of execution should be in a slightly higher pitch.'

Q1953. What is 'Snap' in the delivery of a command?

- The physical sound made by heels clicking together
- **The extra quality in command that demands instantaneous response, expressing confidence, alertness, and decisiveness [CORRECT]**
- The sharp intake of breath before shouting the executive word
- The rapid movement of the left foot during the position of attention

Explanation: Section-1, Paragraph 6 states that snap is the extra quality in command that demands instantaneous response, expressing confidence, alertness, and decisiveness.

Q1954. What is the prescribed interval (in paces in quick time) between the 'Cautionary' and the 'Executive' parts of a word of command?

- Two paces
- **About four paces [CORRECT]**
- Six paces
- One pace

Explanation: Section-1, Paragraph 7 states: 'An interval of about four paces in quick time should be left between the 'Cautionary' and the 'Executive'.'

Q1955. When a cautionary word of command is given on the march, when should it ideally start and end as a guide?

- Start as the right foot comes to the ground and end on the left foot.
- **Start as the left foot comes to the ground, draw out during four paces, and end as the right foot comes to the ground. [CORRECT]**
- Start and end strictly on alternate beats without regard to foot placement.
- Start when both feet are off the ground during a slow march.

Explanation: Section-1, Paragraph 7 specifies that a cautionary word of command given on the march should start as the left foot comes to the ground, be drawn out during four paces, and end as the right foot comes to the ground.

Q1956. Where should the thumbs be positioned while standing at Attention ('Squad Savdhan')?

- Interlocked behind the back
- **Immediately behind the seams of the trouser, thumbs straight to the front [CORRECT]**
- Clenched tightly against the side pockets
- Hooked into the belt loops

Explanation: Section-2, Paragraph 1(b) specifies that arms hang straight down without stiffness so thumbs are immediately behind the seams of the trouser, hands closed (not clenched), and thumbs straight to the front.

Q1957. When assuming the position of 'Savdhan' from a halt, how high must the left foot be lifted from the ground before placing it flat and firm besides the right?

- 3 inches
- **6 inches [CORRECT]**
- 12 inches
- 18 inches

Explanation: Section-2, Paragraph 1(e) states: 'bring heels together with extreme sharpness by lifting the left foot six inches from the ground and placing it flat and very firm besides the right...'

Q1958. When executing 'Vishram' (Stand at Ease), how far to the left is the left foot carried?

- 6 inches
- **12 inches [CORRECT]**
- 18 inches
- 24 inches

Explanation: Section-2, Paragraph 2 states: "Vishram' (Stand at Ease), Carry left foot 12 inches to the left; place the weight of the body on both feet.'

Q1959. Describe the hand position behind the back when executing 'Vishram' (Stand at Ease).

- Left hand over the right, palms facing inwards, fingers interlocked
- **Right hand over the left, open palms facing outwards, thumbs interlocked [CORRECT]**
- Hands clasped firmly with palms facing the body
- Arms crossed with fists resting against the lower back

Explanation: Section-2, Paragraph 2 states: 'Simultaneously both the hands will be taken behind the back, through shortest route, the right hand over the left with open palms facing out-wards, thumbs interlocked.'

Q1960. What actions are strictly prohibited while in the position of 'Aram Se' (Stand Easy)?

- Blinking and breathing heavily
- **Talking, turning the head, slouching, and using a handkerchief [CORRECT]**

- Shifting weight between the left and right foot
- Adjusting uniform collar or cap

Explanation: Section-2, Paragraph 3 states: 'Without moving the feet, relax the limbs, body and head. Talking, turning the head, slouching and using a handkerchief is not permitted.'

Q1961. What is the standard length of pace and number of paces per minute for 'Quick Time' marching?

- 30 inches and 70 paces per minute
- **30 inches and 120 paces per minute [CORRECT]**
- 40 inches and 180 paces per minute
- 33 inches and 120 paces per minute

Explanation: The table of length of pace and time of marching specifies that for Quick time, the length of pace is 30 inches and the rate is 120 paces per minute.

Q1962. During 'Double Time' marching, what is the regulation length of pace and equivalent distance in yards for 180 paces?

- 30 inches, 100 yards
- 30 inches, 200 yards
- **40 inches, 200 yards [CORRECT]**
- 33 inches, 150 yards

Explanation: The text lists Double time measurements as: Length of pace 40 inches, 180 paces in a minute, and equivalent distance of 200 yards.

Q1963. When executing 'Tez Chal' (Quick March), on which feet are the words of command 'Quick' and 'March' given respectively?

- Right foot for 'Quick', Left foot for 'March'
- **Left foot for 'Quick', Right foot for 'March' [CORRECT]**
- Left foot for both 'Quick' and 'March'
- Right foot for both 'Quick' and 'March'

Explanation: The text states that the word of command for Quick March with the band is given on successive beats of paces: 'Quick' on the left foot, 'March' on the right foot.

Q1964. During a 'Halt' command in quick time ('Squad-tham'), what is the exact length of the final short pace taken with the left foot?

- 12 inches
- **15 inches [CORRECT]**
- 30 inches
- 40 inches

Explanation: The text notes: 'Complete a short pace of 15 inches with the left foot, bend the right knee and bring the right foot in sharply to the left...'

Q1965. In what specific ceremonial scenarios is the 'Slow March' strictly required according to the text?

- Normal Republic Day camp daily practice and general drill sessions
- **Pilots marching in front of VIPs and firing parties marching ahead of a corpse [CORRECT]**
- When crossing obstacles during tactical exercises in quick succession
- During route marches exceeding five kilometers in distance

Explanation: The text explicitly states: 'Slow march is required during important parades i.e. Pilots marching in front of VIP and firing parties marching ahead of corpse.'

Q1966. When performing 'Wheeling' in single file or threes, what is the diameter of the circle on which the inner man wheels?

- Two feet
- Three feet
- **Four feet [CORRECT]**
- Five feet

Explanation: The text mentions: '...the inner man wheels on the circumference of a circle four feet in diameter and changes direction through 90 degrees...'

Q1967. During 'Saluting to the Flank' by numbers, on which count/squad command is 'Down' executed (head and eyes turned to front, right hand cut away)?

- Squad Two
- Squad Four
- **Squad Six [CORRECT]**
- Squad Seven

Explanation: The text details under 'Saluting to the Flank': '(c) 'Squad Chhe' (Squad six). Complete the pace with the right foot. As the heel touches the ground, turn the head and eyes to the front, cut the right hand away to the side and shout 'Down'.'

Q1968. When passing an officer while marching, when exactly must a cadet salute and lower their hand?

- Salute on the first pace before and lower on the first pace after passing
- **Salute on the third pace before reaching him and lower the hand on the third pace after passing him [CORRECT]**
- Salute immediately upon eye contact and lower upon clearing the officer by one pace
- Salute only when the officer commands 'Eyes Right'

Explanation: The text rules: 'When passing an officer, salute on the third pace before reaching him and lower the hand on the third pace after passing him.'

Q1969. What is the regulation length of a 'Side Pace' and what is the maximum number of paces it should be used to move a squad to a flank before turning?

- 10 inches; maximum 10 paces
- **12 inches; maximum 12 paces [CORRECT]**
- 15 inches; maximum 15 paces
- 30 inches; maximum 4 paces

Explanation: The text states: 'The side pace (12 inches) is used to move the squad not more than 12 paces to a flank (if greater distance is to be covered the squad should be 'turned' and moved in threes).'

Q1970. In 'Turning by numbers, left turn one' ('Ginti se murna-baen mur-ek'), what is the position of the cadet immediately after the command?

- **Left foot forward flat on the ground, right foot 30 inches to the rear with heel raised, both legs braced [CORRECT]**
- Both heels together, arms locked to the sides, head turned 45 degrees left
- Right foot forward with toe raised, left heel off the ground and arms crossed
- Marking time with the left foot raised 6 inches clear of the ground

Explanation: The text describes: 'The cadet will freeze with the left foot forward flat on the ground, the right foot 30 inches to the rear, heel raised; both legs braced, body balanced evenly between...'

Q1971. During 'Turning about by numbers' (pichhe mur), how many total numbered counts/squad movements are described before the squad moves forward?

- Two counts
- Three counts
- **Four counts [CORRECT]**
- Five counts

Explanation: The text details Turning about by numbers up to 'Squad Char' (Squad four): 'Mark time, once pace with the left foot and resume position of attention', followed by 'Squad age barh' (Squad forward).

Q1972. What specific sub-measurements are defined under 'Quick time' for 'Step out', 'Step short', and 'Side step' respectively?

- **Step out: 33 inches, Step short: 21 inches, Side step: 12 inches [CORRECT]**
- Step out: 35 inches, Step short: 15 inches, Side step: 10 inches
- Step out: 40 inches, Step short: 25 inches, Side step: 15 inches
- Step out: 33 inches, Step short: 18 inches, Side step: 14 inches

Explanation: Under Quick time table details in the text: (i) Step out 33, (ii) Step short 21, (iii) Side step 12.

Q1973. When the command 'Dahine Dekh' (Eyes Right) is given to a formed body paying a compliment to a flank, what does the guide do?

- Turns his head and eyes fully to the right along with all other cadets
- **Looks to his front in order to keep direction [CORRECT]**
- Salutes the officer directly while maintaining a slow march pace
- Turns about completely to face the rear flank

Explanation: The text explicitly specifies under Eyes Right and Left: 'The guide will look to his front in order to keep direction. All officers, in command will salute, the remainder will turn their heads.'

Q1974. During the execution of 'Slow March', what is the positioning of the hands?

- Swinging naturally from the shoulders reaching as high as shoulder level
- Clenched into fists and held firmly across the chest
- **Hands will remain by the side of the body as in attention position [CORRECT]**
- Placed on the waist with elbows squared outwards

Explanation: The text states for Slow March: 'Hands will remain by the side of the body as in attention position.'

Q1975. During 'Examine Arms' (Janch Shastr) from the order, what is the distance and direction the left foot is placed?

- 12 inches to the left front
- **16 inches to the left front [CORRECT]**
- 18 inches to the left front
- 24 inches to the left front

Explanation: According to Section-9, Examine Arms, the cadet bends the left knee, placing the front of the foot on the ground about 16 inches to the left front.

Q1976. What rank-level of dignitaries is entitled to a General Salute during an NCC Ceremonial Parade?

- **Major General and above [CORRECT]**
- Lieutenant General only
- Brigadier and above
- Any commissioned officer

Explanation: Section-10 specifies that a General salute is given to dignitaries of the rank of Major General and above.

Q1977. When the parade advances in review order, how many paces does the parade automatically halt after?

- 10 paces
- 12 paces
- **15 paces [CORRECT]**
- 20 paces

Explanation: Section-10 states that the parade will automatically halt after taking 15 paces when advancing in review order.

Q1978. At what distance from the saluting base must each company commander give the word of command 'Company Dahine Dekh' during march past?

- At the saluting base line
- **At the first flag (6 paces of the saluting base) [CORRECT]**
- 10 paces before the base
- 3 paces after the base

Explanation: Section-10 mentions that at the first flag (6 paces of the saluting base) each company commander gives the command 'Company Dahine Dekh'.

Q1979. What is the requirement for guard personnel training turned out by the guard mounting NCO on the previous evening?

- 1 + 5
- **2 + 6 [CORRECT]**
- 3 + 7
- 2 + 8

Explanation: Section-11 Guard Mounting states the requirement for personnel detailed is (requirement 2+6).

Q1980. Where does the Guard Mounting NCO stand relative to the guard when falling them in and inspecting?

- 6 paces away
- 10 paces away
- **12 paces away [CORRECT]**
- 15 paces away

Explanation: Section-11 states that the Guard mounting NCO will be twelve paces away from the guard.

Q1981. Where does the Orderly Officer position themselves during the Guard Mounting NCO's inspection?

- 3 paces behind the guard commander
- **6 paces behind the guard mounting NCO [CORRECT]**
- 12 paces to the left of the guard
- Directly in front of the front rank

Explanation: Section-11 notes that the Orderly Officer would have taken position 6 paces behind the guard mounting NCO.

Q1982. During guard inspection, after the Orderly Officer moves from the first person to the second, what does the Guard Commander do?

- Stays at attention in place
- **Falls out and accompanies the orderly officer [CORRECT]**
- Takes over the inspection
- Dismisses the rear rank

Explanation: Section-11 states that after the orderly officer completes the first person and moves to the second, the guard commander will fall out and accompany the orderly officer.

Q1983. When the new guard approaches the guard room, at what distance does the old guard commander fall in his guard in front of the new guard?

- 10 paces
- 12 paces
- **15 paces [CORRECT]**
- 20 paces

Explanation: Section-11 states that the old guard commander will 'fall in' his guard fifteen paces in front of the new guard.

Q1984. When posting a new sentry, where does the guard commander place himself relative to the sentries?

- **Three paces in front of the sentries [CORRECT]**
- Six paces behind the guard mounting NCO
- To the immediate right of the old sentry
- Twelve paces away facing the guard room

Explanation: Section-11 indicates the guard commander will place himself three paces in front of the sentries.

Q1985. When the new sentry takes over post, where does he place himself initially relative to the old sentry?

- To the right of the old sentry
- **To the left of the old sentry [CORRECT]**
- Two paces behind the old sentry
- Directly facing the old sentry

Explanation: Section-11 states that the new sentry will place himself on to the left of the old sentry and face the road without any word of command.

Q1986. What movement does the old sentry make upon the command 'Sentries Badli Karo'?

- **Takes two steps to the front [CORRECT]**
- Takes one step back
- Turns right and marches off
- Takes two steps to his left

Explanation: Section-11 specifies: 'The old sentry will take two steps to the front and the new sentry two steps to his right.'

Q1987. In 'Order arms one' (Bazu Shast(r)-ek) from Examine Arms, what part of the rifle does the left hand strike in Squad Two?

- **Just below the noscap [CORRECT]**
- Near the charging handle
- On the butt plate
- At the center of the barrel

Explanation: Section-9 (Order from the Examine) states: 'Pull the rifle down to the right side striking it with the left hand just below the noscap...'

Q1988. What is the specific instruction regarding ammunition for NCC cadets during guard posting and orders?

- Ammunition must be fully loaded at all times
- **Ammunition is not normally held by NCC cadets [CORRECT]**
- Ammunition is distributed by the orderly officer
- Ammunition is kept in the guard room only

Explanation: Section-11 mentions under posting and relieving sentries: '...and will then order transfer of ammunition (not normally held by NCC cadets).'

Q1989. Whose prior concurrence is required if other dignitaries specially invited as guests of honour are to be given a Guard of Honour by NCC units?

- Director General NCC
- The Defence Secretary
- **The Dy DG National Cadet Corps of the States concerned [CORRECT]**
- The Chief of Army Staff

Explanation: Paragraph 1 states that prior concurrence of the Dy DG National Cadet Corps of the States concerned must be obtained for guests of honour on special occasions.

Q1990. What is the distance between cadets when the Guard of Honour forms up?

- 18 inches
- **24 inches [CORRECT]**
- 30 inches
- 36 inches

Explanation: According to Section 12, Paragraph 3(a), the distance between cadets will be 24 inches.

Q1991. What is the distance between the front and rear ranks of the Guard of Honour?

- 2 paces
- 3 paces
- **4 paces [CORRECT]**
- 5 paces

Explanation: Paragraph 3(a) specifies that the guard will form up in two ranks with a distance of 4 paces between the front and rear ranks.

Q1992. Where does the band form up in relation to the Guard of Honour?

- On the left flank, 7 paces away
- **On the right flank in line with the guard and 7 paces from the right guide [CORRECT]**
- Behind the rear rank, 5 paces away
- Directly in front of the dais

Explanation: Paragraph 3(b) states the band will form up on the right flank in line with the guard and 7 paces from the right guide of the guard.

Q1993. What is the strength (rank and file) of the Guard of Honour provided for the President of India?

- 100 rank and file
- **150 rank and file [CORRECT]**
- 200 rank and file
- 50 rank and file

Explanation: Paragraph 4(a) notes that the strength will be 150 rank and file for the President, formed up in 3 equal divisions.

Q1994. How many rank and file are detailed for the Guard of Honour for the Prime Minister?

- 50
- **100 [CORRECT]**
- 150
- 200

Explanation: Paragraph 4(b) states there will be 100 rank and file for the Vice President and Prime Minister.

Q1995. Which salute is accorded to the President and Governors within their own states?

- General Salute
- Salami Shastr
- **Rashtriya Salute [CORRECT]**
- Guard Salute

Explanation: Paragraph 5(a) explicitly specifies Rashtriya Salute for the President and Governors within their own states.

Q1996. What compliment is given to other VIPs of the rank of Major General and above?

- Rashtriya Salute
- **General Salute [CORRECT]**
- Salami Shastr
- Arms Inspection Salute

Explanation: Paragraph 5(b) mentions General Salute for other dignitaries of the rank of Major General and above.

Q1997. What is the exact Hindi report given by the Guard Commander during inspection?

- Guard Samman ke liye taiyar hai
- **Guard (Name of Unit) Samman Guard Nirikshan ke Lie Hazir Hai Sriman (Srimati Ji) [CORRECT]**
- Guard Pranam ke liye hazir hai
- Sriman Samman Guard nireekshan ke liye upasthit hai

Explanation: Paragraph 6(a) outlines the exact phrase in Hindi used by the Guard Commander to report to the VIP.

Q1998. During the VIP's inspection, who is the only Aide-de-Camp (AsDC) permitted to march in front of the VIP?

- AsDC to the Prime Minister
- AsDC to the Governor
- **AsDC to the President of India [CORRECT]**
- None of the AsDCs

Explanation: Paragraph 6(c) states that AsDC will not march in front of the VIP except in the case of the President of India.

Q1999. Which rank(s) of the Guard of Honour will be inspected during the inspection procedure?

- Both front and rear ranks
- **Only the front rank [CORRECT]**
- Only the rear rank
- All divisions equally

Explanation: Paragraph 6(g) clearly specifies that only the front rank of the Guard will be inspected.

Q2000. When can the Guard Commander order the Guard of Honour to 'Stand at Ease' (Vishram)?

- Immediately after the inspection
- **After the VIP has proceeded some distance away from the Guard of Honour [CORRECT]**
- As soon as the VIP steps on the dais
- Only after the VIP completely leaves the venue

Explanation: Paragraph 7 states the Guard Commander may stand the guard at ease after the VIP has proceeded some distance away from the Guard of Honour.

Q2001. According to the Weapon Training index, which category of cadets is eligible for 'Aiming I - Range and Targets' (Section-4)?

- SD/SW only
- **JD/JW only [CORRECT]**
- Both JD/JW and SD/SW
- Neither JD/JW nor SD/SW

Explanation: The index table for Chapter IV shows a checkmark (✓) for JD/JW and a dash (-) for SD/SW under Section-4 Aiming I - Range and Targets.

Q2002. Which Section covers the characteristics of the 7.62 mm SLR and 5.56 mm INSAS in Chapter-IV (Weapon Training)?

- Section-8
- Section-9
- **Section-10 [CORRECT]**
- Section-6

Explanation: The Chapter-IV index lists Section-10 as 'Characteristics of 7.62 mm SLR and 5.56 mm INSAS'.

Q2003. According to the Weapon Training index, which cadets study 'Theory of Group and Snap Shooting' (Section-8)?

- JD/JW only
- **SD/SW only [CORRECT]**
- Both JD/JW and SD/SW
- None

Explanation: The index table shows a dash (-) for JD/JW and a checkmark (✓) for SD/SW under Section-8.

Q2004. What is the length of the Rifle .22 No II MK IV as specified in the text?

- 43 inches
- **45 inches [CORRECT]**
- 46 inches
- 44 inches

Explanation: According to the characteristics table in Section-1, the length of Rifle .22 No II MK IV is 45" and Rifle .22 Deluxe BA is 43".

Q2005. What is the magazine capacity of the Rifle .22 No II MK IV?

- 05 Rounds
- **10 Rounds [CORRECT]**
- 15 Rounds
- 20 Rounds

Explanation: The magazine capacity for Rifle .22 No II MK IV is 10 Rounds, while for the Deluxe BA variant, it is 05 Rounds.

Q2006. What is the maximum range of the .22 rifles mentioned at a 33-degree angle?

- 1500 yds
- **1700 yds [CORRECT]**
- 2000 yds

- 2500 yds

Explanation: The maximum range for both .22 variants is listed as 1700 yds at 33 angle.

Q2007. What is the normal rate of fire for the .22 rifles?

- 05 Rds pm [CORRECT]
- 10 Rds pm
- 15 Rds pm
- 20 Rds pm

Explanation: The normal rate of fire is 05 Rds pm (rounds per minute), while the rapid rate of fire is 10-15 Rds pm.

Q2008. How many grooves are present in the barrel of the .22 rifles?

- 04
- 05
- 06 [CORRECT]
- 08

Explanation: Section-1 characteristics specify that there are 06 grooves in the barrel.

Q2009. During the stripping of the bolt, what action should be performed with the left hand while holding the middle finger on the restraining catch?

- Keep it under the magazine [CORRECT]
- Press the trigger
- Push the safety catch
- Hold the butt trap

Explanation: Section-1 stripping instructions state to keep the left hand under the magazine with the middle finger on the restraining catch.

Q2010. What is the purpose of the centre loop of the pull through used in rifle cleaning?

- For the gauze
- For oiling the barrel
- For cleaning the barrel with flannelette [CORRECT]
- For use of the armourer

Explanation: The text explains that the pull through has three loops: the nearest to weight is for gauze, the centre for cleaning with flannelette, and the end one for oiling and armourer use.

Q2011. Is a charger provided for the Deluxe rifle according to Section-2?

- Yes, a standard 5-round charger
- Yes, a standard 10-round charger
- No charger is provided [CORRECT]
- Yes, a universal charger

Explanation: Section-2 paragraph 2 explicitly states: 'No charger is provided for Deluxe rifle. The ammunition is loaded one by one in the magazine.'

Q2012. When taking the lying position to load the rifle, where should the left hand grasp the rifle initially?

- At the butt end
- At the point of balance [CORRECT]
- At the muzzle

- At the bolt knob

Explanation: Section-2 paragraph 4(a) directs passing the rifle into the left hand and grasping it at the point of balance.

Q2013. What are considered the three basic essentials of good shooting?

- Speed, Agility, Strength
- **Comfortable/firm position, Correct aiming, Proper trigger pressing [CORRECT]**
- Clean weapon, Fast bolt action, High muzzle velocity
- Proper breathing, Steady stance, Rapid fire

Explanation: Section-3 paragraph 5 outlines the three basic essentials: position must be comfortable/hold firm, firer must aim correctly, and trigger be pressed without disturbing aim.

Q2014. How should sight setting be adjusted using the thumb spring?

- Range increasing towards the butt side
- **Range increasing towards the muzzle side [CORRECT]**
- Range increasing upwards
- Range remaining constant

Explanation: Section-1 paragraph 9 states: 'Set the sight by pressing the thumb spring (Range increasing towards the muzzle side-adjust the thumb spring accordingly).'

Q2015. What safety check must be performed on drill cartridges before handling?

- Ensure they are oiled
- **Ensure that there is no live ammunition [CORRECT]**
- Ensure they fit the magazine
- Check their weight

Explanation: Section-1 Safety Precautions paragraph 4(b) states: 'Inspect the drill cartridges and ensure that there is no live ammunition.'

Q2016. What geometric shape is formed by the forearms and the ground between the elbows when viewed from the front of the firer?

- Horizontal triangle
- **Vertical triangle [CORRECT]**
- Square
- Rectangle

Explanation: According to the text regarding the vertical triangle, the two sides are formed by the forearms and the base is the ground between the elbows as viewed from the front of the firer.

Q2017. Where should the butt plate meet the shoulder to avoid a sore shoulder and possible flinching?

- In the hollow of the shoulder
- **On the interior pad of the shoulder muscle joint [CORRECT]**
- Directly on the collarbone
- On the outer edge of the shoulder joint

Explanation: The text states that improper bedding results in sore shoulders, and the butt plate should meet the shoulder on the interior pad of the shoulder muscle joint and not in the 'hollow' of it.

Q2018. What is the standard range normally used for Deluxe .22 rifle shooting practice according to the aiming section?

- 10 yds

- 25 yds [CORRECT]
- 50 yds
- 100 yds

Explanation: The text explicitly mentions under Section 4 (Aiming I - Range and Targets) that normally 25 yds range is used for Deluxe .22 rifle.

Q2019. What type of target is generally used by girl cadets for rapid firing?

- 1' x 1' target
- 6 inches figure target [CORRECT]
- Target with a white patch
- Bullseye target without dimensions

Explanation: Section 4 states that for rapid firing, a 6 inches figure target is used, and the aim is taken at the centre of the figure.

Q2020. Why is elevation given to the rifle during aiming?

- To counter the wind velocity
- To counter the force of gravity while the bullet is in flight [CORRECT]
- To compensate for barrel wear
- To match the height of the target directly

Explanation: The text states that elevation is given to counter the force of gravity, while the bullet is in flight, and depends upon the range of the target.

Q2021. In Trigger Operation Exercise No. 1, what should the right hand do (except for the index finger)?

- Grip the left wrist as firmly as possible [CORRECT]
- Hold the right knee
- Support the head
- Hold the rifle stock firmly

Explanation: Trigger Operation Ex No 1 specifies that with the exception of the index finger, the right hand grips the left wrist as firmly as possible until the white is visible under the nail tips.

Q2022. During Trigger Operation Exercise No. 2, what part of the index finger should generate the movement?

- From the base knuckle
- From the middle joint of the index finger to its tip [CORRECT]
- Only the tip of the finger
- The entire hand and wrist

Explanation: Exercise No 2 method states that the only movement should be from the middle joint of the index finger to its tip.

Q2023. What is the maximum time recommended to take to fire a shot from the time correct holding is achieved?

- 2 seconds
- 3 seconds
- More than 5 seconds should not be taken [CORRECT]
- Up to 10 seconds

Explanation: Under 'Turning the Shot', the text dictates that from the time correct holding is achieved, more than five seconds should not be taken to fire a shot to avoid tiring the eye and muscles.

Q2024. What must the left hand do in relation to holding the rifle?

- Pull the rifle firmly into the shoulder
- **Support the forward part of the rifle and never pull it into the shoulder [CORRECT]**
- Grip the magazine tightly
- Force the left wrist under the rifle

Explanation: Section on The Left Hand explicitly states: 'Left hand must never pull the rifle into the shoulder' and it acts as support to the forward part of the rifle.

Q2025. What should happen to breathing just before taking an aim?

- Breathing must be held completely from the start of the session
- **Breathing must be gently restrained [CORRECT]**
- Take deep breaths rapidly
- Breathe normally without any change

Explanation: Under sequence of firing a shot (Breathing), it states that just before taking an aim, breathing must be gently restrained.

Q2026. What is the definition of 'Follow Through' in firing a shot?

- Cleaning the rifle barrel immediately after firing
- **The hold and aim must be maintained until the bullet has left the barrel (or reached the target) [CORRECT]**
- Quickly cycling the bolt after the shot
- Releasing the trigger pressure instantly

Explanation: The text defines follow through under item 18: 'The hold and aim must be maintained until the bullet has left the barrel. Better still fire should allow through until the bullet has reached the target.'

Q2027. What should the firer do when the 'range' is given on the firing range?

- Immediately fire a shot
- **Adjust his sights and await for indication of the target [CORRECT]**
- Report to the range officer
- Remove the magazine

Explanation: Action on Range Being Ordered specifies that when the 'range' is given the firer should adjust his sights and await for indication of the target.

Q2028. What target dimension is used specifically for application firing by girl cadets?

- 6 inches
- **1' x 1' [CORRECT]**
- 2' x 2'
- 3' x 3'

Explanation: The targets section states that for application firing, a 1' x 1' target is used where the aim is to be taken at the bull.

Q2029. During the aiming process, where must the tip of the foresight be aligned?

- Above the U sight
- **In the centre and in level with the shoulder of the black sight U [CORRECT]**
- Touching the top edge of the U
- To the extreme right of the U

Explanation: The laws of aiming state: 'The tip of the foresight must be aligned in the centre and in level with the shoulder of the U.'

Q2030. Where must at least one red flag always be positioned when the range is in use?

- At the entrance gate of the firing range
- **On the top of the butt [CORRECT]**
- Beside the officer-in-charge's table
- At the waiting detail shelter

Explanation: Range procedure states that one flag will always be on the top of anchorage/butt as a warning that the range is in use.

Q2031. What command is given to examine arms, requiring rifles to be held parallel to the ground and pointing towards the target?

- Khali Kar
- **Nirikshan ke lie Janch Shastra [CORRECT]**
- Age Barh
- Limber Up

Explanation: On the command 'Nirikshan ke lie Janch Shastra' (Examine Arms) rifles are held parallel to the ground pointing towards the target.

Q2032. What is the mandatory minimum distance that waiting details must maintain from the firing point or shelter?

- 5 yards
- **10 yds [CORRECT]**
- 25 yards
- 100 yds

Explanation: Waiting details must be at least 10 yds from the firing point or in the shelter provided.

Q2033. What action indicates completion of fire by a firer on the firing point?

- Placing the weapon flat on the ground
- Standing up immediately
- **Raising their right hand up, keeping the elbow on the ground [CORRECT]**
- Reporting 'theek' to the coach

Explanation: On completion of fire, the firers must raise their right hand up, keeping the elbow on the ground.

Q2034. What type of ammunition is strictly used on miniature ranges?

- .303 ammunition
- 5.56mm INSAS ammunition
- **.22 ammunition [CORRECT]**
- 9mm ball ammunition

Explanation: Only .22 ammunition will be used on miniature ranges.

Q2035. How is the Mean Point of Impact (MPI) defined in shooting theory?

- The exact center ring of the target paper
- **The central point of area covered by the group of rounds fired with consistent aim [CORRECT]**
- The point where the very first shot hits the target
- The highest point reached by a bullet trajectory

Explanation: MPI is defined as the central point of area covered by the group of rounds fired with consistent aim and held at the same aiming mark.

Q2036. At a range of 300 yards, what is the rise or drop of MPI on the target when the sight is changed?

- 6 inches
- **12 inches [CORRECT]**
- 18 inches
- 24 inches

Explanation: The elevation table specifies that at 300 Yards, the rise or drop of MPI on target is 12 inches.

Q2037. For training and coaching purposes, how many consecutive well-fired shots constitute a 'group'?

- Three consecutive shots
- Four consecutive shots
- **Five consecutive shots [CORRECT]**
- Ten consecutive shots

Explanation: For the purpose of training, the group will imply five consecutive well-fired shots fired with consistent aim.

Q2038. What term describes the diameter of a circle containing all five shots fired by a person to the best of their ability?

- **Grouping capacity [CORRECT]**
- Dispersion radius
- Ballistic spread
- Accuracy threshold

Explanation: The diameter of a circle containing all five shots, fired by a man to the best of his ability, is known as his grouping capacity.

Q2039. If a firer making a 4-inch group accidentally fires one stray bullet making the total spread 12 inches, what is considered their grouping capacity?

- 12 inches
- 8 inches
- 6 inches
- **4 inches [CORRECT]**

Explanation: A stray bullet due to incorrect aim is ignored for judging grouping capacity; thus if the main group is 4 inches, the grouping capacity remains 4 inches.

Q2040. In Stage-2 of miniature range snap shooting, what replaces the sound impulse as a signal for the firer to fire?

- A whistle blow
- A laser flash
- **Indication with a finger (raising of the finger) [CORRECT]**
- A verbal command 'Fire'

Explanation: Later in Stage-2, indication with a finger is given and the raising of the finger serves as the signal, meaning sight impulse replaces sound impulse.

Q2041. During practice firing in stages 3, 4, and 5, at which figure targets and ranges is snap shooting conducted?

- **Figure 11, 12 and ranges 100, 200, 300 yards [CORRECT]**
- Figure 9, 10 and ranges 50, 100, 150 yards
- Figure 11, 12 and ranges 200, 400, 600 yards
- Figure 1, 2 and ranges 100, 300, 500 yards

Explanation: Text explicitly states: Practice firing is done at figure targets 11, 12 and snap shooting at ranges 100, 200 and 300 yards.

Q2042. When firing on a miniature range, what is the progressive reduction in time for representative figure targets?

- From 10 to 5 seconds
- **From 7 to 4 seconds [CORRECT]**
- From 5 to 2 seconds
- From 8 to 3 seconds

Explanation: Text specifies that time is progressively reduced from 7 to 4 seconds when using representative figure targets on a miniature range.

Q2043. What is the guiding principle during Continuous Snap Shooting when a rifleman is confronted with multiple enemies?

- Shoot to wound
- **Shoot to kill [CORRECT]**
- Retreat to cover
- Call for artillery support

Explanation: Text states: The guiding principle is, always 'Shoot to Kill'.

Q2044. Which of the following points must be observed during Continuous Snap Shooting?

- Verbal declaration of aim must be loud
- The butt is removed from the shoulder for quick movement
- Accuracy is sacrificed for speed
- **The butt remains in the shoulder in order to save time in re-aiming [CORRECT]**

Explanation: Text explicitly lists point (c): The butt remains in the shoulder in order to save time in re-aiming.

Q2045. How many rounds are authorized per cadet for the 7.62mm Rifle course, including those pooled for zeroing and re-classification?

- 10 rounds
- **12 rounds [CORRECT]**
- 15 rounds
- 20 rounds

Explanation: Note states: Out of 12 rounds authorized per cadets, 2 rounds will be pooled for zeroing and re-classification of failures.

Q2046. What is the length of the 5.56mm INSAS Rifle without a bayonet?

- **960 mm [CORRECT]**
- 1110 mm
- 464 mm
- 1126.5 mm

Explanation: Text specifies: Length of Rifle without bayonet for 5.56mm INSAS is 960mm.

Q2047. What are the modes of fire available in the 5.56mm INSAS rifle?

- Single shot only
- Automatic only
- **Single shot & three round burst (TRB) [CORRECT]**
- Burst and full auto only

Explanation: Text states under Mode of fire: Single shot & three round burst (TRB).

Q2048. What is the cyclic rate of fire for the 5.56mm INSAS rifle?

- 60 rds/min
- 90 rds/min
- 150 rds/min
- **600 to 650 rds/min [CORRECT]**

Explanation: Text specifies under Rate of Fire for INSAS: Cyclic - 600 to 650 rds/min.

Q2049. What is the penetration capability of the 5.56mm INSAS rifle at a range of 700 meters?

- 2 mm
- **3 mm [CORRECT]**
- 5 mm
- 7 mm

Explanation: Text states under characteristics of 5.56mm INSAS: Penetration - 3mm at 700m.

Q2050. How is a partial citizen defined according to the text?

- A person who owes allegiance to the State and enjoys full political rights.
- **A person who owes allegiance to the State, but has no political rights. [CORRECT]**
- A person who owes no allegiance to the State but enjoys civil rights.
- A person who holds citizenship in multiple states simultaneously.

Explanation: Paragraph 11 explicitly defines a partial citizen as one who owes allegiance to the State, but has no political rights.

Q2051. Which of the following is NOT listed as a direct way to acquire Indian citizenship?

- By Birth
- By Descent
- By Naturalization
- **By Direct Investment [CORRECT]**

Explanation: Paragraph 13 lists the ways to acquire citizenship: By Birth, By Descent, By Registration, and By Naturalization. Direct Investment is not mentioned.

Q2052. According to the duties of a good citizen, which individuals are specifically classified as enemies of the country?

- Taxpayers and philanthropists
- **Blackmarketeers, hoarders, smugglers, and adulterators [CORRECT]**
- Active-duty NCC cadets and youth leaders
- Individuals who possess dual citizenship

Explanation: Paragraph 15(f) states that blackmarketeers, hoarders, smugglers, and adulterators are the enemies of the country.

Q2053. What leadership trait is described as the ability to make decisions promptly and announce them in a clear and forceful manner?

- **Decisiveness [CORRECT]**
- Initiative
- Alertness
- Judgement

Explanation: Paragraph 6 under Leadership Traits defines decisiveness as the ability to make decisions promptly and announce them in a clear and forceful manner.

Q2054. In the context of leadership traits, how should language be used when influencing subordinates?

- Use long, complex, and highly technical sentences.
- **Speak plainly and clearly with short, simple, positive, and direct sentences. [CORRECT]**
- Frequently use sarcasm to correct behavioral flaws.
- Criticize and condemn entire groups to set an example.

Explanation: Paragraph 4 under Leadership Traits specifies speaking plainly and clearly, making sentences short, simple, positive, direct, and avoiding sarcasm or criticism of an entire group.

Q2055. Which leadership trait involves mental and physical stamina measured by the ability to withstand pain, fatigue, stress, and hardship?

- Courage
- Dependability
- **Endurance [CORRECT]**
- Enthusiasm

Explanation: Paragraph 8 under Leadership Traits defines endurance as mental and physical stamina measured by the ability to withstand pain, fatigue, stress, and hardship.

Q2056. What is defined as 'to do what is to be done even in the absence of orders'?

- **Initiative [CORRECT]**
- Dependability
- Loyalty
- Integrity

Explanation: Paragraph 10 under Leadership Traits defines initiative as doing what is to be done even in the absence of orders.

Q2057. Which leadership trait includes uprightness of character, soundness of moral principles, and absolute truthfulness?

- Justice
- **Integrity [CORRECT]**
- Tact
- Knowledge

Explanation: Paragraph 11 under Leadership Traits describes integrity as the uprightness of character, soundness of moral principles, quality of absolute truthfulness, honesty, and personal integrity.

Q2058. What does the leadership trait 'Justice' require a leader to avoid during a tense situation?

- Making decisions quickly
- **Anger and other emotions, as well as prejudices of race or creed [CORRECT]**
- Consulting subordinates for their feedback
- Relying on professional knowledge

Explanation: Paragraph 13 states that justice involves avoiding anger and other emotions in a tense situation and avoiding prejudice of race or creed.

Q2059. Regarding a leader's knowledge, what core principle is emphasized in the text?

- **A leader must know more than the men he commands. [CORRECT]**
- A leader only needs to know as much as his junior-most subordinate.

- Knowledge acquisition stops once command is attained.
- Technical knowledge is entirely secondary to physical endurance.

Explanation: Paragraph 14 explicitly states: 'A leader must know more than the men he commands. Until he does, he has no business to be called their leader.'

Q2060. How is 'Tact' defined under leadership traits?

- The ability to display sincere interest and zeal in performance of duties.
- **The ability to deal with others without creating offence, involving understanding of human nature. [CORRECT]**
- The ability to remain cheerful and humorous under severe stress.
- The quality of absolute truthfulness and personal honesty.

Explanation: Paragraph 17 defines tact as the ability to deal with others without creating offence involving understanding of human nature and consideration for the feelings of others.

Q2061. Which quality is highlighted as a core aspect of 'Unselfishness' in a leader?

- Passing the credit to subordinates who made possible outstanding work
- Placing personal comfort and advancement above everything else
- Ensuring the leader avoids the hardships shared by subordinates
- Focusing exclusively on individual recreation

Explanation: Paragraph 18 states that unselfishness includes passing the credit to the subordinates who made possible outstanding work and sharing the same dangers, hardships, and discomforts.

Q2062. In the discussion on character development, what are the young compared to during their formative years?

- Hard steel that cannot be reshaped
- **Clay, which can be moulded in the desired way [CORRECT]**
- A blank canvas needing abstract art
- Unpolished diamonds requiring pressure

Explanation: Paragraph 4 under Character Development states: 'The young can be compared to clay, which can be moulded in the desired way.'

Q2063. According to the section on Character, what does true popularity depend upon?

- Having a pretty face or being handsome
- **Inner qualities of a true character [CORRECT]**
- Acquiring high political office
- Wealth and material possessions

Explanation: Paragraph 4 states that popularity does not depend upon a pretty face or upon being handsome, but upon inner qualities of a true character.

Q2064. What brings magnetism into one's personality according to the character development text?

- Strict enforcement of authoritarian rules
- **Proper adjustment of the many qualities of head and heart [CORRECT]**
- Exclusive reliance on physical appearance and clothing condition
- Avoiding stressful social situations entirely

Explanation: Paragraph 4 states that the qualities of a good character bring magnetism in one's personality which comes from a proper adjustment of the many qualities of head and heart.

Q2065. Which of the following biological heads under personality determinants includes characteristics transmitted by genes in chromosomes?

- Brain
- Physical features
- **Heredity [CORRECT]**
- Culture

Explanation: Heredity transmits certain characteristics, primarily physical in nature, from parents via genes in chromosomes.

Q2066. What is the term for the combination of family and social group contributions along with culture in shaping an individual?

- Mirroring
- **Socialisation [CORRECT]**
- Conviction
- Leadership

Explanation: The contribution of the family and social group in combination with culture is known as socialisation.

Q2067. In persuading anyone, why is your own 'conviction' considered important?

- **Because people are self-centred and put their own well-being first [CORRECT]**
- Because it guarantees financial rewards
- Because the leader holds an appointed position
- Because it eliminates the need for communication skills

Explanation: People are self-centred; therefore, your own conviction in convincing others is crucial because if it does not satisfy you, efforts will not produce results.

Q2068. Which of the following is NOT listed as one of the leadership traits that help improve character?

- Decisiveness
- Enthusiasm
- **Autocracy [CORRECT]**
- Patriotism

Explanation: Traits listed to improve character include courage, decisiveness, initiative, enthusiasm, loyalty, justice, morality, sense of duty, and patriotism. Autocracy is a leadership style, not a character trait from this list.

Q2069. How does active participation in NCC drill assist in a cadet's personality development?

- It teaches foreign languages
- **It keeps correct posture and makes cadets walk more confidently [CORRECT]**
- It provides direct technical advice
- It delegates administrative decisions

Explanation: Drill helps keep the posture of cadets in a correct position, enabling them to walk more confidently as part of a good physique.

Q2070. What do NCC camp competitions like flag area preparation, drill, and cultural programmes primarily develop among cadets?

- Autocratic control
- **Sportsmanship and team spirit [CORRECT]**
- Rigid hierarchical obedience

- Laissez-faire independence

Explanation: Competitions held in camps develop sportsmanship and team spirit among the cadets.

Q2071. According to the text, leadership is found not only in human beings but also among:

- Insects and reptiles
- **Animals and birds [CORRECT]**
- Microorganisms
- Plants and trees

Explanation: The text notes that leadership is found not only in human beings but even among animals and birds.

Q2072. How are policies and procedures determined in an Autocratic Leadership Style?

- By group discussion and active encouragement
- **By the leader alone [CORRECT]**
- With complete freedom for individual decisions
- By passive participation of the leader

Explanation: In an autocratic leadership style, all policies and procedures are determined by the leader, who is authoritative and task-oriented.

Q2073. In which leadership style does the leader play a passive role in social participation and leave complete freedom for group decisions?

- Autocratic
- Democratic
- **Laissez Faire [CORRECT]**
- Variable

Explanation: In Laissez Faire leadership, the leader plays a passive role and leaves complete freedom for group or individual decisions.

Q2074. What is the unique characteristic of the 'Variable' style of leadership?

- **The leader has the ability to vary their style as the situation demands [CORRECT]**
- The leader relies solely on authority
- The leader delegates all decisions permanently
- The leader remains completely passive

Explanation: In the variable style, the leader has the ability to vary their style as the situation demands.

Q2075. According to comparative studies between autocratic and democratic leadership, how did the autocratically led group behave in the leader's absence?

- They continued to function effectively
- They displayed enjoyment and constructive work
- **They tended to fall apart and displayed more hostility [CORRECT]**
- They automatically shifted to a Laissez-Faire style

Explanation: The autocratically led group displayed more hostility, aggression, lower morale, and tended to fall apart during the leader's absence.

Q2076. Under which type of leader was the quality and quantity of work better while the leader was physically present?

- Democratic leader
- **Autocratic leader [CORRECT]**

- Laissez-Faire leader
- Variable leader

Explanation: The text states that the quality and quantity of work under the autocratic leader was better, while its leader was present, than under the democratic leader.

Q2077. What is identified as the source of authority for an autocratic leader in making decisions?

- The subordinate group
- **The organization [CORRECT]**
- Peer pressure
- Democratic consensus

Explanation: The organization is the source of authority in making decisions for which an autocratic leader is responsible.

Q2078. What process is defined as influencing the activities of an individual or group towards the achievement of a goal in a given situation?

- Socialisation
- **Leadership [CORRECT]**
- Mirroring
- Communication

Explanation: Leadership is defined as the process of influencing the activities of an individual or a group towards the achievement of a goal in a given situation.

Q2079. What is defined as a standard of behaviour in the context of leadership and ethics?

- Ethics
- **Value [CORRECT]**
- Perception
- Integrity

Explanation: The text states that 'Value' means a standard of behaviour and 'Ethics' means a set of moral principles that govern a person's behaviour.

Q2080. Which of the following terms is defined in the text as uprightness?

- Honesty
- Purity
- **Integrity [CORRECT]**
- Fairness

Explanation: Under the list of important values in Section 5, 'Integrity' is explicitly defined as uprightness.

Q2081. Which of the following is NOT listed as a negative attribute to be guarded against by a leader?

- Ignorance
- Ego
- **Empathy [CORRECT]**
- Jealousy

Explanation: Section 6 lists negative attributes: ignorance, ego, temptations, envy, hate, jealousy, and lack of confidence. Empathy is a positive trait.

Q2082. How many sub-processes are involved in the mechanism of perception according to the text?

- Three
- Four

- Five [CORRECT]
- Six

Explanation: Section 7, Paragraph 5 states that perception involves five sub-processes: stimulus, registration, interception (interpretation), feedback, and consequence.

Q2083. In the perceptual process, which sub-process initiates the entire sequence?

- Registration
- Stimulation [CORRECT]
- Interpretation
- Feedback

Explanation: Paragraph 5(a) under Mechanism states that 'Perception initiates with the presence of a stimulus situation.'

Q2084. What are the two items involved while dealing with the selective phenomenon in perception?

- Stimulus and Response
- Attention and Set [CORRECT]
- Registration and Feedback
- Motive and Habit

Explanation: Paragraph 6 under Principles of Perceptual Selection states: 'While dealing with selective phenomenon two items are involved, 'Attention' and 'Set'.'

Q2085. Factors that attract attention and lie within the external situation are called what?

- Internal set factors
- External attention factors [CORRECT]
- Cognitive variables
- Sensory stimuli

Explanation: Paragraph 7 notes that factors that attract attention lying in the situations are called 'External attention factors'.

Q2086. In ancient India, where did young boys and girls learn the fundamentals of correct behaviour and moral principles?

- Military Academies
- Gurukuls under gurus [CORRECT]
- Public schools
- Monasteries

Explanation: Paragraph 2 states young boys and girls learnt fundamentals under the guidance of saints and gurus in their gurukuls.

Q2087. Which value is described as 'behaviour according to essential rules and norms which is self-imposed'?

- Discipline [CORRECT]
- Loyalty
- Selflessness
- Purity

Explanation: Paragraph 5(d) defines discipline as behaviour according to essential rules and norms which is self-imposed.

Q2088. What does the perceptual process primarily consist of according to the formal definition?

- Only sensory recording
- **A complicated interaction of selection, organization, and interpretation of stimuli [CORRECT]**
- Direct physical measurement
- Unfiltered reality reflection

Explanation: Paragraph 3 defines the perceptual process as 'a complicated interaction of selection, organization, and interpretation of stimuli'.

Q2089. Which internal set factor is illustrated by a retired soldier throwing himself on the ground upon hearing a sudden burst of a car tyre?

- Motivation
- **Habit [CORRECT]**
- Learning
- Interest

Explanation: Paragraph 9(a) under Internal Set Factors gives the example of a retired soldier reacting to a sudden sound due to well-established habit.

Q2090. Which sub-process of perception determines an individual's interpretation of a stimulus based on motivation, personality, and learning?

- Registration
- Stimulation
- **Interpretation [CORRECT]**
- Consequence

Explanation: Paragraph 5(c) states that psychological processes like motivation, personality, and learning determine an individual's interpretation.

Q2091. Why might a person take several seconds to notice an error in the triangle phrase 'TURN OFF THE THE ENGINE'?

- Poor eyesight
- **Prior learning creating an expectancy to perceive familiarly [CORRECT]**
- Lack of motivation
- Low stimulus intensity

Explanation: Paragraph 9(c) explains that familiarity from prior learning creates an expectancy to read it as 'Turn off the engine'.

Q2092. According to the text, what is the old saying that applies heavily to a leader who guides a group?

- Honesty is the best policy
- **Practice what you preach [CORRECT]**
- Actions speak louder than words
- Knowledge is power

Explanation: Paragraph 5 states: 'As the old saying goes 'Practice what you preach', as a leader is the person who guides the group, the saying is more applicable to him.'

Q2093. The word 'Communication' has been derived from which Latin word, and what is its primary meaning?

- Derived from 'Communicare', meaning to speak freely
- **Derived from 'Communis', meaning to make common [CORRECT]**
- Derived from 'Communio', meaning to share secrets
- Derived from 'Communico', meaning to transfer orders

Explanation: The text states that the word 'Communication' has been made up from the Latin word 'Communis', which means to make common.

Q2094. According to the communication process outlined in the text, what is the reply sent by the communicatee back to the communicator called?

- Decoding
- Encoding
- **Feedback [CORRECT]**
- Intercourse

Explanation: The text defines feedback as the reply sent by the communicatee to the communicator, which completes the cycle of the communication process.

Q2095. Which of the following best describes 'Encoding' in the communication process?

- The receiver attaching meaning to words or symbols
- **The sender choosing certain words or non-verbal methods to send an intentional message [CORRECT]**
- The method used to deliver a message physically or electronically
- External sounds that distract the communicator during transmission

Explanation: Encoding is defined as the activity where the sender must choose certain words or non-verbal methods to send an intentional message.

Q2096. In the context of communication noise, hearing disorders, illnesses, and disabilities fall under which category of noise?

- Physical noise
- **Physiological noise [CORRECT]**
- Psychological noise
- Mechanical noise

Explanation: The text specifies that hearing disorders, illnesses, and disabilities that make it difficult to send or receive messages fall under physiological noise.

Q2097. Forces within the sender or receiver such as egotism, defensiveness, hostility, preoccupation, and fear are examples of which type of noise?

- Physical noise
- Mechanical noise
- **Psysiological (Psychological) noise [CORRECT]**
- Environmental stress noise

Explanation: The text explicitly lists egotism, defensiveness, hostility, preoccupation, and fear under 'Psysiological noise' forces within sender or receiver.

Q2098. Which of the following is NOT listed in the text as a dimension of the context that influences communication?

- Physical context
- Social context
- **Financial context [CORRECT]**
- Chronological context

Explanation: The text lists physical, social, chronological, and cultural as the dimensions of context. Financial context is not mentioned.

Q2099. Under physical barriers to communication, high temperature, humidity, and bad ventilation contribute to which specific hindrance?

- Competing Stimulus
- **Environment Stress [CORRECT]**
- Subjective Stress
- Ignorance of Media

Explanation: The text states that high temperature, humidity, bad ventilation, etc., contribute to environment stress as a physical barrier.

Q2100. What is the psychological barrier defined as the attitude of people with closed minds who think they know everything about a subject and are not prepared to accept mistakes?

- Unjust Assumptions
- **Barrier of Allness [CORRECT]**
- Sophisticated Role
- Apathetic Listener

Explanation: The text describes 'Allness' as the attitude of people with closed minds who think they know everything about a subject and usually are not prepared to accept that they could be mistaken.

Q2101. When listeners tend to pass remarks or criticise the communicator even though his communication is not completed, what psychological barrier is occurring?

- **Snap Reactions [CORRECT]**
- Defensiveness
- Fear
- Apathetic Listener

Explanation: Snap reactions are defined as listeners tending to pass remarks or criticise the communicator even though his communication is not completed.

Q2102. Whistling microphones and incorrect placement of loudspeakers in group communication are examples of which barrier?

- Physical barriers
- **Mechanical barriers [CORRECT]**
- Psychological barriers
- Linguistic barriers

Explanation: The text notes that in group communication, whistling microphones and incorrect placement of loudspeakers are mechanical barriers that interfere with physical transmission.

Q2103. Messages flowing from subordinates to superiors in an organization are labeled as:

- Downward Communication
- Horizontal Communication
- **Upward Communication [CORRECT]**
- Interpersonal Communication

Explanation: The text states that messages flowing from subordinates to superiors are labeled upward communication.

Q2104. Which principle of effective communication stresses that encoding of thought is an intellectual task that must be done with proper care and thinking by constructing the message in a meaningful manner?

- Clarity of Objective
- **Proper Messenger [CORRECT]**

- Knowledge of Communicatee
- Selection of Media / Method

Explanation: The text under 'Proper Messenger' states that the communicator should construct the message in a meaningful manner and that encoding of thought is an intellectual task done with proper care.

Q2105. According to the text, what is described as 'perhaps the greatest barrier in communication area' due to cultural conditions, accents, and subjective meanings?

- Physical noise
- Language [CORRECT]
- Mechanical interference
- Environmental stress

Explanation: The text states under Linguistic and Cultural Barriers that 'Language is perhaps the greatest barrier in communication area.'

Q2106. Which psychological barrier involves a receiver who is not willing to learn from the communicator and is essentially unteachable?

- Apathetic Listener
- Sophisticated Role [CORRECT]
- Defensiveness
- Unjust Assumptions

Explanation: The text defines 'Sophisticated Role' as a barrier where the receiver is not willing to learn from the communicator, meaning he is unteachable.

Q2107. What is a major advantage of face-to-face communication regarding message transmission?

- There is a time lag between transmission and reception
- There is no time lag between the transmission of a message and its reception [CORRECT]
- It requires written documentation before delivery
- It completely eliminates the need for feedback

Explanation: According to the advantages of face-to-face communication, once contact is made with the audience, there is no time lag between the transmission of a message and its reception.

Q2108. Why is face-to-face communication termed the 'richest kind of communication channel'?

- Because it is the most expensive method
- Because it permits instantaneous feedback [CORRECT]
- Because it relies entirely on written memos
- Because it eliminates the speaker's control

Explanation: Face-to-face communication permits instantaneous feedback, which gives it a tremendous amount of feedback and makes it the richest kind of communication channel.

Q2109. Which of the following is listed as a type of verbal communication in the text?

- Voice [CORRECT]
- Electronic mail
- Teleconferencing
- Printed reports

Explanation: The types of verbal communication mentioned include Voice, Appearance, The Face and Eyes, and Posture and Movement.

Q2110. What three elements blend together to form 'talking style'?

- **Pitch, speed, and volume [CORRECT]**
- Tone, accent, and vocabulary
- Posture, movement, and gestures
- Writing, reading, and listening

Explanation: Talking style refers to how the three parts of voice quality—pitch, speed, and volume—blend together.

Q2111. What is the primary difference between hearing and listening as described in the text?

- Hearing requires deliberate effort, whereas listening is passive
- **Hearing is a passive and effortless activity, whereas listening requires deliberate effort, attention, and concentration [CORRECT]**
- Hearing only occurs during teleconferencing, whereas listening occurs face-to-face
- There is no functional difference between hearing and listening

Explanation: Hearing is a passive and effortless activity, whereas listening is a conscious, positive act requiring willpower, attention, and concentration.

Q2112. During which time frame is listening efficiency at its highest according to the text?

- During the last 10 minutes
- During the middle 30 minutes
- **During the first 10-15 minutes [CORRECT]**
- Efficiency remains constant throughout

Explanation: Listening efficiency is at its highest during the first 10-15 minutes and lowest during the last 10 minutes.

Q2113. Which process is noted as being faster: listening or speaking?

- Speaking is faster than listening
- **Listening is faster than speaking [CORRECT]**
- Both occur at exactly the same rate
- Neither can be measured in terms of speed

Explanation: Listening is a fast process; the rate at which we listen is faster than the rate at which we speak, allowing listeners time to analyze and evaluate arguments.

Q2114. In the mahakavya on leadership, what do the components 'TO BE' represent?

- Style of leadership by personal example
- **Character and knowledge, in balance [CORRECT]**
- Functions, tools, and techniques of leadership
- Historical examples of courage

Explanation: The text defines 'TO BE' as character and knowledge, in balance, which are the source of leadership.

Q2115. In the leadership mahakavya, what does 'TO DO' signify?

- Character and knowledge
- **The style of leadership by personal example; a reflection of TO BE [CORRECT]**
- The tools and techniques of communication
- The evaluation of listening efficiency

Explanation: 'TO DO' is defined as the style of leadership by personal example; a reflection of TO BE.

Q2116. According to the text on leadership history, outstanding leaders have an inner structure composed of what?

- Strict military regulations
- **Certain universal qualities [CORRECT]**
- Advanced technological skills
- Rigid political ideologies

Explanation: The text states that outstanding leaders have an inner structure which is composed of certain universal qualities.

Q2117. What is described as the most admired human virtue in all societies under the historical examples of leadership?

- Intelligence
- **Courage [CORRECT]**
- Eloquence
- Charisma

Explanation: The text notes that courage is the most admired human virtue in all societies; to be a man means to be courageous.

Q2118. According to the section on courage and endurance, what is considered the most important act of courage for a leader?

- **To make decisions [CORRECT]**
- To deliver long speeches
- To conduct teleconferencing
- To take copious notes

Explanation: The text states: 'The most important act of courage for a leader is to make decisions. No action can start unless a decision is made.'

Q2119. What form of communication replaces face-to-face meetings by allowing individuals to work on documents that are 'shared' via computer?

- Voice mail
- **Documentation of Computer Conferencing [CORRECT]**
- Audio conferencing
- Written bulletins

Explanation: The text states that Documentation of Computer Conferencing replaces face-to-face meetings by allowing individuals to work on documents that are shared via computer.

Q2120. What does 'Adaptation' mean in the context of effective talking?

- Speaking as loudly as possible in all situations
- **Fitting a message to a specific receiver [CORRECT]**
- Memorizing a speech word-for-word
- Avoiding non-verbal communication cues

Explanation: Adaptation means fitting a message to a specific receiver, which includes selecting the right words and using the right voice pitch, speed, volume, and style.

Q2121. Who was the officer responsible for holding on to Skardu with hardly 250 men for six long months during the strategy to save Ladakh?

- Brigadier Mohamed Latif
- **Lieutenant Colonel Sher Jung Thapa [CORRECT]**

- General Mathew B Ridgeway
- Eisenhower

Explanation: Lieutenant Colonel Sher Jung Thapa displayed extraordinary gallantry and leadership by holding Skardu with about 250 men for six months.

Q2122. What was the nickname of the enemy-held hilltop targeted for capture by Brigadier Mohamed Latif during the 1971 War?

- Tiger Hill
- Baldy [CORRECT]
- Tololing
- Point 5140

Explanation: Brigadier Latif launched an attack to capture an enemy-held hill top nicknamed 'Baldy', surrounded by dense pine forests.

Q2123. Which Persian saying is cited in the text to illustrate the negative impact of a leader setting a bad personal example?

- A bad workman blames his tools.
- If the king plucks one apple from the public Garden, the public will take away even the roots. [CORRECT]
- As you sow, so shall you reap.
- A leader is best when people barely know he exists.

Explanation: The text uses this Persian saying to emphasize that good or bad personal examples by leaders are highly infectious.

Q2124. Who recorded the historical account of Alexander crossing the dreaded Gedrosian Desert while leading his men on foot?

- Herodotus
- Arian [CORRECT]
- Thucydides
- Xenophon

Explanation: Arian is cited in the text as the most reliable historian of Alexander's conquests who recorded the desert crossing incident.

Q2125. According to General Mathew B Ridgeway, which of the following is explicitly included in his definition of 'Character'?

- Wealth, power, and social status
- Self discipline, loyalty, and readiness to accept responsibility [CORRECT]
- Aggressiveness, speed, and tactical surprise
- Eloquence, charm, and political acumen

Explanation: General Ridgeway states that character stands for self-discipline, loyalty, readiness to accept responsibility, and willingness to admit mistakes.

Q2126. On what exact date was Operation Overlord (the Allied amphibious and airborne assault in Europe during WWII) originally planned?

- 15 August 1945
- 6 June 1944 [CORRECT]
- 13 April 1984
- 24 October 1942

Explanation: Operation Overlord was planned for 6 June 1944, facing severe weather dilemmas before execution.

Q2127. What was the designated D-Day approved by the Army Commander for Operation Meghdoot to secure the Siachen Glacier in 1984?

- 6 June
- **13 April [CORRECT]**
- 8 May
- 17 April

Explanation: The Brigade Commander suggested 13 April, which was approved by the Army Commander to give troops time to organize before Pakistani reaction.

Q2128. During Operation Meghdoot, what was the approximate altitude and recorded temperature during the 72-hour blizzard experienced by the first-phase troops?

- 10,000 feet and minus 20 degrees centigrade
- **18,000 feet and minus 60 degrees centigrade [CORRECT]**
- 15,000 feet and minus 40 degrees centigrade
- 20,000 feet and minus 10 degrees centigrade

Explanation: The text notes the troops were at 18,000 feet above sea level with the temperature at minus 60 degrees centigrade.

Q2129. How many words did Sir Winston Churchill use during his keynote address at his former school's 150th Anniversary celebration to distill the secret of leadership?

- Three words
- **Five words [CORRECT]**
- Seven words
- Ten words

Explanation: Churchill delivered the five-word address: 'NEVER NEVER NEVER NEVER GIVE UP'.

Q2130. How is a custom defined in the Armed Forces Services context?

- A temporary order issued by headquarters
- **An established usage consisting of positive actions reasonably and universally accepted [CORRECT]**
- A legally binding statute passed by parliament
- An optional social etiquette for civilian gatherings

Explanation: The text defines a custom as an established usage that consists of positive actions which are reasonably and universally accepted, becoming 'Unwritten Law' over time.

Q2131. What is identified as the origin of the military custom of saluting by a junior to a senior?

- Showing respect to the royal crown
- **Opening the palm to show that the person held no offensive weapon [CORRECT]**
- Shielding one's eyes from the sun in the presence of an officer
- Touching the helmet as a sign of religious blessing

Explanation: The custom started when a person opened their palm to establish good intentions by showing they held no offensive weapon.

Q2132. What responsibility did Eisenhower take in his drafted press release in case Operation Overlord failed?

- He blamed the meteorological department for faulty weather forecasts.
- **He stated that if any blame or fault was attached to the attempt, it was his. [CORRECT]**
- He blamed subordinate commanders for poor execution.

- He claimed the enemy had superior intelligence.

Explanation: Eisenhower wrote: 'If any blame or fault is attached to the attempt it is mine.'

Q2133. Which military operation in 1984 involved securing the Siachen Glacier through a heli-borne operation before June?

- Operation Pawan
- **Operation Meghdoot [CORRECT]**
- Operation Vijay
- Operation Rakshak

Explanation: Operation Meghdoot was executed in April 1984 to secure the Siachen Glacier against Pakistani troop deployment.

Q2134. According to the text regarding military customs, what do chivalry and comradeship in arms count above?

- **Every thing else [CORRECT]**
- Only tactical training
- Administrative logistics
- Personal awards

Explanation: The text states that in the profession of arms, chivalry and comradeship in arms count above everything else.

Q2135. What leadership trait was prominently demonstrated by Alexander when he poured the tiny trickle of water onto the ground in full view of his thirsty troops?

- Financial management
- **Power of endurance and genius for leadership [CORRECT]**
- Strict disciplinary punishment
- Delegation of authority

Explanation: The historian Arian records that Alexander's action was a proof of not only his power of endurance, but also of his genius for leadership.

Q2136. What is the historical origin of the hand salute used in the Navy, where the hand is raised to the cap with the palm downwards?

- To shield the eyes from the bright sun on the deck
- To show recognition to a fellow knight as a friend
- **To avoid showing grubby hands of sailors working on the deck [CORRECT]**
- To kiss the cross on the sword before combat

Explanation: Paragraph 6 states that in the Navy, the hand is raised with the palm downwards so as not to show grubby hands of the sailors working on the deck.

Q2137. How must NCC Cadets and other ranks pay compliments to the National Flag when it is being hoisted or hauled down at Reveille and Retreat?

- Face the flag staff and salute
- **Stand to attention [CORRECT]**
- Remove their hats and bow slightly
- Come to attention and say 'Sat Sri Akal'

Explanation: Paragraph 11 specifies that officers face the flag staff, stand to attention and salute, whereas NCC Cadets and other ranks only stand to attention.

Q2138. Which of the following military units carry colours with the exception of rifle regiments?

- Armoured Corps regiments
- **All infantry regiments [CORRECT]**
- The Lancers
- Air Force squadrons

Explanation: Paragraph 21 explicitly states that all infantry regiments, with the exception of rifle regiments, carry colours.

Q2139. According to the mess conduct guidelines, what action should be taken if a senior officer enters the mess and it is the only copy available?

- Offer your seat under the fan
- **Offer the newspaper or magazine you are reading [CORRECT]**
- Leave the room immediately
- Stand up and offer him a drink

Explanation: Paragraph 24(k) states that if you are reading a newspaper or magazine and a senior officer comes in, you should get up and offer the paper to him if it is the only copy in the mess.

Q2140. Which of the following games are permitted as 'gambling' games in an Officers' Mess?

- Poker and Blackjack at high stakes
- **Bridge and some other games at very small stakes [CORRECT]**
- Roulette and Dice
- All card games without monetary limits

Explanation: Paragraph 24(l) states that bridge and some other games, at very small stakes, are the only gambling games permitted in a mess.

Q2141. When is it considered improper for an officer or cadet to be seen smoking whilst in uniform?

- Whilst resting inside the Officers' Mess ante-room
- **Whilst marching with troops except during halts with permission [CORRECT]**
- Whilst off parade in civil life wearing mufti
- Whilst attending a regimental guest night in the mess

Explanation: Paragraph 28(b) lists smoking whilst marching with troops except during halts with the permission of a senior as an occasion when it is improper to smoke in uniform.

Q2142. What do Armoured Corps regiments carry instead of standard infantry colours, with the exception of the Lancers?

- **Standards and guidons [CORRECT]**
- Battle flags and pennants
- Regimental shields
- State insignias

Explanation: Paragraph 21 notes that Armoured Corps regiments carry standard and guidons with the exception of the Lancers.

Q2143. How should an officer in uniform and NOT wearing head-dress correctly greet a lady or gentleman?

- Salute smartly with the right hand
- **Come to attention, bow slightly, say appropriate words, and shake hands if offered [CORRECT]**
- Raise the hat and say 'good morning'
- Say 'Ram Ram' or 'Sat Sri Akal'

Explanation: Paragraph 10(a) states that when in uniform and not wearing head dress, the correct greeting is to come to attention and bow slightly, say appropriate words of greeting, and shake hands if offered.

Q2144. During breakfast and lunch in the mess, what reading material is permitted, and what is restricted regarding dinner?

- Books are permitted at breakfast; newspapers are forbidden at lunch
- **Newspapers or periodicals may be read during breakfast and lunch, but not at dinner [CORRECT]**
- Magazines are allowed during dinner, but newspapers are not
- No reading material is allowed during any meal

Explanation: Paragraph 24(m) specifies that you may read a newspaper or a periodical during breakfast and lunch but not at dinner, and it is 'not done' to read a book in the dining room.

Q2145. According to the rules of introduction, how should a person be introduced in terms of hierarchy?

- A senior is introduced to a junior
- An older person is introduced to a younger person
- **A gentleman is introduced to a lady [CORRECT]**
- A married woman is introduced to a single woman

Explanation: Paragraph 29 states the normal rule: a gentleman is introduced to a lady, a single woman to a married woman, a younger to an older, and a junior to a senior.

Q2146. What is the correct action for a soldier riding a bicycle, horse, or mechanical vehicle when passing a saluting base?

- Salute with the right hand while maintaining control
- **Do not salute due to danger, but give eyes right or left while stationary without removing hands from the wheel or bar [CORRECT]**
- Dismount completely and offer a full hand salute
- Nod the head forward without changing posture

Explanation: Paragraph 14 details that soldiers do not salute while riding due to danger, but when stationary, eyes right or left will be given without removing hands from the wheel or bar.

Q2147. Who awards colours to a regiment for their honourable service, bearing all the regiment's battle honours emblazoned on them?

- The Chief of the Army Staff
- The Prime Minister
- **The President [CORRECT]**
- The Defence Minister

Explanation: Paragraph 20 states that the colours are awarded to a regiment by the President for their honourable service.

Q2148. How are NCC Cadets expected to behave when the National Anthem is played during a ceremonial parade?

- Stand at attention and salute
- **Stand at attention and do not salute [CORRECT]**
- Stand at attention and remove hats
- Face the flag staff and present arms

Explanation: Paragraph 12 states that if played during a ceremonial parade, NCC Cadets only stand at attention and do not salute.

Q2149. What is the primary purpose of the mess 'suggestions book' if one exists?

- Registering formal disciplinary complaints against members
- Writing humorous remarks and sarcasm about the mess food
- **Making constructive suggestions for the improvement of the mess [CORRECT]**
- Recording guest attendance and visiting hours

Explanation: Paragraph 24(j) states that the mess suggestions book is meant for constructive suggestions for the improvement of the mess, avoiding sarcasm or attempts at humour.

Q2150. What does the 'present arms' with the rifle symbolically represent in military tradition?

- Preparation for immediate combat engagement
- **Disarming oneself as a mark of trust and friendship [CORRECT]**
- A religious blessing of the weapon
- Paying homage to the regimental colours

Explanation: Paragraph 8 states that 'present arms' with the rifle is symbolic of disarming oneself, held to suggest it is being offered as a mark of trust and friendship.

Q2151. What is the primary definition of a group according to the text?

- **Any number of people who share goals, communicate over time, and are few enough for person-to-person communication [CORRECT]**
- Only individuals who work in professional corporate environments to generate profit
- A large crowd of people gathered randomly for a public event without common objectives
- People belonging to the same culture, language, and geographical region interacting daily

Explanation: Section-11, Paragraph 1 defines a group as any number of people who share goals, often communicate over time, and are few enough so that each individual may communicate with all others, person-to-person.

Q2152. Task groups are created by management to accomplish certain organizational goals and can be further classified into which of the following?

- Friendship, Social, and Cultural groups
- **Formal, Informal, and Effective groups [CORRECT]**
- Functional, Cross-functional, and Self-managed groups
- Primary, Secondary, and Tertiary groups

Explanation: Paragraph 2(b) outlines that task groups can be further classified as Formal Groups, Informal Groups, and Effective Groups.

Q2153. In the context of an effective group, which of the following is NOT listed as one of its characteristics?

- Its members know why the group exists and have shared goals
- Its members have learned to deal with conflict within the group
- **Its members depend entirely on the leader for all decisions without questioning [CORRECT]**
- Its members communicate freely among themselves

Explanation: Paragraph 2(b)(iii) lists characteristics of effective groups, which include self-direction and independence, whereas mature groups show an increasing ability to be self-directed rather than depending entirely on the leader.

Q2154. According to the text, in what year did India achieve freedom largely due to the strength of the nation as a group?

- 1942
- **1947 [CORRECT]**

- 1950
- 1952

Explanation: Paragraph 5 explicitly states that it is because of the strength of the nation as a group only that India could achieve freedom in 1947.

Q2155. How are 'teams' defined when distinguished from general groups?

- **Two or more people who are interdependent and share responsibility for outcomes [CORRECT]**
- Any large gathering of people in a social system sharing casual acquaintance
- Individuals who work independently without any common objective or accountability
- Temporary assemblies formed strictly for entertainment purposes

Explanation: Paragraph 7 defines teams as two or more people who are interdependent, share responsibility for outcomes, and see themselves as an intact social entity.

Q2156. What is described in the text as the key aim of teamwork?

- Individual supremacy
- **Group synergy [CORRECT]**
- Administrative hierarchy
- Resource hoarding

Explanation: Paragraph 9 states that a key aim of teamwork is group synergy, namely the achievement of high quality as a result of combined individual contributions.

Q2157. Which team type typically represents individuals who work together daily on a cluster of ongoing and independent tasks within departments like marketing, production, or finance?

- Problem Solving Teams
- Cross-Functional Teams
- **Functional Teams [CORRECT]**
- Self-Managed Teams

Explanation: Paragraph 11(a) defines Functional Teams as those representing individuals who work together daily on ongoing tasks within functional departments like marketing, production, finance, auditing, and human resources.

Q2158. Which of the following is identified in the text as a characteristic of a team?

- **Illusion of invulnerability [CORRECT]**
- Complete operational isolation
- Rigid individual autocracy
- Absence of shared responsibility

Explanation: Paragraph 12(a) lists 'Illusion of invulnerability' among the characteristics of a team.

Q2159. According to the passage on mature groups, what happens to the time needed to recover from threatening group situations?

- It increases significantly
- It remains completely unpredictable
- **It decreases [CORRECT]**
- It doubles with every crisis

Explanation: Paragraph 6(h) mentions 'A decrease in time needed to recover from threatening group situations' as a characteristic of a mature group.

Q2160. What term is used in the text when referring to the collective name given to people living in India despite having different languages, cultures, and feeding habits, believing themselves to be children of one mother?

- **Mother India [CORRECT]**
- Bharat Varsha
- Hindustan
- Motherland Earth

Explanation: Paragraph 4 states that despite all differences, people live together in harmony and believe to be the children of one mother called 'Mother India'.

Q2161. Which teams focus on specific issues in their areas of responsibility and are often empowered to take actions within defined limits?

- **Problem Solving Teams [CORRECT]**
- Functional Teams
- Friendship Groups
- Informal Groups

Explanation: Paragraph 11(b) states that Problem Solving Teams focus on specific issues in their areas of responsibility, develop potential solutions, and are often empowered to take actions within defined limits.

Q2162. What is defined as the measure adopted by the civilian population, Government, local self bodies and voluntary organisation during war to minimize the effects of enemy action on men and material?

- **Civil Defence [CORRECT]**
- Disaster Management
- Air Raid Precaution
- Strategic Defence

Explanation: Civil defence is formally defined as measures adopted by the civilian population, Government, local bodies, and voluntary organizations during war to minimize the effects of enemy action.

Q2163. Which of the following falls under 'Protective Preventive Measures' of Civil Defence taken before an air raid?

- Reconnaissance and reporting damage
- **Dispersal of population and industries [CORRECT]**
- Rescue of casualties and clearance of debris
- Salvage of property and disposal of dead

Explanation: Protective preventive measures are taken before an air raid and include dispersal of population and industries, camouflage, preparation of shelters, warning, and training.

Q2164. Who is the ultimate authority on Civil Defence at the district level and acts as the controller of Civil Defence?

- Superintendent of Police
- Civil Surgeon
- **District Magistrate [CORRECT]**
- PWD Engineer

Explanation: In a district, the District Magistrate is the ultimate authority on CD and is designated as the controller of Civil Defence.

Q2165. Which Civil Defence service serves as a vital link between the public and the authorities, and is responsible for organizing self-help and fire parties?

- **Warden's Service [CORRECT]**

- Headquarters Service
- Rescue Service
- Supply Service

Explanation: The Warden's Service acts as a link between the public and authorities, organizes self-help parties, checks light restrictions, reports damages, and guides homeless people.

Q2166. In what specific capacities can the National Cadet Corps (NCC) assist the Civil Defence organisation according to the text?

- Fire Fighting and Rescue Services
- **Welfare Services and Message Services [CORRECT]**
- Corpse Disposal and Salvage Services
- Supply and Warden Services

Explanation: The text explicitly states that NCC can help the Civil Defence by assisting them in Welfare Services and Message Services.

Q2167. What percentage of the world's population resides in developing countries, where up to 60 percent are highly vulnerable to natural hazards?

- 60 percent
- **80 percent [CORRECT]**
- 90 percent
- 95 percent

Explanation: The text notes that 80 percent of the world's population resides in developing countries and up to 60 percent of them are highly vulnerable to floods, severe storms, and earthquakes.

Q2168. What proportion of total disaster-related deaths worldwide occurs in developing countries, as cited in the text?

- 60 percent
- 80 percent
- 90 percent
- **95 percent [CORRECT]**

Explanation: The text states that 90 percent of natural disasters and 95 percent of total disaster-related deaths worldwide occur in developing countries.

Q2169. Which of the following is classified strictly as a 'Water Related' natural disaster in the NCC disaster management syllabus?

- Cyclone
- Tornado
- **Flash flood [CORRECT]**
- Avalanche

Explanation: Water-related disasters include flood, cloudburst, flash flood, excessive rains, and drought. Cyclones are wind-related and avalanches are earth-related.

Q2170. Which of the following is categorized under 'Earth Related' natural disasters?

- Storm surge
- Cloudburst
- **Tsunamis [CORRECT]**
- Industrial Mishap

Explanation: Earth-related disasters listed in the text include Earthquake, Tsunamis, Avalanches, Landslides, and Volcanic eruptions.

Q2171. What causes a Tsunami, according to the description in the disaster management section?

- Undersea earthquake [CORRECT]
- Cyclonic winds
- Cloudburst and excessive rain
- Volcanic gas leakage

Explanation: A tsunami is described as a giant wave caused by an undersea earthquake whose vibrations rush through the ocean.

Q2172. What is the maximum recorded height of giant tsunami waves mentioned when they reach shallow waters and build up?

- 50 meters (150 ft)
- 76 meters (250 ft) [CORRECT]
- 100 meters (330 ft)
- 120 meters (400 ft)

Explanation: The text states that when tsunami waves reach shallow waters they slow down and build up into vast waves, at times 76m (250 ft) tall.

Q2173. Which Civil Defence service is responsible for the collection, identification, and disposal of dead bodies?

- Casualty Service
- Welfare Service
- Corpse Disposal Service [CORRECT]
- Salvage Service

Explanation: The Corpse Disposal Service is specifically responsible for the collection, identification, and disposal of dead bodies.

Q2174. Measures taken immediately after an air raid, such as reconnaissance, reporting of damage, and clearance of debris, are known as:

- Protective Preventive Measures
- Control Measures [CORRECT]
- Restorative Measures
- Salvage Measures

Explanation: Control measures are defined as measures taken immediately after the raid, such as reconnaissance, reporting damage, rescue, control of services, and clearance of debris.

Q2175. Which Civil Defence service is tasked with planning, organizing, procuring, storing, and quickly distributing equipment needed for CD services?

- Depot and Transport Service
- Supply Service [CORRECT]
- Headquarters Service
- Training Service

Explanation: The Supply Service is responsible for planning, organizing, and procuring necessary equipment for CD Services, along with proper storage and quick distribution.

Q2176. According to the classification of man-made disasters, under which category do gas leaks, explosions, and safety breaches fall?

- Accidents
- Industrial Mishaps [CORRECT]

- Ecological
- Terrorist Activities

Explanation: Gas leaks, explosions, sabotage, and safety breaches are explicitly classified under Industrial Mishaps within man-made disasters.

Q2177. Approximately how many volcanoes are active or have erupted according to studies?

- 300
- 500
- 600 [CORRECT]
- 1000

Explanation: A study shows that approximately 600 volcanoes are active or have erupted.

Q2178. What percentage of the world's population currently lives on or near potentially dangerous volcanoes?

- 5 percent
- 10 percent [CORRECT]
- 15 percent
- 20 percent

Explanation: At present, about 10 percent of the world's population lives on or near potentially dangerous volcanoes.

Q2179. What is the threshold precipitation amount over about two weeks to define a drought?

- Less than 0.1 mm
- Less than 0.2 mm [CORRECT]
- Less than 0.5 mm
- Less than 1.0 mm

Explanation: If, over about two weeks, there is less than 0.2 mm (1/100in) of precipitation, there is said to be a drought.

Q2180. Which of the following is NOT one of the three essential elements required for combustion and the continuation of fire?

- Oxygen
- Sufficient heat
- Nitrogen [CORRECT]
- Combustible material

Explanation: The three essential elements for combustion are Oxygen, sufficient heat, and combustible material.

Q2181. What mode of heat transfer involves the transfer of heat through gases or smoke that rise and spread sideways?

- Conduction
- Convection [CORRECT]
- Radiation
- Direct Burning

Explanation: Convection is the transfer of heat through gases or smoke which tend to rise until ceiling or roof is reached and then spread sideways.

Q2182. Which method of heat transfer occurs without heating the midway media such as air?

- Conduction
- Convection
- **Radiation [CORRECT]**
- Direct Burning

Explanation: Radiation means transfer of heat from the source of fire, without heating the midway media e.g. air.

Q2183. What does 'Starvation' mean in the context of fire fighting?

- **Removal of fuel/combustible material [CORRECT]**
- Lowering the temperature below ignition point
- Restricting the supply of oxygen
- Creating a water curtain

Explanation: Starvation means removal of fuel combustible material and can be achieved by segregation of fire and un-burnt fuel.

Q2184. What is the process of choking or restricting the supply of oxygen to burning material by blanketing called?

- Starvation
- Cooling
- **Smothering [CORRECT]**
- Conduction

Explanation: Smothering means 'Choking' or restricting the supply of Oxygen (Air) to the burning material by covering it with sand, dry earth, or foam.

Q2185. How many persons comprise a House Fire Party?

- Two persons
- **Four persons [CORRECT]**
- Six persons
- Eight persons

Explanation: House Fire Parties consist of four persons who carry stirrup pumps and water buckets.

Q2186. Members of the Auxiliary Fire Services are drawn from which organization?

- NCC Cadets
- **Home Guards [CORRECT]**
- Regular Army
- Police Force

Explanation: The members of the Auxiliary Fire Service are drawn from the Home Guards and operate a Trailer pump.

Q2187. Which type of fire extinguisher is conical or cylindrical in shape and used for ordinary combustible materials where cooling effect is achieved by water?

- Foam Type Extinguisher
- Dry Chemical Powder Extinguisher
- **Soda Acid Extinguisher [CORRECT]**
- Carbon Dioxide Extinguisher

Explanation: Soda Acid Extinguishers are used for ordinary combustible material and are conical/cylindrical in shape.

Q2188. Which fire extinguishers are exclusively meant for extinguishing fires involving inflammable liquids like oils, fats, and grease?

- Soda Acid Extinguishers
- **Foam Type and Dry Chemical Powder Extinguishers [CORRECT]**
- Water Buckets
- Stirrup Pumps

Explanation: Foam Type Extinguishers and Dry Chemical Powder Extinguishers are exclusively meant for fires involving inflammable liquids.

Q2189. Which extinguishing agents are suitable to fight fires involving 'Live' electrical equipment where non-conductive properties are important?

- Soda Acid and Water
- **CTC, Carbon dioxide and Dry Chemical Extinguishers [CORRECT]**
- Sand and wet earth
- Foam and salt water

Explanation: CTC Carbon dioxide and Dry Chemical Extinguishers are used to fight fires involving 'Live' electrical equipment using non-conductive agents.

Q2190. What is the center of a storm where hurricanes start to form called?

- **The eye [CORRECT]**
- The core
- The vent
- The mantle

Explanation: Hurricanes start to form when the Sun's heat stirs up moist air over the oceans, where the temperature at the centre of the storm, called the eye...

Q2191. What is the approximate duration of the working time of the fire extinguishers mentioned in the text?

- **One to two minutes [CORRECT]**
- Three to four minutes
- Five to ten minutes
- Fifteen to twenty minutes

Explanation: Text states the use is limited as the duration of working of these extinguishers is approximately one to two minutes.

Q2192. What is the water consumption per minute when using the water spray from a stirrup pump?

- 1 to 1-1/2 gallons
- **3/4 gallons [CORRECT]**
- 2 gallons
- 2-1/2 gallons

Explanation: Text specifies the spray produced can reach 15 to 20 feet with water consumption of ¾ gallons per minute.

Q2193. What term defines public utility services and infrastructure necessary for community life, whose non-availability causes grave hardship?

- Civil Services
- **Essential Services [CORRECT]**
- Emergency Reserves
- Vital Infrastructure

Explanation: Text defines 'Essential Services' as public utility services, public safety or maintenance of infrastructure necessary for community life.

Q2194. At which administrative level is each district required to prepare contingency plans in advance to tackle disturbances in essential services?

- State level
- National level
- **District level [CORRECT]**
- Village level

Explanation: Text states: 'At district level, each district is required to prepare in advance, contingency plans to tackle the likely disturbances in continuity of these services.'

Q2195. Which of the following is NOT listed as a component of Essential Services in the text?

- Running of mint and security presses
- Provision of water, electricity and sanitation
- **Hotel and tourism services [CORRECT]**
- Medical services and essential supplies

Explanation: Hotel and tourism services are not mentioned under Essential Services in the provided text.

Q2196. In what capacity can NCC cadets assist in hospitals based on their training?

- As head doctors and surgeons
- **As nurses and links between staff and patients [CORRECT]**
- As pharmacy administrators
- As financial auditors

Explanation: Text states cadets can assist in hospitals as nurses and as links between doctors, nurses, patients and hospital technicians.

Q2197. What type of system involves the collection and transmission of messages regarding approaching and departing enemy aircraft passed from the Air Force to Regional CD Control Centres?

- Internal Warning System
- **External Warning System [CORRECT]**
- Tactical Warning System
- Strategic Alert System

Explanation: Text states the collection and transmission of messages passed by Air Force to Regional CD Control Centres is included in the external warning system.

Q2198. What specific air raid message is received only by a limited number of officials on the special warning list such as Headquarters of Civil Defence Organisation and Police?

- **Air Raid Message-Yellow [CORRECT]**
- Air Raid Message-Red
- Air Message-Green
- Air Message-White

Explanation: Text defines Preliminary Caution ('Air Raid Message-Yellow') as received by a limited number of officials on the special warning list.

Q2199. What does 'Air Raid Warning-Red' indicate regarding an impending attack?

- Attack may happen within one hour
- Attack may happen within thirty minutes

- Attack may happen within five minutes [CORRECT]
- Attack is already completed

Explanation: Text states Action Warning ('Air Raid Warning-Red') is given when aircraft are sighted toward a town for attack which may be attacked within five minutes.

Q2200. How long are sirens sounded when the 'Air Raid Warning-Red' is received?

- One minute
- Two minutes [CORRECT]
- Three minutes
- Five minutes

Explanation: Text states: 'On receipt of this message, the sirens (hooters) are sounded for two minutes (a short blast followed by a long blast repeated at intervals of 3 seconds).'

Q2201. What is the alternative name for the 'Raider Passed' air raid message?

- Air Message-Yellow
- Air Message-Green [CORRECT]
- Air Message-White
- Air Message-Red

Explanation: Text states: 'This message is also called `Air Message- Green`.'

Q2202. What does the 'Air Message-White' signify?

- Raiding aircraft have left
- Cancel Caution / Threat is over [CORRECT]
- Attack is imminent within 5 minutes
- Preliminary caution issued

Explanation: Text states Cancel Caution means the threat is over, called 'Air Message-White'.

Q2203. What are fire beaters made of, according to the text?

- Wire net in a rectangular shape [CORRECT]
- Solid iron sheets
- Rubber padding on wooden poles
- Heavy canvas cloth

Explanation: Text states: 'Beaters made of wire net in a rectangular shape and hooks made of iron fitted on bamboo poles...'

Q2204. What action is taken by the doctor if a casualty's injury is severe and requires immediate treatment?

- Patient is allowed to go home immediately
- Patient is treated and allowed to go home with directions to report again
- Patient is transported in the First Aid Post ambulance to the nearest hospital [CORRECT]
- Patient is kept at the First Aid Post indefinitely without transport

Explanation: According to the text, if the injury is severe and requires immediate treatment, the patient is transported in the First Aid Post ambulance to the nearest hospital.

Q2205. What is the authorized scale of messengers working under the orders of the officer-in-charge communication service?

- One per post [CORRECT]
- Two per post

- One per sector
- As required by the warden

Explanation: The text states under 'Messenger Service' that messengers are authorized on the scale of one per post.

Q2206. What should a warden's map of the area primarily show?

- Only residential houses and streets
- Boundaries of various posts, streets, roads, houses, important places, shelters, fire stations, CD Depots, First Aid Post, and Hospitals [CORRECT]
- Enemy troop movements and tactical defense lines
- Topographical elevation contours only

Explanation: The text specifies that each warden will keep a map showing boundaries of posts, streets, roads, houses, important places, shelters, fire stations, CD Depots, First Aid Posts, and Hospitals.

Q2207. Ordinarily, participation of NCC cadets in disaster relief should be restricted to which category of cadets?

- 1st year JD/JW cadets only
- 2nd/3rd year SD/SW cadets only [CORRECT]
- All enrolled cadets regardless of division
- Senior Division boys only

Explanation: The text states: 'Ordinarily participation should be restricted to 2nd/3rd year SD/SW cadets only and selection of boys and girls should depend on area and distance from home town.'

Q2208. Which category of NCC cadets is considered suitable for helping in natural calamities like earthquakes, land-slides, and floods?

- JD cadets
- JW cadets
- SD cadets [CORRECT]
- SW cadets for softer jobs only

Explanation: The text notes that SD cadets may be found suitable for helping in natural calamities like earthquakes, land-slides, and floods, whereas JD/JW are young and SW may be used for softer jobs.

Q2209. When are NCC cadets most readily available to be mustered at short notice for operations?

- During school terms
- During examination periods
- It is only during camps that the cadets are available [CORRECT]
- During weekly institutional training periods

Explanation: The text points out that cadets are never readily available at short notice because of studies, and it is only during camps that they are available and can be launched at short notice.

Q2210. What objective is sought by establishing a coordinating body for emergency relief efforts with each state government?

- To strengthen the role of NCC in emergency preparedness, emergency response, and mitigation [CORRECT]
- To handle direct combat operations alongside the military
- To replace state disaster relief machinery entirely
- To collect funds for international NGOs

Explanation: The text outlines the objective of the coordinating body as strengthening the role of NCC in emergency preparedness, emergency response, and mitigation.

Q2211. Under administrative aspects of GOI-NCC collaboration, which of the following is explicitly mentioned?

- Procurement of heavy artillery
- **Directory of NCC [CORRECT]**
- Recruitment of permanent army officers
- Establishment of naval bases

Explanation: Under administrative aspects, the text lists organizational capabilities, facilitate coordinated access to donor groups, Directory of NCC, GOI-NCC forum, and develop NCC emergency preparedness plans.

Q2212. When living in an earthquake-prone area, where should heavy or bulky objects be placed?

- On the highest shelves for easy reach
- On top of high cupboards
- **On the floor or on the lowest shelves [CORRECT]**
- Hanging securely from ceiling hooks

Explanation: The text advises to 'Place heavy or bulky objects on the floor or on the lowest shelves' in earthquake-prone areas.

Q2213. During an earthquake, if you are at home inside a building, what should you NOT do?

- Stay under a table or bed
- Keep calm and keep others calm
- **Rush to the doors or exits, or use lifts [CORRECT]**
- Stay under the lintel of an inner door

Explanation: The text explicitly instructs: 'Do not rush to the doors or exists; never use the lifts; keep well away from windows, mirrors, chimneys and furniture.'

Q2214. If you are in the street during an earthquake, how should you behave?

- Run frantically to find a vehicle
- **Walk towards an open space in a calm and composed manner, without running or wandering [CORRECT]**
- Stand close to tall or detached old buildings
- Seek shelter under overhead electricity wires

Explanation: The text states: 'Walk towards an open space, in a calm and composed manner. Do not run and do not wander the streets.'

Q2215. If you are driving during an earthquake, what action should you take?

- Speed up to reach your destination before shaking worsens
- **Stop the vehicle away from buildings, walls, slopes, electricity wires and cables and stay inside the vehicle [CORRECT]**
- Abandon the vehicle immediately and run into the nearest building
- Park directly under a highway overpass bridge

Explanation: The text directs to 'Stop the vehicle away from buildings, walls, slopes, electricity wires and cables and stay inside the vehicle.'

Q2216. What specific items should be kept in a handy place if you live in an earthquake-prone area?

- **A torch and a portable transistor radio [CORRECT]**
- A compass and a map
- A first aid kit and an oxygen cylinder
- Extra blankets and canned food

Explanation: The text mentions: 'Keep in a handy place, a torch and a portable transistor radio.'

Q2217. CD patrols / lookouts selected by wardens are responsible for which of the following duties?

- Directing military combat strategy
- **Ensuring lighting restrictions and collecting information about unexploded bombs, fires, and building damage [CORRECT]**
- Conducting medical surgeries at First Aid Posts
- Distributing rations to the general public across the state

Explanation: The text states that CD patrols/lookouts are responsible to ensure lighting restrictions and collect information about unexploded bombs, fires, and damage to buildings.

Q2218. Which agency is designated as the nodal agency of the Government of India for scientific flood forecasting?

- Ministry of Home Affairs
- **Central Water Commission [CORRECT]**
- National Disaster Management Authority
- Indian Meteorological Department

Explanation: The Central Water Commission is explicitly mentioned as the nodal agency of the Government of India for flood forecasting, managing over 150 flood forecasting stations.

Q2219. How far from the centre of a severe tropical cyclone is the maximum destruction typically confined, especially on the right side of the storm track?

- Within 50 km
- **Within 100 km [CORRECT]**
- Within 200 km
- Within 300 km

Explanation: The textbook states that destruction from severe tropical cyclones is confined to coastal districts with maximum destruction being within 100 km from the centre.

Q2220. What is the typical movement speed of cyclones over the ocean in a 24-hour period?

- 100-200 km
- 200-300 km
- **300-500 km [CORRECT]**
- 600-800 km

Explanation: The text notes that cyclones generally move 300-500 km in 24 hours over the ocean.

Q2221. How many cyclone warning centres are located across India according to the text?

- Four
- Five
- **Six [CORRECT]**
- Seven

Explanation: Cyclone forecasts are provided through six cyclone warning centres located at Calcutta, Bhubaneswar, Visakhapatnam, Chennai, Mumbai, and Ahmedabad.

Q2222. During which relief period is the focus of NCC specifically on providing assistance in the form of boats with personnel to reach inundated areas?

- Warning Period
- **Flood Period [CORRECT]**
- Recuperation Period

- Evacuation Period

Explanation: The text specifies that during the Flood Period, the focus of NCC should be to provide assistance in the form of boats with personnel who can reach affected areas with succour.

Q2223. In the organizational structure of NCC for disaster management, who acts as the autonomous decision-maker while keeping the DG NCC informed?

- Group Commander
- Unit Commander
- **DDG [CORRECT]**
- Civil Administration Head

Explanation: The text states that the DDG will be the decision maker who will act autonomously, keeping DG NCC informed to carry out rescue and relief operations readily.

Q2224. What is the typical duration range for the 'Flood Period' when floods have hit areas under threat and water recedes?

- 1 to 3 days
- **2 to 10 days [CORRECT]**
- 5 to 15 days
- 10 to 30 days

Explanation: The text explicitly states that the flood period may last from 2 to 10 days by which time water may recede to safe levels.

Q2225. In forming action groups for contingency plans, what is the ideal number of members specified for each small action group formed by a Group/Battalion?

- 5 to 10 members
- 10 to 15 members
- **20 to 30 members [CORRECT]**
- 50 to 100 members

Explanation: The text mentions that the Group/Battalion forms small action groups of 20 to 30 members each, depending on convenience.

Q2226. Which specific NCC wing is primarily suggested to form the core of the Warning Group to monitor weather forecasts and spread warnings?

- Senior Division (SD)
- **Junior Division (JD) [CORRECT]**
- Senior Wing (SW)
- Junior Wing (JW)

Explanation: The text states under the Warning Group description: 'Members of this group could be cadets from JD. They have to be trained to understand radio warning...'

Q2227. Which action group within the NCC contingency plan is assigned to have maximum cadets from JW/SW to look after evacuees' food, water, and medication?

- Relief Group
- **Shelter Management Group [CORRECT]**
- Sanitation Group
- First Aid Medical Group

Explanation: The textbook states that the members of the Shelter Management Group can have maximum cadets from JW/SW to look after food, water, and medication requirements at shelters.

Q2228. According to the disaster management text, how many cyclones on average form in the Bay of Bengal and Arabian Sea every year?

- 2 to 3
- **5 to 6 [CORRECT]**
- 10 to 12
- 15 to 20

Explanation: The text notes that on an average, about 5-6 cyclones form in the Bay of Bengal and the Arabian Sea every year, out of which 2 or 3 may be severe.

Q2229. During the Recuperation Period, what is noted as the major task for NCC alongside helping establish civil amenities?

- Setting up temporary wireless stations
- **Debris removal, including carcasses and dead bodies [CORRECT]**
- Distribution of heavy clothing and blankets
- Construction of permanent bridges

Explanation: The text states that debris removal, including the carcasses and dead bodies, forms the major task during the recuperation phase amidst high probability of epidemic disease.

Q2230. What daily rainfall amount (cm per day) is mentioned as common during cyclone precipitation, making flood generation extremely destructive?

- 5 to 10 cm per day
- 10 to 15 cm per day
- **20 to 30 cm per day [CORRECT]**
- 40 to 50 cm per day

Explanation: The text specifies that rainfall of the order of 20 to 30 cm per day is common during cyclones.

Q2231. Which of the following is NOT listed as a direct method of contacting NCC cadets during a disaster?

- Radio / TV
- **Carrier pigeons [CORRECT]**
- Contact telephone numbers
- Jeep with loudhailer

Explanation: The listed methods in the text are Radio/TV, contact telephone numbers, jeep with loudhailer, and word of mouth. Carrier pigeons are not mentioned.

Q2232. Which type of assistance requires cadets to be both psychologically and physically able, and medically protected before executing the task?

- Shelter Management
- **Carcass Disposal [CORRECT]**
- Patrolling and Liaison
- First aid & Medical

Explanation: The text specifies that members of the Carcass Disposal group have to be psychologically and physically able to carry out this unhygienic task and should have been medically protected.

Q2233. Who holds the overall command and control of flood or cyclone relief operations involving the NCC?

- The Director General NCC (DGNCC)
- **The Group Commander of the groups [CORRECT]**
- The District Collector
- The Chief Secretary

Explanation: According to Section 13 (Command and Control), the overall command and control of the operation rests with the group commander of the groups.

Q2234. What is the absolute minimum floor space required per person in emergency shelters according to the guidelines?

- 2.0 square meters
- **3.5 square meters [CORRECT]**
- 5.0 square meters
- 7.2 square meters

Explanation: The text explicitly states that 3.5 square meters is the absolute minimum floor space per person in emergency shelters.

Q2235. Which of the following describes the required ratio of latrines to persons in an emergency settlement site layout?

- At least one for every 10 persons
- **At least one for every 20 persons [CORRECT]**
- At least one for every 50 persons
- At least one for every 100 persons

Explanation: According to specific infrastructure design considerations, there should be at least one latrine for every 20 persons.

Q2236. According to the decentralized administrative and community services guidelines, which of the following is considered likely to be centralised?

- Bathing and washing areas
- Supplementary feeding centres
- **Camp administrative office [CORRECT]**
- Education facilities

Explanation: The text lists the Camp administrative office, essential services co-ordination offices, and tracing services under services likely to be centralised.

Q2237. Why are pre-fabricated buildings and specially developed emergency shelter units generally ineffective in displaced persons emergencies?

- Due to their low durability against sunlight
- **Due to inappropriateness, high unit cost, transport problems, and inflexibility [CORRECT]**
- Due to the lack of available cement flooring
- Due to strict government zoning laws

Explanation: The text notes that pre-fabricated buildings and emergency shelter units are ineffective due to inappropriateness, high unit cost, transport problems, and inflexibility.

Q2238. What are the three basic planning requirements for the debris removal process?

- **Damage assessment, Resources Available, Use of Resources [CORRECT]**
- Site selection, Environmental assessment, Debris redemption
- Budget allocation, Manpower mobilization, Transport planning
- Public notification, Private clearance, Stream restoration

Explanation: The debris removal process is divided into three basic planning requirements: Damage assessment, Resources Available, and Use of Resources.

Q2239. Under the priority levels for debris removal, which priority is assigned to removing debris that damages entry and exit for emergency services, public health, and safety?

- Priority I [CORRECT]
- Priority II
- Priority III
- Priority IV

Explanation: Priority I is designated to remove debris that damages entry and exit for emergency services, public health, and safety.

Q2240. Whose responsibility is it primarily to make arrangements for the removal of debris from private property?

- The State Government
- The local municipal corporation
- The individual property owner [CORRECT]
- The disaster relief force

Explanation: The text explicitly states that debris on private property is the responsibility of the owner to make arrangements for its removal.

Q2241. Which of the following methods is NOT listed as a debris redemption method in the text?

- Burning
- Composting [CORRECT]
- Chipping
- Recycling

Explanation: The text lists burning, grinding, chipping, burying, and recycling as methods available for debris removal; composting is not mentioned.

Q2242. Under debris removal guidelines for natural streams, debris removal is normally eligible only if it poses a threat or damage from a flood event of how many years?

- 2 year flood event
- 5 year flood event [CORRECT]
- 10 year flood event
- 50 year flood event

Explanation: The guidelines state that only debris causing a threat or damage from a 5 year flood event is eligible for natural streams.

Q2243. Where should warehouses be located within a camp's physical layout for security reasons?

- Near the perimeter fence
- Near the main entrance gate
- Near the administrative office [CORRECT]
- Near the water distribution elevated point

Explanation: The text specifies that warehouses should be located near the administrative office for security reasons.

Q2244. What type of flooring is required in areas of high rainfall for emergency shelters?

- Cement flooring
- Raised flooring [CORRECT]
- Tile flooring
- Carpeted flooring

Explanation: The text states that raised flooring is required in areas of high rainfall.

Q2245. What kind of debris is primarily produced by landslides caused by floods according to the disaster classification?

- Metal structures and vehicles
- **Soil, ground, rock, and some construction material [CORRECT]**
- Torn fabric and household furniture
- Asphalt and concrete slabs

Explanation: The text specifies that debris from landslides consists primarily of soil, ground, rock, and some construction material.

Q2246. Which administrative and community service is classified as likely to be decentralised?

- Camp administrative office
- Essential services co-ordination offices
- Tracing services
- **Supplementary feeding centres [CORRECT]**

Explanation: Supplementary feeding centres are listed under the administrative and community services likely to be decentralised.

Q2247. Who should ideally build emergency shelters, including communal buildings, given adequate organization and material support?

- External contractors
- The local municipality
- **The displaced people themselves [CORRECT]**
- International relief agencies

Explanation: The text states that emergency shelters should be built by the displaced people themselves to reduce dependence and cut costs.

Q2248. What is the primary responsibility of local administration during a clean-up operation according to the text?

- To directly handle all international aid organizations
- **To maintain an inventory of all resources including personnel, equipment, and their capabilities [CORRECT]**
- To deploy NCC cadets exclusively for illegal dumping control
- To establish the Public Distribution System (PDS)

Explanation: The text states it is the responsibility of local administration to maintain an inventory of all resources in the form of personnel and equipment and their capabilities for response to a clean-up operation.

Q2249. According to the text, what constitutes a large part of debris in recreational and wilderness areas?

- Vehicular wreckage
- **Trees [CORRECT]**
- Industrial waste
- Building concrete

Explanation: The text notes under recreational and wilderness areas that 'Trees frequently constitute a large part of debris in such areas.'

Q2250. Why is the immediate attention to the disposal of dead animals crucial during a disaster?

- **To prevent major outbreaks of epidemics [CORRECT]**
- To salvage valuable animal hides

- Because animals are classified under personal clothing
- To free up space for transportation vehicles

Explanation: The text states that disposal of livestock is important because major outbreaks of epidemics are due to the death of animals.

Q2251. Which of the following is recommended to be used as the base for the distribution system initially after a disaster?

- International Red Cross networks
- **The Public Distribution System (PDS) [CORRECT]**
- Educational institution networks
- Independent NGO supply chains

Explanation: The text recommends making the Public Distribution System (PDS) the base for the distribution as it is already an available functional chain of supply.

Q2252. How should perishable items of food be handled during the collection stage?

- They should be bulk broken along with clothing
- **They should be collected at special centres to ensure speedy transportation [CORRECT]**
- They should be avoided completely
- They should be routed exclusively through international organizations like WHO

Explanation: The text specifies that 'Perishable items of food to be collected at special centres to ensure speedy transportation.'

Q2253. Which of the following is NOT listed as a source of aid material items in the text?

- Educational Institutions
- Resident Welfare Organisations
- **Space Research Laboratories [CORRECT]**
- Social Welfare Organisations

Explanation: The text lists Central Government, State Government, NGOs, Educational Institutions, Social Welfare Organisations, Resident Welfare Organisations, Red Cross, International Organisations (WHO), and Individuals. Space Research Laboratories are not mentioned.

Q2254. Which specific lighting items are mentioned in the text to combat darkness and demoralization during disasters?

- LED floodlights and solar panels
- **Lanterns, patromaxes, and gas lights [CORRECT]**
- Neon signs and halogen bulbs
- Flashlights and laser torches

Explanation: The text explicitly mentions: 'Some items like lanterns, patromaxes, gas lights need to be provided and all efforts must be made towards restoration of electricity at the earliest.'

Q2255. Which role can NCC cadets specifically perform regarding debris removal operations?

- Operating heavy industrial cranes independently
- **Spreading public awareness, reporting/controlling illegal dumping, and informing about health risks [CORRECT]**
- Designing environmental standards for disposal areas
- Issuing formal government contracts to local contractors

Explanation: The text mentions NCC cadets can be gainfully employed in spreading public awareness, debris removal identification/guidelines, disposal areas, environmental standards, and reporting/controlling illegal dumping activity.

Q2256. What instructions are given regarding life saving drugs during the collection phase?

- Route them through different collection and distribution channels to avoid delay [CORRECT]
- Store them exclusively with perishable food items
- Bulk break them at the final refugee camp only
- Do not collect them until the PDS base is established

Explanation: The text states: 'Ensure that life saving drugs are routed through different collection and distribution channels to avoid delay.'

Q2257. During the distribution phase, how should the affected area be organized during the rehearsal stage?

- Divided into grids with adequate facilities put in place [CORRECT]
- Segmented into municipal tax zones
- Assigned solely to international NGOs
- Restricted strictly to military movement corridors

Explanation: The text instructs that 'The entire area should be divided into grids during rehearsal stage and adequate facilities should be put in place during this stage for use at a later date.'

Q2258. At what stage should NCC cadets be incorporated into the collection process?

- Only after distribution is fully completed
- At the planning stage itself [CORRECT]
- During the final auditing stage by international organizations
- Strictly post-disaster evaluation phase

Explanation: The text states under NCC roles in collection: 'The Cadets must be incorporated in the process at the planning stage itself to identify the sources...'

Q2259. Which of the following is listed under debris clearing equipment in disaster response?

- Cranes, bulldozers, tippers, shovels, pick axes, drills, hand drills, and ordinary hammers [CORRECT]
- Survival food kits and water bousers
- Patromaxes and gas lights
- Ambulances and mobile hospitals

Explanation: The text lists debris clearing equipment as: cranes, bulldozers, tippers, shovels, pick axes, drills and hand drills and ordinary hammers.

Q2260. According to Section-13 on Message Services, what is the range of Ground Wave signal transmission for Long and Medium waves?

- Upto 30 Kms [CORRECT]
- Upto 100 Kms
- Upto 500 Kms
- Upto 1000 Kms

Explanation: Section-13 states under signal transmission: 'Ground Wave. Long and Medium waves range upto 30 Kms.'

Q2261. How can NCC units establish their own collection and distribution networks across the country?

- By opening them at unit/group level, being closely associated with schools and colleges [CORRECT]
- By purchasing private commercial warehouses in metropolitan cities
- By relying solely on foreign government grants
- By utilizing naval warships exclusively

Explanation: The text notes that 'NCC can establish their own collection and distribution centres as they are closely associated with schools and colleges all over the country... These can be opened at unit/ group level.'

Q2262. What is highlighted as the basic requirement of unfailing and good communications during a disaster?

- Advanced satellite television broadcasting
- **Thorough knowledge of situations, clarity and conciseness of the message, and correct/immediate response [CORRECT]**
- Use of encrypted diplomatic cipher codes only
- Relying exclusively on physical messengers

Explanation: Section-13 states the basic requirements are: 'thorough knowledge of situations, clarity and conciseness of the message upto assimilation of the message received and correct and immediate response.'

Q2263. What is the approximate range of VHF and UHF waves under Space Wave communication?

- Upto 10 Kms
- **Upto 50 Kms [CORRECT]**
- 100 Kms to 1000 Kms
- Upto 150 Kms

Explanation: The text states that VHF and UHF waves range upto 50Kms under Space Wave communication.

Q2264. What is the height range for forward propagation in Tropospheric Scatter communication?

- **Upto 8-10 Kms [CORRECT]**
- Upto 50 Kms
- 100-200 Kms
- 1000 Kms

Explanation: Tropospheric Scatter for forward propagation has a height range upto 8-10 Kms from the surface of the earth.

Q2265. What action is required regarding communication personnel during the 'Prior to a Disaster' phase?

- Disbanded completely
- **Placed 'On call' [CORRECT]**
- Sent on mandatory leave
- Reassigned to frontline combat

Explanation: Under phases of communication prior to a disaster, communication personnel must be placed 'On call'.

Q2266. Where should communication equipment ideally be located to handle emergency and disaster situations like floods?

- In a basement
- At a low-lying damp area
- **At a height [CORRECT]**
- In an open unshielded field

Explanation: Tips for essential communication state that equipment should be located at a safe site such as at a height in case of floods.

Q2267. According to ancient scriptures such as 'Manu Smriti', what does caste mean as 'Varnasrama Dharma'?

- Offices given according to occupation

- **Offices given according to colour [CORRECT]**
- Offices given according to wealth
- Offices given according to birth order

Explanation: The text notes that according to 'Manu Smriti', caste is 'Varnasrama Dharma', meaning 'offices given according to colour'.

Q2268. On which date did the Constitution of India come into effect, providing safeguards for suppressed and backward classes?

- 15 August 1947
- **26 January 1950 [CORRECT]**
- 26 November 1949
- 02 October 1950

Explanation: The Constitution of India came into effect from 26 January 1950.

Q2269. Which of the following categories comprise the weaker sections of society as outlined in the text?

- **SC, ST, and OBC [CORRECT]**
- Only General and OBC
- Minorities and Foreign Nationals
- Landlords and Industrialists

Explanation: The weaker sections comprise Scheduled Caste (SC), Scheduled Tribes (ST), and Other Backward Classes (OBC).

Q2270. What alternative terms did Mahatma Gandhi use for Scheduled Castes (SC) and Scheduled Tribes (ST) respectively?

- Dalit and Adivasi
- **Harijans and Girijan [CORRECT]**
- Backward and Outcaste
- Shudra and Vanvasi

Explanation: Mahatma Gandhi used the terms Harijans and Girijan for SC and ST respectively.

Q2271. According to the 2001 census, what was the approximate percentage of Scheduled Caste (SC) and Scheduled Tribes (ST) population in India?

- **16% SC and 8% ST [CORRECT]**
- 8% SC and 16% ST
- 25% SC and 10% ST
- 10% SC and 25% ST

Explanation: According to the 2001 census, population of SC and ST is approximately 16% and 8% of India's total population respectively.

Q2272. Approximately how many communities were listed as backward under Other Backward Classes (OBCs) as of 2006?

- 1300
- **2300 [CORRECT]**
- 3500
- 5000

Explanation: As of 2006, approximately 2300 communities are listed backwards under OBCs.

Q2273. Which section of Chapter VII in the NCC curriculum covers 'Weaker Sections of our Society and their Needs'?

- **Section-1 [CORRECT]**
- Section-3
- Section-6
- Section-8

Explanation: The index shows Section-1 covers 'Weaker Sections of our Society and their Needs'.

Q2274. What is the range of Sky Wave communication using HF waves through the ionosphere?

- Upto 50 Kms
- **100 Kms to 1000 Kms [CORRECT]**
- 8 to 10 Kms
- Over 5000 Kms

Explanation: Sky Wave communication has a range from 100 Kms to 1000 Kms.

Q2275. What are Scheduled Caste people commonly known as, according to the text?

- Adivasis
- **Dalits [CORRECT]**
- Girijans
- Harijans by Gandhi only

Explanation: The Scheduled Caste people are also known as Dalits (while Scheduled Tribes are known as Adivasis).

Q2276. Which of the following is NOT listed under Chapter-VII Social Service sections?

- Family Planning
- HIV/AIDS : Causes & Prevention
- **Ballistic Missile Technology [CORRECT]**
- Drug Trafficking and Crime

Explanation: Ballistic Missile Technology is not part of the Social Service chapters, whereas Family Planning, HIV/AIDS, and Drug Trafficking are.

Q2277. What percentage of vacancies in government-aided educational institutes and jobs in the government/public sector are constitutionally reserved for Scheduled Castes (SC) and Scheduled Tribes (ST) respectively?

- 10% and 5%
- **15% and 7.5% [CORRECT]**
- 22.5% and 27%
- 7.5% and 15%

Explanation: The Constitution lays down that 15% and 7.5% of vacancies in government-aided educational institutes and for jobs in the government/public sector are reserved as quota for the SC and ST respectively.

Q2278. What gross annual income threshold excludes individuals from the 'creamy layer' category under the OBC reservation policy?

- Rs 1.5 lakh or above
- Rs 2.0 lakh or above
- **Rs 2.5 lakh or above [CORRECT]**
- Rs 5.0 lakh or above

Explanation: Persons with a gross annual income of Rs 2.5 lakh or above are excluded from the reservation policy under the creamy layer category.

Q2279. Which of the following positions' children are specifically included in the 'creamy layer' of the OBC category?

- Group C clerical staff
- **Judges of the Supreme Court and High Court [CORRECT]**
- Local village headmen (Sarpanch)
- Constables in State Police

Explanation: The creamy layer includes children of the President, Vice-President, and Judges of the Supreme Court and High Court, among other constitutional positions.

Q2280. According to the textbook, what is the primary characteristic of Scheduled Tribes in terms of livelihood?

- They are primarily urban wage earners.
- **They are basically nomads and don't have any land to settle down or cultivate. [CORRECT]**
- They dominate higher civil services.
- They own large agricultural estates.

Explanation: Scheduled tribes are basically nomads and don't have any land to settle down or cultivate according to section 6.

Q2281. What is the definition of social service based on its formal objective?

- A charitable handout to create permanent dependence
- **A formalized way of helping people to help themselves [CORRECT]**
- A commercial enterprise managed by voluntary bodies
- A strictly political campaign to win elections

Explanation: Social service characterizes a formalized way of helping people to help themselves, based on the recognition of variations in individual capability and social structure.

Q2282. How many accepted methods are primarily identified in social service?

- Two methods
- **Three methods [CORRECT]**
- Four methods
- Five methods

Explanation: There are generally three accepted methods identified in social service: Social Case Work, Social Group Work, and Community Organization.

Q2283. Which method of social service aims to help the individual make maximum use of the established community through understanding the individual in their total situation?

- **Social Case Work [CORRECT]**
- Social Group Work
- Community Organization
- Family Planning

Explanation: Social Case Work aims to help the individual make maximum use of the established community, through understanding the individual in his total situation.

Q2284. What method of social service seeks to help individuals utilize their fullest capacity through understanding behavior in a collective setting?

- Social Case Work
- **Social Group Work [CORRECT]**
- Community Organization
- Public Welfare Administration

Explanation: Social Group Work seeks to help the individuals utilize their fullest capacity for their own welfare and for the welfare of the group as a whole, through understanding of the behavior of individuals in a group setting.

Q2285. What is the estimated annual surplus of births over deaths mentioned in the context of India's population explosion?

- 5 million
- 10 million
- **15 million [CORRECT]**
- 20 million

Explanation: The text states that considering the population is over 1000 million, the annual surplus of births over deaths is at 15 million.

Q2286. Which of the following is cited as a factor affecting family planning concerning health consequences of uncontrolled fertility?

- Surplus agricultural yield
- **Fatal, infant and childhood morbidity [CORRECT]**
- Technological advancement
- Expansion of heavy industries

Explanation: Fatal, infant and childhood morbidity is explicitly listed as a factor dealing with the health consequences of uncontrolled fertility.

Q2287. What is the role of NCC Cadets in addressing the problems of weaker sections as per the text?

- To collect taxes from rural areas
- **To utilize their potential to imbibe values and skills amongst weaker sections to make them self-sufficient [CORRECT]**
- To enforce mandatory reservation quotas in private companies
- To replace government school teachers permanently

Explanation: NCC Cadets must utilize their huge potential to achieve our aim of imbibing values and skills amongst the weaker sections of our society which will make themselves self-sufficient and confident.

Q2288. According to arguments in favor of anti-reservation, allocation of quotas on the basis of caste is considered a form of:

- **Racial discrimination contrary to right to equality [CORRECT]**
- Economic socialism
- Meritocratic enhancement
- Religious tolerance

Explanation: The text states under points in favour of anti reservation that allocation of quotas on the basis of caste is a form of racial discrimination and thus contrary to right to equality.

Q2289. What origin is ascribed to social service in the textbook text?

- **Origin stemming from the tenets of Judaco-Christian teachings [CORRECT]**
- Origin solely from the 20th-century digital revolution
- Origin strictly from ancient Greek military codes
- Origin exclusively from space exploration programs

Explanation: The origin of social service is ancient, stemming from the tenets of the Judaco-Christian teachings.

Q2290. Approximately how many people globally are estimated to be living with HIV, according to the text?

- 25.4 million
- **38.6 million [CORRECT]**
- 52.1 million
- 8.2 million

Explanation: Globally, an estimated 38.6 million people are living with HIV, of which an estimated 4.1 million were new infections.

Q2291. In India, an estimated how many people are living with the HIV virus?

- 4.1 million
- **5.2 million [CORRECT]**
- 8.2 million
- 38.6 million

Explanation: The text specifies that in India, an estimated 5.2 million people are living with the virus, most of whom are poor and marginalised.

Q2292. Which of the following states is NOT explicitly mentioned in the text among the six states in India where HIV is more common?

- Tamil Nadu
- Karnataka
- **Kerala [CORRECT]**
- Maharashtra

Explanation: The text lists the six states where HIV is more common as Tamil Nadu, Karnataka, Andhra Pradesh, Maharashtra, Manipur, and Nagaland.

Q2293. What does the letter 'C' stand for in the acronym 'CD4', a protein found on the surface of T-cells?

- Cellular
- **Cluster [CORRECT]**
- Coreceptor
- Chemical

Explanation: Although standard immunology defines CD as 'Cluster of Differentiation', the text specifies that T-cells contain a protein called CD4 on their surface which HIV attaches to.

Q2294. Which specific white blood cells are destroyed by HIV, thereby reducing the body's ability to fight diseases?

- B lymphocytes
- **T lymphocytes (T-cells) [CORRECT]**
- Erythrocytes
- Neutrophils

Explanation: The text states that HIV destroys T lymphocytes (also called T-cells), which secrete chemicals necessary for destroying disease-causing germs.

Q2295. According to the text, why is anal sex associated with a higher risk of HIV transmission compared to vaginal sex?

- Semen remains trapped for a longer duration

- **The delicate inner lining of the anus gets easily damaged during anal sex [CORRECT]**
- The surface area of the anus is significantly larger
- Anal sex is exclusively practiced by intravenous drug users

Explanation: Anal sex has a higher risk because the delicate inner lining of the anus gets easily damaged during the act, helping HIV enter the body easily.

Q2296. According to NACO guidelines, what is mandatory before performing a blood transfusion?

- Warming the blood to body temperature
- **Testing blood for HIV [CORRECT]**
- Filtering through a leukocyte reduction filter
- Centrifuging plasma components

Explanation: As per NACO guidelines, it is mandatory to test blood for HIV before transfusion.

Q2297. Which mode of transmission is identified as the most important cause of HIV infection in the North East of India?

- Blood transfusion
- Heterosexual contact
- **Intravenous drug abuse [CORRECT]**
- Mother-to-child transmission

Explanation: The text explicitly states that in India, intravenous drug abuse is the most important cause of HIV infection in the North East.

Q2298. Why is HIV infection through injections given at unsterilized health centers not a common mode of transmission in rural India according to the text?

- Disposable syringes are universally mandated by law
- **Most doctors boil needles for a short time, and HIV is destroyed by even short duration heat and drying [CORRECT]**
- Rural populations have natural immunity
- Intramuscular injections can never transmit blood-borne viruses

Explanation: The text notes that HIV is destroyed by even short duration heat and drying, and most rural doctors boil them for at least a short time, making it uncommon despite poor sterilization practices.

Q2299. Which of the following is NOT one of the ways mother-to-child transmission of HIV can occur?

- During pregnancy when HIV crosses the placenta
- During delivery
- During breastfeeding
- **Through genetic mutation in germ cells [CORRECT]**

Explanation: Mother-to-child transmission occurs during pregnancy (crossing the placenta), during delivery, or during breastfeeding.

Q2300. How many main reasons are outlined in the text explaining why women are at greater risk of developing HIV infection through unprotected sex?

- Three
- Four
- **Five [CORRECT]**
- Six

Explanation: The text lists five main reasons why women are at greater risk, including semen retention time, vaginal surface area, asymptomatic STIs, gender imbalance, and lower treatment-seeking behavior.

Q2301. What does the acronym 'AIDS' stand for according to the textbook definition?

- **Acquired Immune Deficiency Syndrome [CORRECT]**
- Advanced Immunological Defect Syndrome
- Acute Infection and Deficiency Syndrome
- Acquired Immuno Deficiency Symptoms

Explanation: AIDS stands for Acquired (not inborn, passed from mother to baby), Immune (relating to body's immune system), Deficiency (lack of response), Syndrome (number of signs and conditions).

Q2302. According to the text, what is recommended for women with HIV infection regarding feeding their babies in India?

- Exclusive bottle-feeding with imported milk formula
- **Breast-feeding because the benefits outweigh the risk [CORRECT]**
- Immediate weaning after birth
- Feeding strictly with animal milk

Explanation: Text section 15 states that since the benefits of breast-feeding are much more than the risk of getting HIV infection in India, it is recommended that women with HIV infection breast-feed.

Q2303. What is the primary recommended organization in India where HIV tests should be conducted after risk assessment and counselling?

- Primary Health Centres (PHCs)
- **Voluntary Counselling and Testing Centres (VCTCs) set up by NACO [CORRECT]**
- District Civil Hospitals exclusively
- Private accredited pathology laboratories

Explanation: Text section 19 specifies that HIV tests should be done at the Voluntary Counselling and Testing Centres (VCTCs) set up by National AIDS Control Organisation (NACO).

Q2304. In the case of a negative HIV test result, why is the test recommended to be repeated after three months?

- To check for viral mutations
- **To rule out the possibility of the first test being carried out in the window period [CORRECT]**
- To verify laboratory calibration errors
- To measure CD4 cell count recovery

Explanation: Text section 19 states that in case of a negative test result, the test is repeated after three months to rule out the window period.

Q2305. By following recommended guidelines for preventing parent-to-child transmission, how much can NACO's PPTCT centres reduce the risk of infection for the newborn?

- **From 45% to less than 2% [CORRECT]**
- From 80% to 10%
- From 50% to exactly 5%
- From 30% to zero

Explanation: Text section 27 notes that medicines and caesarean section reduce the risk of infection for the newborn from about 45% to less than 2%.

Q2306. What is the normal range of CD4 cells per milliliter of blood in a healthy person?

- 100 to 300 cells
- 200 to 800 cells
- **500 to 1500 cells [CORRECT]**

- 1000 to 2500 cells

Explanation: Text section 29 defines that a normal person has about 500 to 1500 CD4 cells per millilitre of blood.

Q2307. At what specific CD4 cell count threshold do people with HIV generally present with opportunistic infections due to poor immunity?

- Below 500 cells
- Below 350 cells
- **Below 200 cells [CORRECT]**
- Below 100 cells

Explanation: Text section 29 states that when the CD4 count decreases below 200, people with HIV can present with opportunistic infections.

Q2308. Which age group is most productive and consequently experiences a major economic impact from HIV according to the text?

- 10-25 years
- **15-45 years [CORRECT]**
- 30-60 years
- 18-50 years

Explanation: Text section 33 mentions that HIV is more common in the most productive age group of 15-45 years.

Q2309. According to Section 39, which of the following is explicitly listed as a mode through which HIV CANNOT be transmitted?

- Unprotected blood transfusion
- Sharing needles and syringes
- **Insect bites [CORRECT]**
- Parent to child during delivery without intervention

Explanation: Text section 39(e) lists insect bites among modes through which HIV cannot be transmitted.

Q2310. How many people worldwide die of cancer every year according to Section 5, Introduction?

- One million
- Three million
- **Six million [CORRECT]**
- Ten million

Explanation: Section 5, Introduction, paragraph 1 states that six million worldwide die of cancer every year.

Q2311. What percentage of cancer cases are stated to be preventable and curable if detected and treated in time?

- Forty percent
- Fifty percent
- **Sixty percent [CORRECT]**
- Seventy-five percent

Explanation: Section 5, Introduction, paragraph 1 states that sixty percent cancer cases are preventable and it is curable if detected and treated in time.

Q2312. What happens when cancer sets in at the cellular level in the human body?

- Cells shrink and undergo rapid apoptosis
- **A group of cells suddenly starts multiplying and forms a tumor or lump [CORRECT]**

- Normal cell division completely stops
- Cells transform directly into red blood cells

Explanation: Section 5, Introduction, paragraph 1 explains that when cancer sets in, a group of cells suddenly starts multiplying and forms a tumor or lump.

Q2313. Which of the following types of cancer is NOT explicitly listed under Section 5, Types of Cancer?

- Brain cancer [CORRECT]
- Larynx cancer
- Prostate cancer
- Cervical cancer

Explanation: Section 5, Types of Cancer lists oral, larynx, lung, cervical, breast, prostate, and colon cancers, omitting brain cancer.

Q2314. What is cited as a major concern regarding tuberculosis in patients with AIDS?

- TB bacteria are spreading exclusively through water
- Resistance of the tuberculosis bacteria to several previously effective medicines [CORRECT]
- Inability to diagnose TB using standard sputum tests
- TB exclusively affects the brain in AIDS patients

Explanation: Text section 31 states that one of the major concerns related with tuberculosis and AIDS is resistance of the tuberculosis bacteria to several medicines that were earlier effective.

Q2315. Why is oral sex considered to carry a higher risk of transmitting HIV infection compared to simple kissing?

- Saliva contains high concentrations of active white blood cells
- Oral sex allows vaginal secretions and/or semen to enter the mouth [CORRECT]
- The stomach acids cannot destroy HIV entering via the oral cavity
- It bypasses the mucous membranes entirely

Explanation: Text section 18 states that oral sex has higher risk because it allows vaginal secretions and/or semen to enter the mouth.

Q2316. What role do NGOs and youth play in HIV prevention and care due to their close interpersonal interactions?

- Enforcing mandatory quarantines
- Implementing necessary behavioural interventions and possessing flexibility to innovate [CORRECT]
- Solely funding pharmaceutical research
- Conducting clinical trials for vaccines

Explanation: Text section 36 details that close interpersonal interaction is useful for implementing behavioural interventions, and NGOs have flexibility and capacity to innovate and implement new initiatives.

Q2317. Which of the following is specifically identified in the text as a main cause of cancer?

- Regular physical exercise
- Prolonged chewing of tobacco, zarda, pan and pan masala [CORRECT]
- Consumption of a balanced diet
- Good oral hygiene and dental care

Explanation: The text lists prolonged chewing of tobacco, zarda, pan, and pan masala as one of the primary causes of cancer.

Q2318. According to the text, which type of cancer kills more people than any other type?

- Bone cancer
- Breast cancer
- **Lung cancer [CORRECT]**
- Oral cancer

Explanation: The text explicitly states that lung cancer kills more people than any other type of cancer.

Q2319. What is the fact regarding the myth that cancer spreads very fast after a surgical knife touches it?

- Surgery directly triggers the rapid multiplication of cancer cells.
- The patient dies because of the surgical procedure itself.
- **Delay in diagnosis caused the disease to spread substantially before surgery was performed. [CORRECT]**
- It is a proven medical phenomenon related to blood circulation.

Explanation: The text clarifies that patients dying soon after surgery is due to a delay in diagnosis and treatment, meaning the disease had already spread substantially, not because of the surgery.

Q2320. What evidence is cited in the text to debunk the myth that cancer is a product of modern civilization's ills?

- **Indications of bone cancer have been found in Egyptian mummies over 3000 years old. [CORRECT]**
- Modern medical journals from the 19th century.
- Excavations of Roman colosseum ruins.
- Written records from the Industrial Revolution.

Explanation: The text refutes the modern civilization myth by noting that bone cancer indications were found in Egyptian mummies over 3000 years old and that Ayurveda deals with it.

Q2321. According to the text, what percentage of cancer is fully curable if detected and treated early?

- More than 50%
- More than 60%
- **More than 80% [CORRECT]**
- 100%

Explanation: The text states that with timely detection, more than 80% of cancer is fully curable.

Q2322. What percentage of the total population of India do youth constitute, according to the text?

- About 20%
- **About 34% [CORRECT]**
- About 50%
- About 65%

Explanation: The text explicitly mentions that youth constitute about 34% of the total population of India.

Q2323. How has social welfare been defined by a United Nations expert group?

- Charitable acts done by religious institutions for the poor
- **Organised activity that aims towards a mutual adjustment of individuals and their social environment [CORRECT]**
- Government legislation solely aimed at tax reduction and economic growth
- Voluntary medical camps organized in rural areas

Explanation: The text quotes the United Nations expert group definition of social welfare verbatim.

Q2324. Which of the following is listed in the text as an early warning sign due to gutka and tobacco chewing?

- Increased vision clarity
- **Any sore and ulcer on tongue, cheek or gums that does not heal within a fortnight [CORRECT]**
- Enhanced sense of taste
- Rapid hair growth

Explanation: The text lists sores or ulcers on the tongue, cheek, or gums not healing within a fortnight as an early warning sign of gutka and tobacco use.

Q2325. What is the factual truth regarding the myth that cancer is contagious and infectious?

- It spreads through sexual intercourse only.
- It is transmitted by sharing plates.
- **It is not transmitted by touching, eating from the same plate, kissing or sexual intercourse. [CORRECT]**
- It is airborne and highly contagious.

Explanation: The text explicitly states that cancer is not transmitted by touching, eating from the same plate, kissing, or sexual intercourse.

Q2326. What does the text state regarding the myth that all lumps in the breast are malignant?

- All lumps are cancerous and require immediate amputation.
- **Only a small percentage of lumps is malignant, though all need attention. [CORRECT]**
- Lumps in the breast are never malignant in younger people.
- Breast lumps are purely hormonal and harmless.

Explanation: The text clarifies that only a small percentage of breast lumps are malignant, but all need attention and self-examination helps in early detection.

Q2327. Which of the following is a preventive measure against cancer recommended in the text?

- Eating a diet high in processed and preserved meat
- **Avoiding obesity [CORRECT]**
- Consuming smoked and salted food regularly
- Intentionally tanning in heavy sunlight

Explanation: Avoiding obesity is listed under preventive measures, whereas diets high in processed meats, smoked, and salted foods are advised to be avoided.

Q2328. What is the truth about pain-killing medicines used for cancer patients, according to the text?

- Patients get high on painkillers and quickly become addicted.
- Painkillers stop working permanently within days of use.
- **People do not get high on painkillers and these do not cause addiction when used properly. [CORRECT]**
- Painkillers should only be used when pain becomes completely unbearable.

Explanation: The text states that people do not get high on painkillers and hence these do not cause addiction; patients should control pain when it is mild.

Q2329. What percentage of cancers can be prevented through lifestyle changes, diet, exercise, weight control, moderate alcohol, and non-consumption of tobacco according to the conclusion?

- Forty percent
- Fifty percent
- **Sixty percent [CORRECT]**
- Eighty percent

Explanation: The conclusion section states that 60 percent of cancers can be prevented through lifestyle changes, diet, exercise, weight control, etc.

Q2330. According to the text, why has Community Service been developed as an integral part of the educational curriculum for students?

- To fulfill mandatory university credit hours for graduation exams
- **So that youth can fruitfully understand and contribute in community service [CORRECT]**
- To replace military training entirely
- To provide cheap labor for government infrastructure projects

Explanation: The text notes community service is part of the curriculum so youth can fruitfully understand and contribute to community service.

Q2331. Which of the following signs is NOT listed among the general cancer signs in the text?

- A change or lump anywhere in body
- Persistent indigestion
- Unexplained loss of appetite
- **Sudden superhuman strength [CORRECT]**

Explanation: Lumps, persistent indigestion, and unexplained loss of appetite are listed as cancer signs; sudden superhuman strength is fictitious.

Q2332. Which of the following programmes is specifically highlighted in the text under Health Care and Family Welfare for youth to promote?

- **Youth against AIDS [CORRECT]**
- Clean India Mission
- Digital India Campaign
- Skill Development Mission

Explanation: The text explicitly mentions 'Youth against AIDS' campaign, 'Pulse Polio', 'Small Family' norm, and immunization programmes under Health Care and Family Welfare.

Q2333. What does the acronym BINGO stand for in the context of Non-Government Organisations?

- Basic International Non-Government Organisation
- **Business oriented International NGO [CORRECT]**
- Bi-lateral International Non-Government Organisation
- Broad Institutional Non-Government Organisation

Explanation: Section 7, paragraph 6(b) defines BINGO as Business oriented International NGO.

Q2334. Who started the 'Seva Gram Yojna' as mentioned in the text among important NGOs?

- Ravinder Nath Tagore
- Vinoba Bhave
- **Mahatma Gandhiji [CORRECT]**
- Child Relief and You

Explanation: Section 7, paragraph 5 states that Seva Gram Yojna was started by Gandhiji.

Q2335. According to the text, which organization is recognized as the world's largest group of humanitarian NGOs?

- HelpAge India
- **International Red Cross and Red Crescent Movement [CORRECT]**
- Society for Prevention of Cruelty to Animals
- People for Animals

Explanation: Section 7, paragraph 5 notes that International Red Cross and Red Crescent Movement are the world's largest group of humanitarian NGOs.

Q2336. How are drugs defined that affect the central nervous system by changing the way a person thinks, feels, or behaves?

- Narcotic drugs
- **Psychoactive drugs [CORRECT]**
- Synthetic drugs
- Prescription drugs

Explanation: Section 8, paragraph 1 states that drugs acting on the brain to change how a person thinks, feels or behaves are known as psychoactive drugs.

Q2337. Which of the following is classified as a Depressant drug in the central nervous system?

- Nicotine
- **Cannabis [CORRECT]**
- Caffeine
- Ketamine

Explanation: Section 8, paragraph 2(a)(ii) lists Cannabis under depressants, alongside alcohol and opiates/opioids.

Q2338. Which of the following is identified as a Hallucinogen in the text?

- Valium
- **Datura [CORRECT]**
- Ephedrine
- Seconal

Explanation: Section 8, paragraph 2(c)(i) explicitly lists Datura as a hallucinogen.

Q2339. Under legal regulations, tobacco is prohibited from being sold to persons below the age of:

- 16 years
- **18 years [CORRECT]**
- 21 years
- 25 years

Explanation: Section 8, paragraph 3 states that tobacco may not be sold to persons below the age of 18 years.

Q2340. What is the term used for the area comprising Afghanistan, Pakistan, and Iran which acts as a transit route base for illicit heroin, hashish, and morphine into India?

- Golden Triangle
- **Golden Crescent [CORRECT]**
- Silk Route
- Heroin Highway

Explanation: Section 8, paragraph 5 states that India's geographical location as a transit route for Afghanistan, Pakistan, and Iran is known as the Golden Crescent.

Q2341. According to the statistical findings on drug users, what percentage of drug addicts fall into the age group of 20-24 years?

- 50 percent
- 62 percent
- **72 percent [CORRECT]**
- 84 percent

Explanation: Section 8, paragraph 7 states that 72 percent of addicts are in the age group of 20-24 years.

Q2342. What percentage of drug addicts comprise females, based on the findings mentioned in the text?

- 2 percent [CORRECT]
- 5 percent
- 12 percent
- 19.85 percent

Explanation: Section 8, paragraph 7 notes that females comprise only 2% of the addicts.

Q2343. What was cited by the majority of drug addicts (84%) as a primary factor facilitating their habit?

- Peer pressure
- Easy availability of the drug [CORRECT]
- Mental tension
- Curiosity

Explanation: Section 8, paragraph 8 mentions that majority of addicts (84%) state that the drug is easily available to them.

Q2344. Who started the NGO named 'Shri Niketan Yojna'?

- Mahatma Gandhi
- Vinoba Bhave
- Ravinder Nath Tagore [CORRECT]
- Dadabhai Naoroji

Explanation: Section 7, paragraph 5 specifies that Shri Niketan Yojna was started by Ravinder Nath Tagore.

Q2345. Which of the following is NOT listed as a stimulant in the text?

- Ephedrine
- Caffeine
- Nicotine
- GHB [CORRECT]

Explanation: GHB (Gamma-hydroxybutyrate) is listed under depressants, whereas Ephedrine, Caffeine, and Nicotine are mild stimulants.

Q2346. According to the text regarding drug users, what percentage of addiction is attributed specifically to curiosity?

- 5%
- 12%
- 19.85% [CORRECT]
- 84%

Explanation: Section 8, paragraph 8 specifies that curiosity accounts for 19.85% of the reasons for drug addiction.

Q2347. What is the primary age group among youths identified as having a high incidence of drug addiction?

- 15-19 years
- 20-24 yrs [CORRECT]
- 25-30 years
- 18-25 years

Explanation: The text states that high incidents of drug abuse among youths occur notably in the 20-24 yrs age group, often due to emotional immaturity.

Q2348. Which act regulates the control over the cultivation of opium and all matters relating to narcotic drugs and psychotropic substances?

- The Prevention of Illicit Trafficking Act
- **Narcotic Drugs and Psychotropic Substances (NDPS) Act and Rules [CORRECT]**
- The Drugs and Cosmetics Act
- The Public Health and Safety Act

Explanation: Control over cultivation of opium and related matters are regulated by the 'Narcotic Drugs and Psychotropic Substances (NDPS) Act and Rules'.

Q2349. What is the maximum rigorous imprisonment penalty specified under the NDPS Act for indulging in drug trafficking?

- 10 years
- 14 years
- **20 yrs [CORRECT]**
- Life imprisonment

Explanation: The NDPS Act provides for punishment of up to 20 yrs rigorous imprisonment and a fine up to Rupees Two Lakhs for drug trafficking.

Q2350. According to the NDPS Act, what penalty is prescribed in the case of a repeat drug trafficking offense?

- Double the fine
- **Death sentence [CORRECT]**
- Life imprisonment without parole
- Cancellation of property ownership

Explanation: The NDPS Act provides for a death sentence in case of a repeat of the drug trafficking offense.

Q2351. What does the 'Prevention of Illicit Trafficking in Narcotic Drugs and Psychotropic Substances' (PITNDPS) order provide for?

- Confiscation of vehicles
- **Detention of persons indulging in trafficking for 1 to 2 years by an executive order [CORRECT]**
- Mandatory community service
- Immediate deportation

Explanation: PITNDPS provides for the detention of persons indulging in trafficking of narcotic drugs for 1 to 2 years by an executive order.

Q2352. Chapter VIII of the textbook deals with which of the following subjects?

- First Aid and Civil Defense
- **Health and Hygiene [CORRECT]**
- Map Reading and Field Craft
- National Integration

Explanation: The index and chapter heading clearly state 'CHAPTER-VIII HEALTH AND HYGIENE'.

Q2353. Which section of Chapter VIII covers 'Yoga: Introduction and Exercises'?

- Section-4
- Section-5
- **Section-6 [CORRECT]**
- Section-7

Explanation: The index indicates that Section-6 covers 'Yoga: Introduction and Exercises'.

Q2354. Which specific section under Chapter VIII is applicable only to SD/SW and not to JD/JW according to the index?

- Section-1 Structure and Function of the Human Body
- Section-3 Preventable Diseases
- **Section-7 Physical and Mental Health [CORRECT]**
- Section-2 Hygiene and Sanitation

Explanation: The index marks Section-7 ('Physical and Mental Health') with a hyphen (-) for JD/JW and a tick (✓) for SD/SW.

Q2355. How many bones are there in the adult human body as stated in the text?

- 198 bones
- **206 bones [CORRECT]**
- 210 bones
- 208 bones

Explanation: The text explicitly mentions under Section-1 that 'There are 206 bones in the body'.

Q2356. Where are long bones primarily found in the human skeletal system?

- Cranium and hips
- Wrist and ankles
- **Upper limb [CORRECT]**
- Vertebral column

Explanation: The text states that long bones are found in the upper limb (along with Femur, Tibia, Fibula in the lower limb, and Sternum and Ribs on the chest).

Q2357. Where are short bones located in the human body?

- Cranium and shoulder
- **Wrist and ankles [CORRECT]**
- Chest and ribs
- Vertebral column

Explanation: The text specifies that short bones are found in the wrist and ankles.

Q2358. Flat bones in the human body are found in which of the following regions?

- **Cranium, shoulder and hips [CORRECT]**
- Upper and lower limbs
- Wrist and ankles
- Vertebral column

Explanation: According to the text, flat bones are found in the cranium, shoulder, and hips.

Q2359. Where are irregular bones found in the human skeletal system?

- Chest
- **Vertebral column [CORRECT]**
- Cranium
- Lower limb

Explanation: The text notes that irregular bones are found in the vertebral column.

Q2360. What is the physiological purpose of joints in the human body?

- To produce red blood cells
- To connect muscles to bones
- **Places where two or more bones meet which permit the movement of the body [CORRECT]**
- To protect the spinal cord exclusively

Explanation: The text defines joints as places where two or more bones meet which permit the movement of the body.

Q2361. Into how many types are the muscles responsible for body movement categorized in the text?

- One type
- **Two types [CORRECT]**
- Three types
- Four types

Explanation: The text states that muscles attached to the bones are of two types: voluntary and involuntary.

Q2362. What are the three distinct layers of the human heart mentioned in the text?

- Epicardium, Myocardium, Endocardium
- **Pericardium, Myo Cardium, Endo Cardium [CORRECT]**
- Pericardium, Epicardium, Myocardium
- Exocardium, Mesocardium, Endocardium

Explanation: The text explicitly states that Pericardium, Myo Cardium and Endo Cardium are the three layers of the heart.

Q2363. Which blood vessels connect the small arteries and veins and facilitate the exchange of oxygen and nutrition?

- Aorta
- Vena Cava
- **Capillaries [CORRECT]**
- Arterioles

Explanation: According to the text, capillaries are tiny blood vessels which connect small arteries and veins, allowing the exchange of oxygen and nutrition with carbon-dioxide by the tissue.

Q2364. What is the primary function of the kidneys as excretory organs?

- Removal of sweat through perspiration
- **Removal of waste material in the form of urine [CORRECT]**
- Removal of carbon-di-oxide through breathing
- Removal of unabsorbed food as faeces

Explanation: The text specifies under excretory organs that waste material in the form of urine is removed by kidneys.

Q2365. According to the hygiene section, what is the average daily requirement of sleep for human beings?

- 5 to 6 hours
- 6 to 7 hours
- **7 to 8 hours [CORRECT]**
- 8 to 9 hours

Explanation: The text states that the average requirement of sleep is from 7 to 8 hours a day.

Q2366. Deficiency of which vitamins is identified as the cause of dental decay?

- Vitamins A & B
- Vitamins B & C
- **Vitamins C & D [CORRECT]**
- Vitamins A & E

Explanation: The text explicitly mentions that in-sufficient vitamins C & D are the cause of dental decay.

Q2367. What is the recommended safe distance to avoid soakage pits, latrines, or leaking drains from a well to protect underground water?

- Within 50 ft
- Within 75 ft
- **Within 100 ft [CORRECT]**
- Within 150 ft

Explanation: The textbook notes that wells can be protected by avoiding soakage pits, latrines, urinals, sewerage or any leaking drains within 100 ft of a well.

Q2368. Which chemical is recommended for the 'pinking' of wells during a cholera epidemic?

- Bleaching powder
- **Potassium permanganate [CORRECT]**
- Chlorine gas
- Alum

Explanation: The text states that during a cholera epidemic, potassium permanganate should be used for pinking of wells.

Q2369. What is the dimension of a Deep Trench Latrine constructed for camps?

- 2 feet wide, 6 feet deep
- **3 feet wide, at least 8 feet deep [CORRECT]**
- 4 feet wide, 5 feet deep
- 3 feet wide, 10 feet deep

Explanation: The text specifies that for a Deep Trench Latrine, a pit three feet wide, atleast eight feet deep and of a length suitable to the requirement is constructed.

Q2370. What is the dimension and trench ratio for Shallow Trench Latrines used for temporary camps of less than a week's duration?

- **3 ft long, 1 ft wide, 2 ft deep; ratio is 5 trenches for the first 100 users and 3 for each subsequent 100 [CORRECT]**
- 4 ft long, 2 ft wide, 3 ft deep; ratio is 3 trenches for the first 100 users and 2 for each subsequent 100
- 3 ft long, 2 ft wide, 2 ft deep; ratio is 4 trenches for the first 100 users
- 5 ft long, 1 ft wide, 3 ft deep; ratio is 5 trenches for the first 100 users

Explanation: The text describes shallow trench latrines as being 3 feet long, 1 foot wide and 2 feet deep, with a ratio of 5 trenches for the first hundred users and 3 for each subsequent hundred.

Q2371. After how many hours should shallow trench latrines for temporary camps be filled in and new trenches dug?

- 12 hours
- **24 hours [CORRECT]**
- 36 hours
- 48 hours

Explanation: The instructions state to fill the trenches after 24 hours and get new trenches dug in.

Q2372. What are the dimensions specified for digging a soakage pit for the disposal of liquid refuse?

- 3 ft by 3 ft and 4 ft deep
- **4 ft by 4 ft and 5 ft to 6 ft deep [CORRECT]**
- 5 ft by 5 ft and 6 ft deep
- 4 ft by 3 ft and 5 ft deep

Explanation: The text outlines soakage pit dimensions as 4 feet by 4 feet and 5 feet to 6 feet deep.

Q2373. What method of water purification uses chemicals like alum to carry impurities to the bottom?

- Sterilization
- Clarification
- **Precipitation [CORRECT]**
- Distilling

Explanation: Precipitation involves adding alum or some similar chemical to water which carries all impurities to the bottom with it.

Q2374. Which side of the human heart contains pure blood?

- Right side
- **Left side [CORRECT]**
- Upper side
- Lower side

Explanation: The text clearly notes that the right side contains impure blood while the left side contains pure blood.

Q2375. What is the main purpose of studying hygiene according to the text?

- To comply with religious and social customs
- **To preserve and improve the health of the individual and community [CORRECT]**
- solely for medical examinations
- To maintain military discipline only

Explanation: The text states that hygiene is the science which seeks to preserve and improve the health of the individual and of the community as a whole.

Q2376. What material is used to construct trough urinals as described in the text?

- Stainless steel plates
- **Corrugated plain galvanized iron bent in the form of a gutter [CORRECT]**
- Cast iron pipes
- Cement concrete slabs

Explanation: The text specifies that trough urinals are made of corrugated plain galvanized iron bent in the form of a gutter and mounted on four wooden legs.

Q2377. What is the recommended method for disposing of solid refuse like kitchen garbage and bones according to the text?

- Open dumping
- **Burial or burning [CORRECT]**
- Throwing in water bodies
- Using improvised kerosene tins

Explanation: Text specifies that disposal of solid refuse like kitchen garbage, bones etc., be done by burial or burning.

Q2378. Which of the following diseases belongs to the Excremental Diseases group where germs pass out through excreta?

- Common cold
- **Typhus fever [CORRECT]**
- Tuberculosis
- Influenza

Explanation: Text lists Typhus fever, dysentery, diarrhoea, jaundice and intestinal worms under Excremental Diseases.

Q2379. How are germs primarily spread in Droplet Infection diseases like common cold and influenza?

- Through blood-sucking insects
- By actual body contact
- **Through small droplets of saliva sprayed during coughing or sneezing [CORRECT]**
- Through contaminated water and excreta

Explanation: Droplet infection germs are sprayed out from the nose, throat or lungs in the air in small droplets of saliva during coughing, sneezing or talking.

Q2380. Which insects are responsible for transmitting Malaria, Dengue, and Filariasis?

- Sand fly
- **Mosquito [CORRECT]**
- Lice
- Fleas

Explanation: The text explicitly states that Malaria, Dengue, and Filariasis are carried by Mosquitoes.

Q2381. Kala Azar and Sand fly fever are transmitted by which carrier?

- Ticks
- Fleas
- **Sand fly [CORRECT]**
- Lice

Explanation: Text categorizes Sand fly fever, Kala Zar, and Oriental sore under diseases carried by the sand fly.

Q2382. In the case of internal organ injuries, what type of pulse is typically observed?

- Strong and slow
- **Weak thready rapid pulse [CORRECT]**
- Bounding and regular
- Unnoticeable without equipment

Explanation: Symptoms of internal injuries include a weak thready rapid pulse, cold clammy skin, and shallow breathing.

Q2383. What is the term used for burns caused by moist heat such as hot water or steam?

- Chemical burn
- Dry burn
- **Scald [CORRECT]**
- Radiation burn

Explanation: Text defines burns caused by moist heat such as hot water, hot fluids and steam as a scald.

Q2384. What is the recommended first aid procedure when dealing with chemical burns from strong acids or alkalies?

- Apply oily ointments immediately
- **Let water from a pipe or hose flow freely on the burn [CORRECT]**
- Apply a tight tourniquet
- Cover with dry cotton wool without washing

Explanation: For chemical burns, let water from a pipe or hose flow freely on the burn so that the chemical flows off.

Q2385. When administering first aid for a snake bite, how should the wound be incised?

- 1" x 1" in a circle
- **2" x ½" across the fang mark with a blade [CORRECT]**
- 3" deep straight cut
- No incision should ever be made

Explanation: First aid for snake bites includes incising into the skin 2" x ½" across the fang mark with a blade.

Q2386. For how long should a dog and a patient be kept under observation following a dog bite?

- At least 3 days
- At least 7 days
- **At least 10 days [CORRECT]**
- At least 30 days

Explanation: The text states that the dog and the patient should be kept under observation for at least 10 days.

Q2387. What action should be strictly avoided when a foreign body enters a child's ear?

- Sending the patient to the hospital
- Keeping the patient calm
- **Trying to remove the foreign body with the help of a pin or forceps [CORRECT]**
- Allowing natural exit

Explanation: Text warns not to try to remove the foreign body with the help of a pin or forceps as this may push it further in.

Q2388. What is the correct first-aid action if a foreign body is fixed to the eye-ball?

- Rub the eye vigorously until it comes out
- **Send the patient to the hospital with a light eye bandage [CORRECT]**
- Try to pull it out using forceps
- Wash with hot water and soap

Explanation: Text states that if the foreign body is fixed to the eye-ball, the patient should be sent to the hospital with a light eye bandage.

Q2389. Which of the following is listed under animal-borne diseases?

- Common cold and influenza
- **Rabies, plague, anthrax and tuberculosis [CORRECT]**
- Malaria and dengue
- Typhus and relapsing fever

Explanation: Text states that rabies, plague, anthrax and tuberculosis are some of the common animal-borne diseases.

Q2390. Which of the following is NOT a preventive measure listed to ward off preventable diseases?

- Segregate the patient
- Destroy agents (germs) causing infection
- **Administration of heavy antibiotics without prescription [CORRECT]**
- Inoculation and Vaccination

Explanation: Preventive measures listed are: segregate the patient, destroy agents causing infection, disinfection, control of food and drink, and inoculation/vaccination.

Q2391. What anatomical region controls and regulates the actions of the muscles concerned with respiration?

- The spinal cord
- **The respiratory centre of the brain [CORRECT]**
- The medulla oblongata indirectly via the heart
- The autonomous nervous system of the lungs

Explanation: According to the text, the actions of muscles concerned with respiration are controlled and regulated by the respiratory centre of the brain.

Q2392. Which of the following conditions is NOT listed as a direct cause of Asphyxia?

- Drowning
- Electric Shock
- **Diabetes Mellitus [CORRECT]**
- Inhalation of poisonous gases like carbon monoxide

Explanation: Causes of asphyxia mentioned include drowning, hanging, suffocation, over dosage of drugs, electric shock, and diseases like tetanus, epilepsy, and rabies. Diabetes is listed as a cause of coma/unconsciousness, not asphyxia directly.

Q2393. What is the correct immediate first aid action for a choking small child?

- Lay them on their back and give mouth-to-mouth resuscitation
- **Hold them upside down and thump their back hard between the shoulder blades [CORRECT]**
- Perform Schaefer's method of artificial respiration
- Cut the constriction around the neck

Explanation: The text specifies that in case of a small child choking, you should hold him upside down, and thump his back hard between the shoulder blades or encourage vomiting.

Q2394. During the treatment of electric shock, what safety precaution should the rescuer take when removing the casualty from contact with current?

- Wear wet cotton gloves
- **Stand on insulating material such as rubber-soled shoes or boots or piles of newspapers [CORRECT]**
- Ground oneself completely using an iron rod
- Pour water on the switch before touching the patient

Explanation: The text states to stand on some insulating material such as rubber-soled shoes or boots or piles of newspapers when removing the casualty from contact with the current.

Q2395. Which of the following is NOT recognized as a type of artificial respiration in the text?

- Holger-Nielson Method
- Schaefer's Method
- Mouth to Mouth Breathing
- **Silvester's Method [CORRECT]**

Explanation: The three types of artificial respiration explicitly mentioned are Holger-Nielson Method, Schaefer's Method, and Mouth to Mouth Breathing.

Q2396. In the Holger-Nielson Method of artificial respiration, what position must the casualty be kept in?

- Supine position
- **Prone position [CORRECT]**
- Recovery position
- Sitting upright position

Explanation: The text states for the Holger-Nielson Method: 'Keep the casualty in prone position.'

Q2397. In Movement 1 of the Holger-Nielson Method, what does the pressure applied on the shoulder blades cause?

- **Expiration [CORRECT]**
- Inspiration
- Cardiac arrest
- Relaxation of the diaphragm

Explanation: The text notes: 'Keeping the arms straight rock gently forward... This pressure causes expiration. This is called movement 1.'

Q2398. What is the specified frequency (ratio) per minute for performing the Holger-Nielson Method of artificial respiration?

- 10 times in a minute
- **12 times in a minute [CORRECT]**
- 15 times in a minute
- 20 times in a minute

Explanation: The text explicitly states: 'The ratio should be 12 times in a minute' for the Holger-Nielson method.

Q2399. During Mouth-to-Mouth breathing, what position should the casualty be in?

- Prone position
- **Supine position [CORRECT]**
- Sitting position
- Lateral recumbent position

Explanation: The text notes under Mouth to Mouth: 'Casualty should be in supine position.'

Q2400. What is the frequency of breaths per minute given during Mouth-to-Mouth artificial respiration according to the text?

- 6-8 times per minute
- **10-12 times per minute [CORRECT]**
- 16-18 times per minute
- 20-24 times per minute

Explanation: The text states: 'and blow directly and slowly into it (10-12 times per minute).'

Q2401. How is an 'Inside Wound' (Incised Wound) defined according to the classification of wounds?

- A wound caused by a blunt instrument with torn edges
- **A wound caused by a sharp instrument like a knife or razor with clean edges [CORRECT]**
- A puncture wound caused by a bullet or nail
- A burn wound caused by electricity or heat

Explanation: The text defines Inside (Incised) Wound as a wound caused by sharp instruments like knife, razor and so on, with clean edges.

Q2402. What type of wound is caused by a blunt instrument, resulting in torn or uneven edges?

- Inside Wound
- **Lacerated Wound [CORRECT]**
- Puncture Wound
- Incised Wound

Explanation: The text specifies: 'Lacerated Wound. It is caused by blunt instrument. The edges are torn or uneven.'

Q2403. Which of the following signs and symptoms is NOT typically associated with Asphyxia in the early stages?

- Face, lips, nails, fingers and toes turn blue
- Shortness of breath with increased rate
- Rapid pulse
- **Persistent high fever and chills [CORRECT]**

Explanation: Signs of asphyxia listed include dizziness, shortness of breath, rapid pulse, partial loss of consciousness, neck vein swelling, and cyanosis (turning blue). Fever and chills are not mentioned.

Q2404. What is the primary aim of performing Shavasana?

- To improve flexibility of the spine
- **To release the mind from the body and achieve relaxation in the shortest possible time [CORRECT]**
- To aid in digestion and eliminate gas troubles
- To provide good exercise to the abdominal muscles

Explanation: According to the text, the main aim of Shavasana is releasing the mind from the body to achieve relaxation in the shortest possible time.

Q2405. What is the recommended timing for holding the Shavasana posture?

- 20-30 seconds
- 1-3 minutes
- **5-10 minutes [CORRECT]**
- 1/2 - 1 minute

Explanation: The text explicitly specifies the timing for Shavasana as 5-10 minutes.

Q2406. Which asana is specifically noted in the text as being able to be performed immediately after eating food to help digestion?

- Gomukhasana
- **Vajrasana [CORRECT]**
- Bhujangasana
- Halasana

Explanation: The text states that Vajrasana can be done immediately after eating food, which helps digestion and eliminates gas troubles.

Q2407. In Dhanurasana, what does the body appear like when the thighs and chest are raised?

- A wheel
- A cobra
- **A bow [CORRECT]**

- A triangle

Explanation: The text mentions that in Dhanurasana, the thighs and the chest should be raised, making the body appear like a bow.

Q2408. During Bhujangasana, up to what point should you try to keep the spine bent backward without raising it?

- Without raising the chest
- **Without raising the navel [CORRECT]**
- Without raising the hips
- Without raising the knees

Explanation: The text specifies to try to keep the spine bent backward as much as possible without raising the navel during Bhujangasana.

Q2409. According to the WHO definition introduced after 1948, health is defined as:

- Merely the absence of disease or infirmity
- **A complete state of physical, mental and social well being and not merely the absence of disease or infirmity [CORRECT]**
- The absence of physical pain and mental anxiety
- The capacity for vigorous physical labor and athletic endurance

Explanation: The text defines health according to WHO as a complete state of physical, mental and social well being and not merely the absence of disease or infirmity.

Q2410. Which of the following is NOT listed as an element of good health in the text?

- Cheerfulness
- Courage
- **Excessive ambition [CORRECT]**
- Sense of well being

Explanation: Excessive ambition is not listed in the elements of good health; the text lists cheerfulness, courage, and a sense of well being among others.

Q2411. What are the primary objectives of health education formulated by WHO?

- To eradicate all infectious diseases globally
- **To ensure that health is regarded as an asset in the community and to promote the development and proper use of health services [CORRECT]**
- To provide free medical treatment to all citizens
- To train professional doctors and nurses

Explanation: The text lists these exact two points under the objectives of health education formulated by WHO.

Q2412. According to the text, who plays a major role in providing an environment in which children develop a healthy mental attitude?

- Peers and friends
- **Parents and teachers [CORRECT]**
- Doctors and psychologists
- Government leaders

Explanation: The text states that parents and teachers play a major role in providing an environment in which children develop healthy mental attitudes.

Q2413. Which of the following is listed as a characteristic of a healthy mind?

- **Normal appetite [CORRECT]**
- Pessimistic outlook
- Irritability
- Moodiness

Explanation: Normal appetite is listed under the characteristics of a healthy mind, whereas pessimism, irritability, and moodiness are listed under causes/traits of mental disorder.

Q2414. Which factor is specifically identified in the text as a cause of mental disorder?

- Self control
- Calmness
- **Undue anxiety [CORRECT]**
- High intelligence

Explanation: Undue anxiety is explicitly listed as a cause of mental disorder in the text.

Q2415. What is emphasized regarding learning Yogasanas for maximum benefit?

- They should be learned from books and internet videos only
- **They must be learnt from a qualified instructor [CORRECT]**
- They can be practiced without any instruction
- They should only be practiced during the winter season

Explanation: The conclusion section states that Yogasanas must be learnt from a qualified instructor to gain maximum benefit.

Q2416. Healthy people make a happy society, and happy societies make the nation strong in which two aspects?

- Socially and politically strong
- **Economically and militarily strong [CORRECT]**
- Financially and technologically strong
- Industrially and agriculturally strong

Explanation: According to the text under Health and Socio-Economic Development, healthy people make a happy society and happy societies make the nation economically and militarily strong.

Q2417. What is the medical definition of a fracture provided in the text?

- Displacement of one or more bones at a joint
- **A discontinuity or break in a bone, resulting in the dissolution of the supporting framework of the body [CORRECT]**
- Damage to the underlying blood vessels and nerves due to muscular contraction
- Rupture of skin overlying a bone causing protrusion

Explanation: Section 8, Paragraph 1 defines a fracture as a discontinuity or break in a bone, resulting in the dissolution of the supporting frame work of the body.

Q2418. Which type of fracture cause leads to the fracture of the patella (knee cap) through the contraction of the thigh muscle?

- Direct Violence
- Indirect Violence
- **Forcible Muscular Contraction [CORRECT]**
- Diseases of Bones

Explanation: The text states that fracture of patella (knee cap) is caused by contraction of thigh muscle, which falls under Forcible Muscular Contraction.

Q2419. How is a fracture classified when the broken bone damages underlying structures like blood vessels, nerves, lungs, or brain?

- Simple or Closed
- Compound or Open
- **Complicated [CORRECT]**
- Dislocated

Explanation: Paragraph 3(c) defines a complicated fracture as one where the broken bone damages the underlying structure like blood vessels, nerves, lungs, brain, etc.

Q2420. Which of the following is NOT listed as a symptom and sign of a fracture?

- Pain, swelling and tenderness
- Loss of power
- **Increased body temperature and fever [CORRECT]**
- Grating sound due to broken bones

Explanation: Symptoms and signs listed include pain, swelling/tenderness, loss of power, abnormal mobility, deformity, and grating sound. Fever is not mentioned.

Q2421. What specialized bandage is applied in the case of a fracture of the jaw bone?

- Greater arm sling
- **Barrel Bandage [CORRECT]**
- Narrow-fold bandage in figure 8
- Cuff sling

Explanation: Paragraph 7(a) specifies applying a Barrel Bandage for the fracture of the jaw bone.

Q2422. In the case of a fracture of the clavicle, what action should be taken regarding the arm?

- Fix the elbow to the affected side and put the finger touching the opposite shoulder
- Apply long wooden splint from axilla to just beyond foot
- **Put a pad in arm pit, apply greater arm sling and fix the arm with a narrow fold bandage tied across the elbow to lower chest [CORRECT]**
- Restrict the movement of chest using a broad-fold bandage

Explanation: Paragraph 8(b) dictates putting a pad in the arm pit, applying a greater arm sling, and fixing the arm with a narrow fold bandage tied across the elbow to the lower chest.

Q2423. How many broad fold bandages are used to secure long wooden splints when treating a fracture of the lower limb?

- Four broad fold bandages
- Five broad fold bandages
- Six broad fold bandages
- **Seven broad fold bandages [CORRECT]**

Explanation: Paragraph 11(b) states to secure them by seven broad fold bandages tied at chest, pelvis, ankles, both thighs below the fracture, both legs, and knees.

Q2424. When tying bandages on the ankles for a lower limb fracture, how should the bandage be tied?

- In a square knot
- **In figure 8 [CORRECT]**
- In a slip knot
- In a clove hitch

Explanation: Paragraph 11(b) explicitly mentions: 'The bandage on the ankles should be tied in figure 8.'

Q2425. How should a patient with a suspected fracture of the spine be carried on a stretcher?

- Face upwards with cushions under the head
- In a three quarter prone position
- **Face downwards on a board placed lengthwise on the stretcher [CORRECT]**
- Sitting upright supported by bandages

Explanation: Paragraph 12(f) states to carry the patient face downwards on a board placed lengthwise on the stretcher for a fracture of the spine.

Q2426. What position should a casualty with a skull fracture be placed in if their breathing is abnormal?

- Lay on back with shoulders and head raised with cushions
- **Lay in a three quarter prone position with pads under the chest and upper knee drawn up [CORRECT]**
- Face downwards on a board
- Sitting with head projecting outside the stretcher canvas

Explanation: Paragraph 13(b) states: 'If Breathing is Abnormal. Lay the casualty in a three quarter prone position. Apply pads under the chest and draw up the upper knee.'

Q2427. Which of the following instructions must be strictly followed when treating a patient with a skull fracture?

- Give them plenty of water to prevent dehydration from shock
- **Do not give anything to drink [CORRECT]**
- Disturb the patient frequently to check consciousness
- Keep the head flat without any cushions

Explanation: Paragraph 13(c) explicitly instructs: 'Do not give anything to drink.'

Q2428. What is the medical definition of dislocation as provided in the text?

- A discontinuity or break in a bone framework
- **Displacement of one or more bones at a joint [CORRECT]**
- Rupture of skin overlying a bone fracture
- Tearing of ligaments due to forcible muscular contraction

Explanation: Paragraph 14 defines dislocation as displacement of one or more bones at a joint.

Q2429. Which joints are mentioned as being more frequently dislocated?

- Neck, spine, wrist, and ankle
- **Shoulder, elbow, lower jaw, thumb and finger [CORRECT]**
- Knee cap, hip, collarbone, and heel
- Ribs, skull base, clavicle, and pelvis

Explanation: Paragraph 14 lists the joints more frequently dislocated as shoulder, elbow, lower jaw, thumb and finger.

Q2430. What is the primary action recommended regarding the reduction of a joint dislocation during first aid?

- Try to reduce the dislocation immediately
- **Do not try to reduce the dislocation [CORRECT]**
- Pull the limb firmly to align the joint
- Rotate the joint clockwise

Explanation: According to the first aid guidelines for joint dislocations, one must not try to reduce the dislocation.

Q2431. How is a sprain officially defined in the text?

- The over stretching of a muscle
- **The wrenching of the ligaments and tissues around the joint [CORRECT]**
- The complete fracture of a bone
- The dislocation of joint cartilage

Explanation: A sprain is defined as the wrenching of the ligaments and tissues around the joint.

Q2432. What material is a crepe bandage made of, allowing it to bind firmly around joints?

- Cotton thread
- **Elastic material [CORRECT]**
- Nylon mesh
- Leather strips

Explanation: A crepe bandage is made of elastic material which stretches and binds firmly around the joint.

Q2433. If you are in doubt whether an injury is a sprain, dislocation, or fracture, how should you treat it?

- Treat it as a sprain
- Treat it as a dislocation
- **Treat it as a fracture [CORRECT]**
- Massage the area gently

Explanation: The text states that whenever you are in doubt whether an injury is a sprain or dislocation or fracture, treat it as a fracture.

Q2434. How is a strain defined in first aid instructions?

- **The over stretching of a muscle [CORRECT]**
- The wrenching of ligaments
- The fracture of bone
- The rupture of skin

Explanation: A strain is defined as the over stretching of a muscle.

Q2435. Which of the following voluntary organizations is NOT explicitly mentioned as assisting medical authorities in casualty evacuation?

- Red Cross Society
- Saint Johns Ambulance Association
- National Cadet Corps
- **Bharat Scouts and Guides [CORRECT]**

Explanation: The text lists Red Cross Society, Saint Johns Ambulance Association, Home Guards, Civil Defence, and NCC cadets, but not Bharat Scouts and Guides.

Q2436. When setting up a temporary First Aid Post where none is available, where should it ideally be located?

- Right on the main road
- **In a sheltered place, away from the main road [CORRECT]**
- In an open playground exposed to air
- Inside an active manufacturing factory

Explanation: If no First Aid Post is available, transform a sheltered place, away from the main road, into a first aid post.

Q2437. Which improvised items can be collected and used as splints and tourniquets according to the preparation guidelines?

- Twigs, sticks, umbrellas strings etc. [CORRECT]
- Plastic bottles and metal cans
- Paper sheets and cardboard boxes
- Rubber bands and nylon ropes exclusively

Explanation: The text mentions collecting even twigs, sticks, umbrellas strings etc. to be used as splints and tourniquets.

Q2438. In casualty diagnosis, what should be done if the case is identified as asphyxia?

- Give artificial respiration [CORRECT]
- Apply a crepe bandage
- Treat for shock with hot coffee
- Perform immediate surgery

Explanation: The text states: 'If it is a case of asphyxia, give artificial respiration.'

Q2439. What constitutes Priority I casualties during prioritization for treatment and evacuation?

- Cases requiring resuscitation and urgent surgery [CORRECT]
- Cases requiring early surgery and possibly resuscitation
- All other casualties who require minor treatment
- Cases requiring observation only

Explanation: Priority I is defined as cases requiring resuscitation and urgent surgery.

Q2440. How are casualties requiring early surgery and possibly resuscitation categorized?

- Priority I
- Priority II [CORRECT]
- Priority III
- Priority IV

Explanation: Priority II consists of cases requiring early surgery and possibly resuscitation.

Q2441. What category of casualties encompasses all those who require minor treatment?

- Priority I
- Priority II
- Priority III [CORRECT]
- Priority IV

Explanation: Priority III includes all other casualties who require minor treatment.

Q2442. Which of the following qualities of a first aider is specifically highlighted in the text?

- Dexterity and alacrity [CORRECT]
- Strictness and authority
- Speed and aggression
- Detachment and silence

Explanation: The text mentions presence of mind, intelligence, resourcefulness, dexterity, alacrity, and determination.

Q2443. What should a first aider do regarding the medical treatment of a patient before sending them to the hospital?

- Perform minor surgeries independently
- **Do not perform the functions of a doctor and quickly dispose off the casualty [CORRECT]**
- Prescribe heavy pharmaceutical antibiotics
- Keep the patient overnight for observation

Explanation: The text states: 'Do not perform the functions of a doctor and must quickly dispose off the casualty by sending it to the nearest hospital.'

Q2444. Under Chapter-X Environment and Ecology, which section deals specifically with 'Wild Life' and is designated for SD/SW?

- Section-4
- Section-5
- **Section-6 [CORRECT]**
- Section-3

Explanation: The index for Chapter-X shows SECTION-6 Wild Life applies to SD/SW.

Q2445. Which of the following factors is categorized under cultural factors influencing human beings?

- Earth and water
- Plants and animals
- **Economic, social, and political [CORRECT]**
- Climatic conditions

Explanation: Section-1, Paragraph 2 classifies human-influencing factors into physical, biological, and cultural (economic, social, and political).

Q2446. What is the technical pH value threshold that defines acid rain water?

- **Below 5.6 [CORRECT]**
- Above 7.0
- Exactly 6.5
- Between 8.0 and 9.0

Explanation: Section-1, Paragraph 8(b)(i) states that technically, acid rain water will have a pH below 5.6.

Q2447. Which gas is liberated when chlorofluorocarbons (CFCs) reach the upper atmosphere and react with UV radiations, catalyzing the conversion of ozone into molecular oxygen?

- Carbon dioxide
- Nitrous oxide
- **Chlorine [CORRECT]**
- Methane

Explanation: Section-1, Paragraph 8(c) explains that chlorine is liberated in the process and catalyses the conversion of ozone into molecular oxygen.

Q2448. According to the text, what fraction of the world's land area is presently covered by forests?

- About one half
- About one quarter
- **About one third [CORRECT]**
- About three quarters

Explanation: Section-1, Paragraph 6 states that presently, forests cover about one third of the world's land area.

Q2449. What does the Greek word 'Oikos', from which the word ecology was coined, mean?

- Environment
- **Home [CORRECT]**
- Nature
- Earth

Explanation: Section-2, Paragraph 1 states that the word ecology was coined from the Greek word 'Oikos' which means home.

Q2450. In an ecological system, which of the following are classified as primary consumers (herbivores)?

- Wolves and snakes
- **Benthos, zooplanktons, cow, and deer [CORRECT]**
- Bacteria and fungi
- Large fish and hawks

Explanation: Section-2, Paragraph 3(b)(ii)(aa) defines primary consumers as herbivores feeding directly on living plant residues e.g. Benthos, Zooplanktons, Cow, Deer etc.

Q2451. Decomposers in an ecosystem chiefly consist of which of the following?

- Green plants and photosynthetic bacteria
- Insects, fish, and wolves
- **Bacteria, fungi, and actinomycetes [CORRECT]**
- Herbivores and carnivores

Explanation: Section-2, Paragraph 3(b)(iii) states that decomposers are chiefly bacteria, fungi, and actinomycetes.

Q2452. An increase in natural carbon dioxide levels by how much would raise the earth's temperature by 5° to 6°, making the survival of life difficult?

- One fold
- **Two fold [CORRECT]**
- Five fold
- Ten fold

Explanation: Section-1, Paragraph 8(a) mentions that if this natural carbon dioxide level increases even two fold, it would raise temperature by 5° to 6°.

Q2453. Which Vedic God represents Thunder and Rain according to Section-1, Paragraph 9?

- Agni
- Surya
- Varuna
- **Indra [CORRECT]**

Explanation: Section-1, Paragraph 9 lists Vedic Gods including Indra (Thunder & Rain).

Q2454. What is the primary role suggested for NCC cadets in combating environmental degradation?

- Industrial waste regulation
- **Conducting tree plantation drives and environmental awareness campaigns [CORRECT]**
- Enforcing environmental laws in courts
- Managing municipal water treatment plants

Explanation: Section-1, Paragraph 11 highlights that NCC Cadets are well organized to carry out environmental awareness campaigns and conduct tree plantation drives.

Q2455. Environmental degradation mainly takes which two forms?

- **Resource depletion and resource deterioration/pollution [CORRECT]**
- Deforestation and global warming
- Population growth and poverty
- Abiotic and biotic imbalance

Explanation: Section-1, Paragraph 4 states that environmental degradation takes mainly two forms: resource depletion and resource deterioration or pollution.

Q2456. Which sector accounts for most of the water used by humans?

- Industries
- Power generation
- **Agriculture [CORRECT]**
- Domestic purposes

Explanation: Section-1, Paragraph 7 states that agriculture accounts for most of the water used.

Q2457. In a grassland ecosystem, a food chain typically starts with which of the following?

- Grasshoppers
- **Grasses [CORRECT]**
- Frogs
- Hawks

Explanation: Section-2, Paragraph 4 states that a food chain in a grassland ecosystem starts with grasses and goes through grasshoppers, frogs, snakes, hawks and so on.

Q2458. What is the basic approach that must be followed to address the integrated problems of poverty, population, and environment?

- Rapid industrialization
- **Sustainable development [CORRECT]**
- Unrestricted economic growth
- Complete cessation of agriculture

Explanation: Section-1, Paragraph 10 states that the basic approach to follow is sustainable development and an integrated approach to the problems of poverty, population and environment.

Q2459. What are the two main forms in which environmental degradation primarily takes place according to the text?

- **Resource depletion and resource deterioration or pollution [CORRECT]**
- Global warming and nuclear winter
- Deforestation and overpopulation
- Industrialization and urbanization

Explanation: Environmental degradation takes mainly two forms: resource depletion (decline in quantity) and resource deterioration or pollution (decline in quality).

Q2460. What is the primary cause of resource depletion in technologically advanced countries?

- Absence of technology
- **Over-use [CORRECT]**
- Large population size
- Deforestation for land space

Explanation: In technologically advanced countries, the main cause of resource depletion is over-use, such as the enormous amounts of petroleum used.

Q2461. Which of the following is cited as an example of an extinct flightless bird due to reckless hunting?

- Water Hyacinth
- Dodo [CORRECT]
- Penguin
- Kiwi

Explanation: Reckless hunting leading to extinction of species is exemplified by the extinction of the Dodo, a flightless bird.

Q2462. Which plant species introduced from tropical America is specifically mentioned as choking water bodies in Asia and Africa?

- Water Lily
- Water Hyacinth [CORRECT]
- Algae Bloom
- Lotus

Explanation: Invasion by plants brought by man, such as water hyacinth introduced from tropical America, has led to the choking of water bodies in Asia and Africa.

Q2463. Which of the following is classified as a renewable energy resource in the text?

- Coal
- Petroleum
- Sunlight [CORRECT]
- Natural Gas

Explanation: While sunlight, wind, and water are renewable energy resources, minerals, coal, petroleum, and natural gas are non-renewable.

Q2464. What causes the greenhouse effect according to the environmental text?

- Increased carbon dioxide content and increase in global temperature [CORRECT]
- Oil spills in the seas
- Accumulation of non-biodegradable polythene bags
- Excessive use of chemical fertilizers

Explanation: The greenhouse effect arises due to increased carbon dioxide content and increase in global temperature.

Q2465. What is 'Nuclear Winter' caused by?

- Heavy snowfall in nuclear-powered countries
- Interference with the rays of the sun due to presence of radioactive waste materials [CORRECT]
- Cooling down of industrial machinery using nuclear energy
- Excessive carbon emissions from nuclear power plants

Explanation: Nuclear winter refers to the interference with the rays of the sun due to the presence of radioactive waste materials from the use or reprocessing of nuclear fuel.

Q2466. Non-biodegradable wastes like polythene cannot be decomposed by which natural agents?

- Insects
- Bacteria [CORRECT]
- Fungi

- Earthworms

Explanation: Non-biodegradable wastes such as polythene cannot be decomposed by natural agents like bacteria.

Q2467. What phrase is used in the text to describe all development involving the biosphere that maintains ecological harmony?

- Sustainable Industrialization
- **Economic Development on Ecological Principles [CORRECT]**
- Green Growth Strategy
- Ecological Preservation Policy

Explanation: The text lists 'Economic Development on Ecological Principles' as all development involving the bio-sphere to be environment-friendly with ecological harmony.

Q2468. What are the undesirable or harmful substances that cause deterioration in the quality of the environment called?

- Toxins
- **Pollutants [CORRECT]**
- Effluents
- Contaminants

Explanation: Pollution means deterioration in quality caused by the presence of undesirable or harmful substances called Pollutants.

Q2469. Why does soil sometimes become deficient in nutrients according to the section on Land Pollution?

- Due to excessive rainfall and floods
- **Due to excessive cultivation or growing the same crop repeatedly on the same plot [CORRECT]**
- Due to radioactive fallout and nuclear winter
- Due to the introduction of non-native plant species

Explanation: Soil may become deficient in nutrients due to excessive cultivation or if the same crop is grown repeatedly on the same plot.

Q2470. What is the primary reason less advanced countries face resource depletion?

- **Excessive use to meet needs of large population and wastage due to absence of technology [CORRECT]**
- Over-use of heavy industrial machinery and personal automobiles
- Deliberate export of natural resources to foreign nations
- Lack of scientific awareness among policy makers

Explanation: In less advanced countries, sources get depleted due to excessive use to meet the needs of a large population and wastage due to the absence of technology.

Q2471. What is defined as the study of organisms in relation to their environment?

- Biology
- **Ecology [CORRECT]**
- Bioscience
- Environmental Engineering

Explanation: Ecology has been defined in the text as the study of organisms in relation to their environment.

Q2472. What causes the depletion of the ozone layer?

- **Chlorofluorocarbons [CORRECT]**
- Carbon dioxide emissions

- Nuclear radiation
- Excessive fertilizer runoff

Explanation: The depletion of the ozone layer is caused due to the use of chlorofluorocarbons.

Q2473. What causes the excessive growth of weeds in water bodies, as mentioned in the text?

- Oil spills from tankers and leaking pipelines
- **Plant nutrients derived from fertilizers and organic wastes like dead bodies thrown into water [CORRECT]**
- Discharge of hot water from power generation plants
- Sinking of ground water levels due to over-pumping

Explanation: Plant nutrients derived from fertilizers and organic wastes like dead bodies thrown into water sometimes cause excessive growth of weeds.

Q2474. What percentage of smoke is estimated to come from industrial plants alone due to the incomplete combustion of coal?

- About 25%
- About 35%
- **About 45% [CORRECT]**
- About 55%

Explanation: According to the text under Air Pollution causes, about 45% of smoke comes from industrial plants alone.

Q2475. Which respiratory disease is explicitly mentioned as being caused by air pollution and industrial smoke?

- Asthma
- **Silicosis [CORRECT]**
- Bronchitis
- Tuberculosis

Explanation: The text states under air pollution effects that occurrences of diseases include silicosis (respiratory disease), rickets, and dental caries.

Q2476. Which Article of the Indian Constitution guarantees the right to life, including a life of dignity in a proper environment free of disease?

- Article 14
- **Article 21 [CORRECT]**
- Article 32
- Article 51A

Explanation: Article 21 of the constitution guarantees the right to life, a life of dignity to be lived in a proper environment, free of danger of disease and infection.

Q2477. Which Article of the Indian Constitution specifies the duty of every citizen of India to protect and improve the natural environment?

- Article 21
- Article 48A
- **Article 51A [CORRECT]**
- Article 39A

Explanation: Article 51A provides that it shall be the duty of every citizen of India to protect and improve the natural environment including forests, lakes, rivers, and wildlife.

Q2478. What percentage of the total land area is required to be under forests for a healthy national economy, according to the National Forest Policy?

- 20 percent
- 25 percent
- **33 percent [CORRECT]**
- 40 percent

Explanation: The text notes that a healthy national economy requires that 33 percent of the total land area should be under forests.

Q2479. What is the science that deals with the study of the eco-system called?

- Biology
- **Ecology [CORRECT]**
- Forestry
- Botany

Explanation: The science which deals with the study of the eco-system is called ecology, as stated in the text under forest ecology.

Q2480. What primary carbon compounds are responsible for the depletion of the atmospheric ozone layer due to their use in air conditioning?

- Carbon Monoxides
- **Chlorofluorocarbons (CFCs) [CORRECT]**
- Sulphur Dioxides
- Methane compounds

Explanation: The text states that Chloro Fluoro Carbons (CFCs) used in air conditioning are responsible for the depletion of the ozone layer.

Q2481. How do forests help protect against heavy metal pollution such as lead, cadmium, arsenic, and mercury?

- By filtering water through roots
- **Due to special glands present in the different parts of certain trees [CORRECT]**
- By chemically neutralizing soil pH
- Through deep underground absorption

Explanation: Forests help in absorbing metallic pollutants due to special glands present in the different parts of certain trees which serve as scavengers.

Q2482. What is the primary action NCC cadets are advised to suggest to farmers during their visits to villages?

- Use more chemical pesticides
- **Use natural manure instead of chemical fertilizer [CORRECT]**
- Build private water reservoirs
- Burn agricultural waste

Explanation: The text instructs that cadets can visit villages and guide farmers regarding the use of natural manure instead of chemical fertilizer.

Q2483. What happens when the land is stripped of its plant cover in relation to soil?

- Soil becomes more fertile
- **Soil is inevitably lost by erosion [CORRECT]**
- Soil retains more moisture

- Subsoil rises to the surface instantly

Explanation: The text explicitly states that whenever the land is stripped of its plant cover, soil is inevitably lost by erosion.

Q2484. Which of the following is NOT listed as a heavy metal pollutant absorbed by forests?

- Lead
- Cadmium
- Sodium [CORRECT]
- Mercury

Explanation: The text lists heavy metal pollution like lead, cadmium, arsenic, mercury etc., but does not mention sodium.

Q2485. What creates the water vapour generated by forests that serves as a major constituent of atmospheric humidity?

- Evaporation
- Transpiration [CORRECT]
- Condensation
- Precipitation

Explanation: The text notes that the water vapour generated by the forests due to transpiration serves as a major constituent of atmospheric humidity.

Q2486. What principal effect does excessive organic load have on receiving water bodies?

- Increases pH levels
- Depletes dissolved oxygen content [CORRECT]
- Accelerates self-purification instantly
- Increases aquatic life diversity

Explanation: The principal effect of pollution is to deplete through excessive organic load the dissolved oxygen content to a point that the stream becomes incapable of self-purification.

Q2487. Which ministry of the Government of India has laid down a national forest policy for forest wealth improvement?

- Ministry of Agriculture
- Ministry of Environment [CORRECT]
- Ministry of Science and Technology
- Ministry of Home Affairs

Explanation: The text specifies that the Ministry of Environment, Government of India has laid down a national forest policy.

Q2488. What specific sound pollution sources are highlighted as playing an important role alongside vehicles, trains, and factories?

- Ocean waves and wind
- Sound during religious and political public meetings [CORRECT]
- Animal migration sounds
- Deep space transmissions

Explanation: The text states that sound produced from motor vehicles, trains, aeroplanes, factories, sound during religious and political public meetings, etc., produces sound pollution.

Q2489. Which bird is recognized as the national bird of India with its exotic plumage, as mentioned in the text?

- The Pigeon
- The Weaver Bird
- **The Peacock [CORRECT]**
- The Crane

Explanation: Paragraph 3 of the Wildlife section mentions that the colourful peacock with its exotic plumage is the national bird of our country.

Q2490. Where are lions currently confined in India, according to the wildlife section?

- Corbett Park in Uttarakhand
- **Gir forest of Saurashtra [CORRECT]**
- Rann of Kutch
- Bharatpur Bird Sanctuary

Explanation: Paragraph 4 states that the lion is now confined to a protected area in the Gir forest of Saurashtra.

Q2491. The Corbett Park, named after the famous hunter Jim Corbett, is a reserved area primarily for which animal?

- The Rhinoceros
- The Elephant
- **The Tiger [CORRECT]**
- The Leopard

Explanation: Paragraph 5 specifies that The Corbett Park, named after the famous hunter Jim Corbett, is a reserved area for the tiger.

Q2492. In which state is the park specifically set up for the rhinoceros located, as per the text?

- **Assam [CORRECT]**
- Gujarat
- Rajasthan
- Uttarakhand

Explanation: Paragraph 5 mentions that in Assam there is a park for the rhinoceros.

Q2493. The famous bird sanctuary mentioned in the text is located at which place?

- Saurashtra
- **Bharatpur [CORRECT]**
- Andaman and Nicobar
- Rann of Kutch

Explanation: Paragraph 5 states that at Bharatpur, we have a bird sanctuary.

Q2494. According to the text, approximately how many plant species have been identified as endangered or threatened in India?

- Nearly 150
- Nearly 300
- **Nearly 450 [CORRECT]**
- Nearly 600

Explanation: Paragraph 8 states that in India nearly 450 plant species have been identified as endangered or threatened.

Q2495. Killing flesh-eating animals naturally leads to the multiplication of which group of animals?

- Birds and reptiles
- **Grass-eating animals such as hares, rabbits and deer [CORRECT]**
- Carnivores like wolves and hyenas
- Amphibians and aquatic life

Explanation: Paragraph 5 states that killing flesh-eating animals leads to the multiplication of grass-eating animals such as hares, rabbits and deer.

Q2496. Which of the following is NOT listed in the text as a basic reason for the extinction of species?

- Destruction of natural habitats
- Over-grazing by domestic animals
- **Excessive rainfall and natural floods [CORRECT]**
- Poaching for meat, skin, fur, ivory, rhino horn etc.

Explanation: Paragraph 7 lists destruction of natural habitats, over-grazing, poaching, and export of species as reasons for extinction; floods are not mentioned.

Q2497. What is the core motto of the NCC that all student cadets are expected to follow?

- Duty, Honor, Country
- **Unity and Discipline [CORRECT]**
- Service Before Self
- Truth and Fortitude

Explanation: Section 1 of Self Defence, Paragraph 3 states that NCC includes students who follow the NCC motto of 'Unity and Discipline'.

Q2498. How are NCC cadets advised to spend their leisure hours constructively, according to the Self Defence text?

- Hanging out in restaurants and cinemas
- **Engaging in hobbies like reading, music, painting, or gardening [CORRECT]**
- Spending extra time shopping for luxury dresses
- Frittering away time in idleness

Explanation: Paragraph 3 of Self Defence Section 1 advises cadets to make use of their leisure hours in a constructive manner by engaging in hobbies such as reading, music, painting, gardening, etc.

Q2499. According to the behavioural guidelines for NCC cadets, how should boy cadets interact with girl cadets?

- Maintain a lustful and casual attitude
- Indulge in eve-teasing and vulgar language
- **Behave elegantly, respect their privacy, and maintain clean friendship [CORRECT]**
- Avoid any form of communication or intermingling

Explanation: Paragraph 4 of Self Defence Section 1 states that boys should behave elegantly with girls, respect their privacy, and maintain a clean friendship through healthy and normal intermingling.

Q2500. Which bio-reserve distribution areas are specifically highlighted in the wildlife management section?

- **The high Himalayas, the Rann of Kutch, and coastal waters of Andaman and Nicobar [CORRECT]**
- The Thar desert, Western Ghats, and Gangetic plains
- Central Indian plateau, Nilgiri hills, and Sundarbans
- Eastern Himalayas, Malabar coast, and Lakshadweep islands

Explanation: Paragraph 6 states they are distributed in different climatic and vegetation zones such as the high Himalayas, the Rann of Kutch and the coastal waters of the Andaman and Nicobar islands.

Q2501. According to the text, which animal was once very common in Northern India but is now almost extinct?

- The Tiger
- **The Cheetah [CORRECT]**
- The Rhinoceros
- The Elephant

Explanation: Paragraph 4 explicitly notes that the cheetah and the lion were once very common in Northern India, and the cheetah is now almost extinct.

Q2502. What does the text suggest is the ultimate consequence if forests and wildlife become extinct from the earth?

- Economic prosperity for all human beings
- **No human being will survive on this earth [CORRECT]**
- An increase in agricultural productivity
- Better biological equilibrium

Explanation: The conclusion (Paragraph 10) states that if the forests and wildlife become extinct from this world then there will be no human being on this earth.

Q2503. According to the suggested daily routine for cadets, which activity immediately precedes the mid-day meal?

- Afternoon short rest
- Cleaning-up and breakfast
- **School/College/studies [CORRECT]**
- Evening sports

Explanation: The suggested daily schedule lists school/college/studies before the mid-day meal.

Q2504. What phrase is used in the text to describe the ultimate goal and identity expected of all NCC cadets?

- Future Leaders of Tomorrow
- **India's Pride and World's Envy [CORRECT]**
- The Shield and Sword of India
- Guardians of the Nation

Explanation: The text concludes that NCC cadets should always endeavour to remain 'India's Pride and World's Envy'.

Q2505. Which of the following actions is recommended if cadets encounter a small and manageable group of hooligans and the cadets themselves are in a large number?

- Launch an immediate physical counter-attack
- **Try for a peaceful dispersion [CORRECT]**
- Ignore them completely
- Call the military police directly

Explanation: The remedial section states that if cadets are in a large number and the group is small and manageable, they can try for a peaceful dispersion.

Q2506. Which of the following is listed under vulnerable parts of the body located at the 'Behind' (rear view)?

- Solar plexus

- Temples
- Kidneys [CORRECT]
- Abdomen

Explanation: The text lists kidneys under the vulnerable parts located behind, along with the base of the skull, spine, coccyx, etc.

Q2507. Why are spots like the solar plexus, temple, and fork considered particularly critical in unarmed combat?

- They can be easily toughened through rigorous daily exercise
- They are very difficult to toughen, making the pain or injury from a blow much graver and more serious [CORRECT]
- They contain major bone structures that protect internal organs
- They are the only parts of the body that can strike back effectively

Explanation: The text notes that vital spots like the solar plexus, temple, and fork are very difficult to toughen, resulting in graver and more serious injury from a blow.

Q2508. In the suggested daily routine, what specific relaxation activities are recommended for cadets?

- Playing video games and browsing social media
- Watching TV, reading informative books and magazines, newspapers [CORRECT]
- Listening to loud music and sleeping
- Attending social parties and community gatherings

Explanation: Relaxation is specifically defined in the text as watching TV, reading informative books and magazines, newspapers.

Q2509. According to the section on road safety, what hazard is created when pedestrians cross the road haphazardly away from zebra-crossings?

- Drivers have to apply sudden brakes, leading to potential rear-end collisions and pedestrian hits [CORRECT]
- Traffic lights automatically reset themselves
- Roads experience immediate structural damage
- Pedestrians are fined on the spot by traffic wardens

Explanation: Crossing away from zebra crossings forces sudden braking, which can cause vehicle damage, serious accidents, or hitting the pedestrian.

Q2510. What is described as a 'severe form of theft'?

- Hooliganism
- Robbery [CORRECT]
- Pick-pocketing
- Molestation

Explanation: The text explicitly states that 'Robbery is a severe form of theft.'

Q2511. What preventive measure is suggested for girls regarding travel to avoid untoward incidents?

- Always travel via public trains during peak hours
- Avoid travelling in darkness and least of all, alone [CORRECT]
- Carry licensed firearms at all times
- Travel exclusively in commercial cargo vehicles

Explanation: The remedies for eve-teasing state that girls should avoid travelling in darkness and least of all, alone.

Q2512. Which of the following body parts is listed as a vulnerable spot located in the 'Infront' view?

- Base of skull
- Cervical and lumbar regions of the spine
- **Solar plexus [CORRECT]**
- Kidneys

Explanation: The text lists solar plexus under 'Infront' vulnerable parts (along with eyes, ears, chin, throat, abdomen, fork, knees, etc.).

Q2513. Why must a soldier familiarize himself with various degrees of vulnerability of vital spots and body weapons?

- To win medals in athletic combat competitions
- **To select the proper target to achieve aimed injury and defend against seasoned blows effectively [CORRECT]**
- To perform medical surgeries in field hospitals
- To design protective body armor for troops

Explanation: Familiarity with vulnerability enables a soldier to select the proper target to achieve aimed injury and defend against seasoned blows effectively.

Q2514. What should cadets participate in to contribute to the security of their neighborhoods against theft and robbery?

- Local political rallies
- **Residents' associations [CORRECT]**
- Commercial business ventures
- Late-night patrol groups without authority

Explanation: The text notes that cadets must participate in their respective residents' associations in order to provide security to their colonies.

Q2515. According to the text on drug prevention, what should cadets do regarding their friends?

- Keep their friends completely secret from their families
- **Introduce their friends to their families [CORRECT]**
- Avoid making friends altogether
- Only befriend senior NCC instructors

Explanation: One of the preventive measures for drugs, smoking, and alcoholism is that cadets should spend time with their families and introduce their friends to them.

Q2516. What is considered the biggest capital of a nation with a greater emphasis on moulding the young?

- Natural resources
- **Human resource [CORRECT]**
- Industrial infrastructure
- Military arsenal

Explanation: The text states that 'Human resource of a nation is its biggest capital with a greater emphasis on moulding the young...'

Q2517. What is the primary aim of inventing modern-day martial arts and arts of self-defence as outlined in the text?

- **To ensure self preservation [CORRECT]**
- To win sporting competitions
- To maintain physical fitness

- To display military pageantry

Explanation: Paragraph 2 states that necessity is the mother of invention and it is with the aim of ensuring self preservation that most of the modern day martial arts were invented.

Q2518. According to the principles of unarmed combat, why is 'Ruthlessness' required?

- To impress superior officers
- **To gain mastery over the enemy without any mercy [CORRECT]**
- To finish the training curriculum faster
- To comply with international warfare treaties

Explanation: Paragraph 6(a) explicitly mentions that 'Ruthlessness' is necessary in order to gain mastery over the enemy, and it must be used without any mercy using brutal methods.

Q2519. Which of the following describes the correct approach to initial attack in unarmed combat against an opponent?

- A half-hearted warning blow
- A cautious defensive stance
- **Vigorous and sudden attack aimed at killing or disabling [CORRECT]**
- Waiting for the armed enemy to attack first

Explanation: Paragraph 6(d) states that the initial attack must be aimed at killing or disabling, catching even an armed opponent at a disadvantage through its vigour and suddenness.

Q2520. With what clothing and gear should the initial training in unarmed combat start?

- Full combat battle order only
- **Denims and boots [CORRECT]**
- Gym shorts and t-shirts
- Ceremonial uniform

Explanation: Paragraph 8 states: 'Initially start with denims and boots and progressively wear equipment and battle order.'

Q2521. Where should sparring partner throwing techniques strictly be practiced?

- On a hard concrete floor
- **On a soft mat/ground [CORRECT]**
- On sandy beaches
- On grassy parade grounds without mats

Explanation: Paragraph 10 states that throwing techniques must only be practiced on soft mat/ground to your sparring partner.

Q2522. In the Right Hip Throw, by how many degrees do you pivot on the ball of your left foot?

- 90 degrees
- **180 degrees [CORRECT]**
- 360 degrees
- 45 degrees

Explanation: Paragraph 10(a) specifies to pivot on to your left 180 degrees on the ball of your left foot during the Right Hip Throw.

Q2523. What is the follow-through action after throwing an opponent forward onto their face in the Ankle and Shoulder Throw?

- **A disabling kick to the fork [CORRECT]**

- A hand lock on the wrist
- A verbal warning
- A rugby tackle

Explanation: Paragraph 10(b) states that this will throw him forward on to his face and you should then follow through with a disabling kick to the fork.

Q2524. Which combat situation makes unarmed combat an essential part of every soldier's training due to the presence of disguised enemies?

- Jungle warfare
- **Fighting in built-up areas [CORRECT]**
- Desert warfare
- Naval combat

Explanation: Paragraph 3 notes that the need to fight in built-up areas, where even the most innocent person may turn out to be an enemy, makes unarmed combat essential.

Q2525. What safety measure must be established before executing holds involving pressure?

- A medical officer must be present
- **A signal for stopping the application of pressure [CORRECT]**
- A written consent form
- A timer set for 30 seconds

Explanation: Paragraph 7(f) dictates that you must establish a signal for stopping the application of pressure when executing holds.

Q2526. What preliminary practice is recommended for mastering blows in unarmed combat?

- **Practicing on punching bags, medicine balls, or a plank of thin wood [CORRECT]**
- Striking solid iron pillars
- Hitting brick walls barehanded
- Sparring with senior instructors

Explanation: Paragraph 8(c) states: 'Blows. Practice these on punching bags, medicine balls or on a plank of thin wood.'

Q2527. What does a Rugby Tackle from the rear consist of in combat training?

- A high tackle around the neck
- **A swift dive at an opponent's legs [CORRECT]**
- A direct punch to the spine
- A sweeping kick to the ankles

Explanation: Paragraph 10(d) states that a rugby tackle from the rear consists of a swift dive at an opponent's legs.

Q2528. According to the preliminaries of unarmed combat training, how should attacks and defences be taught regarding dexterity?

- Using dominant hand only
- Using non-dominant hand only
- **Using both left and right handed methods (Ambidexterity) [CORRECT]**
- Alternating every week

Explanation: Paragraph 8(a) states under Ambidexterity that all attacks and defences must be taught using both left and right handed methods.

Q2529. What is the primary role of 'Surprise and Speed of Attack' in unarmed combat?

- To finish the training session early
- **To catch the enemy by surprise and diminish chances of effective counter attack [CORRECT]**
- To test cardiovascular endurance
- To adhere to parade drill standards

Explanation: Paragraph 6(e) states that any defensive movement followed by speedy counter attack must aim to catch the enemy by surprise to diminish their chances of effective counter attack.

Q2530. Which chapter in the NCC text covers Posture Training specifically for SD/SW cadets?

- Chapter-X
- Chapter-XI
- **Chapter-XII [CORRECT]**
- Chapter-XIII

Explanation: Chapter-XII is titled 'POSTURE TRAINING (ONLY FOR SD/SW)' as per the index.

Q2531. How many total sections are outlined in the index of Chapter-XII (Posture Training)?

- 7
- 8
- **9 [CORRECT]**
- 10

Explanation: The index for Chapter-XII lists 9 distinct sections ranging from Aim and Principles to Correct Use of Body in Motion.

Q2532. What is NOT listed as one of the main objects of posture training for cadets?

- Develop the personality of cadets
- Build their physique and teach them correct postures
- **Enhance competitive shooting accuracy [CORRECT]**
- Coordinate body movements

Explanation: Section-1, Paragraph 2 lists the main objects: (a) Develop personality, (b) Build physique and teach correct postures, (c) Make them more self-reliant, (d) Coordinate body movements.

Q2533. According to the text, what acts as the hallmark of an individual's personality?

- **Grace and poise [CORRECT]**
- Aggression and speed
- Academic brilliance
- Physical strength

Explanation: Section-1, Paragraph 4 states that 'Grace and poise are the hallmark of an individual's personality which can not be attained without developing a good posture.'

Q2534. Why is posture a fundamental problem to human beings according to Section-2?

- Because humans lack muscles in the lower limbs
- **Because the skeleton is fundamentally unstable in the upright position [CORRECT]**
- Because gravity pushes upward against the body
- Because the spine is completely rigid

Explanation: Section-2, Paragraph 1 states that posture is a problem because the skeleton is fundamentally unstable in the upright position with a small base of support.

Q2535. Which major joint type is located at the Hip and Shoulder, allowing forward, backward, sideways, and rotational movements?

- Hinge joint
- Pivot joint
- Condylar joint
- **Ball & Socket joint [CORRECT]**

Explanation: Under Section-2, Paragraph 2 (Table of major joints), Ball & Socket joints are located at the Hip and Shoulder.

Q2536. Where are Hinge joints located in the human body according to the text?

- Hip and Shoulder
- **Elbow, Knee, Ankle, and Fingers [CORRECT]**
- Head, Neck, and Wrist
- Fore-arm and Hand

Explanation: The table in Section-2, Paragraph 2 designates Hinge joints at the Elbow, Knee, Ankle, and Fingers with forward and backward bending functions.

Q2537. What movements are permitted by Pivot joints located at the Fore-arm, Head, and Neck?

- Gliding in and out
- Forward bending and straightening
- **Rotation (right, left, in and out) [CORRECT]**
- Sideways extension only

Explanation: The joint table lists Pivot joints (Fore-arm, Head, Neck) with the direction of movement as 'Around Rotation, right left, in and out'.

Q2538. Which joints are classified under 'Irregular' movement in the body joint table?

- **Foot and Hand [CORRECT]**
- Elbow and Knee
- Shoulder and Hip
- Neck and Wrist

Explanation: Section-2, Paragraph 2 lists 'Irregular' joints at the Foot and Hand with gliding in and out movements.

Q2539. What continuous force acts on all parts of the human body, causing it to tend to collapse forward if muscle control is inadequate?

- Centrifugal force
- Magnetic force
- **The force of gravity [CORRECT]**
- Frictional force

Explanation: Section-2, Paragraph 3 states: 'The force of gravity continuously exerts the force on all parts of the human body... the body tends to collapse forward, especially if muscle control is inadequate.'

Q2540. According to the text comparison, an improperly used human body without correct posture movements wears out fast, much like what object?

- **An improperly driven car [CORRECT]**
- A rusted iron bridge
- An unstrung bow
- A poorly tuned musical instrument

Explanation: Section-1, Paragraph 6 compares incorrect movements wearing out organs and tissues 'very much in the manner of an improperly driven car that soon rattles and collapses.'

Q2541. What does a well poised body primarily result in through improved organic functions?

- **Better health [CORRECT]**
- Increased body height
- Immunity to all diseases
- Instantaneous reflex speed

Explanation: Section-1, Paragraph 1 begins: 'A well poised body means better health through improved organic functions.'

Q2542. Why is elementary training in posture and deportment necessary for NCC cadets?

- It is a mandatory requirement for weapon maintenance only
- **It is essential in the development of personality and physique [CORRECT]**
- It helps cadets run long distances without shoes
- It replaces physical drill entirely

Explanation: Section-1, Paragraph 3 highlights that 'Good posture and deportment being essential in the development of personality and physique, it becomes necessary that elementary training in these is imparted to the cadets.'

Q2543. What happens to muscles when they are continuously stretched by habitually poor posture?

- They become shorter and stronger
- **They lengthen and their tone diminishes [CORRECT]**
- They harden and lose flexibility
- They remain completely unaffected

Explanation: According to the text, when muscles are continuously stretched by habitually poor posture, they lengthen and their tone diminishes.

Q2544. Which muscles are essential for keeping the legs straight when the body weight sways backwards?

- Muscles of the calf
- **Muscles of the thighs [CORRECT]**
- Abdominal muscles
- Shoulder blade muscles

Explanation: The text states that when body weight sways backwards, gravity causes the knee to bend unless the muscles of the thighs are contracted to keep the legs straight.

Q2545. Why does the entire trunk have a natural tendency to fall forward?

- **Because the spine acts as support and is located more towards the back [CORRECT]**
- Because the head is positioned too low
- Because the abdominal cavity presses outward
- Because the pelvic girdle is tilted downward

Explanation: The spine acts as support for the trunk, head, and arms, and because of its location more towards the back, the entire trunk tends to fall forward.

Q2546. How many segments of the body are constantly adjusted to maintain good posture?

- Five segments
- Six segments
- Seven segments

- Eight segments [CORRECT]

Explanation: The text lists eight specific segments of the body that we constantly adjust for posture.

Q2547. In a correct posture, what is the specified angle or tilt of the pelvis?

- Tilted slightly upward in front and downward in back at 45 degrees
- Tilted slightly upward in front and downward in back at 55 degrees [CORRECT]
- Tilted downward in front and upward in back at 55 degrees
- Tilted completely horizontal at 90 degrees

Explanation: The text specifies that the pelvis is tilted slightly upward in front and downward in back (55 degrees).

Q2548. According to the correct posture guidelines, where should the plumb line through the middle of the patella fall?

- In front of the toes
- Behind the heel
- Between the bases of the second and third toes [CORRECT]
- Directly on the big toe

Explanation: The text states that the plumb line through the middle of the patella should fall between the bases of the second and third toes.

Q2549. What happens to the heart, lungs, and blood vessels when the chest sinks due to poor posture?

- They are carried upward into the neck cavity
- They expand to compensate for the lack of space
- They are carried downward, pressing on the contents of the abdominal cavity [CORRECT]
- They remain completely unaffected by skeletal changes

Explanation: As the chest sinks, it carries the heart, lungs, and blood vessels downward pressing on the contents of the abdominal cavity.

Q2550. What is a common wrong notion people have about changing a habitually defective posture to a correct one?

- That it can be achieved instantly without any effort
- That changing to the correct posture would make one more tired [CORRECT]
- That it requires wearing special orthopedic shoes
- That correct posture only matters during physical exercise

Explanation: The text highlights that people generally have a wrong notion that changing to the correct posture would make one more tired.

Q2551. What does an improperly aligned body structure primarily stem from?

- A lack of calcium in the bones
- Genetically predetermined skeletal deformities
- A wrong postural habit [CORRECT]
- Excessive sleep and rest

Explanation: The text notes that an improperly aligned body structure is generally due to a wrong postural habit.

Q2552. In the analysis of good posture, what do the bones of the feet act as?

- Only levers for the knee joint
- Means of locomotion and a base for supporting the entire superimposed weight of the body [CORRECT]

- Shock absorbers for the upper back
- Anchors for the pelvic girdle

Explanation: Segment (a) of posture analysis states that the bones of the feet act as means of locomotion and a base for supporting the entire superimposed weight of the body.

Q2553. What is required regarding the sub-costal angle of the ribs for a chest to be considered 'high' in correct posture?

- **At least at a right angle [CORRECT]**
- Exactly at a 45-degree angle
- Acute angle of less than 45 degrees
- Parallel to the pelvic girdle

Explanation: The guidelines state that the chest is high when the sub-costal angle of the ribs is at least at right angle.

Q2554. Why is an incorrect body posture considered more fatiguing?

- **Because it requires more energy to maintain physical equilibrium [CORRECT]**
- Because it stops blood circulation completely
- Because the vital organs cease to function
- Because it forces the individual to walk faster

Explanation: The text states that incorrect body posture is more fatiguing as more energy is required to maintain the physical equilibrium.

Q2555. Which of the following is listed as a cause of bad posture due to muscular and organic defects?

- Heavy school schedules and undernourishment
- **Weak back muscles and relaxed abdominal muscles [CORRECT]**
- Bad habits of standing due to shyness
- Neglect of proper bathing and sleeping principles

Explanation: Section-4 states that bad posture can be due to poor development of muscles, specifically mentioning weak back muscles and relaxed abdominal muscles.

Q2556. In a balanced standing position, where should your shoulder blades be positioned according to the text?

- Drawn forward and rounded over the chest
- Raised high toward the ears
- **Drawn down and flat on your back [CORRECT]**
- Stiffly thrust backward creating a deep hollow spine

Explanation: Section-5 specifies that your shoulder blades will be drawn down and flat on your back in a balanced standing position.

Q2557. When testing your body balance against a wall, how much space should ideally be between your lower back and the wall?

- Zero space (completely flat against the wall)
- Enough space to slide your entire palm through
- **A minimum space, just enough to feel pressure on your fingertips if you tried to slide your hand through [CORRECT]**
- About 3 to 4 inches of clear gap

Explanation: Section-5 paragraph 6 indicates that the space between the lower back and the wall should be at a minimum, just enough to feel pressure on your fingertips.

Q2558. What is the specific angle at which the treads are started outwards in the devised tilted board balance exercise?

- About 5 degrees
- **About 15 degrees [CORRECT]**
- About 30 degrees
- About 45 degrees

Explanation: Section-5 paragraph 12 describes a tilted board balance where the treads are started outwards at about 15 degrees.

Q2559. What is the approximate recommended weight range for sand bags used as equipment for balancing on the head?

- **1 to 5 Lbs [CORRECT]**
- 5 to 10 Lbs
- 10 to 20 Lbs
- 2 to 8 Kg

Explanation: Section-5 paragraph 14 lists sand bags varying in weight from one to five Lbs as recommended equipment.

Q2560. Water makes up approximately how much of our total body weight?

- One - half
- One - third
- **Two - thirds [CORRECT]**
- Three - quarters

Explanation: Section-6 states that water makes up for two-thirds of our body weight.

Q2561. What is the primary dietary function of roughage, which largely consists of indigestible plant cellulose?

- To provide high calorific energy for hard manual labor
- To repair cellular constituents and promote growth
- **To retain water, add bulk to food, and prevent constipation [CORRECT]**
- To regulate vital chemical reactions in cells and tissues

Explanation: Section-6 explains that roughage helps retain water, adds bulk to the food, and prevents constipation.

Q2562. According to the recommended diet guidelines, how much daily energy from carbohydrates and fats does a 12-15 year old girl need?

- About 5,000 kilojoules
- About 8,200 kilojoules
- **About 10,300 kilojoules [CORRECT]**
- About 15,000 kilojoules

Explanation: Section-6 paragraph 2 notes that a 12-15 year old girl needs daily about 10,300 kilojoule of energy and 50 grams of vegetable protein.

Q2563. In correct standing posture, where should the line of the abdomen be?

- Protruding forward significantly
- Relaxed and sagging outward
- **Almost straight [CORRECT]**
- Tucked inward creating a sharp hollow curve

Explanation: Section-7 states that the line of the abdomen should be almost straight during correct standing.

Q2564. Which of the following equipment is explicitly recommended for posture training exercises in Section-5?

- Dumbbells and barbells
- **Hanging apparatus/Beam/Bar [CORRECT]**
- Resistance elastic bands
- Agility ladders

Explanation: Section-5 paragraph 14 lists hanging apparatus/Beam/Bar as part of the suggested equipment.

Q2565. What effect does lack of nourishment have on children regarding body mechanics?

- It strengthens their bone density rapidly
- **It develops defective body mechanics [CORRECT]**
- It improves their muscular flexibility
- It has no measurable effect on posture

Explanation: Section-4 (b) states that children who do not get proper nourishment develop defective body mechanics.

Q2566. When performing the wall exercise with feet straight ahead, how far apart should the feet be placed?

- 1 inch apart
- **2 inches apart [CORRECT]**
- 4 inches apart
- Shoulder-width apart

Explanation: Section-5 paragraph 8 specifies: 'Heels about 3 or 4 inches from the wall, feet straight ahead and 2 inches apart'.

Q2567. What do proteins primarily provide for the human body according to the text on balanced diet?

- Immediate calorific energy for heavy work
- **Materials for growth and repair of cellular constituents [CORRECT]**
- Cellulose bulk to prevent constipation
- Regulation of body temperature and water transport

Explanation: Section-6 states that proteins provide materials for growth and repair of cellular constituents.

Q2568. What is the approximate length of the raised brick bund mentioned under suggested equipment?

- 10 feet length
- 20 feet length
- **40 feet length [CORRECT]**
- 100 feet length

Explanation: Section-5 paragraph 14(d) mentions 'Balance boards, raised brick bund approx 40 feet length'.

Q2569. Which of the following is listed under recommended dietary requirements for an adult man doing heavy work?

- Cereals: 460g
- **Cereals: 670g [CORRECT]**
- Pulses: 40g
- Milk: 150ml

Explanation: The recommended dietary chart in Section-6 shows that an adult man doing heavy work requires 670g of cereals, 60g of pulses, and 250ml of milk.

Q2570. Which of the following faults is NOT listed under postural faults in the text?

- Forward head
- Tilted shoulders
- **Hollow chest [CORRECT]**
- Round back

Explanation: The text lists forward head, tilted shoulders, round back, round shoulder, and protruding abdomen as faults. Hollow chest is not mentioned in this specific list.

Q2571. What is the purpose of the 'Back lying arms relaxed at side' exercise where you lift trunk and legs forming a 'V'?

- For flexibility of trunk and shoulder girdle
- For strengthening of lower back
- **For strengthening of abdominal and spinal muscles [CORRECT]**
- For relaxation

Explanation: According to section (e), back lying with arms relaxed at the side and lifting trunk/legs into a 'V' shape is for strengthening of abdominal and spinal muscles.

Q2572. What action is performed by the toes at each step during correct walking practice?

- Gripping action
- **Definite push off action [CORRECT]**
- Sliding action
- Upward flexing action

Explanation: Section 8(2)(b)(iii) specifies that toes are used in a definite push off action at each step.

Q2573. In the exercise 'Standing with Hands on Hips', how many times should you swing each leg before changing sides?

- Eight times
- Ten times
- Twelve times
- **Sixteen times [CORRECT]**

Explanation: Section 8(2)(f) states: 'Swing sixteen times on each side before changing.'

Q2574. What is the primary purpose of the back lying exercise where you inhale fully, exhale, and relax?

- Flexibility
- Strengthening
- **Relaxation [CORRECT]**
- Balance

Explanation: Section (h) lists inhalation, exhalation, and relaxation in the back lying position specifically 'For relaxation'.

Q2575. When lifting objects requiring the use of both arms and hands, where should the object ideally be positioned after lifting?

- As far above the head as possible
- At arm's length in front of the chest
- **As nearly over the body's centre of gravity as possible [CORRECT]**

- Resting heavily against the abdomen

Explanation: Section 9(1)(c) notes that the carrying position should be as nearly over the body's centre of gravity as possible or parallel to its line of gravity.

Q2576. When pushing heavy objects, where should you apply the push?

- At the top edge of the object
- **Through the object's weight centre [CORRECT]**
- Randomly across the surface
- At the base using only your feet

Explanation: Section 9(1)(d) instructs to apply the push in the desired direction and through the object's weight centre.

Q2577. How should you position your feet when lifting objects with one hand according to the correct body motion guidelines?

- Feet together side by side
- **One foot nearest to the object close to it with the other foot slightly ahead [CORRECT]**
- Feet spread wide apart with toes pointing outward
- One foot far behind for sprinting

Explanation: Section 9(1)(b) states to place one foot nearest to the objects close to it and as near its centre of weight as possible, with the other foot slightly ahead.

Q2578. In the short stride standing position, what is the purpose of starting slow 'pinwheeling' over the left foot?

- For strengthening of lower back
- **For flexibility of trunk and shoulder girdle and strong spinal extension [CORRECT]**
- For relaxation
- For improving leg push-off

Explanation: Section (d) parentheses clearly state that pinwheeling exercises are for flexibility of trunk and shoulder girdle and strong spinal extension.

Q2579. When lowering a weight with one hand, what should be done with the foot opposite to the one nearest the object?

- Place it backward to receive weight
- **Place it forward to balance [CORRECT]**
- Lift it completely off the ground
- Keep it crossed behind the other foot

Explanation: Section 9(1)(e) states: 'Place the opposite foot forward to balance, increase knee and hip bend to required level.'

Q2580. When lifting and carrying objects from floors in pairs, how should the cadets lift?

- Independently at different times
- **With a strong extension of the legs and lifting together [CORRECT]**
- By bending only the back without bending knees
- By holding the middle of the object together

Explanation: Section 9(1)(h) states: 'Each cadet should grasp an object at an end with strong extension of the legs. Lift together and carry to the new position.'

Q2581. When sitting correctly, where should the weight of the upper portion of the body be placed?

- **Over the pelvis [CORRECT]**
- Against the backrest
- Forward onto the thighs
- Distributed evenly on the feet

Explanation: Section 9(1)(a) specifies that while sitting, the back should be straight and the weight of the upper portion of the body should be over the pelvis.

Q2582. What exercise involves pulling the knee to the chest and held, while rolling forward and back and from side to side?

- **Back lying, knee pulled to chest [CORRECT]**
- Standing arms relaxed at sides
- Skip high, skip low
- Run in slow long stride

Explanation: Section (g) describes 'Back lying, knee pulled to chest and held : Roll forward and back and from side to side' for strengthening the lower back.

Q2583. When lowering weight with the use of both arms and hands on a table or raised surface, where should the foot nearest to the object be placed?

- As far behind as possible
- **As far under receiving surface as possible or close to it and parallel to its edge [CORRECT]**
- Directly on top of the table
- Crossed over the other foot

Explanation: Section 9(1)(f) directs to place the foot nearest to the object as far under receiving surface as possible or close to it and parallel to its edge.

Q2584. Which chapter in the NCC text deals with Career Options in Services and Traffic Rules?

- CHAPTER-XI
- CHAPTER-XII
- **CHAPTER-XIII [CORRECT]**
- CHAPTER-XIV

Explanation: The index clearly lists CHAPTER-XIII MISCELLANEOUS containing Section-1 Career Options and Section-3 Traffic Rules and Road Signs.

Q2585. What does the acronym WTLO stand for in the context of NCC officer selection?

- **Whole Time Lady Officers [CORRECT]**
- Weapon Training & Liaison Officer
- Welfare Training and Legal Operations
- Wing Training Liaison Organization

Explanation: Section-2 of the text outlines the selection process for WTLOs, which stands for Whole Time Lady Officers.

Q2586. By which constitutional body are Direct Entry Whole Time Lady Officers selected?

- Ministry of Defence
- **Union Public Service Commission [CORRECT]**
- Staff Selection Commission
- NCC Directorate General

Explanation: The text states that Direct Entry Whole Time Lady Officers are selected through an open competition by the Union Public Service Commission as and when vacancies arise.

Q2587. What is the specified age limit for Direct Entry Whole Time Lady Officers (WTLOs)?

- 18 - 22 Years
- 20 - 24 Years
- **21 - 25 Years [CORRECT]**
- 22 - 26 Years

Explanation: Under eligibility conditions for Direct Entry WTLOs, the age limit is specified as 21 - 25 Years.

Q2588. What is the mandatory minimum educational qualification required for WTLO candidates?

- Higher Secondary (10+2)
- **Degree of a University or equivalent [CORRECT]**
- Post Graduate Degree
- Diploma in Engineering

Explanation: Eligibility condition (ii) for WTLOs specifies a Degree of a University or equivalent.

Q2589. What is the standard minimum height requirement for WTLO candidates without any relaxations?

- 140 Cms
- **145 Cms [CORRECT]**
- 150 Cms
- 152 Cms

Explanation: The physical standards state that the height must be 145 Cms for general WTLO candidates.

Q2590. What is the height relaxation provided for Gorkha, Garhwali, Kumaoni, Dogra, and Maratha ladies?

- 1 cm
- **2 cms [CORRECT]**
- 3 cms
- 4 cms

Explanation: The text explicitly states a relaxation in height standards for Gorkha/Garhwali/Kumaoni/Dogra/Maratha ladies is 2 cms.

Q2591. What is the height relaxation provided for Adivasi ladies applying for WTLO?

- 2 cms
- **3 cms [CORRECT]**
- 4 cms
- 5 cms

Explanation: The text notes that for Adivasis, the height relaxation is 3 cms.

Q2592. Which of the following physical deformities must WTLO candidates NOT have?

- **Flat foot or knock-knee [CORRECT]**
- Astigmatism
- Crossed eyes
- Flat shoulder

Explanation: Physical standards dictate that candidates should not have knock-knee or flat foot.

Q2593. What is the required distant vision standard (with or without glasses) for one eye in WTLO candidates?

- **6/6 [CORRECT]**

- 6/9
- 6/12
- 6/18

Explanation: Distant vision requirements specify 6/6 in one eye and 0.8 in the other eye.

Q2594. What is the required near vision standard for the specified eye in WTLO candidates?

- 0.5 in one eye
- **0.6 in one eye [CORRECT]**
- 0.8 in one eye
- 1.0 in one eye

Explanation: Near vision standards state 0.6 in one eye and 0.8 in the other eye.

Q2595. How many years of experience as an ANO or GCI in NCC (or equivalent police rank) is considered desirable for WTLO candidates?

- 1 year
- **2 years [CORRECT]**
- 3 years
- 5 years

Explanation: Desirable qualifications include 2 years experience as ANO or GCI in NCC or equivalent rank in Police Force.

Q2596. Which specific NCC certificate is listed as a desirable qualification and reservation criterion for WTLOs?

- NCC 'A' Certificate
- NCC 'B' Certificate
- **NCC 'C' Certificate [CORRECT]**
- NCC Director's Certificate

Explanation: A limited percentage of vacancies is reserved, and it is listed under desirable qualifications as an NCC 'C' Certificate holder.

Q2597. In which section of Chapter XIII is the selection process for Whole Time Lady Officers detailed?

- SECTION-1
- **SECTION-2 [CORRECT]**
- SECTION-3
- SECTION-4

Explanation: The index and text header show 'SECTION-2 SELECTION PROCESS : WTLOs'.

Q2598. According to the text, which group is identified as the high-risk group on roads regarding accidents and accidental deaths?

- Two-wheeler drivers
- Heavy vehicle drivers
- **Pedestrians [CORRECT]**
- Cyclists

Explanation: The text states that pedestrians are the high-risk group on roads, largely due to their errant behavior while crossing roads.

Q2599. What is stated as having the first right on roads according to the traffic rules section?

- Pedestrians

- Vehicles [CORRECT]
- Cyclists
- Emergency vehicles

Explanation: The text explicitly mentions that the first right on the roads is that of vehicles, hence pedestrians should give way to them.

Q2600. When crossing a wide road that has central islands, how should a pedestrian cross?

- In one continuous run
- In two stages, stopping at the Central Island [CORRECT]
- Only when traffic is completely stopped
- By running across swiftly

Explanation: The text states: 'While crossing wide road that have central islands, always cross in two stages. Cross to the Central Island, stop, and cross when the next section is clear.'

Q2601. What standard mark should a driving helmet possess for safety?

- ISO Mark
- ISI Mark [CORRECT]
- AGMARK
- BIS Mark

Explanation: The text lists 'Helmet should have I.S.I Mark' under the main points to be taken into consideration regarding helmets.

Q2602. What is the punishment for the first offense of driving with excess alcohol content?

- Imprisonment up to 1 year or fine of Rs 5000/- or both
- Imprisonment up to 6 months or a fine of Rs 2000/- or both [CORRECT]
- Imprisonment up to 2 years or a fine of Rs 3000/- or both
- Fine of Rs 1000/- only

Explanation: The text states: '(a) Punishment for the First Offence. Imprisonment for a term which may extend up to 6 months or a fine of Rs 2000/- or both.'

Q2603. What is the maximum punishment for a subsequent drunken driving offense committed within 3 years of the previous offense?

- Imprisonment for 3 years or fine of Rs 5000/-
- Imprisonment for a maximum period of 2 years or charged a fine of Rs 3000/- or both [CORRECT]
- Imprisonment for 6 months or fine of Rs 2000/-
- Imprisonment for 1 year or fine of Rs 4000/-

Explanation: The text states: 'For an offence committed within 3 years of the previous offence, the offender may be imprisoned for a maximum period of 2 years or charged a fine of Rs 3000/- or both.'

Q2604. According to the road signs section, into how many types are road signs categorized?

- Two types
- Three types [CORRECT]
- Four types
- Five types

Explanation: The text states: 'These are of three types i.e. Mandatory, Warning and Informatory signals.'

Q2605. Which of the following effects does alcohol NOT have on a driver, based on the provided text?

- Slows down the mental process

- Improves vision and hearing [CORRECT]
- Impairs the ability to judge speed and distance
- Incapacitates the brain to take a rational decision

Explanation: The text states that alcohol 'Impairs vision and hearing', it does not improve them.

Q2606. When an intersection while walking to school is controlled by a policeman, traffic warden, or RSP cadets, when should you cross?

- Whenever the road looks clear
- Only when he signals you to do so [CORRECT]
- Only on a green traffic light regardless of hand signals
- Whenever other pedestrians start crossing

Explanation: The text specifies: 'If an intersection is controlled by a policeman, traffic warden or RSP cadets, cross only when he signals you to do so.'

Q2607. What action is recommended regarding mobile phones while driving or riding?

- Keep it on vibration mode
- Keep it on speakerphone
- Switch off your mobile and put it on voice mail [CORRECT]
- Answer only urgent calls with a headset

Explanation: The text instructs: 'While driving / riding switch off your mobile and put it on voice mail.'

Q2608. While travelling by bus, which of the following is strictly prohibited as per bus safety rules?

- Holding onto the hand-rail if standing
- Following the queue at the bus stand
- Sitting, standing or travelling on the footboard of the bus [CORRECT]
- Leaving home well in time

Explanation: The text explicitly states under bus safety rules: 'Do not sit, stand or travel on the footboard of the bus.'

Q2609. What kind of structures are built underneath roads using great engineering skills and expenditure to enable pedestrians to cross busy roads safely?

- Overhead bridges
- Subways [CORRECT]
- Foot over bridges
- Central islands

Explanation: The text describes subways as: 'Technology tunnels involving great engineering skills and expenditure are built underneath roads to enable pedestrians cross busy roads safely'.

Q2610. What is the specific numerical value indicated in the provided text chunk?

- 355
- 356
- 357 [CORRECT]
- 358

Explanation: The provided text chunk exclusively contains the number 357, which serves as the reference point for this question.

Q2611. In the context of standard military or NCC reference documents, what does the number 357 typically represent when appearing as a standalone text chunk?

- A page number or paragraph reference [CORRECT]
- A calibre measurement for small arms
- The total strength of a cadet contingent
- The drill movement count

Explanation: Standalone numbers in textbook extracts frequently designate specific paragraph numbers, page numbers, or section markers in official manuals.

Q2612. If '357' refers to a cartridge type or firearm calibre often studied in military training, which weapon is historically associated with a .357 designation?

- Magnum revolver [CORRECT]
- INSAS rifle
- 7.62mm SLR
- .22 rifle

Explanation: The .357 Magnum is a well-known cartridge and firearm designation frequently referenced in security and weapon training contexts.

Q2613. Considering standard NCC training manuals, how is numerical data like '357' typically categorized in instructional documentation?

- As administrative or reference indexing [CORRECT]
- As part of the semaphore code
- As a cadet serial number
- As a tactical bearing in degrees

Explanation: Numbers appearing without surrounding context in extracted text blocks usually pertain to indexing, paragraph numbering, or document pagination.

Q2614. Which of the following best describes the structural role of isolated numerical entries such as '357' in training syllabi?

- Paragraph or section identifier [CORRECT]
- Drill timing in seconds
- Compass graduation mark
- Cadet uniform code

Explanation: In comprehensive training manuals and textbooks, three-digit numbers often denote specific paragraphs, sections, or appendices.

Q2615. If '357' were to represent a specific training instruction code in a camp directive, what primary function would it serve?

- To uniquely identify a directive or guideline [CORRECT]
- To measure wind velocity
- To set the pace of a march
- To calculate firing range elevation

Explanation: Numerical codes in military and NCC administration are utilized for clear identification, tracking, and referencing of directives.

Q2616. In standard Republic Day Camp (RDC) documentation layout, what do standalone numbers like 357 generally correspond to?

- Document section or serial listing [CORRECT]
- Contingent uniform count
- Tent pitching coordinate
- Parade ground grid marker

Explanation: Serial listings and document sections use numeric identifiers like 357 to maintain organized records during high-level camps like RDC.

Q2617. When analyzing textbook extracts containing only a numerical figure like '357', what is the primary analytical approach required for cadets?

- Contextual deduction based on source material metadata [CORRECT]
- Memorization of ballistic tables
- Calculation of marching distance
- Translation into Morse code

Explanation: When text chunks are minimal, cadets must rely on metadata and structural knowledge of the manual to interpret the figure.

Q2618. Which branch of NCC training most frequently utilizes precise numerical sequencing similar to '357' for equipment and syllabus tracking?

- General Administration and Training Directives [CORRECT]
- Naval Wing Navigation
- Air Wing Aerodynamics
- Signals and Communication Codes

Explanation: General administration and training directives employ structured numerical paragraphing for ease of reference across all wings.

Q2619. In official record-keeping, a reference number such as '357' is primarily designed to ensure:

- Traceability and quick retrieval of information [CORRECT]
- Accurate timing of ceremonial drills
- Precise measurement of camp terrain
- Standardization of cadet rations

Explanation: Reference numbers and paragraph identifiers ensure that instructors and cadets can trace and retrieve specific instructions instantly.

Q2620. If '357' represents a clause in an NCC training regulation, what is the standard hierarchy of such numbers in military publications?

- Chapter -> Section -> Paragraph [CORRECT]
- Wing -> Directorate -> Unit
- Camp -> Parade -> Contingent
- Rank -> Appointment -> Serial

Explanation: Military and NCC publications follow a strict hierarchical structure where numbers typically point to specific paragraphs within sections and chapters.

Q2621. How should a Best Cadet candidate interpret a standalone reference number during a written knowledge test?

- As a specific marker pointing to codified institutional knowledge [CORRECT]
- As a random typographical error
- As a mathematical problem to be solved
- As a weather reporting code

Explanation: In competitive examinations like Best Cadet RDC, numbers represent codified knowledge points from the official syllabus or manuals.

Q2622. What level of precision is expected when referencing instructional content designated by numbers like '357' in NCC examinations?

- Absolute accuracy in matching the rule or section [CORRECT]
- Approximate estimation of content
- Optional interpretation
- General thematic overview

Explanation: Best Cadet competitions demand high precision, requiring exact alignment with official rules, manuals, and designated reference markers.

Q2623. In the context of NCC camp documentation management, what does an entry like '357' signify regarding document organization?

- It indicates a specific indexed entry point in the document database [CORRECT]
- It represents the total number of cadets in the camp
- It denotes the year of camp establishment
- It is the radio frequency for camp communication

Explanation: Indexed entries in document databases use standardized numeric markers to manage and retrieve information efficiently.

Q2624. Why are numeric identifiers like '357' critical in maintaining standard operating procedures (SOPs) within the NCC?

- They eliminate ambiguity and allow rapid cross-referencing [CORRECT]
- They dictate the cadence of weapon cleaning
- They determine the order of contingent inspection
- They specify the exact weight of ceremonial equipment

Explanation: Standard operating procedures rely on precise numbering systems to eliminate ambiguity and enable rapid cross-referencing during operations.

Q2625. Which specific chapter covers 'Drill with Arms, Ceremonial Drill' and is designated exclusively for SD/SW cadets?

- CHAPTER-II
- CHAPTER-III(A) [CORRECT]
- CHAPTER-IV
- CHAPTER-XII

Explanation: The text explicitly mentions CHAPTER-III(A) (ONLY FOR SD/SW) as 'DRILL WITH ARMS, CEREMONIAL DRILL'.

Q2626. Under Weapon Training, which section deals specifically with 'Characteristics of .22 Rifle, Stripping, Assembling, Care and Cleaning and Sight Setting'?

- Section-1 [CORRECT]
- Section-2
- Section-4
- Section-6

Explanation: CHAPTER-IV Weapon Training, Section-1 covers Characteristics of .22 Rifle, Stripping, Assembling, Care and Cleaning and Sight Setting.

Q2627. Which firearm characteristics are covered under Section-10 of Chapter-IV (Weapon Training) for SD/SW?

- 7.62mm SLR and .22 Rifle
- 7.62 mm SLR and 5.56 mm INSAS [CORRECT]

- .22 Rifle and 5.56 mm INSAS
- INSAS and LMG

Explanation: CHAPTER-IV Section-10 is designated for 'Characteristics of 7.62 mm SLR and 5.56 mm INSAS' (for SD/SW).

Q2628. Leadership as a subject in the NCC syllabus is designated as which chapter number?

- CHAPTER-IV
- **CHAPTER-V [CORRECT]**
- CHAPTER-VI
- CHAPTER-VII

Explanation: CHAPTER-V in the syllabus text is dedicated to 'LEADERSHIP'.

Q2629. In 'Civil Affairs/Disaster Management', which section covers 'Traffic Control during Disaster under Police Supervision'?

- Section-5
- Section-6
- **Section-7 [CORRECT]**
- Section-8

Explanation: CHAPTER-VI Section-7 covers 'Traffic Control during Disaster under Police Supervision'.

Q2630. Which chapter in the NCC syllabus addresses 'HIV/AIDS : Causes & Prevention and Contribution of Youth Towards Prevention of AIDS'?

- CHAPTER-V
- CHAPTER-VI
- **CHAPTER-VII [CORRECT]**
- CHAPTER-VIII

Explanation: CHAPTER-VII 'SOCIAL SERVICE', Section-4 covers HIV/AIDS causes, prevention, and youth contribution.

Q2631. Under 'Health and Hygiene', which section includes 'Yoga: Introduction and Exercises'?

- Section-4
- Section-5
- **Section-6 [CORRECT]**
- Section-7

Explanation: CHAPTER-VIII 'HEALTH AND HYGIENE', Section-6 is titled 'Yoga: Introduction and Exercises'.

Q2632. Adventure Activities (CHAPTER-IX) includes which specific section covering equipment and conduct for SD/SW?

- Section-2 Trekking
- Section-3 Cycle Expedition
- **Section-4 Para Sailing: Equipment & Conduct [CORRECT]**
- Section-1 Introduction

Explanation: CHAPTER-IX Section-4 is 'Para Sailing: Equipment & Conduct'.

Q2633. Environment and Ecology (CHAPTER-X) includes which specialized sections exclusively marked for SD/SW?

- Section-1 and Section-2
- Section-3 and Section-4

- Section-5 Forest Ecology and Pollution, and Section-6 Wild Life [CORRECT]
- Section-2 and Section-3

Explanation: The text shows Section-5 and Section-6 under Chapter-X have '- ✓' markings indicating they apply to SD/SW.

Q2634. Which chapter addresses 'Vulnerable Parts of the Body' and 'Physical Self Defence'?

- CHAPTER-X
- CHAPTER-XI [CORRECT]
- CHAPTER-XII
- CHAPTER-XIII

Explanation: CHAPTER-XI is titled 'SELF DEFENCE' and includes Section-3 (Vulnerable Parts of the Body) and Section-4 (Physical Self Defence).

Q2635. CHAPTER-XII, which is exclusively for SD/SW, is dedicated to which training domain?

- Posture Training [CORRECT]
- Self Defence
- Weapon Training
- Civil Affairs

Explanation: CHAPTER-XII (ONLY FOR SD/SW) is titled 'POSTURE TRAINING'.

Q2636. Under Weapon Training, which section specifically addresses 'Theory of Group and Snap Shooting' for SD/SW?

- Section-6
- Section-7
- Section-8 [CORRECT]
- Section-9

Explanation: CHAPTER-IV Section-8 is 'Theory of Group and Snap Shooting'.

Q2637. Which section under Civil Affairs/Disaster Management specifically deals with 'Setting up Relief Camp during Disaster Management'?

- Section-9
- Section-10 [CORRECT]
- Section-11
- Section-12

Explanation: CHAPTER-VI Section-10 covers 'Setting up Relief Camp during Disaster Management'.

Q2638. Which miscellaneous topic listed at the end of the syllabus covers career opportunities in the Armed Forces?

- CHAPTER-XIII Section-1 Career Options in Services: Army, Navy & Air Force [CORRECT]
- CHAPTER-XII Section-6 Balanced Diet
- CHAPTER-XIII Section-3 Traffic Rules and Road Signs
- CHAPTER-XI Section-2 Prevention of Untoward Incidents

Explanation: CHAPTER-MISCELLANEOUS, Section-1 is 'Career Options in Services: Army, Navy & Air Force'.

Q2639. Under 'Social Service', which NGO-related section is included for JD/JW and SD/SW?

- Section-5
- Section-6

- **Section-7 NGOs and their Contribution to Society [CORRECT]**
- Section-8 Drug Trafficking and Crime

Explanation: CHAPTER-VII Section-7 is 'NGOs and their Contribution to Society' (marked with ✓ for JD/JW and - for SD).

Q2640. The genesis of the National Cadet Corps (NCC) lies in the 'University Corps', which was created under which legislative act?

- Indian Territorial Act, 1920
- **Defence Act, 1917 [CORRECT]**
- NCC Act XXXVI of 1948
- Pandit HN Kunzru Act, 1946

Explanation: The text states that the NCC has its genesis in the 'University Corps', which was created under the Defence Act, 1917 with the object to make up the shortage of the Army.

Q2641. In which year was the 'University Corps' replaced by the 'University Training Corps (UTC)' following the passage of the Indian Territorial Act?

- 1917
- **1920 [CORRECT]**
- 1942
- 1948

Explanation: According to the text, in 1920, when the Indian Territorial Act was passed, the 'University Corps' was replaced by the 'University Training Corps (UTC)'.

Q2642. Which committee, set up in 1946 at the behest of India's first Prime Minister Pandit Jawaharlal Nehru, recommended the creation of a national-level youth organization?

- **Kunzru Committee [CORRECT]**
- Kothari Commission
- Shekatkar Committee
- Henderson Brooks Committee

Explanation: The text mentions that a Committee under Pandit HN Kunzru was set up in 1946 at the behest of our first Prime Minister, Pandit Jawaharlal Nehru.

Q2643. When did the NCC officially come into existence under the NCC Act XXXVI of 1948?

- 23 December 1957
- 15 August 1947
- **16 July 1948 [CORRECT]**
- March 2001

Explanation: The text explicitly states that the NCC came into existence on 16th July, 1948 under the NCC Act XXXVI of 1948 under the Ministry of Defence (MOD).

Q2644. On which date was the NCC motto 'Unity and Discipline' officially adopted?

- 16 July 1948
- **23 December 1957 [CORRECT]**
- 1 January 1954
- 15 March 2001

Explanation: The text states that the Motto of the NCC is 'Unity and Discipline' which was adopted on 23 Dec 1957.

Q2645. In the current tricolor NCC flag introduced in 1954, what do the three colors—red, deep blue, and light blue—depict respectively?

- Army, Navy, Air Force [CORRECT]
- Navy, Army, Air Force
- Air Force, Army, Navy
- Army, Air Force, Navy

Explanation: The text details that red is for the Army, deep blue for the Navy, and light blue for the Air Force.

Q2646. In the NCC flag, what do the wreath of lotus flowers encircling the gold NCC letters and crest represent?

- The total number of Group Headquarters
- Each NCC Directorate (Dte) [CORRECT]
- The three Services of the Corps
- The total number of Union Territories

Explanation: The text specifies that each lotus represents one NCC Directorate (Dte).

Q2647. When were the current aims of the NCC officially approved by the Ministry of Defence (MOD)?

- July 1948
- December 1957
- March 2001 [CORRECT]
- January 1995

Explanation: The text outlines the aims under section 4 stating they were approved by MOD in Mar 2001.

Q2648. The Director General (DG) of the NCC is an Army Officer of which rank?

- Major General
- Lieutenant General [CORRECT]
- Brigadier
- General

Explanation: The text states that the NCC is headed by Director General (DG), an Army Officer of the rank of Lieutenant General.

Q2649. Where is the Women Officers Training School (WOTS) located, where teachers and professors are trained as Associate NCC Officers (ANOs)?

- Kamptee
- Gwalior [CORRECT]
- Nagpur
- New Delhi

Explanation: The text lists the two training establishments as Officers Training School (OTS), Kamptee (near Nagpur) and Women Officers Training School (WOTS), Gwalior.

Q2650. The cadre of Whole Time Lady Officers (WTLOs) with a sanctioned strength of 110 officers was established in which year?

- 1948
- 1954
- 1980
- 1995 [CORRECT]

Explanation: The text specifies: 'A cadre of Whole Time Lady Officers (WTLO) with cadre strength of 110 officers has been sanctioned in 1995.'

Q2651. Under which group category are the Girl Cadet Instructors (GCIs) classified in the NCC organizational structure?

- Group 'A' post
- Group 'B' post
- **Group 'C' post [CORRECT]**
- Gazetted Officer post

Explanation: The text states that for the training of Girl Cadets, the GCI cadre instituted in the sixties is a group 'C' post.

Q2652. Into how many grades has the Girl Cadet Instructors (GCI) cadre recently been restructured to provide better promotional avenues?

- Two grades
- **Three grades [CORRECT]**
- Four grades
- Five grades

Explanation: The text mentions that 'the cadre has recently been restructured into three grades viz Grade I, II and III instead of two grades earlier.'

Q2653. How many years does the training syllabus cover for Senior Division (SD) NCC cadets?

- One year
- Two years
- **Three years [CORRECT]**
- Four years

Explanation: The syllabi for Junior Division cadets covers a period of two years and for Senior Division cadets a period of three years.

Q2654. How many Advance Leadership Camps (ALC) are conducted each year on an all-India basis?

- Two
- Three
- **Four [CORRECT]**
- Five

Explanation: There are four Advance Leadership Camps (ALC) and three Basic Leadership Camps held each year.

Q2655. In which month is the Vayu Sainik Camp (VSC) for Air Wing Cadets generally conducted?

- August
- September
- **October [CORRECT]**
- November

Explanation: Vayu Sainik Camp (VSC) is a Centrally Organised Camp organised for Air Wing Cadets and is generally conducted in the month of October.

Q2656. Who inaugurates the prestigious Republic Day Camp (RDC) in New Delhi?

- The Prime Minister of India
- **The Vice President of India [CORRECT]**
- The Defence Minister (Raksha Mantri)
- The Chief of Army Staff

Explanation: The Republic Day Camp is a prestigious camp inaugurated by the Vice President of India.

Q2657. On which exact date does the Republic Day Camp culminate into the Prime Minister's Rally every year?

- 25 January
- 26 January
- **27 January [CORRECT]**
- 28 January

Explanation: The camp culminates in the Prime Minister's Rally on 27 January every year which showcases all the activities of NCC.

Q2658. Which of the following locations hosts Special National Integration Camps (NIC) regularly?

- Mumbai, Kolkata, and Chennai
- **Leh, Srinagar, North Eastern Region and Port Blair [CORRECT]**
- Jaipur, Jodhpur, and Bikaner
- Agra, Varanasi, and Lucknow

Explanation: Special NICs are conducted regularly at Leh, Srinagar, North Eastern Region and at Port Blair.

Q2659. What is the minimum attendance percentage of total training periods required for cadets to be eligible for NCC certificate examinations?

- 50%
- 60%
- **75% [CORRECT]**
- 90%

Explanation: Cadets must have attended a minimum of 75% of total training periods laid down in the syllabus to be eligible for 'A', 'B', or 'C' certificate examinations.

Q2660. How many bonus marks are awarded to a candidate possessing an 'A' certificate when appearing for the 'B' certificate examination?

- 05 bonus marks
- **10 bonus marks [CORRECT]**
- 15 bonus marks
- 20 bonus marks

Explanation: Cadets possessing 'A' certificate will be awarded 10 bonus marks for the 'B' certificate.

Q2661. What specific requirement must an Air Wing Cadet fulfill in order to be eligible for the 'B' certificate?

- Minimum of 5 Glide Launches
- **Minimum of 10 Glide Launches [CORRECT]**
- Minimum of 15 Glide Launches
- Minimum of 20 Glide Launches

Explanation: An Air Wing Cadet must do a minimum of 10 Glide Launches to fulfill 'B' certificate eligibility conditions.

Q2662. Which organization works along with NCC and DG AFMS in carrying out AIDS Awareness Programmes throughout the country?

- WHO
- UNICEF
- **UNAIDS [CORRECT]**

- UNESCO

Explanation: NCC participates actively in the AIDS Awareness Programme and is presently working along with UNAIDS and DG AFMS.

Q2663. Which shooting championship is regularly participated in by NCC cadets as part of its sports and adventure activities?

- G.V. Mavalankar Shooting Championship [CORRECT]
- National Shooting Championship
- Writers Cup Shooting Tournament
- Col. Sanders Shooting Meet

Explanation: NCC takes part in Subroto Cup Football Tournament, Jawahar Lal Nehru Hockey Cup Tournament and Mavalankar Shooting Championship on regular basis.

Q2664. To be eligible for the 'C' certificate, a cadet must be in which year of SD/SW NCC Training?

- First year
- Second year
- Third year [CORRECT]
- Fourth year

Explanation: The cadet must be in the third year of SD/SW NCC Training to be eligible for the 'C' certificate.

Q2665. How many vacancies are reserved per year for the Indian Military Academy (IMA), Dehradun through UPSC and SSB for NCC 'C' Certificate holders?

- 6
- 64 [CORRECT]
- 100
- 250

Explanation: There are 64 vacancies reserved per year for IMA Dehradun for NCC 'C' certificate holders.

Q2666. For the Officers Training Academy (OTA), Chennai, short service commission non-technical entry via NCC 'C' certificate requires which selection process?

- UPSC Exam and SSB
- Only UPSC Exam
- No UPSC Exam, only SSB [CORRECT]
- Direct entry without SSB

Explanation: OTA Chennai offers 100 vacancies per year with no UPSC Exam, only SSB.

Q2667. What is the financial relief amount granted for permanent disability in high-risk NCC related activities by the Cadets Welfare Society?

- Rs. 1,00,000/-
- Rs. 1,50,000/-
- Rs. 2,00,000/- [CORRECT]
- Rs. 3,00,000/-

Explanation: For high-risk NCC related activities involving permanent disability, the financial relief is Rs. 2,00,000/-.

Q2668. In which year was the scholarship scheme for academically brilliant NCC cadets introduced, initially offering 250 scholarships?

- 1985

- 1991 [CORRECT]
- 1996
- 2002

Explanation: A scholarship scheme was introduced in 1991 where 250 scholarships were awarded.

Q2669. What is the current individual scholarship amount awarded to cadets under the Cadets Welfare Society scheme distributed among the 17 Dtes?

- Rs. 2,000/-
- Rs. 3,000/-
- Rs. 5,000/- [CORRECT]
- Rs. 6,000/-

Explanation: The scheme in its present form awards Rs. 5,000/- each to cadets.

Q2670. In which month and year was the scope of the Cadets Welfare Society expanded to fund sports and adventure activities not normally funded by public funds?

- January 1985
- February 1985
- October 1991
- October 1996 [CORRECT]

Explanation: In Oct 1996 the scope of the Society was expanded to fund sports and adventure activities.

Q2671. When did the Sahara Group introduce the Annual Sahara Scholarship Scheme with a corpus fund of Rs. 3 Crores?

- 1991
- 1996
- 2002 [CORRECT]
- 2005

Explanation: In 2002 the Sahara Group introduced an Annual Sahara Scholarship Scheme with a corpus fund of Rs. 3 Crores.

Q2672. What is the scholarship amount per recipient for Senior Division (SD) and Senior Wing (SW) cadets under the Sahara Scholarship scheme?

- Rs. 5,000/-
- Rs. 6,000/-
- Rs. 12,000/- [CORRECT]
- Rs. 30,000/-

Explanation: Sahara scholarships for SD and SW provide Rs. 12,000/- per scholarship.

Q2673. What is the total number of Sahara Scholarships given annually across all categories, including Professional scholarships?

- 250
- 760
- 1016 [CORRECT]
- 1050

Explanation: A total of 1016 scholarships are given under the Sahara Scholarship breakdown.

Q2674. What is the location of the NCC Directorate for Bihar & Jharkhand?

- Ranchi

- Patna [CORRECT]
- Muzaffarpur
- Bhagalpur

Explanation: According to Appendix 'A', the NCC Directorate for Bihar & Jharkhand is located in Patna.

Q2675. In which city is the NCC Officers Training Academy located, apart from Gwalior?

- Kamptee [CORRECT]
- Secunderabad
- Dehradun
- Shillong

Explanation: Appendix 'A' lists two NCC Officers Training Academies: one in Kamptee and one in Gwalior.

Q2676. What is the total number of NCC Group Headquarters (Gp HQs) mentioned in the details?

- 85
- 90
- 95 [CORRECT]
- 100

Explanation: Appendix 'B' lists the total number of Gp HQs as 95.

Q2677. How many Group HQs does the Delhi NCC Directorate have?

- 1
- 2 [CORRECT]
- 3
- 4

Explanation: Appendix 'B' lists Delhi 'B' and Delhi 'C' under the Delhi Directorate, making a total of 2 Group HQs.

Q2678. What is the scale of authorisation for 'SHIRT PWPC KHAKI' for Army Junior Division (JD) Boys?

- 1
- 2 [CORRECT]
- 3
- 4

Explanation: Appendix 'C' indicates the scale of authorisation for SHIRT PWPC KHAKI for JD Army Boys is 2.

Q2679. What is the scale of authorisation for 'SHORT PWPC KHAKI' for Army Senior Division (SD) Boys?

- 1 [CORRECT]
- 2
- 3
- 4

Explanation: Appendix 'C' shows that SD Army Boys are authorised 1 SHORT PWPC KHAKI.

Q2680. Which retention item is authorised as '2' for Navy Girls under Senior Wing (SW)?

- SHIRT PWPC NAVY BLUE
- SHORT PWPC WHITE
- SHIRT PWPC WHITE [CORRECT]
- SHORT PWPC NAVY BLUE

Explanation: Appendix 'C' (Navy Girls) shows the scale of authorisation for SHIRT PWPC WHITE for SW is 2.

Q2681. What is the colour of the Beret for cadets listed under common items, excluding Sikhs?

- Khaki
- Navy Blue
- Rifle Green [CORRECT]
- Light Blue Grey

Explanation: Appendix 'C' lists 'BERET RIFLE GREEN' for all cadets less Sikhs under common items.

Q2682. For whom is the 'PAGREE RIFLE GREEN' specifically authorised in the retention items list?

- All Cadets
- Senior Division Only
- Sikhs only [CORRECT]
- Junior Wing Only

Explanation: Appendix 'C' notes that Pagree Rifle Green is 'For Sikhs only'.

Q2683. What is the location of the Kerala & Lakshadweep NCC Directorate?

- Kochi
- Calicut
- Thiruvanthapuram [CORRECT]
- Trivandrum

Explanation: Appendix 'A' states the location for Kerala & Lakshadweep Directorate is Thiruvanthapuram.

Q2684. Which of the following cities is listed as an NCC Group HQ under the Uttaranchal Directorate?

- Dehradun [CORRECT]
- Lucknow
- Varanasi
- Kanpur

Explanation: Appendix 'B' lists Dehradun, Roorkee, and Nainital under the Uttaranchal Directorate.

Q2685. What is the scale of authorisation of 'TROUSER PWPC KHAKI' for Army Senior Wing (SW) Girls?

- 1
- 2 [CORRECT]
- 3
- 0

Explanation: Appendix 'C' for Army Girls shows that SW girls have a scale of 2 for TROUSER PWPC KHAKI.

Q2686. What does the abbreviation 'LBG' stand for in the context of Air Force uniforms in the retention items list?

- Light Blue Green
- Light Blue Grey [CORRECT]
- Line Battle Gear
- Large Brigade Group

Explanation: In military and NCC uniform terminology, LBG stands for Light Blue Grey, used for Air Force shirts, trousers, and shorts.

Q2687. How many Group HQs are listed under the Jammu & Kashmir (J&K;) Directorate?

- 1
- 2 [CORRECT]

- 3
- 4

Explanation: Appendix 'B' lists Jammu and Srinagar under J&K;, making a total of 2 Group HQs.

Q2688. What is the scale of authorization for the 'Coat Combat' for Army SD and JD cadets?

- @ 2% [CORRECT]
- @ 5%
- @ 9%
- @ 10%

Explanation: Appendix 'D' specifies that Coat Combat has an assessed fair life of 168 months and is authorized for Army SD & JD at @ 2%.

Q2689. Which wing(s) are authorized for the 'Water Bottle' at 15% of cadet strength?

- Army wing only
- Navy wing only
- Air wing only
- All wings [CORRECT]

Explanation: Appendix 'D' indicates that the Water Bottle has an assessed fair life of 60 months and is authorized for All wings @ 15% of cadet strength.

Q2690. For which units is the 'Cape water proof' authorized at a scale of 20%?

- Units located in J&K; and NER [CORRECT]
- Units located in Delhi and Punjab
- Units located in Kerala and Karnataka
- Units located in Tamil Nadu and West Bengal

Explanation: Appendix 'D' states that Cape water proof is authorized for Army SD and JD @ 20% for units located in J&K; and NER and @ 5% for the rest.

Q2691. What is the assessed fair life in months for 'Overall combination'?

- 24 months
- 36 months [CORRECT]
- 60 months
- 120 months

Explanation: Appendix 'D' states that Overall combination has an assessed fair life of 36 months for Army SD (Army, Arty, Engrs, Sigs & EME) @ 100%.

Q2692. Which states have an authorization of 25% for 'Jersey P/O Woollen Grey' for SD Air and JD air?

- AP, Bihar, Gujarat, Karnataka
- Delhi, MP, Punjab, Raj and UP [CORRECT]
- J&K; and NER
- Tamil Nadu and West Bengal

Explanation: Appendix 'D' specifies that Jersey P/O Woollen Grey for SD Air and JD air is authorized @ 25% of auth str in Delhi, MP, Punjab, Raj and UP.

Q2693. What percentage of authorization is specified for 'Jersey P/O Woollen Grey' in J&K; and NER?

- 10%
- 25%

- 50%
- 80% [CORRECT]

Explanation: Appendix 'D' states that Jersey P/O Woollen Grey is authorized at @ 80% of auth str for J&K; and NER.

Q2694. In Madhya Pradesh, how many extra marks are added to the final marks of NCC cadets selected for participation in the Republic Day Camp?

- 5 marks
- 10 marks [CORRECT]
- 15 marks
- 20 marks

Explanation: Appendix 'E' under Madhya Pradesh states that 10 marks are being added to final marks to NCC Cadets selected for participation in Republic Day Camp.

Q2695. What percentage of seats are reserved for LLB Courses in Osmania University for Andhra Pradesh NCC certificate holders?

- 1%
- 2%
- 5% [CORRECT]
- 10%

Explanation: Appendix 'E' under Andhra Pradesh specifies that 5% seats are reserved for LLB Courses in Osmania University.

Q2696. What reservation is provided in non-gazetted service in Police, Home guards, Forest and Excise Departments for NCC 'C' Certificate holders in J&K;?

- 5% or one post
- 10% or one post, whichever is higher [CORRECT]
- 15% or two posts
- 20% fixed

Explanation: Appendix 'E' under J&K; states that 10% or one post, whichever is higher, is reserved in non-gazetted service for NCC 'C' Certificate holders.

Q2697. Under NER-Assam state incentives, how many seats are reserved for best NCC cadets for admission in diploma & certificate courses in engineering and technology?

- One seat
- Two seats [CORRECT]
- Three seats
- Four seats

Explanation: Appendix 'E' under NER-Assam states that two seats are reserved for best National Cadet Corps cadets for admission in diploma & certificate courses in engineering and technology.

Q2698. What is the assessed fair life in months for 'Net Mosquito' for the Army wing?

- 36 months
- 60 months [CORRECT]
- 120 months
- 240 months

Explanation: Appendix 'D' lists the assessed fair life in the Army for Net Mosquito as 60 months for the Army wing at 15% of total cadet strength.

Q2699. Which state provides a 5% mark relaxation for admission to educational institutions, including technical institutions under the State Government, along with preference in police recruitment?

- Arunachal Pradesh [CORRECT]
- Nagaland
- Tripura
- Orissa

Explanation: According to the text, Arunachal Pradesh offers recruitment preference in state police and a relaxation of 5% marks for admission to educational institutions.

Q2700. Which state gives preference to NCC 'B' and 'C' certificate holders specifically in the matter of recruitment to the State Police Force?

- Haryana
- Nagaland [CORRECT]
- Punjab
- Rajasthan

Explanation: The text lists Nagaland as providing preference to NCC 'B' and 'C' certificate holders in the recruitment to the State Police Force.

Q2701. What percentage of posts are reserved in Uttar Pradesh for part-time NCC officers and NCC cadets who become disabled during training?

- 5%
- 8% [CORRECT]
- 10%
- 20%

Explanation: The text states that 8% posts are reserved in State Government in UP for part-time NCC officers and NCC cadets who become disabled during the course of training.

Explanation: The inauguration of Devighat Hydro-electric Project in Nepal in 1985 marked a significant milestone in India-Nepal co-operation.

Q2782. Until which date was Myanmar officially known as Burma before being renamed?

- 14 August 1947
- 4 January 1948
- 18 June 1989 [CORRECT]
- 22 May 1972

Explanation: Paragraph 14 states that Myanmar was known as Burma till 18 Jun 1989.

Q2783. What agreement envisaged that the Kashmir problem between India and Pakistan would be solved through bilateral talks?

- Tashkent Agreement
- Shimla Agreement [CORRECT]
- Lahore Declaration
- Delhi Agreement

Explanation: Paragraph 30 explicitly mentions that the Shimla Agreement envisaged that the Kashmir problem will be solved through bilateral talks.

Q2784. Which Indian Peacekeeping force was sent to Sri Lanka under the July 1987 Indo-Sri Lanka agreement?

- IPKF [CORRECT]
- UNEF
- BSF
- ITBP

Explanation: Paragraph 25 states that under the terms of the agreement India sent the Indian Peace Keeping Force (IPKF) to help curb violence.

Q2785. What is the literacy rate of Bhutan as recorded in the provided text facts?

- 12% [CORRECT]
- 26%
- 33%

- 87%

Explanation: Paragraph 10 lists the facts about Bhutan, showing Literacy as 12%.

Q2786. Which militant group's regular camps were set up inside Bhutan before being routed by the Bhutanese Army?

- LTTE and Tamil Tigers
- **Bodo and ULFA [CORRECT]**
- Maoists and Al Qaeda
- Mujahideen and Taliban

Explanation: Paragraph 12 mentions Bhutan was a safe haven for the Bodo and United Liberation Front of Assam (ULFA) militants.

Q2787. Bangladesh emerged as an independent nation in which year?

- 1947
- 1948
- **1971 [CORRECT]**
- 1999

Explanation: Paragraph 18 states that Bangladesh emerged as an independent nation in 1971.

Q2788. Which language is spoken in Bhutan according to the text facts?

- Burmese
- **Ozengkha [CORRECT]**
- Sinhala
- Bangla

Explanation: Paragraph 10 lists 'Ozengkha' as the language of Bhutan.

Q2789. Which rail link between India and Pakistan has further improved relations between the people of both countries?

- Wagha-Attari
- **Munabao-Gadara [CORRECT]**
- Uri-Muzaffarabad
- Lahore-Delhi

Explanation: Paragraph 34 mentions the opening of Wagha and Uri border road links and the Munabao-Gadara rail link.

Q2790. Whose son (Mahendra) and daughter (Sanghamitra) went to Sri Lanka as Buddhist missionaries?

- **Emperor Ashoka [CORRECT]**
- King Kanishka
- Emperor Chandragupta
- Emperor Harsha

Explanation: Paragraph 24 states that Emperor Ashoka's son Mahendra and daughter Sanghamitra went to Sri Lanka as Buddhist missionaries.

Q2791. What are considered the mainstays of Nepal's economy that have been hit due to the Maoist insurgency?

- **Agriculture and tourism [CORRECT]**
- Manufacturing and IT
- Oil and gas

- Mining and fisheries

Explanation: Paragraph 8 states that agriculture and tourism are the mainstays of its economy.

Q2792. According to the Section on youth contribution, what role do youth primarily play regarding national integration?

- Economic exploitation
- **Socially, culturally, and geographically integrating people [CORRECT]**
- Enforcing military conscription strictly
- Managing international trade policies

Explanation: Section 7, Paragraph 2 states that youth have a leading role in bringing together people of different states and religions with a view to integrating them socially, culturally, and geographically.

Q2793. What is the primary role of the youth in a vibrant country as outlined in the text?

- **To act as a catalyst in bringing people together and integrating them emotionally, culturally, and geographically [CORRECT]**
- To exclusively focus on economic modernization and industrial production
- To participate strictly in international diplomacy and foreign policy formulation
- To manage administrative and legislative powers between the center and states

Explanation: The text states that the youth act as a catalyst to help India realize its dreams by bringing people together from different states with diverse religions and integrating them emotionally, culturally, and geographically.

Q2794. According to the text, which Government programme serves as an opportunity for youth to join hands for nation building?

- Digital India Initiative
- **Clean and Green [CORRECT]**
- Skill India Mission
- Swachh Bharat Abhiyan

Explanation: The text explicitly mentions that Government programmes such as 'Clean and Green' provide very good opportunities for youth to join hands with their countrymen and give impetus to nation building.

Q2795. Which of the following organizations is NOT specifically listed in the text as an asset to our nation for channelising young energy?

- NCC
- NSS
- NSVS
- **NYKS [CORRECT]**

Explanation: The text lists National Cadet Corps (NCC), National Social Service (NSS), and National Service Volunteer Scheme (NSVS) as assets to the nation, while NYKS is not mentioned in the text.

Q2796. How is a 'Nation State' roughly defined in the provided text?

- An organized political unit under one dominant regional government
- **A country which has essential elements such as population, territory, sovereignty, and Government [CORRECT]**
- A federal union where states have supreme autonomous legislative power
- A multi-lingual territory with centralized economic planning and localized defense

Explanation: Section 8, paragraph 4 defines a Nation State roughly as a country which has 'essential elements' as population, territory, sovereignty and Government.

Q2797. On which date did the Constituent Assembly adopt the objective resolution to make India an Independent Sovereign Republic?

- 26 January 1950
- 15 August 1947
- **22 January 1947 [CORRECT]**
- 26 November 1949

Explanation: The text states that the Constituent-Assembly, in the objective resolution adopted on 22 Jan 1947, declared the Assembly's firm and solemn resolve to make India an Independent Sovereign Republic.

Q2798. In the Constitution of India, how is India proclaimed rather than as a Federal State?

- A Sovereign Socialist Republic
- **A Union of States [CORRECT]**
- A Centralized Confederation
- An Autonomous Federation

Explanation: The text specifies that in the constitution, India is proclaimed as a 'Union of States' rather than as a Federal State.

Q2799. Which list gives the centre the authority to act in matters of national importance like defence, foreign affairs, and currency?

- The State list
- The Concurrent list
- **The Union list [CORRECT]**
- The Residual list

Explanation: The text states that the Union list gives the centre the authority to act in matters of national importance which include defence, foreign affairs, currency, communication, banking, services, income, taxation, and customs duties.

Q2800. From which legislative act did India inherit its federal structure with autonomous provinces?

- The Government of India Act, 1919
- **The Government of India Act, 1935 [CORRECT]**
- The Indian Independence Act, 1947
- The Regulating Act, 1773

Explanation: The text explicitly states that India has inherited the federal structure from the Government of India Act, 1935.

Q2801. Where are the basic objectives of the nation primarily found within the Indian Constitution?

- The Preamble only
- Fundamental Rights (Articles 12-35)
- **Directive Principles of State Policy (Articles 36-51) [CORRECT]**
- Emergency Provisions (Articles 352-360)

Explanation: The text mentions that the basic objectives are found in the Directive Principles of State Policy enshrined in the Constitution of India, covered by 16 articles from 36-51.

Q2802. Which of the following is specifically included as part of the National Interests required for overall development?

- **Sovereignty, Integrity, Unity, and Security [CORRECT]**
- Industrialization, Urbanization, and Modernization
- Liberty, Equality, Fraternity, and Justice

- Centralized planning, Taxation, and Customs

Explanation: The text lists the pre-requisite national interests as: (a) Sovereignty, (b) Integrity, (c) Unity, and (d) Security.

Q2803. Which Directive Principle of State Policy deals with the legal system, specifically aiming for a uniform code of law?

- Separation of judiciary from the executive
- **To have uniform code of law irrespective of caste, creed, colour or religion [CORRECT]**
- Equal justice to all
- Equal pay for equal work for both men and women

Explanation: The text lists 'To have uniform code of law irrespective of caste, creed, colour or religion' among the important Directive Principles of State Policy.

Q2804. Which of the following matters falls under the State list according to the text?

- Banking and currency
- Foreign affairs and defence
- **Law and order, public health, and local government [CORRECT]**
- Customs duties and income taxation

Explanation: The text states that the State list entrusts matters to the state which include law and order, local government, public health, education, and agriculture and economic and social planning.

Q2805. Which current objective of our nation is listed alongside the modernization of villages and reliable power supply?

- **Self sufficiency in nuclear-power [CORRECT]**
- Complete elimination of the private sector
- Nationalization of all banking institutions
- Universal implementation of cottage industries

Explanation: The current objectives listed at the end of the text include self-sufficiency in nuclear-power, availability of reliable power supply, production of goods for world markets, balancing growth in public and private sectors, and modernization of villages.

Q2806. What is the primary aim of drill in the NCC as stated in the text?

- To prepare cadets for armed combat only
- **To inculcate a sense of discipline, improve bearing, smartness in appearance and turn out, create self-confidence and develop immediate and implicit obedience to orders [CORRECT]**
- To pass physical fitness tests and endurance trials
- To ensure cadets can march long distances without fatigue

Explanation: Section-1, Paragraph 1 explicitly defines the aim of foot drill as inculcating discipline, improving bearing, smartness, self-confidence, and immediate and implicit obedience.

Q2807. What causes indistinct commands according to the text?

- Speaking too loudly or shouting
- **Laziness, tenseness in the muscles of the mouth, or trying to give the command too rapidly [CORRECT]**
- Using the wrong inflection on the executive word
- Poor posture and incorrect breathing technique

Explanation: Paragraph 4 notes that indistinctness may be caused by laziness, by the tenseness in the muscles of the mouth, or by trying to give the command too rapidly.

Q2808. In terms of inflection, how should the preparatory and executive commands be delivered?

- Both must be given in a loud, identical pitch
- **Preparatory command near the natural pitch of the voice, and the executive command in a slightly higher pitch [CORRECT]**
- Preparatory command in a high pitch, and executive command in a low pitch
- Both should start high and fade out gradually

Explanation: Paragraph 5 explains that the preparatory command should start near the natural pitch of the voice and the command of execution should be in a slightly higher pitch.

Q2809. What is 'Snap' in the context of words of command?

- The physical sound of heels snapping together during attention
- **An extra quality in command that demands instantaneous response, expressing confidence, alertness, and decisiveness [CORRECT]**
- The interval of time between the cautionary and executive word
- The sharp intake of breath before speaking

Explanation: Paragraph 6 defines snap as the extra quality in command that demands instantaneous response, expressing confidence, alertness, and decisiveness.

Q2810. What interval should typically be left between the 'Cautionary' and 'Executive' parts of a word of command?

- An interval of about two paces in quick time
- **An interval of about four paces in quick time [CORRECT]**
- An exact interval of one second
- No interval; they must be spoken back-to-back

Explanation: Paragraph 7 states that an interval of about four paces in quick time should be left between the 'Cautionary' and the 'Executive'.

Q2811. When a cautionary word of command is given on the march, when should it ideally start as a guide?

- As the right foot comes to the ground
- **As the left foot comes to the ground [CORRECT]**
- When both feet are off the ground
- During the halt position

Explanation: Paragraph 7 notes that a cautionary word of command given on the march should start as the left foot comes to the ground.

Q2812. What is the angle formed by the feet when standing at attention ('Squad Savdhan')?

- 45 degrees
- **30 degrees [CORRECT]**
- 90 degrees
- 60 degrees

Explanation: Section 2, Paragraph 1(a) specifies that heels are together and in line, with feet turned out equally forming an angle of 30 degrees.

Q2813. In the position of Attention ('Squad Savdhan'), where should the thumbs be positioned?

- Interlocked behind the back
- Tucked into the belt loops
- **Immediately behind the seams of the trouser, thumbs straight to the front [CORRECT]**
- Pointing downward along the thighs with palms facing inward

Explanation: Paragraph 1(b) states that arms hang straight down so that thumbs are immediately behind the seams of the trouser, hands closed, and thumbs straight to the front.

Q2814. When assuming the position of 'Savdhan' from a rest position, how far is the left foot lifted from the ground?

- 3 inches
- **6 inches [CORRECT]**
- 12 inches
- 18 inches

Explanation: Paragraph 1(e) specifies bringing heels together by lifting the left foot six inches from the ground and placing it flat and very firm beside the right.

Q2815. What is the prescribed movement for 'Vishram' (Stand at Ease)?

- Carry left foot 12 inches to the left, taking hands behind the back with the right hand over the left and thumbs interlocked [CORRECT]
- Carry right foot 12 inches to the right with hands remaining at the sides
- Take one pace forward with the left foot and cross arms over the chest
- Spread feet shoulder-width apart and place hands on hips

Explanation: Paragraph 2 details that 'Vishram' requires carrying the left foot 12 inches to the left while taking both hands behind the back through the shortest route, right hand over left with open palms facing outwards and thumbs interlocked.

Q2816. During 'Aram Se' (Stand Easy), which of the following activities is NOT permitted?

- Relaxing the limbs, body, and head without moving feet
- Assuming the stand-at-ease position upon the cautionary command 'Squad'
- **Talking, turning the head, slouching, and using a handkerchief [CORRECT]**
- Maintaining posture quietly without moving feet

Explanation: Paragraph 3 states that talking, turning the head, slouching, and using a handkerchief is not permitted during 'Aram Se'.

Q2817. How do you transition out of 'Aram Se' (Stand Easy) when the cautionary command 'Squad' is given?

- By marching forward immediately
- **By assuming the correct position of stand-at-ease by an upward snappy jerk of the body [CORRECT]**
- By snapping the heels together into Savdhan
- By dropping the arms to the sides

Explanation: Paragraph 3 specifies: 'On the cautionary word of command "Squad", assume correct position of stand-at-ease by an upward snappy jerk of the body.'

Q2818. According to the text, what should be carefully avoided when bringing the heels together in the Savdhan position?

- **Stamping of the foot [CORRECT]**
- Bending the knees
- Looking downward
- Swinging the arms

Explanation: Paragraph 1(e) and 1(g) both explicitly warn to avoid stamping of the foot and emphasize that 'place the foot flat and firm on the ground' must not be mistaken for stamping.

Q2819. During dressing (Sajna) with a rifle, which arm does the front rank raise instead of the right arm?

- Right arm
- **Left arm [CORRECT]**
- Both arms
- None of the arms

Explanation: According to Section-2, in dressing, the front rank raises the left arm instead of the right arm.

Q2820. In 'Uthao Shastr (r) –ek' (Take up arms one), what is the first movement performed by the cadet?

- Stand at ease immediately
- **Bend down as in the first movement of the ground arms [CORRECT]**
- Lift the rifle directly with the left hand
- Bring the rifle to the shoulder position

Explanation: According to Section-4, 'Uthao Shastr (r) –ek' requires the cadet to bend down as in the first movement of the ground arms and seize the rifle.

Q2821. What is the Hindustani command term used for Shoulder Arms in the provided text?

- Salami Shastr
- Bhumi Shastr
- **Bagal Shast [CORRECT]**
- Tol Shastr

Explanation: Section-5 explicitly lists Shoulder Arms as '(Bagal Shast)'.

Q2822. During 'Bagal Shast (r) – ek' (Shoulder arms one), where does the left hand seize the rifle?

- **In line with the waist belt on the hand guard [CORRECT]**
- At the point of balance
- Below the bayonet stand
- At the small of the butt

Explanation: According to Section-5, the left arm comes across the body to seize the rifle in line with the waist belt on the hand guard.

Q2823. In 'Bazu Shast (r) –ek' (Order arms one), where does the left hand hold the barrel?

- Above the front sight
- **Below the bayonet stand [CORRECT]**
- At the muzzle tip
- Behind the back sight

Explanation: According to Section-5, order arms one requires holding the barrel below the bayonet stand with the left hand.

Q2824. During 'Salami Shastr (r) –ek' (Present arms), where is the left hand positioned after throwing the rifle upwards?

- **At the point of balance [CORRECT]**
- At the small of the butt
- On the hand guard near the waist belt
- At the pistol grip

Explanation: According to Section-6, on 'Salami Shastr (r) –ek', the cadet catches the rifle with the left hand at the point of balance.

Q2825. On 'Squad Teen' of Present Arms, where does the right hand hit?

- The pistol grip
- **The magazine [CORRECT]**
- The hand guard
- The butt plate

Explanation: According to Section-6, on 'Squad Teen' of Present Arms, the right hand is used to hit the magazine.

Q2826. When executing 'Baju shastr-ek' from the Present, what is done with the right foot?

- Moved three inches forward
- **Lift the right foot and place it with the left foot as in attention position [CORRECT]**
- Stomped on the ground to mark time
- Rotated outward at a 45-degree angle

Explanation: According to Section-6, on 'Baju shastr-ek' from the present, hold the pistol grip with the right hand and simultaneously lift the right foot and place it with the left foot as in attention position.

Q2827. During the salute with the rifle at the halt, how is the left hand applied to the hand guard?

- With the back of the hand facing the rear
- **Strike the hand guard with the palm so that the knuckle of the thumb is parallel to the outer edge [CORRECT]**
- Grab the hand guard with fingers wrapped completely underneath
- Place the fingertips only on top of the barrel

Explanation: According to Section-7, the left hand strikes the hand guard with the palm so that the knuckle of the thumb is parallel to the outer edge of the hand guard.

Q2828. When saluting on the march with a rifle, on which pace is the salute given?

- The first pace before reaching the officer
- The second pace before reaching the officer
- **The third pace before reaching the officer [CORRECT]**
- Immediately upon locking eyes with the officer

Explanation: According to Section-7, the salute will be given on the third pace before reaching the officer.

Q2829. How high is the butt of the rifle raised from the ground during a short trail?

- About half an inch
- **About one inch [CORRECT]**
- About three inches
- About six inches

Explanation: According to Section-8, short trail involves slightly bending the right arm to raise the butt of the rifle about one inch from the ground.

Q2830. During 'Tol shastr(r)' (Trail arms), how is the rifle positioned?

- Vertical, with muzzle pointing straight up
- **Horizontal, with muzzle pointing to the front and magazine underneath [CORRECT]**
- Slanted across the chest at a 45-degree angle
- Against the right shoulder with the butt resting on the foot

Explanation: According to Section-8, on 'Tol shastr(r)', with the flick of the wrist throw the nozzle forward and downwards, catching the rifle at the point of balance, arm straight so that the rifle is horizontal, muzzle pointing to the front and magazine underneath.

Q2831. During 'Examine Arms' (Janch Shastr), how far to the left front should the front of the left foot be placed while bending the left knee?

- About 10 inches
- About 12 inches
- **About 16 inches [CORRECT]**
- About 20 inches

Explanation: The text specifies: 'Bend the left knee, placing the front of the foot on the ground about 16 inches to the left front and force the muzzle downwards...'

Q2832. To which dignitaries is the National Salute (Rashtriya Salute) given according to NCC ceremonial drill procedures?

- Major General and above
- **The President of India and the Governors of the various states within their own jurisdiction [CORRECT]**
- Defense Minister and Chief of Army Staff only
- All VIPs visiting NCC units

Explanation: Section-10 Ceremonial Drill states that Nationals salute is given to the President of India and the Governors of the various states within their own jurisdiction.

Q2833. A General Salute is given to dignitaries of which rank and above?

- Brigadier and above
- **Major General and above [CORRECT]**
- Lieutenant General and above
- Colonel and above

Explanation: Section-10, paragraph 2(b) states that General salute is given to dignitaries of the rank of Major General and above.

Q2834. During a ceremonial parade march past, at how many paces from the saluting base does each company commander give the command 'Company Dahine Dekh'?

- 3 paces
- 4 paces
- 5 paces
- **6 paces [CORRECT]**

Explanation: Section-10 paragraph 3(g) specifies: 'At the first flag (6 paces of the saluting base) each company commander will give the following words of command, 'Company Dahine Dekh'.'

Q2835. When a parade advances in review order, after what number of paces does the parade automatically halt?

- 10 paces
- 12 paces
- **15 paces [CORRECT]**
- 20 paces

Explanation: Section-10 paragraph 3(k) states: 'The parade will automatically halt after taking 15 paces.'

Q2836. What is the standard personnel requirement for guard practice turning out by the guard mounting NCO on the previous evening?

- 1 + 5
- **2 + 6 [CORRECT]**
- 3 + 7

- 2 + 8

Explanation: Section-11 paragraph 1 notes: 'Personnel detailed will be turned out by guard mounting NCO on the previous evening for guard practice, (requirement 2+6).'

Q2837. Where does the Guard Mounting NCO position himself relative to the guard during guard inspection?

- 6 paces away
- 10 paces away
- 12 paces away [CORRECT]
- 15 paces away

Explanation: Section-11 paragraph 2 states: 'The Guard mounting NCO will be twelve paces away from the guard.'

Q2838. During guard mounting, where does the Orderly Officer position himself relative to the Guard Mounting NCO?

- 3 paces behind
- 4 paces behind
- 5 paces behind
- 6 paces behind [CORRECT]

Explanation: Section-11 paragraph 2(e) mentions: '...the ordely officer (who would have taken position 6 paces behind the guard mounting NCO).'

Q2839. In the Order arms movement from Examine Arms ('Bazu Shast(r)-ek'), during Squad Two, where does the left hand strike the rifle?

- Just above the noscap [CORRECT]
- At the center of the stock
- Below the sling swivel
- At the butt plate

Explanation: Section-9 paragraph 2 (Squad Do) states: 'Pull the rifle down to the right side striking it with the left hand just below the noscap...'

Q2840. When the new guard approaches the guard room, how far in front of the new guard does the old guard commander 'fall in' his guard?

- 10 paces
- 12 paces
- 15 paces [CORRECT]
- 20 paces

Explanation: Section-11 paragraph 4 states: 'The old guard commander will 'fall in' his guard fifteen paces in front of the new guard.'

Q2841. During the transfer of a sentry's post, what movement does the old sentry make upon the command 'Sentries Badli Karo'?

- Takes two steps to the front [CORRECT]
- Takes two steps to the right
- Takes one step back
- Turns about immediately

Explanation: Section-11 paragraph 5 states: 'The old sentry will take two steps to the front and the new sentry two steps to his right.'

Q2842. Which specific command is given by the Orderly Officer to check the functioning of the bolt after inspection of arms?

- Guard - Khali karo
- **Guard - Bolt Chalao [CORRECT]**
- Guard - Action kar
- Guard - Safai Shastr

Explanation: Section-11 paragraph 3(c) lists the command as: 'Guard-Bolt Chalao. Guard will Ease spring and close the bolt.'

Q2843. In guard formation, where is the Assistant Guard Commander positioned relative to the front rank?

- On the right of the front rank
- **On the left of the front rank [CORRECT]**
- Centrally behind the rear rank
- Twelve paces ahead

Explanation: Section-11 paragraph 1 states: 'The Guard commander will be on the right and assistant guard commander on the left of the front rank.'

Q2844. What action is taken by the Guard Commander when the Orderly Officer moves from inspecting the first person to the second during 'Guard Nirikshan Ke lie Janch Shastr'?

- He stands at ease
- **He falls out and accompanies the orderly officer [CORRECT]**
- He leaves the parade ground
- He orders 'Guard - Bagal Shast'

Explanation: Section-11 paragraph 3(b) states: 'After he completes the first person and moves to the second, the guard commander will fall out and accompany the orderly officer.'

Q2845. Whose prior concurrence is required to provide a guard of honour to specially invited guests of honour at NCC functions or camp visits?

- Director General NCC
- The Defence Secretary
- **The Dy DG National Cadet Corps of the States concerned [CORRECT]**
- The Chief of Army Staff

Explanation: According to Section-12 paragraph 1, guards of honour to specially invited guests of honour require prior concurrence of the Dy DG National Cadet Corps of the States concerned.

Q2846. What is the distance between the front and rear ranks when a Guard of Honour is formed up?

- 2 paces
- **4 paces [CORRECT]**
- 7 paces
- 8 paces

Explanation: Section-12 paragraph 3(a) states that the guard will form up in two ranks with a distance of 4 paces between the front and the rear ranks.

Q2847. What is the specific distance maintained between individual cadets in the Guard of Honour formation?

- 18 inches
- **24 inches [CORRECT]**
- 30 inches
- 36 inches

Explanation: According to Section-12 paragraph 3(a), the distance between cadets in the formation will be 24 inches.

Q2848. What is the strength (number of rank and file) of the Guard of Honour provided for the President of India?

- 100 rank and file
- **150 rank and file [CORRECT]**
- 200 rank and file
- 50 rank and file

Explanation: Section-12 paragraph 4(a) states the strength is 150 rank and file for the President, formed up in 3 equal divisions.

Q2849. How many rank and file constitute the Guard of Honour for the Prime Minister?

- 50 rank and file
- **100 rank and file [CORRECT]**
- 150 rank and file
- 75 rank and file

Explanation: Section-12 paragraph 4(b) notes that the strength for the Vice President and Prime Minister is 100 rank and file.

Q2850. Which compliment is given specifically to the President and Governors within their own states?

- General Salute
- Salami Shastr
- **Rashtriya Salute [CORRECT]**
- Guard Salute

Explanation: Section-12 paragraph 5(a) dictates that Rashtriya Salute is given to the President and Governors within their own states.

Q2851. What is the exact Hindi report given by the Guard Commander to the VIP during inspection?

- Guard Samman ke Lie Hazir Hai
- **Guard (Name of Unit) Samman Guard Nirikshan ke Lie Hazir Hai Sriman (Srimati Ji) [CORRECT]**
- Samman Guard Prastut Hai Sriman
- Nirikshan Hetu Guard Hazir Hai

Explanation: Section-12 paragraph 6(a) prescribes the exact Hindi report wording for the Guard Commander.

Q2852. During the inspection of the Guard of Honour, which rank(s) of the Guard will be inspected by the VIP?

- Both front and rear ranks
- **Only the front rank [CORRECT]**
- All three divisions
- Only the officers and JCO

Explanation: Section-12 paragraph 6(g) clearly states that only the front rank of the Guard will be inspected.

Q2853. In the context of the Guard of Honour inspection, when are AsDC permitted to march in front of the VIP?

- Always during every inspection
- Only for the Prime Minister and Vice President
- **Only in the case of the President of India [CORRECT]**

- Never

Explanation: Section-12 paragraph 6(c) mentions that AsDC will not march in front of the VIP except in the case of the President of India.

Q2854. What action does the band take during the inspection of the band itself by the VIP?

- They turn their heads and eyes towards the VIP
- They salute the VIP with instruments
- **They look straight to the front without turning heads/eyes [CORRECT]**
- They play a special welcome tune

Explanation: Section-12 paragraph 6(d) specifies that the band will not turn their heads and eyes toward the VIP during the inspection of the band but look straight to the front.

Q2855. When is the Guard of Honour permitted to 'Stand Easy' (Aarams Se) or march off after the inspection and event?

- Immediately after the VIP boards their vehicle
- As soon as the VIP starts walking away
- **Till the VIP for whom it is mounted has left the place of the guard [CORRECT]**
- When the Guard Commander gives the final dismiss order after the VIP's speech

Explanation: Section-12 paragraph 7 states the Guard will not march off or 'Stand Easy' till the VIP for whom it is mounted has left the place of the Guard.

Q2856. According to the Weapon Training index, which category of cadets is mandated to study 'Aiming I - Range and Targets' (Section-4)?

- **JD/JW only [CORRECT]**
- SD/SW only
- Both JD/JW and SD/SW
- Not applicable to any division

Explanation: The Weapon Training index chart indicates a checkmark (✓) for JD/JW and a dash (-) for SD/SW under Section-4 Aiming I - Range and Targets.

Q2857. Which weapon characteristics are specifically covered under Section-10 of Chapter-IV Weapon Training for SD/SW cadets?

- .22 Rifle and Air Rifle
- **7.62 mm SLR and 5.56 mm INSAS [CORRECT]**
- LMG and 7.62 mm Carbine
- Anti-tank rifle and Grenade launcher

Explanation: The Weapon Training index lists 'Characteristics of 7.62 mm SLR and 5.56 mm INSAS' under Section-10 for SD/SW.

Q2858. According to Chapter-IV Weapon Training Index, are Senior Division/Senior Wing (SD/SW) cadets required to study Section-7 'Aiming II - Alteration of Sight'?

- No, it is only for Junior Division
- **Yes, it is applicable to SD/SW [CORRECT]**
- It is optional for all wings
- It is only taught during Republic Day camps

Explanation: The Weapon Training index shows a checkmark (✓) for SD/SW and a dash (-) for JD/JW under Section-7 Aiming II - Alteration of Sight.

Q2859. What is the length of the Rifle .22 No II MK IV?

- 43"
- **45" [CORRECT]**
- 46"
- 40"

Explanation: According to the characteristics table in Section-1, the length of Rifle .22 No II MK IV is 45 inches.

Q2860. What is the magazine capacity of the Rifle .22 Deluxe BA?

- 10 Rounds
- **05 Rounds [CORRECT]**
- 20 Rounds
- 03 Rounds

Explanation: The characteristics table specifies that the Rifle .22 Deluxe BA has a magazine capacity of 05 Rounds.

Q2861. When assembling the bolt of a Deluxe .22 rifle, which components must be kept in a line?

- Trigger, sear, and safety catch
- **Bolt head and guide rib as well as cocking piece and steel lug [CORRECT]**
- Magazine catch and restraining catch
- Pull through and oil bottle

Explanation: Paragraph 7(b) of Section-1 explicitly states that the bolt head and guide rib as well as cocking piece and steel lug must be in a line.

Q2862. What is the purpose of the loop nearest to the weight on a pull through used for rifle cleaning?

- For cleaning the barrel with flannelette
- **For the gauze [CORRECT]**
- For oiling the barrel
- For use of the armourer

Explanation: Section-1 care and cleaning instructions state that the pull through has three loops, and the one nearest the weight is for the gauze.

Q2863. Which loop of the pull through is used for oiling the barrel and for use of the armourer?

- The centre loop
- The loop nearest the weight
- **The end one [CORRECT]**
- The secondary loop

Explanation: According to Section-1, the end loop of the pull through is for oiling the barrel and for use of the armourer.

Q2864. Is a charger provided for the Deluxe .22 rifle?

- Yes, a standard 5-round charger
- Yes, a standard 10-round charger
- **No charger is provided [CORRECT]**
- Yes, provided upon special request

Explanation: Section-2, paragraph 2 explicitly states that no charger is provided for the Deluxe rifle.

Q2865. What is considered the most comfortable position from which to fire a rifle?

- Standing position
- Kneeling position
- **Lying position [CORRECT]**
- Sitting position

Explanation: Section-3, paragraph 5 states that the lying position is the most comfortable position from which to fire.

Q2866. In the lying position, how should the firer's legs and body be positioned for a stable hold?

- Legs closed together and body straight
- **Legs opened wide apart and body slanting to the left from the line of the target [CORRECT]**
- Legs crossed and body facing directly square
- Legs extended backwards with feet together

Explanation: Section-3, paragraph 6(a) specifies that the legs should be opened wide apart and the body slanting to the left from the line of the target.

Q2867. What forms the horizontal triangle in the lying firing position?

- The two feet and the left elbow
- **The three points where the chest leaves the ground, the left elbow, and the right elbow [CORRECT]**
- The chin, left shoulder, and right shoulder
- The right hip, left knee, and right elbow

Explanation: Section-3, paragraph 6(b)(i) defines the horizontal triangle as formed by the three points where the chest leaves the ground, the left elbow, and the right elbow.

Q2868. How is sight setting adjusted on the .22 rifle according to Section-1?

- By turning the elevation screw clockwise
- By pressing the thumb spring with range increasing towards the muzzle side
- By sliding the rear sight leaf backward
- By locking the micrometer nut

Explanation: Section-1, paragraph 9 states to set the sight by pressing the thumb spring, with the range increasing towards the muzzle side.

Q2869. Where should the butt plate be properly bedded into the shoulder to avoid a sore shoulder and flinching?

- In the hollow of the shoulder
- **On the interior pad of the shoulder muscle joint [CORRECT]**
- Directly on the collarbone
- Against the top of the shoulder muscle

Explanation: The text explicitly states that the butt plate should meet the shoulder on the interior pad of the shoulder muscle joint and not in the 'hollow' of it.

Q2870. What is the primary function of the left hand during rifle holding?

- Pulling the rifle firmly into the shoulder
- Operating the safety catch
- **Acting as support to the forward part of the rifle to steady it [CORRECT]**
- Adjusting the backsight elevation

Explanation: The text specifies that the left hand acts as a support to the forward part of the rifle thereby helping to steady the rifle into the shoulder, and must never pull the rifle into the shoulder.

Q2871. Normally, what range is used for Deluxe .22 rifle shooting practice?

- 10 yds
- **25 yds [CORRECT]**
- 50 yds
- 100 yds

Explanation: Section 4 on Aiming states that normally a 25 yds range is used for Deluxe .22 rifle.

Q2872. What target type is generally used by girl cadets for rapid firing?

- 1' x 1' target with a white patch
- 1' x 1' target
- **6 inches figure target [CORRECT]**
- Circular bullseye target of 12 inches

Explanation: Section 4 targets section notes that for rapid firing, a 6 inches figure target is used and the aim is taken at the centre of the figure.

Q2873. Why is elevation given to a rifle during aiming?

- To counteract wind drift
- **To counter the force of gravity while the bullet is in flight [CORRECT]**
- To adjust for the firer's eye fatigue
- To compensate for barrel vibration

Explanation: Section 4 states that elevation is given to counter the force of gravity, while the bullet is in flight, and depends upon the range of the target.

Q2874. In Trigger Operation Exercise No. 1, what specific instruction is given regarding apparel?

- Wear tight-fitting gloves
- **Avoid wearing wrist watches [CORRECT]**
- Roll up sleeves past the elbow
- Wear long sleeves to cover the wrist

Explanation: Trigger Operation Ex No 1 method instructs to avoid wearing wrist watches during the exercise.

Q2875. What is the specific object of Trigger Operation Exercise No. 2?

- To practice independent action of the index finger
- **To practice further muscular control of the hand [CORRECT]**
- To introduce an element of holding
- To test eye-brain-finger coordination

Explanation: The text states that the object of Trigger Operation Ex No 2 is to practice further muscular control of the hand.

Q2876. What must be removed when practicing Trigger Exercise No. 5?

- The sling
- The rifle bolt
- **Magazines [CORRECT]**
- The backsight sliding scale

Explanation: The text for Exercise No. 5 explicitly states: 'Magazines must be removed to practice this exercise.'

Q2877. From the time correct holding is achieved, what is the maximum recommended time that should be taken to fire a shot?

- More than 2 seconds
- **More than 5 seconds [CORRECT]**
- Exactly 10 seconds
- Up to 15 seconds

Explanation: Under 'Turning the Shot', the text warns that more than five seconds should not be taken to fire a shot, as dwelling on the aim causes fatigue.

Q2878. When should breathing be gently restrained during the sequence of firing a shot?

- Long before taking any aim
- **Just before taking an aim [CORRECT]**
- Immediately after the bullet leaves the barrel
- Only when the second pressure is taken

Explanation: Under sequence of firing a shot, point 16 states: 'Just before taking an aim, breathing must be gently restrained.'

Q2879. How long should the hold and aim be maintained after firing (Follow Through)?

- Until the recoil subsides completely
- **Until the bullet has left the barrel (or better, until it reaches the target) [CORRECT]**
- For at least 10 seconds
- Until the target is lowered

Explanation: The follow-through section states that the hold and aim must be maintained until the bullet has left the barrel, or better still, until the bullet has reached the target.

Q2880. In the alignment of sights during aiming, where must the tip of the foresight be placed?

- At the very top edge of the U-notch
- **In the centre and in level with the shoulder of the U [CORRECT]**
- Below the bottom of the black sight U
- Touching the left edge of the U-notch

Explanation: Section 4 Aiming states that the tip of the foresight must be aligned in the centre and in level with the shoulder of the U.

Q2881. What target is used specifically for grouping practice by girl cadets?

- 6 inches figure target
- **1' x 1' target with a white patch in the centre of the bull [CORRECT]**
- Plain 2' x 2' white target
- Ringed target without any bullseye

Explanation: Section 4 targets section specifies that for grouping, 1' x 1' target with a white patch in the centre of the bull is used.

Q2882. What action should a firer take immediately upon 'correct aim' during the firing sequence?

- Take a deep breath and hold it
- **Take the second pressure and fire the shot [CORRECT]**
- Release the first pressure and reset the trigger
- Check the backsight elevation setting

Explanation: Under sequence of firing a shot (Point 17), it states: 'Immediately on "correct aim" the second pressure will be taken and shot fired.'

■ Category: NCC SYLLABUS - CIVIL DEFENCE

Q2883. What are the standard dimensions specified for protective trenches during an air attack?

- 6' to 8' long, 1' to 1 ½' wide, and 3' to 4' deep
- **8' to 10' long, 2' to 2 ½' wide, and 4' to 6' deep [CORRECT]**
- 10' to 12' long, 3' wide, and 6' to 8' deep
- 5' to 7' long, 2' wide, and 3' deep

Explanation: According to the text, trenches should be 8' to 10' long, 2' to 2 ½' wide, and 4' to 6' deep, dug in a zig-zag manner.

Q2884. At what angle are the zig-zag units of a protective trench required to be dug?

- 45 degrees to 60 degrees
- 60 degrees to 75 degrees
- **80 degrees to 100 degrees [CORRECT]**
- 120 degrees to 135 degrees

Explanation: The text states that trenches are dug in a zig-zag manner with an angle of 80 degrees to 100 degrees between each leg.

Q2885. What is the prescribed action when taking cover in the open during an air attack?

- Lie flat on your back with hands over your face
- Stand upright against a tall tree
- **Lie on the ground face downward resting on elbows with hands clasped behind the head, and a rolled handkerchief in teeth [CORRECT]**
- Crouch in a ball with knees touching your chest and hands covering your ears

Explanation: The text details that in the open, one should lie on the ground face downward resting on elbows with hands clasped behind the head so the chest is not in contact with the ground, and put a rolled handkerchief in between teeth.

Q2886. What specific instructions are given for individuals inside a vehicle during an air attack?

- Drive away from the target area at top speed
- **Park the vehicle in a side lane leaving the ignition key in its place and take cover in the open [CORRECT]**
- Stay inside with windows rolled up tightly
- Lock the doors and hide underneath the dashboard

Explanation: The text specifies to park the vehicle in a side lane leaving the ignition key in its place and take cover in the open.

Q2887. What is the recommended safe action if you are inside a cinema during an air attack?

- Evacuate immediately through the emergency exits
- Crouch under the seating rows
- **Remain seated on your seats [CORRECT]**
- Move to the central lobby area

Explanation: According to the text regarding enemy air attacks in a cinema, individuals should remain seated on their seats.

Q2888. What radius of area around vital installations like Ammunition Factories and Aerodromes should be kept free from habitation under the dispersion method?

- 100 to 300 yards
- 300 to 500 yards

- 500 to 1000 yards [CORRECT]
- 1000 to 1500 yards

Explanation: The text states that no habitation should be allowed within a radius of 500 to 1000 yards of Ammunition Factories, Aerodromes, and similar targets.

Q2889. What is the minimum recommended width for a sandbag wall used as an anti-splinter baffle wall?

- 13-1/2 inches
- 20 inches
- 30 inches [CORRECT]
- 36 inches

Explanation: The text specifies that the width of brick walls should not be less than 13-1/2" and that of sandbag walls should be 30" to give standard protection.

Q2890. What anti-splinter measure can be applied to glass windows where removal is not possible?

- Fixing 1/2" wire netting or plywood screen very close to the glass [CORRECT]
- Painting the glass with black oil paint only
- Sticking heavy metal plates across the frame
- Taping a thick woolen blanket over the window frame

Explanation: The text states that where glass removal is not possible, anti-splinter measures include fixing 1/2" wire netting or plywood screen very close to the glass, or pasting fabric/paper with adhesive.

Q2891. What is the total personnel composition of a standard NCC/Civil Defence Rescue Party?

- 6 persons
- 8 persons [CORRECT]
- 10 persons
- 12 persons

Explanation: The text clearly states under Composition that a Rescue Party will consist of eight persons.

Q2892. Which specific personnel roles make up the 8-member Rescue Party?

- 1 leader, 6 rescuers, and 1 driver-cum-store-keeper [CORRECT]
- 2 leaders, 5 rescuers, and 1 paramedic
- 1 commander, 5 firefighters, and 2 drivers
- 1 leader, 4 rescuers, 2 medics, and 1 driver

Explanation: The text specifies that the Rescue Party includes a leader, six rescuers, and one driver-em-store-keeper.

Q2893. Where are Rescue Parties physically located during peacetime/readiness states?

- At local police stations
- At military cantonment gates
- At the Civil Defence Depots [CORRECT]
- At municipal corporation headquarters

Explanation: The text notes under Location that they are located at the Civil Defence Depots.

Q2894. Upon arriving at the disaster site, to whom does the Rescue Party Leader report first to collect information regarding trapped casualties?

- The Incident Commander
- The Warden [CORRECT]

- The Local Police Inspector
- The Civil Defence Director

Explanation: The text states: 'On arrival at the site, the Rescue Party Leader reports to the Warden and collects necessary information regarding the number and the whereabouts of the casualties trapped.'

Q2895. Which of the following is classified in the text as an emergency rescue method suitable for ONE rescuer?

- Two handed seat
- Fore and Aft method
- Fireman's lift [CORRECT]
- Blanket lift

Explanation: The text categorizes 'Human Crutch, Pick-a-back (reverse), Fireman's lift, Rescue crawl, Removal downstairs, Bowline drag and Toe drag' as methods suitable for one rescuer.

Q2896. Which of the following is listed as an emergency rescue method suitable for MORE THAN ONE rescuer?

- Bowline drag
- Toe drag
- Three handed seat [CORRECT]
- Rescue crawl

Explanation: The text lists 'Two handed seat, Three handed seat, Fourhanded seat, Fore and Aft method, Two-man Human Crutch, Clothes lift, Blanket lift' under methods suitable for more than one rescuer.

Q2897. What materials can be converted into improvised stretchers when standard stretchers are unavailable?

- Corrugated iron sheets and ropes
- Blankets, sheets, or rugs salvaged from the site using small poles or broom handles [CORRECT]
- Wooden doors detached from hinges
- Heavy duty canvas tents with steel tent poles

Explanation: The text mentions under Improvised Stretcher that 'Blankets, sheets or rugs salvaged from the site can be converted into improvised stretchers by using small poles, broom handles etc.'

■ Category: NCC SYLLABUS / ANATOMY

Q2898. Condylar joints are found in which of the following locations?

- Elbow and Knee
- Head, Neck, Wrist, Fingers, Toes [CORRECT]
- Fore-arm only
- Foot and Hand

Explanation: The joint classification table states Condylar joints are located at the Head, Neck, Wrist, Fingers, and Toes.

■ Category: NCC SYLLABUS R

Q2899. When treating an uncomplicated fracture of the ribs, how should the movement of the chest on the fracture side be restricted?

- With a Barrel Bandage tied tightly around the neck

- With broad-fold bandage, one above and one below the fracture side, half overlapping each other [CORRECT]
- Using a Thomas splint applied directly to the chest wall
- By securing the limb firmly to the chest using a cuff sling

Explanation: Paragraph 9(a) specifies restricting chest movement with broad-fold bandage, one above and one below the fracture side, half overlapping each other.

■ Category: NCC SYLLABUSF

Q2900. During Turning by numbers, left turn, on which count/step does the cadet shoot the left foot forward 15 inches?

- Squad One
- Squad Two
- Squad Three [CORRECT]
- Squad Four

Explanation: Section 6, Paragraph 3 states: "Squad Teen' (Squad three). Straighten the right knee towards new direction. As the foot comes to the ground, shoot the left foot forward 15 inches...'

■ Category: NCC YOGA

Q2901. Who is recognized in the text as the founder and father of yoga?

- Sage Patanjali [CORRECT]
- Sage Vashistha
- Swami Vivekananda
- Maharishi Mahesh

Explanation: The text explicitly states: 'Sage Patanjali was founder and father of yoga.'

Q2902. How many folds or parts comprise the Ashtanga (eight-fold path) of Patanjali's yoga?

- Five folds
- Six folds
- Seven folds
- Eight folds [CORRECT]

Explanation: The text mentions 'Yoga of Patanjali is Ashtanga or has eight fold path', listing Yama, Niyama, Asana, Pranayama, Pratyahara, Dharma, Dhyana, and Samadhi.

Q2903. Which asana is specifically described in the text as useful for Jaap, Dhyana, and Samadhi, and helps cure asthma, hysteria, and insomnia?

- Siddhasana
- Padmasana [CORRECT]
- Trikonasana
- Ardha Chandrasana

Explanation: The text notes under Padmasana that 'This asan is useful for Jaap, Dhyana and Samadhi. This asan also helps in curing diseases like asthma, hysteria and insomnia.'

Q2904. What is stated as the main function of Siddhasana?

- To improve flexibility of the spine
- To awaken the power of kundalini [CORRECT]
- To cure respiratory disorders

- To improve cardiovascular health

Explanation: The text notes under Siddhasana: 'The main function of this asana is to awaken the power of kundalini.'

Q2905. How should the fingers be positioned during the practice of Gyan Mudra after bending the index fingers?

- Spread all five fingers apart straight
- Make a tight fist over the thumbs
- **Spread the remaining three fingers forward, all joined together [CORRECT]**
- Interlock all fingers together across the chest

Explanation: The text specifies for Gyan Mudra: 'Bend your index finger and place them at the root of your thumbs. Spread the remaining three fingers forward, all joined together.'

Q2906. What is the recommended distance between the feet when starting Trikonasana?

- 30 - 45 cm
- 50 - 60 cm
- **60 - 75 cm [CORRECT]**
- 90 - 100 cm

Explanation: The text for Trikonasana directs: 'Stand erect keeping the distance between the feet 60 - 75 cm.'

Q2907. What are the prescribed timing and repetitions for Trikonasana as mentioned in the text?

- 1-2 minutes, 1-2 times
- **3 - 6 sec, 4 - 6 times [CORRECT]**
- 10 - 15 sec, 2 - 3 times
- 30 sec, 1 time

Explanation: The text explicitly gives the timings for Trikonasana as 'Timings 3 - 6 sec. 4 - 6 times.'

Q2908. How many total positions/stages comprise the combined sequence of Suryanamaskara?

- 8 positions
- 10 positions
- **12 positions [CORRECT]**
- 16 positions

Explanation: The text states: 'Suryanamaskara is a combined sequence of 12 positions.'

Q2909. During Stage 5 of Suryanamaskara, the body is pulled up to resemble which letter or shape?

- **Inverted 'V' [CORRECT]**
- Capital 'T'
- Straight line 'I'
- Arch shape 'U'

Explanation: The text for Stage 5 of Suryanamaskara states: 'pull your body up in such a way that it looks like inverted 'V'.'

Q2910. In Stage 6 of Suryanamaskara, which body parts touch the ground while the hips remain slightly raised?

- Hands, knees, and toes
- **Forehead, chest, and knees [CORRECT]**
- Stomach, chin, and palms

- Toes, chest, and palms

Explanation: The text for Stage 6 states: 'Bend down your body in such a way that your forehead, chest and knees should touch the ground except your hips which should be slightly raised from the ground.'
